    REPAIRS TO THE COMPONENT LEVEL; OPERATES EQUIPMENT AND COMPLETES
    PREVENTIVE MAINTENANCE PROCEDURES.

    ACE CREDIT RECOMMENDATION FOR 29V10: IN THE LOWER-DIVISION
    BACCALAUREATE/ASSOCIATE DEGREE CATEGORY, 3 SEMESTER HOURS IN BASIC
    ELECTRONICS LABORATORY, 2 IN DIGITAL PRINCIPLES, AND 3 IN ELECTRONIC
    SYSTEMS TROUBLESHOOTING AND MAINTENANCE (6/88).

                     -----------------------------

MILITARY OCCUPATIONAL SPECIALTY GROUP: 76P      ACE GUIDE ID NUMBER:
TITLE: MATERIEL CONTROL AND ACCOUNTING             MOS 76P-002
      SPECIALIST

MILITARY OCCUPATIONAL SPECIALTIES HELD: 76P10  DUTY

SKILL QUALIFICATION TESTS TAKEN: NONE

    DESCRIPTION OF 76P10: PREPARES STOCK RECORDS AND OTHER DOCUMENTS SUCH
    AS INVENTORY, STOCK CONTROL, AND ACCOUNTING REPORTS; OPERATES OFFICE
    MACHINES AND DATA PROCESSING EQUIPMENT; MAINTAINS TECHNICAL REFERENCE
    LIBRARY; REVIEWS AND PROCESSES SUPPLY REQUESTS; EDITS CATALOG DATA
    AND DAILY ACTIVITY WORKLOAD; PERFORMS FINANCIAL INVENTORY ACCOUNTING
    ADMINISTRATION FUNCTIONS; INTERPRETS SUPPLY DOCUMENTS IN AN AUTOMATED
    ENVIRONMENT FOR INPUT AND OUTPUT PROCESSING; MAY PERFORM ACCOUNTING
    AND SALES FUNCTIONS IN SELF-SERVICE SUPPLY, REPAIR AND UTILITIES,
    CLOTHING SALES, AND MILITARY EXCHANGE ACTIVITIES; RECEIVES, STORES,
    AND ISSUES DIRECT EXCHANGE ITEMS.

---------------------- MILITARY EXPERIENCE ------------------------------

  ACE CREDIT RECOMMENDATION FOR 76P10: IN THE VOCATIONAL CERTIFICATE
  CATEGORY OR IN THE LOWER-DIVISION BACCALAUREATE/ASSOCIATE DEGREE
  CATEGORY, 2 SEMESTER HOURS IN RECORD KEEPING, 1 IN WAREHOUSE
  PRACTICES, 2 IN OFFICE MACHINES, 1 IN RETAILING, AND 2 IN COMPUTER
  OPERATIONS (9/82).

                 ----------------------------

SPECIAL QUALIFICATION IDENTIFIERS:

  (L)   LINGUIST

ADDITIONAL SKILL IDENTIFIERS:

  (N3)  CIRCUIT CONDITIONING

------------------------ OTHER LEARNING EXPERIENCES ------------------------

THIS SECTION PROVIDES THE ACADEMIC AND BUSINESS COMMUNITIES WITH A
RECORD OF THE SOLDIER'S LEARNING EXPERIENCES. COURSES LISTED MAY FALL
INTO ONE OF THE FOLLOWING CATEGORIES: THOSE THAT ACE WILL NEVER EVALUATE
FOR COLLEGE CREDIT, THOSE THAT ARE PENDING EVALUATION, AND THOSE THAT ARE
EVALUATED BUT ARE NOT CURRENTLY COMPUTER COMPATIBLE. EVENTUALLY MOST OF THE
LEARNING EXPERIENCES IN THE SECOND AND THIRD CATEGORIES WILL BE INCLUDED IN
THE MAIN BODY OF THE TRANSCRIPT. WE RECOMMEND REVIEW OF THE LISTING WITH
THE SOLDIER TO DETERMINE THE APPROPRIATENESS OF THE EXPERIENCES TO THE
SOLDIER'S PROGRAM OF STUDY OR EMPLOYMENT.

Keyword Index

This index is designed to provide rapid access to the courses described in the course exhibit section. Titles of courses are arranged alphabetically under keywords which have been extracted verbatim from the titles. For example, the keyword *Data Processing* is followed by all titles containing the words *Data Processing.*

To locate a specific course, identify a word or group of words in the title which seems to be unique of descriptive. For example, the title *Data Processing Specialist, COBOL* can be found under the keywords *Data Processing* or *COBOL*. Similarly, the title *Russian Technician* can be found under the keyword *Russian.*

The ID number for each course is displayed to the right of the title. Refer to that number in the course exhibit section for a full description of the course.

Basic Airborne (Women)
AR-0803-0002
OV-1D (Mohawk) Airborne Radar Repair
AR-1715-0168
OV-1D (Mohawk) Airborne Sensor Specialist
AR-1704-0013
Special Forces Aidman (Airborne)
AR-0709-0006

Aircraft

Aircraft Armament Maintenance Supervisor
AR-1704-0062
Aircraft Armament Maintenance Technician
AR-1704-0062
Aircraft Armament Missile Systems Repairer
AR-1704-0159
Aircraft Armament Repair
AR-1715-0320
Aircraft Armament Subsystem Mechanic
AR-1704-0083
Aircraft Armament Technical Inspector
AR-1704-0120
AR-1704-0146
Aircraft Armament/Missile Systems Repairer
AR-1714-0023
Aircraft Armament/Missile Systems Repairer Supervisor Advanced Noncommissioned Officer (NCO)
AR-1704-0167
Aircraft Carburetor Repair
AR-1704-0014
Aircraft Component Repair (Entry)
AR-1704-0015
Aircraft Component Repair Advanced Noncommissioned Officer (NCO)
AR-1704-0135
Aircraft Component Repair Helper (Entry)
AR-1704-0015
Aircraft Component Repairer Supervisor Advanced Noncommissioned Officer (NCO)
AR-1704-0166
Aircraft Electrician
AR-1704-0075
Aircraft Electrician Maintenance Supervisor/Technical Inspector
AR-1704-0099
Aircraft Electrician Repair
AR-1704-0075
Aircraft Electrician Repairer Basic Noncommissioned Officer NCO
AR-1704-0108
Aircraft Electrician Repairer Basic Technical
AR-1704-0108
Aircraft Electrician Repairer Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0108
Aircraft Engine Repair
AR-1704-0045
Aircraft Fire Control Repair
AR-1715-0269
Aircraft Fire Control Repairer
AR-1714-0023
Aircraft Fire Control Repairer Advanced Noncommissioned Officer (NCO)
AR-1704-0140
Aircraft Fire Control Repairer Basic Technical
AR-1704-0119
Aircraft Fire Control Systems Supervisor Advanced Noncommissioned Officer (NCO)
AR-1704-0167
Aircraft Fire Control Systems Supervisor Basic Noncommissioned Officer (NCO) Basic
AR-1704-0147
Aircraft Hydraulic Repair
AR-1704-0016
Aircraft Hydraulics Repair Specialist Candidate
AR-1704-0021

Aircraft Instrument and Electrical Systems Repair
AR-1721-0007

Aircraft Instrument Repair
AR-1721-0004

Aircraft Maintenance Officer and Repair Technician (AMOC) Phase II - CH 47A/B/C
AR-1717-0074

Aircraft Maintenance Officer and Repair Technician (AMOC), Phase II - AH-1
AR-1717-0071

Aircraft Maintenance Officer and Repair Technician (AMOC), Phase II - OH-58
AR-1717-0073

Aircraft Maintenance Officer and Repair Technician Phase II - UH-1
AR-1717-0070

Aircraft Maintenance Officer Phase II - CH-47
AR-1717-0074

Aircraft Maintenance Officer, Phase II - AH-1
AR-1717-0071

Aircraft Pneudraulic Repairer Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0114

Aircraft Pneudraulics Repairer Basic Noncommissioned Officer (NCO)
AR-1704-0114

Aircraft Pneudraulics Repairer Basic Technical
AR-1704-0114

Aircraft Power Plant Repair Supervisor/Technical Inspector
AR-1704-0097

Aircraft Powerplant Repairer
AR-1704-0068

Aircraft Powerplant Repairer Basic Noncommissioned Officer (NCO)
AR-1704-0106

Aircraft Powerplant Repairer Basic Technical
AR-1704-0106

Aircraft Powertrain Repair
AR-1704-0012

Aircraft Powertrain Repair Skill Development Base
AR-1704-0020

Aircraft Powertrain Repair Specialist Candidate
AR-1704-0020

Aircraft Powertrain Repairer
AR-1704-0012

Aircraft Powertrain Repairer Basic Noncommissioned Officer (NCO)
AR-1704-0107

Aircraft Powertrain Repairer Basic Technical
AR-1704-0107

Aircraft Powertrain System Maintenance Supervison/Technical Inspector Basic Technical
AR-1704-0098

Aircraft Reciprocating Engine Repair
AR-1704-0026

Aircraft Repair Parts Specialist
AR-1405-0018

Aircraft Rotor and Propeller Repair
AR-1704-0054

Aircraft Rotor and Propeller Repair Skill Development Base
AR-1704-0023

Aircraft Structural Repair Supervisor/Technical Inspector Basic Technical
AR-1704-0101

Aircraft Structural Repairer Basic Noncommissioned Officer (NCO)
AR-1704-0109

Aircraft Structural Repairer Basic Technical
AR-1704-0109

Aircraft Structural Repairer Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0109

Aircraft Structure Repair
AR-1704-0100

Aircraft Survivability Equipment Repair
AR-1704-0042

Aircraft Turbine Engine Repair
AR-1704-0068

Aircraft Turbine Engine Repair Specialist Candidate
AR-1704-0072

Aircraft Turbine Engine Repair, Skill Development Base
AR-1704-0072

Aircraft Turbine Engine Test Cell Operator
AR-1704-0024

Aircraft Turbine Multi-Engine Repair
AR-1704-0090

Aircraft Warning/Defense Equipment Repair
AR-1704-0042
AR-1715-0561

Aircraft Weapon Systems Repairer
AR-1704-0103

Aircraft/Armament/Missile Systems Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0147

AH-64 Aircraft Powertrain Repairer
AR-1704-0180

CH-47 Aircraft Repair Transition
AR-1704-0034

Special Electronic Mission Aircraft (SEMA) Common Core
AR-1715-0871

Aircraft Maintenance

Aircraft Maintenance (AV-CMF) Noncommissioned Officer (NCO) Advanced
AR-1717-0005

Aircraft Maintenance (AV-CMF) Noncommissioned Officer (NCO) Basic
AR-1717-0006

Aircraft Maintenance (Entry)
AR-1704-0070

Aircraft Maintenance and Repair Technician Phases I and II
AR-1717-0051

Aircraft Maintenance Apprentice
AR-1704-0070

Aircraft Maintenance Officer
AR-1717-0022

Aircraft Maintenance Officer (Phase II)
AR-1717-0027

Aircraft Maintenance Officer (Phase III)
AR-1717-0026

Aircraft Maintenance Officer (Phase IV)
AR-1717-0024

Aircraft Maintenance Officer (Phase V)
AR-1717-0025

Aircraft Maintenance Officer (Phases I, II and III)
AR-1717-0021

Aircraft Maintenance Officer - Phase II
AR-1717-0023

Aircraft Maintenance Officer and Repair Technician
AR-1717-0051

Aircraft Maintenance Officer and Repair Technician (AMOC) Phase II
AR-1717-0051

Aircraft Maintenance Officer and Repair Technician - Phase I
AR-1717-0023
AR-1717-0068

Aircraft Maintenance Supervisor
AR-1717-0009

Airdrop

Airdrop Equipment Technician Warrant Officer Entry
AR-1733-0003

Airdrop Loadmaster
AR-0419-0026

Airdrop Systems Technician - Senior Warrant Officer Training (Technical/Tactical Certification)
AR-1408-0156

Airdrop Systems Technician - Warrant Officer Technical/Tactical Certification
AR-1733-0010

Parachute Maintenance and Airdrop Officer
AR-2201-0136

Parachute Packing, Maintenance and Airdrop
AR-1733-0001

Parachute Rigger (Parachute Packing, Maintenance and Airdrop)
AR-1733-0001

Airframe

Airframe Repair
AR-1704-0047

Airframe Welding
AR-1704-0037

Light Target Missile Launcher Operation and Airframe and Engine Maintenance
AR-1704-0077

Radio Controlled Airplane Target (RCAT) Airframe Engine Maintenance Maintenance
AR-1704-0077

Airplane

Airplane Maintenance
AR-1704-0029

Airplane Maintenance Supervisor/Technical Inspector
AR-1717-0065

Airplane Repair
AR-1704-0010
AR-1704-0073

Airplane Technical Inspector
AR-1717-0004

Multi-Engine Airplane Repair
AR-1704-0043

Multi-Engine Command Airplane Maintenance
AR-1704-0067

Multi-Engine Medium Transport Airplane Maintenance
AR-1704-0074

Multi-Engine Observation Airplane Maintenance
AR-1704-0038

Multi-Engine Utility Airplane Repair
AR-1704-0027

O-1/U-6 Airplane Repair
AR-1704-0029

O-1/U-6 Airplane Repair, Skill Development Base
AR-1704-0011

Observation Airplane Repairer
AR-1704-0038

Observation Airplane Repairer Basic Technical
AR-1704-0116

Observation Airplane Technical Inspector
AR-1704-0129

OV-1 Airplane Repair
AR-1704-0038

OV-1 Airplane Repair Specialist Candidate
AR-1717-0007

OV-1 Airplane Repair, Skill Development Base
AR-1717-0007

OV-1 Observation Airplane Repairer Basic Noncommissioned Officer (NCO)
AR-1704-0149

OV-1 Observation Airplane Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0149

OV-1 Observation Airplane Technical Inspector
AR-1704-0161

Radio Controlled Airplane Target (RCAT) Airframe Engine Maintenance Maintenance
AR-1704-0077

Radio-Controlled Airplane Target (RCAT) Radio Maintenance
AR-1715-0181

Radio-Controlled Airplane Targets (RCAT) Operation
AR-2201-0087

Single-Engine Airplane Repair
AR-1704-0025

Single-Engine Light Transport Airplane Maintenance
AR-1704-0030

Single-Engine Observation and Utility Airplane Maintenance
AR-1704-0029

U-1A Airplane Repair
AR-1704-0030

U-1A Airplane Repair, Skill Development Base
AR-1704-0041

U-8/U-21 Airplane Repair
AR-1704-0067

U-8/U-21 Airplane Repair, Skill Development Base
AR-1704-0022

Utility/Cargo and Observation Airplane Advanced Noncommissioned Officer (NCO)
AR-1704-0138

Utility/Cargo and Observation Airplane Supervisor Advanced Noncommissioned Officer (NCO)
AR-1704-0160

Utility/Cargo Airplane
AR-1704-0073

Utility/Cargo Airplane Repairer Basic Technical
AR-1704-0115

Utility/Cargo Airplane Technical Inspector
AR-1704-0128

Ajax

Nike Ajax Fire Control System Maintenance

Intelligence Analyst Primary Technical
AR-1606-0151

Intelligence Analyst, Specialist Candidate
AR-1606-0032

Non-Morse Communications Analyst
AR-1606-0011

Personnel Data Analyst Specialist
AR-1402-0024

Programmer Analyst
AR-1402-0054

Programmer/Analyst
AR-1402-0114

Programmer/Analyst Basic Noncommissioned Officer (NCO)
AR-1402-0120

Soils Analyst Noncommissioned Officer (NCO) Candidate
AR-1601-0009

Soils Analyst, Skill Development Base
AR-1601-0009

Special Identification Techniques Analyst
AR-1606-0029

Analytic

Modern Analytic Techniques for Executive Decision Making
AR-0326-0015

Anesthesiology

(Anesthesiology Nursing for Army Nurse Corps Officers)
AR-0703-0001

Anesthesiology for Army Nurse Corps Officers
AR-0703-0001

Animal

Advanced Animal Care Specialist
AR-0102-0005

Animal Care Specialist
AR-0102-0002
AR-0102-0007

Antennaman

Antennaman Noncommissioned Officer (NCO) Basic
AR-1714-0009

Antiaircraft

Antiaircraft Artillery (AAA) and Surface-to-Air Missile (SAM) Battery Officer
AR-1601-0032

Antiaircraft Artillery (AAA) Integrated Fire Control Maintenance
AR-1715-0214

Antiaircraft Artillery (AAA) Integrated Fire Control Maintenance Officer
AR-1715-0214

Antiaircraft Artillery (AAA) Officer Basic
AR-2201-0082

Antiaircraft Artillery (AAA) Operations and Intelligence Noncommissioned Officer (NCO)
AR-1713-0002

Antiaircraft Artillery (AAA) Remote Control Repair
AR-1714-0005

Antiaircraft Artillery (AAA) Remote Control Repair Basic
AR-1715-0285

Antiaircraft Artillery (AAA) Repair
AR-1710-0017

Associate Antiaircraft Artillery (AAA) and Surface-to-Air Missile (SAM) Officer Advanced
AR-1408-0030

Associate Antiaircraft Artillery (AAA) Missile Battery Officer
AR-1715-0288

Light Antiaircraft Artillery (AAA) Maintenance
AR-1601-0039

Medium and Heavy Antiaircraft Artillery (AAA) Maintenance
AR-1710-0031

Medium Antiaircraft Artillery (AAA) Maintenance
AR-1710-0031

Antiarmor

Heavy Antiarmor Weapons Crewman
AR-2201-0279

Antiterrorism

Antiterrorism Instructor Qualification
AR-1406-0095

Apprenticeship

Proxy Apprenticeship Training
AR-1409-0004

Approach

Air Traffic Control Approach Control Enroute Specialist
AR-1704-0002

Air Traffic Control Ground Control Approach Specialist
AR-1704-0003

Ground Control Approach Equipment Repair
AR-1715-0199

Architecture

Expert Systems Architecture and Advanced Skills in Object-Oriented Programming
AR-1402-0098

Expert Systems Architecture and Object-Oriented Programming
AR-1402-0098

Area

Area Communications Systems Operations
AR-1715-0264

Area Intelligence Officer
AR-1606-0031

Area Intelligence Specialist
AR-1606-0031

Area Signal Center Officer
AR-1408-0050

Foreign Area Officer
AR-1511-0017

Foreign Area Officer Nonresident/Resident
AR-1511-0015

Foreign Area Officer Orientation
AR-1511-0017

Forward Area Alerting Radar (FAAR) Organizational Maintenance
AR-1715-0585

Forward Area Alerting Radar (FAAR) Repair
AR-1715-0169

Forward Area Alerting Radar (FAAR) Repairer
AR-1715-0169

Forward Area Alerting Radar (FAAR) Repairer Basic Noncommissioned Officer (NCO)
AR-1715-0642

Forward Area Alerting Radar (FAAR) System
AR-1715-0374

Forward Area Alerting Radar (FAAR) System Maintenance
AR-1715-0374

Armament

Aircraft Armament Maintenance Supervisor
AR-1704-0062

Aircraft Armament Maintenance Technician
AR-1704-0062

Aircraft Armament Missile Systems Repairer
AR-1704-0159

Aircraft Armament Repair
AR-1715-0320

Aircraft Armament Subsystem Mechanic
AR-1704-0083

Aircraft Armament Technical Inspector
AR-1704-0120
AR-1704-0146

Aircraft Armament/Missile Systems Repairer
AR-1714-0023

Aircraft Armament/Missile Systems Repairer Supervisor Advanced Noncommissioned Officer (NCO)
AR-1704-0167

Aircraft/Armament/Missile Systems Supervisor Basic Noncommissioned Officer (NCO)
AR-1704-0147

Armament Maintenance (Entry)
AR-1710-0046

Armament Maintenance and Repair Officer
AR-1717-0014

Armament Maintenance Foreman
AR-1717-0047

Armament Maintenance Supervision
AR-1717-0047

Armament Repair Technician
AR-1717-0052
AR-1717-0077

Armament Repair Technician Warrant Officer Advanced
AR-1710-0123

Armament/Fire Control Maintenance Supervisor Noncommissioned Officer

Special Forces Combat Diving Supervisor
AR-1606-0177
Special Forces Diving Medical Technician
AR-0709-0039
Special Forces Diving Supervisor
AR-1606-0144
Special Forces Medical Diving Technician
AR-0709-0025

Division
Division Chaplain
AR-1406-0083

Document
Document Examinations
AR-1728-0013
Document Laboratory Technician
AR-1728-0013
Questioned Documents Examiner
AR-1728-0013

Documentation
Graphics Documentation Specialist Basic Noncommissioned Officer (NCO)
AR-0202-0001
Still Documentation Specialist Basic Noncommissioned Officer (NCO)
AR-1709-0011
Visual Information/Audio Documentation Systems Specialist Basic Noncommissioned Officer (NCO)
AR-1719-0004

Documents
Questioned Documents Examiner
AR-1728-0013

Dog
Marijuana Detector Dog/Handler
AR-1728-0021
Mine and Tunnel Detection Dog Handler
AR-1728-0019
Tracker Dog/Handler
AR-1728-0022

Door
Helicopter Door Gunner Qualification
AR-1606-0090

Doppler
Corporal Doppler Repair
AR-1715-0187
Surface-to Surface Missile (SSM) Doppler Repair
AR-1715-0187

Drafting
Cartographic Drafting
AR-1713-0006
Construction Drafting
AR-1713-0007
General Drafting
AR-1713-0003

Dragon
Bradley Fighting Vehicle Systems TOW/Dragon Repairer
AR-1710-0108
Dragon Trainer
AR-2201-0210
TOW/Dragon Repairer
AR-1715-0755

Drill
Drill Sergeant
AR-2201-0146
AR-2201-0339
Drill Sergeant and the Initial Entry Training (IET) Cadre Course
AR-2201-0146

Drug
Alcohol and Drug Abuse Prevention and Control Program Advanced Counseling

Skills
AR-1512-0012
Alcohol and Drug Abuse Prevention and Control Program Alcohol and Drug Control Officer
AR-0801-0015
Alcohol and Drug Abuse Prevention and Control Program Clinical Director/ Clinical Consultant
AR-0801-0014
Alcohol and Drug Abuse Prevention and Control Program Family Counseling

Drug and Alcohol Rehabilitation
AR-0799-0009
Drug and Alcohol Rehabilitation Training Individual
AR-0801-0003
Forensic Drug Chemist
AR-1601-0048

Drycleaning
Laundry and Drycleaning Operations (Navy)
AR-1716-0004

Dual
Dual Purpose Mission Training
AR-1715-0712
Dual Purpose Mission Training (05H)
AR-1715-0534

DARCOM
DARCOM Commodity Command Physical Inventory Management
AR-1405-0088
DARCOM Depot Physical Inventory Management
AR-1405-0087
DARCOM Supply Management Career Intern Training
AR-1405-0015

DASE
Defense Against Sound Equipment (DASE)
AR-1715-0206
Defense Against Sound Equipment (DASE), Phase I
AR-1715-0420
AR-1715-0711
Defense Against Sound Equipment (DASE), Phase II
AR-1715-0509

DAS3
Decentralized Automated Service Support System (DAS3)
AR-1402-0059
Decentralized Automated Service Support System (DAS3) and The Direct Support Unit Standard Supply System (DS4) Operator
AR-1402-0102
Decentralized Automated Service Support System (DAS3) Computer Repairer
AR-1715-0527
Decentralized Automated Service Support System (DAS3)/Direct Support Unit Standard Supply System (DS4)
AR-1402-0080
DAS3 Computer Systems Repairer
AR-1715-0883
DAS3 COBOL Specifics
AR-1402-0069
DAS3 Executive Language and Editor
AR-1402-0068
DAS3/DS4 Operator
AR-1402-0080
Standard Port System-Enhanced/ Decentralized Automated Service Support System (DASPE-E/DAS3)
AR-1402-0095

DEB
Digital European Backbone (DEB) Communications Systems Repair
AR-1715-0396
Digital European Backbone (DEB) Multiplex Equipment Repair
AR-1402-0053

DIMES
DIMES Analyst Basic (Work Methods and Standards)
AR-0326-0022

DOS
Disk Operating System (DOS) Executive Software
AR-1402-0066
Disk Operating Systems (DOS) Concepts and Job Control Language (JCL)
AR-1402-0065

DS/GS
AN/MSQ-103 Teampack Intermediate Maintenance Training (DS/GS)
AR-1715-0541
AN/TSQ-114 Intermediate (DS/GS) Maintenance
AR-1715-0545
AN/TSQ-114 Trailblazer Intermediate (DS/GS) Maintenance
AR-1715-0545
DS/GS Test and Repair Station Maintenance (AH-64)
AR-1715-0878
DS/GS Test and Repair Station Maintenance (AH-64A)
AR-1715-0596
Electronic Switching Systems Repairer (DS/GS)
AR-1715-0597
Guardrail Maintenance (DS/GS)
AR-1715-0544
Hawk Missile Support Repair Technician (DS/GS)
AR-1715-0647
MSQ-103 Intermediate Maintenance Training (DS/GS)
AR-1715-0541
Short Range Air Defense System (SHORADS) DS/GS Maintenance Repair Technician
AR-1715-0646

DSTE
Automatic Data Processing (ADP) Repair, Phase VII—Digital Subscriber Terminal Equipment (DSTE) Repair
AR-1715-0253
Digital Subscriber Terminal Equipment (DSTE) Operator
AR-1715-0043
Digital Subscriber Terminal Equipment (DSTE) Repair
AR-1715-0253
Digital Subscriber Terminal Equipment (DSTE) Repairer
AR-1715-0253

DSU/GSU
DSU/GSU Mechanized Stock Control
AR-1405-0010

DS4
Decentralized Automated Service Support System (DAS3) and The Direct Support Unit Standard Supply System (DS4) Operator
AR-1402-0102
Direct Support Unit Standard Supply System (DS4)
AR-1405-0176

DX43
Helicopter Armament Subsystem M22 and DX43 Mechanic
AR-1704-0081
Helicopter Armament Subsystem M22 and Simulator DX43 Repair
AR-1704-0078

Ear
Ear, Nose, and Throat Specialist
AR-0709-0002
Eye, Ear, Nose, and Throat Specialist
AR-0709-0002

East European
U.S. Army Institute for Advanced Russian and East European Studies
AR-0602-0001

Echelons
Director of Information Management (DOIM)/Echelons Above Corps (EAC) Operations Officer
AR-1402-0096
Echelons Above Corps (EAC) Operations Officer
AR-2201-0304
AR-2201-0305

Economic
Economic Analysis for Decision Making
AR-0326-0021

Editor
DAS3 Executive Language and Editor
AR-1402-0068

Education
Army Medical Department (AMEDD) Graduate Medical Education (GME) Program Command and Staff.
AR-0799-0014

Effective
Effective Military Writing
AR-2201-0254

Effectiveness
Organizational Effectiveness Consultant
AR-0326-0039
Organizational Effectiveness Staff Officer
AR-0326-0039

Effects
Nuclear Weapons Effects Officer
AR-1303-0002

Ejection
(Martin-Baker J-5 Ejection Seat Specialist)
AR-1704-0087
Ejection Seat Repairer
AR-1704-0087

Electric
Electric Motor and Generator Repair
AR-1715-0321
Electric Motor and Generator Repairman
AR-1715-0321
Electric Power Production (CMF-52) Noncommissioned Officer (NCO) Advanced
AR-1710-0043
Electric Power Production (52-CMF) Noncommissioned Officer (NCO) Basic
AR-1710-0021
Electric Power Production (52-CMF) Noncommissioned Officer (NCO) Basic
AR-1408-0080
Electric/Electronic Devices Maintenance (35-CMF) Noncommissioned Officer (NCO) Basic
AR-1710-0021
Electrical Equipment Maintenance (63-CMF) Noncommissioned Officer (NCO) Basic
AR-1710-0021
Mobile Electric Power Generation
AR-1710-0009
Mobile Electric Power Generation (Precise)
AR-1710-0010

Electrical
Aircraft Instrument and Electrical Systems Repair
AR-1721-0007
Ballistic Missile Electrical Mechanical Repair (Pershing)
AR-1715-0122
Electrical Accounting Machine Repair
AR-1706-0004
Electrical Equipment Maintenance (63-CMF) Noncommissioned Officer (NCO) Basic
AR-1710-0021
Electrical Instrument Repair

Course Number Index

The following columns cross-reference military course numbers to ID numbers for the courses listed in the course exhibit section. Readers who desire to trace courses for which they only have military course numbers as references may find the applicable courses by referring to the cross-reference list.

Each ID number begins with prefix initials which identify a specific branch of the Armed Services. The following prefixes are used:

AF—Air Force
AR—Army
CG—Coast Guard
DD—Department of Defense
MC—Marine Corps
NV—Navy

#-90 OMS/UTES	AR-1405-0210
#-90 OMS/UTE6	AR-1405-0209

Appendix E

Conversion of Army Enlisted Military Occupational Specialties to Department of Defense Enlisted Occupational Codes

This appendix is designed to aid the user in determining the Army formal course number when only the MOS code is known.

The number that the Army assigns to a formal course for enlisted personnel often consists of a three-digit Department of Defense (DoD) occupational code followed by the five-digit code for the MOS and skill level associated with the course, e.g., 300–91C10. In order to use the Course Number Index to locate a specific course exhibit ID number, the user must know the entire official Army course number. However, on some soldiers' records the entire course number is not given; instead, the military record may list the course number as only the MOS and skill level, without the DoD code.

For example, the Army course number for the course that trains persons for MOS 91C (Clinical Specialist) is 300–91C10. When a soldier's record incompletely lists the course number as 91C10, the user can refer to MOS 91C in this appendix to find the DoD occupational code, 300. The user can then turn to 300–91C10 in the Course Number Index to find the ID number of the course exhibit, which in this example is AR–0709–0009.

REQUEST FOR COURSE RECOMMENDATION

The applicant for credit must fill out one form for *each* service school course completed. The institutional official is responsible for verifying from official military records that the student completed the entire course, and for submitting the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193. ATTN: Military Evaluations. *Please Print.*

1. *Exact* course title *(do not abbreviate)*

2. Service branch offering the course:
☐ Air Force
☐ Army
☐ Coast Guard
☐ Department of Defense
☐ Marine Corps
☐ Navy

3. Name of service school attended:

4. Location (installation, state):

5. Length of course *(in weeks)*:

6. Dates of attendance: From: day/month/year To: day/month/year

7. Official military course number:

8. MOS/AFSC/Rating:

9. Course was designed for:
☐ Warrant Officers
☐ Officer Candidates
☐ Commissioned Officers
☐ Enlisted Personnel
☐ Aviation Cadets
☐ Noncommissioned Officers

10. Rank or rating upon completion of the course:

11. Please give some indication of subjects studied in course:

The 1990 GUIDE to the EVALUATION of EDUCATIONAL EXPERIENCES in the ARMED SERVICES

AMERICAN COUNCIL ON EDUCATION One Dupont Circle • Washington, D.C. 20036-1193

685

BEST COPY AVAILABLE

THE CHAIRMAN, JOINT CHIEFS OF STAFF
WASHINGTON, D.C. 20318

5 October 1990

Dear Service Member,

I support the DOD policy of providing postsecondary education opportunities for all active duty and Reserve Service members. I strongly advise you to take advantage of the voluntary education program to catch up with your education before you leave the military. The Military Services need well-trained, educated people. Your pursuit of higher education will not only enhance your military job performance and chance for promotion, but will also improve your job opportunities when you return to civilian life.

The Guide to the Evaluation of Educational Experiences in the Armed Services, published by the American Council on Education, describes how you can receive college credits for your military training and experience and is widely recognized by the colleges and universities that grant credit for this training and experience. This guide is available for your reference at your base or post Education Center.

A number of programs are available through education centers on military installations, including courses taught in the classroom, independent study, testing of all kinds, and education guidance. Take advantage of these resources and educational programs during your military tour, and continue to use educational and Montgomery GI Bill benefits when you return to civilian life.

I wish you good luck and success in pursuit of your educational goals.

Sincerely,

COLIN L. POWELL
Chairman
Joint Chiefs of Staff

Eastern Illinois University

Foreword

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in military life. ACE has worked cooperatively with the Department of Defense and the armed services in assisting hundreds of thousands of service men and women to achieve recognition for their learning. The long-term success of the *Guide* evaluation system for military training has resulted in its serving as a model for the evaluation of programs offered by other noncollegiate organizations, including business, industry, government agencies, voluntary and professional associations, and labor unions. These formalized efforts to evaluate noncollegiate-sponsored programs enable students to combine their extrainstitutional learning with study at postsecondary institutions to achieve degree-related educational objectives. Not only is this sound educational practice, it is also an efficient use of educational resources and an incentive for the persons affected to undertake further study.

Special recognition must be paid to hundreds of individuals who have served as evaluators and the many educational institutions, professional and disciplinary associations, and the apprenticeship training community for their wholehearted cooperation in this endeavor. Without their support and assistance, the *Guide* would not have been possible. We are greatly indebted to them.

Once again, we are pleased to commend this work to you in your continuing work with service men and women and veterans.

ROBERT H. ATWELL
President
American Council on Education

How to Find and Use MOS Exhibits

This volume contains recommendations for all Army enlisted and warrant officer military occupational specialties (MOS's) evaluated through June 1988.

The instructions that follow provide a step-by-step procedure for finding and using the MOS exhibits and recommendations. Readers unfamiliar with MOS's—how they are structured and how MOS proficiency is demonstrated—should read Appendix A. Additional information on MOS's is provided in the Questions and Answers section.

Step 1

Have the applicant submit official Army documentation to you.

Several records may be used for MOS verification. A servicemember or veteran may submit one or several of the following forms:

Enlisted Personnel:

- *Army/ACE Transcript.*
- *Military Orders* (order awarding an MOS).
- *Course Completion Certificate.*
- *DA Form 2166–5, Enlisted Evaluation Report (EER).*
- *DA Form 2166–5A, Senior Enlisted Evaluation Report (SEER).*
- *DA Form 2166–7, NCO Evaluation Report*
- *USAEEC Form 10* and *EREC Form 10A, Enlisted Evaluation Data Report.*
- *DA Form 2–1, Personnel Qualifications Record.*
- *DA Form 20, Enlisted Qualification Record.*
- *Individual Soldier's Report (ISR).*
- *DD Form 295, Application for the Evaluation of Educational Experiences During Military Service* (April 1975) and *Application for the Evaluation of Learning Experiences During Military Service* (June 1979 and November 1986).
- *DD Form 214, Armed Forces of the United States Report of Transfer or Discharge* (November 1955) and *Certificate of Release or Discharge from Active Duty* (July 1979).

Warrant Officers:

- *DA Form 67–8, 67–7, 67–6, Officer Evaluation Report (OER).*
- *DA Form 67–8–1, Officer Evaluation Report Support Form.*
- *DA Form 2–1, Personnel Qualifications Record.*
- *DA Form 66, Officer Qualification Record.*
- *DA Form 4037, Officer Record Brief.*

NOTE: Many warrant officers began their careers as enlisted personnel; in such cases, warrant officers may also submit their enlisted records for evaluation.

Army records must be requested by the individual. Records may be obtained as follows:

Active-duty enlisted soldier or warrant officer. The Army installation to which he or she is assigned.

Army National Guard personnel. The National Guard unit to which he or she is assigned.

Army Reservist or retired personnel. The U.S. Army Reserve Component and Administrative Center (TAGO), 9700 Page Boulevard, St. Louis, Missouri 63132.

Army veteran. General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132. The veteran may request service records by submitting U.S. Government Standard Form 180, which may be obtained from a state's veterans affairs office, the Veterans Administration, or the National Personnel Records Center.

Step 2

By referring to military records, verify each MOS the person has successfully held.

When verifying enlisted MOS's it is important to identify the skill level. Since the higher skill levels of an MOS encompass the duties of the lower skill levels (i.e., a person with MOS 12B40 is able to perform the duties of 12B30), the credit recommendation for MOS 12B40 would include the recommendation for 12B30. Thus, you need to verify the highest skill level a person held.

To determine an individual's eligibility for the award of MOS credit, determine the dates the MOS was held and follow the appropriate instructions from the following list:

- October 1973–December 1976. Check for a score of 70 or above on the MOS evaluation test.
- January 1977–July 1983. Use the SQT score in conjunction with EERs and SEERs, and/or other assessment methods; if score is not available, use EERs and SEERs. (See question 15 in the Questions and Answers section.)
- August 1983–Present. Check for a score of 60 or above on the SQT; if score is not available, use EERs, SEERs, or NCO Evaluation Reports.

Question 3 in the Questions and Answers section and Appendix A contain more information on the Army MOS testing system.

You may need to consult several records in order to verify the MOS, the skill level, and to determine eligibility for the credit award. Refer to the records listed in Step 1 and look for the necessary information.

Enlisted Personnel:

- *Army/American Council on Education Registry Transcript System (AARTS).* This transcript may be used for verifying MOS's held. It is used to document military training and experience for active-duty personnel who entered the service on or after October 1, 1981. Transcripts are available by writing to the AARTS Operations Center, Ft. Leavenworth, KS 66027-5073. (See questions 20, 21 and 22 in the Questions and Answers section and see sample records in Appendix G. The transcript request form in Appendix G may be duplicated as necessary.)
- *Military Order* (order awarding an MOS). This document indicates that the individual was awarded the MOS following a period of supervised on-the-job training. Only individuals who have been judged competent in the MOS during this training period are awarded the MOS.
- *A course completion certificate for an MOS-producing course.* This indicates that the individual was awarded the MOS upon successful completion of the course. The certificate verifies that the person is qualified to perform the entry-level duties of a particular MOS skill level.
- *DA Form 2166–5, Enlisted Evaluation Report (EER).* This document contains the supervisor's rating. It provides ratings on duty performance traits, demonstrated overall performance of assigned duties, and advancement potential. Because supervisors' ratings tend to be subjective, one EER alone is seldom sufficient to validate proficiency. *DA Form 2166–5A, Senior Enlisted Evaluation Reports (SEERs)* provide ratings on performance qualities, leadership skills, demonstrated overall performance, and advancement potential. The maximum score attainable on EERs and SEERs is 125. EERs were formerly given to those in paygrades E–4 and E–5, while E–6 and above received SEERs. Then EERs were discontinued, and those in paygrades E–5 through E–7 were given SEERs. Those in paygrades E–4, E–8, and E–9 were not evaluated. Both EERs and SEERs have been discontinued.
- *DA Form 2166–7, NCO Evaluation Report.* Current supervisor's rating, replacing EERs and SEERs. Provides description and scope of duties, and ratings and written comments about the NCO's MOS competence, leadership abilities, training responsibilities, and responsibility and accountability. In Part IV, check for a *success* rating (meets standards) or an *excellence* rating (exceeds standards) in sections b, d, e, and f. In Part V, determine that an overall rating of *fully capable* or *among the best* has been achieved.
- *EREC Form 10A, Enlisted Evaluation Data Report* (replaces USAEEC Form 10). This record provides an EER weighted average (EERWA) score. It also lists raw SQT scores along with a percentile score. The percentile compares the soldier with others who have taken the test in that MOS.
- *DA Form 2–1, Personnel Qualifications Record.* This record provides a summary of a soldier's career, including MOS's held, courses taken, and awards received. Item 6 lists each MOS designation and skill level, title, and date held. Item 35 lists the soldier's assignments, with MOS and skill level designations, and the effective date of the assignment.
- *DA Form 20, Enlisted Qualification Record.* Sections 22 and 23 provide the MOS code, title, date awarded, and MOS evaluation scores and dates. Section 38 lists duty positions held and dates.
- *Individual Soldier's Report (ISR).* This form reports SQT results. You should check for the MOS designation, skill level, dates, and a score report. A score of 60 or above indicates that the individual has qualified in the MOS for the Army's purposes. (Unlike the score of 70 or above on MOS tests, this score does not automatically qualify the individual for the MOS credit but should be considered with the other information available.)
- *DD Form 295, Application for the Evaluation of Educational Experiences During Military Service* (April 1975) or *Application for the Evaluation of Learning Experiences During Military Service* (June 1979, November 1986). This form may be used when it contains occupational information. The April 1975 version contains the section "Major Service Jobs or Billets." The June 1979 and November 1986 versions have a section entitled "Military Occupational History." Check for MOS designation, title, and period during which the MOS was held. The form may also list test scores and dates.
- *DD Form 214, Transfer or discharge papers.* This form may be used for verifying an MOS but will not necessarily provide the dates during which the MOS was held. On the old version (November 1, 1955) *Armed Forces of the United States Report of Transfer or Discharge,* check item 25 for the MOS designation and title. On the new version (July 1, 1979) *Certificate of Release or Discharge from Active Duty,* check item 11 for MOS designation, title, and years and months in the MOS.

Warrant Officers:

- *DA Form 67–7.* See section on description of duties for MOS designation, professional attributes, demonstrated performance, and potential.
- *DA Form 67–8.* See section on duty description for MOS designation, performance evaluation, and performance and potential evaluation.

- *DA Form 67–8–1.* See written statements by the rated officer and the rater.
- *DA Form 2–1.* See items 3 and 6 for MOS designation, relevant dates, and dates of evaluation.
- *DA Form 66.* See section 9 for MOS designation, title, and relevant dates.
- *DA Form 4037.* See Section I for MOS designations and titles.

See Appendix G for sample copies of the above forms.

Step 3

Find the appropriate MOS exhibit in the Guide.

Using the military records, find the information necessary for locating the correct MOS exhibits. Pertinent information includes: the MOS designation, the MOS title, the dates each MOS was held, and when appropriate, the date associated with an MOS evaluation (MOS Evaluation Test score, SQT results, EER/SEER). When you cannot verify MOS proficiency through a careful examination of military records, you may wish to conduct your own assessment. (See question 15 in Questions and Answers.) Verification of MOS proficiency should precede the granting of credit or advanced standing.

There are two sections for MOS exhibits: the Army Enlisted MOS Exhibits, beginning on page 1–1 and the Army Warrant Officer MOS Exhibits, beginning on page 2–1. Within each section, exhibits are arranged by ACE ID number.

The exhibit(s) for a given MOS can easily be found when the MOS designation is known. Each MOS exhibit is assigned an ACE ID number that has three components. The first component, *MOS*, identifies the exhibit as one that describes an Army military occupational specialty. The second component consists of the MOS designation, e.g., 81C or 271A. The third component, a three-digit, sequentially assigned number, e.g., –001, –002, –003, uniquely identifies the exhibit. Enlisted MOS exhibit ID numbers have nine characters, e.g., MOS–81C–001. Warrant officer MOS exhibit ID numbers have ten characters, e.g., MOS–271A–001.

When the title of the MOS is known, the exhibit ID number(s) can be found by referring to the Army Occupational Title Index.

There may be several exhibits for an MOS. Each time there is a new recommendation for an MOS, there is a new exhibit. For example, three exhibits appear for MOS 12B. The ACE ID numbers for the three exhibits are MOS–12B–001, MOS–12B–002, and MOS–12B–003. The oldest exhibit for the MOS, the first to be evaluated, is assigned –001 as the last three characters. The last exhibit for an MOS, the exhibit ending in the highest number, is the most recent.

When there is more than one exhibit, select the correct one by referring to the exhibit dates which conform to the time frame in which the individual held the MOS. The exhibit dates for each new exhibit establish continuity with the previous exhibit, e.g., if the end date for the first exhibit is 8/75, the start date for the next exhibit would be 9/75. In many cases, the date of the soldier's last MOS evaluation will indicate which exhibit is most appropriate. However, when the time period that a person held an MOS skill level spans more than one exhibit for the MOS, you should exercise your own judgment in deciding which exhibit is more appropriate. (See question 5 in Questions and Answers.)

Step 4

Read the entire MOS exhibit.

Although credit is granted for a particular skill level of an MOS, users are urged to read the entire MOS exhibit. Doing so will make possible the most appropriate application of a given recommendation to the student's program of study at your institution. Each item in the exhibit has been prepared to help users identify or interpret the recommendations. (See sample exhibits.) The descriptions and the special notes on career progression will be particularly helpful to users.

The descriptions, which are similar to learning outcome statements of postsecondary courses and programs of study, will provide essential information about the learning required for proficiency in the MOS. Comparing the MOS "Description" with a description of the course or program of study that the student will pursue at your institution will help you

- determine how much of the recommended credit applies to the course or program of study at your institution
- identify additional areas of possible credit
- resolve problems with duplication of credit when the applicant has applied for credit for more than one military learning experience
- place the student at the appropriate point in the course sequence or program of study.

In addition, the exhibits contain special notes on career progression. These notes will help users identify other areas of possible credit and resolve duplication of credit. Enlisted MOS descriptions often include special notes on prerequisite MOS's and normal patterns of career progression. In warrant officer MOS exhibits, other MOS's an individual may have held are listed in the exhibit item "Career Pattern."

Step 5

Award credit as appropriate.

The MOS recommendations are advisory. They are intended to assist in formally recognizing the learning of enlisted soldiers, warrant officers, and veterans, and in placing them in postsecondary programs of study, apprenticeship programs, and jobs. The recommendations may be modified.

When an applicant has applied for credit for more than one military learning experience, you may find that you will have to reduce the total amount of credit recommended to avoid granting duplicate credit. (See questions 7, 11 and 12 in Questions and Answers.)

You may also wish to increase the recommended credit to account for the learning that the applicant may have acquired in other military or nonmilitary settings.

Step 6

When assistance is required, contact The Center.

The Center operates an advisory service to assist education officials, apprenticeship and training officials, and employers in evaluating the learning experiences of military personnel. Publication of the *Guide* is part of that service. However, there are instances when additional assistance is needed.

When requesting an exhibit for an enlisted or warrant officer MOS, complete a copy of the Request for Army Enlisted and Warrant Officer MOS Exhibits form that appears at the back of this volume.

When assistance in interpretation is needed and it appears that official military records will help staff members in responding to an inquiry, copies should be attached to the letter of inquiry. *Do not send original records.*

When an MOS exhibit or assistance in interpretation is needed immediately, you may telephone The Center at (202) 939-9470. Whether inquiring by letter or telephone, you should always obtain information concerning MOS exhibits directly from The Center, not the applicant. (See question 10 in Questions and Answers.)

Inquiries concerning *MOS exhibits* should be addressed to:

The Center for Adult Learning and Educational
Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036-1193
ATTN: Military Evaluations Program

Sample Enlisted MOS Exhibit

ID Number. A nine-character code assigned by ACE to identify each enlisted MOS exhibit.

MOS Designation. The five-character codes that identify the MOS and each of its skill levels. An MOS may have as many as five skill levels (e.g., Skill Levels 10, 20, 30, 40 and 50) or as few as one. The enlisted MOS structure is fully described in Appendix A.

Career Management Field. Two digits and a title designating a group of related MOS's; if divided into subfields (three digits and a title), the subfield is also provided. When a person has held more than one MOS in the same career management field or subfield, you should be alert to the possibility of overlapping recommendations. Brief descriptions of enlisted career management fields are provided in Appendix D.

Description. A summary description applying to all skill levels and a specific description for each skill level. Provides information about the duties performed and the qualifications required for proficiency in the MOS. It indicates the rationale behind a given recommendation and provides information that can be used as a starting point should you wish to conduct further assessment of the learning a soldier or veteran has acquired. The description is also useful in making decisions when recommendations from more than one learning experience appear to duplicate each other.

Date of Evaluation. By month and year. Follows the recommendation for each skill level.

Important: Read entire MOS exhibit before awarding educational credit.

MOS-13B-003

CANNON CREWMEMBER

13B10
13B20
13B30
13B40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves as a member of a field artillery cannon unit. Places and fires cannon, maintains transport vehicles and weapons, and operates communications equipment. *Skill Level 10:* Serves as vehicle driver, ammunition specialist, cannoneer, maintenance technician, and communications equipment operator; determines azimuth, reads maps, navigates, and operates radio set; services hydraulic, pneumatic, and electro-mechanical systems. *Skill Level 20:* Able to perform the duties required for *Skill Level 10;* assists section chief; uses aiming devices . . . *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief; directs defense of section; instructs and supervises 7 to 12 section personnel; supervises equipment maintenance. . . . *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises 12 to 60 section personnel; selects sites for weapon emplacement; . . .

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in communications systems operation, 1 in hydraulic and electromechanical systems troubleshooting and maintenance, 1 in map reading, and 1 in applied mathematics (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, and 2 in applied mathematics (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, 2 in applied mathematics, 3 in principles of supervision, 3 in communication skills, and 1 in technical report writing (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, 2 in applied mathematics, 3 in principles of supervision, 3 in communication skills, and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

Title. The official Army title of the MOS during the period of the exhibit dates. If the title changed during that period, the newer title is given first and the older title is given in parentheses on the next line.

Exhibit Dates. Start and end dates by month and year. The earliest start date for enlisted MOS's is 10/73 because The Center does not have the information necessary to evaluate enlisted MOS's as they may have existed earlier than 10/73. When an end date is given, the MOS was either discontinued (an explanation is provided) or changed (another exhibit will follow for the MOS, e.g., MOS-81C-002). An end date of "Present" indicates that the MOS still exists and the exhibit is current as of June 1990. Some exhibits will end with the phrase "Pending evaluation."

Recommendation. By skill level. Only the recommendation for the *highest* skill level held should be used; skill-level recommendations should *not* be added.

Educational credit is recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

You are free to modify the recommendation.

Sample Warrant Officer MOS Exhibit

ID Number. A ten-character code assigned by ACE to identify each warrant officer MOS exhibit.

MOS Designation. The four-character code that identifies the MOS plus the neutral fifth character, zero ("0"). The zero is added as a reminder that the MOS evaluation does not include the evaluation of learning associated with Special Qualifications Identifiers (SQI's). When a person's MOS designation includes an SQI, signified by a letter or number other than zero as the fifth character, additional credit may be granted on the basis of individual assessment (refer to Appendix E).

Description. Provides information about the duties performed and the qualifications required for proficiency in the MOS. It indicates the rationale behind a given credit recommendation and provides information that can be used as a starting point should you wish to conduct further assessment of the learning a warrant officer or veteran has acquired. The description is also useful in making decisions about how much credit to grant when credit recommendations from more than one learning experience appear to duplicate each other.

MOS-132A-002

METEOROLOGY TECHNICIAN

132A0

Exhibit Dates: 6/89–Present.

Career Pattern

NOTE: This MOS was formerly designated 201A. May have progressed to Meteorology Technician from MOS 93F (Field Artillery Meteorological Crewman).

Description

Normally serves as the chief of a meteorology section that provides ballistic meteorological data (not involving weather forecasting) to artillery units; is responsible for the organization and operation of the section and its physical facilities as well as the supervision and training of enlisted specialists in the section; manages and allocates resources to install, operate, and maintain mercurial, aneroid, electronic, optical, and mechanical meteorological instruments and equipment; determines layout of ballistic meteorological stations and facilities and plans equipment installation; knows methods of observing and plotting meteorological data; inspects and tests meteorological equipment; determines operating procedures and techniques; allocates work to subordinates; determines requirements for, procures, and manages supplies, repair parts, and equipment; supervises calibration of graphs and other recording devices; evaluates ballistic meteorological data and produces messages to be transmitted to artillery units; instructs subordinates on established maintenance techniques and operating procedures; may serve as an instructor at a formal service school; may be employed in research, development, and evaluation activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in supply management, 3 in applied mathematics, and 3 in general meteorology. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (6/89).

Important: Read entire MOS exhibit before awarding educational credit.

Title. The official Army title of the MOS during the period of the exhibit dates. If the title changed during that period, the newer title is given first and the older title is given in parentheses on the next line. A title in the exhibit may be different from the title that appears on the person's Army records. The latter title may be a Special Qualifications identifier (see Appendix E).

Exhibit Dates. Start and end dates by month and year. The start dates vary considerably for each warrant officer MOS exhibit. Each start date reflects a historical tracing of the MOS requirements. The end date for all warrant officer MOS's that have been evaluated is given as "Present," indicating that the exhibit is current as of June 1990. Some exhibits will end with the phrase "Pending evaluation."

Career Pattern. Enlisted or other warrant officer MOS's that an individual may have held. You should be alert to the possibility of overlapping recommendations when a warrant officer has held one or more of these MOS's.

Recommendation. Educational credit is recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Date of Evaluation. By month and year.

You are free to modify the recommendation.

Questions and Answers

This section is designed to answer questions that may arise about using the **Guide** *and awarding credit.*

1

Which learning experiences have been evaluated for the Army?

Formal courses offered by the active Army, Army Reserve, and National Guard are all eligible to be evaluated. See Volume 1 for information and credit recommendations. In addition, Army Military Occupational Specialties (MOS's) have been evaluated. ACE began evaluating MOS's in 1974. The exhibits will not have a start date that is earlier than October 1973, the Army regulation in effect at the time. MOS exhibits are contained in this volume.

2

What are primary, secondary, and duty MOS's?

All soldiers receive a primary MOS. A primary MOS is the MOS in which soldiers normally work and in which they are tested annually with the Skills Qualification Test (SQT). Currently, in instances in which a soldier has been tested, institution officials should verify an SQT score of 60 or above to document proficiency. In the absence of an SQT score (SQTs have not been developed for some MOS's), or when the SQT was taken prior to 8/83, one or several Enlisted Evaluation Reports (EERs—supervisor's ratings) may be used. (See question 3.)

Some soldiers receive a secondary MOS. It is generally related to their primary MOS, and they are tested in their secondary MOS every other year. If an SQT score is recorded, or the soldier has received one or more EERs for working in that MOS, credit may be awarded.

A duty MOS indicates the MOS in which the individual is working. In most cases, the duty MOS is the same as the primary MOS. In instances in which the duty MOS is different from the primary MOS, soldiers take an SQT in their primary MOS, but are evaluated by their supervisor in their duty MOS. Credit may be awarded in either the primary or duty MOS or both. The soldier must maintain proficiency in the primary MOS by studying for and passing the annual SQT. If there is no SQT for the primary MOS, institutions may prefer awarding credit for the duty MOS on the basis of EERs.

Very often the primary, secondary, and duty MOS's are in the same or related career field. If this is the case, there is apt to be some duplication in the credit recommendations. Follow the guidelines in question 11.

3

How can I determine whether an applicant is eligible to receive the credit recommended in an enlisted MOS exhibit?

If the individual seeking credit held the MOS between 10/73 and 12/76, check military records for a score of 70 or above on the MOS evaluation test. See Step 2 in How to Find and Use MOS Exhibits for a complete listing of military records and the information they contain.

For those who held the MOS between 1/77 and 7/83, verification of MOS-related learning may require additional considerations beyond those under the old MOS test system. The testing system in use during these dates, the Skill Qualification Test (SQT), was considerably different from the old system and from the current SQT system. During this period it served as a diagnostic training tool for Army MOS trainers rather than an actual assessment of individual proficiency.

Although the SQT should not be used by itself in credit decisions for MOS's held between 1/77 and 7/83, it is one indicator of MOS proficiency. In the absence of an MOS evaluation test score, it is possible for you to assess an applicant's eligibility with other documentation of MOS proficiency. See Step 2 in How to Find and Use MOS Exhibits for a complete listing of all such documents and descriptions of the information they contain.

You may wish to consult several of these forms before deciding the appropriate credit award. As with a portfolio type of assessment, multiple indicators of learning outcomes serve to increase your confidence in the person's proficiency and the validity and reliability of the credit awards. For example, consulting an individual's records that span a period of years allows you to follow that individual's career path through the Army's MOS skill levels. If you are uncertain about a person's proficiency in a given subject area, you are encouraged to use additional means of assessment. Any of the assessment methods used by your institution to grant credit for experiential learning are applicable to MOS verification. See question 15 for suggestions on using the MOS recommendations in conducting individual assessments.

For those who held the MOS from 8/83 to the present, the SQT score may be used. (See Appendix A for information about the improved SQT.) Check the applicant's records for a score of 60 or above.

See Step 2 in How to Find and Use MOS Exhibits for a complete listing of military records and the information they contain.

4

Can MOS credit be awarded to Army reservists and National Guard members as well as active-duty soldiers?

Credit for MOS's may be granted to Reserve Forces personnel (Army National Guard members and reservists), but institutions should be aware that documenting MOS proficiency for them is different from that for active-duty soldiers.

The SQT is taken annually by active-duty soldiers, and every two years by members of the Reserve Forces. For active-duty personnel, the SQT has been considered a reliable instrument for making academic credit award decisions. However, Reserve and National Guard commanders generally narrow down the tasks for each soldier. They select the tasks that are necessary for a soldier to maintain proficiency in the skills required to support the mission of the particular unit. Thus, scores are based on these selected items, and have a meaning different from the scores of active-duty personnel. National Guard members and reservists receive EERs on an annual basis. Therefore, EERs, not SQTs, should be used to verify MOS proficiency for Reserve Forces personnel. ACE suggests that institutions check for a minimum of two EERs in the same MOS before awarding credit. The guidelines mentioned above for the pre-August 1983 time frame should be followed before granting MOS credit.

An explanation of the application of credit recommendations for other learning may also be useful. Individuals in the active Army and Reserve Forces receive identical basic training. If it was taken after December 1979, the credit that is recommended in exhibit AR-2201-0197 may be granted. After completing basic training, all soldiers now attend an Advanced Individual Training (AIT) formal course. AIT provides basic entry-level MOS skills. Credit may be awarded for AIT in accordance with the credit recommendations in the *Guide*.

Following AIT, active Army soldiers are assigned to a permanent duty station where they receive supervised on-the-job training. Members of the Reserve Forces receive their MOS training and perform their MOS duties one weekend a month and during their two-week tour of active-duty training each year.

Credit may be granted for *formal courses* taken by the soldiers. Members of the Reserve Forces are eligible to receive the credit for successful completion of courses which have been evaluated by ACE.

In granting credit to either an active-duty soldier or a member of the Reserve Forces for successful completion of formal courses as well as MOS's, care must be taken to avoid granting duplicate credit. (See question 11.)

5

What if the applicant held the MOS before the start date of the MOS exhibit? Should I still use the recommendation to grant credit to this person?

If you have the institutional resources to do so, you should do some investigating before deciding to accept or modify the recommendation. Since MOS duties and skill level structures sometimes change, you need to determine if the earlier MOS is the same as the current MOS described in the *Guide*. You may be able to confirm the comparability of the new MOS description to an old description. There are three steps you will need to follow in deciding whether or not to award credit:

1. Obtain a description of the MOS as it existed when the person held it. If the person held it since October 1, 1973, write to the Advisory Service for a copy of the Army description (be sure to tell us when the person held the MOS). If the person held it before October 1973, a copy of the description may be obtained by writing to the Soldier Support Center, National Capitol Region, ATT: ATZI-NCR-MO, 200 Stovall Street, Alexandria, VA 22332. Be sure to include the full title, dates held, and MOS designator. They will send a copy of the description if it is available. Use the description to identify the learning outcomes represented by the MOS.

2. Determine whether the individual demonstrated proficiency in the MOS. If the person held the MOS since October 1, 1973, follow the procedures outlined in question 3 and in Steps 1 and 2 in How to Find and Use MOS Exhibits to determine MOS proficiency. If the person held the MOS before October 1973, conduct your own assessment to verify that the person achieved the learning outcomes represented by the MOS. (See question 15 for information about assessment techniques.)

3. Determine how much credit may be granted to the person. A careful comparison of the description in the MOS exhibit and the one obtained in Step 1, above, may reveal whether the MOS was substantively different. If it was not, the credit recommendation in the exhibit may be used. If specific differences are identified, then the recommended credits may need to be modified accordingly.

6

Is a four-digit number such as 5241 an acceptable warrant officer MOS designation?

In some cases, yes. The four-digit number is the warrant officer MOS designation that was used before the present warrant officer MOS classification system was adopted in June 1961. For example, the MOS designation for Bandmaster was 5241, then became 031A, and is now 420C. When the start date for a warrant officer MOS exhibit is earlier than 6/61, the four-digit MOS designation is provided in the MOS exhibit because some warrant officer records may show the old number.

7

Should I award credit to a warrant officer for his or her *enlisted MOS's?*

Yes, you may award credit for any combinaton of learning experiences. (See question 11.)

8

What is the significance of the date which appears after each credit recommendation?

That date is called the "evaluation date" and represents the month and year the credit recommendation was established. Each time a course or MOS is evaluated, a date is provided to indicate when the course or MOS was last considered for a credit equivalency. The date tells you how recently a recommendation was established so that you can judge the currency of the credit recommended. This information is particularly useful in subject areas where "state of the art" is important in determining the applicability of credit. You can also use the evaluation date when your institution has established a "statute of limitations" for acceptance of transfer credit. The date is provided purely for your information; do not confuse the date with exhibit dates.

9

When an MOS exhibit includes the statement "Pending evaluation," how will I know when the ACE recommendations will be available?

The abbreviated exhibit format was developed to let you know the evaluation status of MOS's. Such exhibits include only the ACE ID number, the MOS title, the MOS designations, and the exhibit dates with the statement "Pending evaluation." When you encounter the statement, two things are certain: (1) the MOS is one that was in use as of the publication cut-off date of June 1990 and (2) that ACE plans to evaluate it. As MOS recommendations are available they will be announced in *The Center Update* and will appear in evaluation updates to the *Handbook to the Guide* (see question 19). Inquiries about the evaluation status of an MOS should be directed to the Advisory Service. Submit a completed "Request for Army Enlisted and Warrant Officer Exhibits" form located at the back of this volume.

10

How long does it take to receive a response?

About two to three weeks for most requests. Every effort will be made to respond as quickly as possible. If you wish, you may call in requests.

11

I have looked up several courses and MOS's for one applicant. It appears that a lot of the recommended credit is in the same subject area. How can I avoid granting too much or duplicate credit to this person? Also, if I grant credit for a course, should I also grant credit for the MOS?

You may grant credit for any combination of learning experiences. In doing so, however, you must be alert to the possibility of overlapping credit recommendations. When the person is applying for credit for more than one learning experience, the recommendations might cover some of the same learning. In such cases, awarding a simple total of the recommended credits could result in the award of more credit than the learning merits. Credit recommendations may overlap between (1) related courses, (2) courses and related MOS's, (3) related enlisted MOS's, and (4) enlisted and warrant officer MOS's. The MOS and course exhibits contain information that will assist you in identifying cases of duplication.

1. *Course recommendations* will overlap when the individual has participated in several military courses in the same subject area and at the same level.

2. *Course recommendations and MOS recommendations* will overlap when the individual has acquired his or her proficiency, or a significant portion of it, through completion of one or more formal service school courses. That is, some formal courses are MOS-producing; successful completion of the course leads to the award of a specific MOS. Other courses often supplement on-the-job training and work experience and are clearly related to the skills, competencies, and knowledge required for proficiency in an MOS. Related MOS's include those awarded upon completion of the course, those required as a prerequisite to the course, and those for which the course is supplementary.

3. *Enlisted MOS recommendations* will overlap when the soldier or veteran has held two or more MOS's that require related qualifications and the performance of related or similar duties. MOS's in the same career management field or subfield are probably related.

4. *Enlisted and warrant officer MOS recommendations* will probably overlap because most warrant officers progress through the enlisted ranks, in enlisted MOS's directly related to warrant officer positions. Related MOS's are noted in the "Career Pattern" item in warrant officer MOS exhibits.

To reconcile overlapping credit recommendations, compare the descriptions and recommendations for all courses and/or MOS's and interview the soldier or veteran to obtain additional information. When the learning outcomes, courses in which credits are recommended, and the number of credits recommended for a given course or subject are the same or very similar, there is overlap, and you should modify the credit recommendations to avoid granting duplicate credit. To determine how much credit without duplication may be awarded to an individual who has completed a number of courses and held a number of MOS's, use the following steps:

1. Identify Army MOS's held and formal courses completed by the individual from the official military records the individual provides.
2. Locate all pertinent and available MOS exhibits and course exhibits in the *Guide*, and note the "Related Occupation Codes" listed in the course exhibit.
3. For enlisted MOS's, locate the correct skill level within each enlisted MOS exhibit; for courses, locate the correct version within each course exhibit.
4. Read and compare all the descriptions.
5. On the basis of the person's program of study, identify the appropriate recommendations in each exhibit.
6. Read and compare all the pertinent recommendations. It may be helpful to list the amount of credit and the subject areas of each recommendation.
7. If necessary, obtain additional information from the individual through interview or further assessment.
8. When the nature and extent of the individual's learning has been identified, refer to all pertinent recommendations and make decisions on how much credit may be awarded without duplication. Credit should be awarded as appropriate to the educational goals of the individual and the institution.

If you cannot determine whether duplication exists, write to the Advisory Service.

12

Why does the MOS I just looked up have more credit recommended than the course that leads to it?

It is rare for the subject matter covered in a course to perfectly coincide with the learning represented by occupational proficiency. In most cases, there is quite a difference in scope: a difference in the subject matter mastered by the learner and, when the subject matter is the same, a difference in the depth and breadth of the learning.

Usually the scope of a course is narrower than that of the job. Most Army courses are designed to prepare the soldier to be able to function on the job or to take on additional tasks. As such, the courses normally provide entry-level occupational skills and competencies. However, successful performance in an MOS is predicated on the additional factor of job experience and/or extensive self-instruction.

Enlisted and warrant officer MOS's related to courses are listed in the course exhibit item "Related Occupation Codes" in Army course exhibits. A related MOS may be one that is awarded upon completion of the course, one for which the course is supplementary, or one which is required as a prerequisite to the course. Therefore, this item in the course exhibit tells you that there is a relationship—a likelihood of overlapping credit recommendations—between the MOS and the course. The term "overlapping" connotes that at least part of the learning represented by the MOS is the same as that for the course; therefore, some of the credits recommended may duplicate each other. A suggested procedure for resolving duplication is given in the answer to question 11.

13

When credit is recommended in more than one category, what should I do?

Credit has frequently been recommended in more than one category. One reason for multiple-category recommendations is that the scope of a given MOS or course reflects learning in several subject fields at different levels of complexity. The learning outcomes acquired in a course or MOS in one subject field may apply to courses normally included in lower-division baccalaureate/associate degree programs, while those in another subject field may apply to courses normally included in upper-division baccalaureate programs. Another reason for multiple-category recommendations is that learning in a given subject field can be applied to courses and programs of study encompassed by more than one of the categories. That is, learning in business, for example, may apply to the vocational certificate category and to the lower-division baccalaureate category. A thorough reading of the exhibit will help you to determine which category is the best for you to apply. You will need to read the exhibit and compare learning outcomes achieved and course objectives and content with those of your own institution.

In the first instance—learning in several subject fields—the recommended credits may be added as long as all the subjects are applicable to the student's program of study at your institution.

> *Example A:*
>
> In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills and 1 in principles of management. In the upper-division baccalaureate category, 3 semester hours in personnel management (6/75).

In Example A, up to 5 semester hours may be awarded if they apply to the student's program: 1 in communication skills, 1 in principles of management, and 3 in personnel management.

In the second instance—learning in a given subject field that is applied to two or more categories—the recommended credits probably should not be added. You will have to determine how they apply to the student's program of study at your institution.

> *Example B:*
>
> In the vocational certificate category, 15 semester hours in electricity or electronics. In the lower-division baccalaureate/associate degree category, 10 semester hours in electricity or electronics. In the upper-division baccalaureate category, 5 semester hours in electricity or electronics (6/75).

In Example B, to determine how many credits to award, compare the information in the exhibit description with the desired outcomes of electricity or electronics or related courses and programs of study at your institution. Award credit based on comparison of these outcomes.

In the third instance—a combination of Examples A and B—you may combine the credit categories when the subject areas are different, but should not add subject areas with the same title.

> *Example C:*
>
> In the lower-division baccalaureate/associate degree category, 3 semester hours in typing and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in office management and 2 for field experience in management (11/75).

The 3 semester hours in office management recommended in the lower-division baccalaureate/associate degree category and the 3 in office management recommended in the upper-division baccalaureate category should not be combined for a total of 6. Eight semester hours might be granted if they apply to the student's program: 3 in typing, 3 in office management, and 2 for field experience in management. The evaluators have described the course content, and using that description from the course exhibit, you must determine the appropriate application of the credit recommendation.

All three examples are from early evaluations. Evaluators now place the credit in a given subject area in the highest, most appropriate, category. If credit is placed in more than one category, specific subjects will be cited. For example, if credit in the lower division is in personnel supervision, credit in the upper division might be in human resource management.

As a general rule, you should read the course description or the MOS summary and skill level descriptions, and then award credit as it best applies to the student's program of study, as determined through academic counseling.

Credit may be applied to a student's program in various ways: (1) applied to the major to replace a required course, (2) applied as an optional course within the major, (3) applied as a general elective, (4) applied to meet basic degree requirements, or (5) applied to waive a prerequisite. Credit granted by a postsecondary institution will depend on institutional policies and degree requirements.

For additional help in this area, see the Model Policy on page xxxi.

14

Do I have to grant credit *exactly* as it appears in the recommendation?

No. You are under no obligation to grant credit, although most colleges do recognize learning that occurs in a military setting. The use of ACE recommendations is the prerogative of education officials and employers. The recommendations are provided to assist you in assessing the applicability of a person's military learning experiences to his or her educational program or occupation. *You may modify the recommendations in accordance with your institution's policies and practices.*

You should keep in mind that the recommendations are advisory and are designed as a tool for use in giving due recognition to an individual for learning experiences acquired in the armed services. You should also keep in mind that the learning of some service personnel may exceed the skills, competencies, and knowledge evaluated for a specific course or MOS. In these cases, you may wish to conduct further assessment. (See question 15 for information about assessment techniques.)

15

May I conduct my own assessment of an applicant's learning?

Yes. In a sense, you are *always* conducting your own assessment, even when you use the recommendations in this book. The *Guide* is one of many tools you can use to assess what an applicant has learned and how that learning can be applied to a specific program of study at your institution. When you cannot find a recommendation in the *Guide* or cannot obtain one from the Advisory Service, we encourage you to use other means to assess what the person has learned.

There is a wide variety of assessment techniques that you can use, e.g., written examinations, oral examinations, faculty committee assessment, evaluation of materials supplied by the applicant, personal interviews, performance tests, and standardized examinations such as CLEP. A combination of several techniques will usually result in a reliable assessment of the person's learning.

You may learn more about assessment techniques through the publications of the Council for Adult and Experiential Learning (CAEL). Their publications may be purchased from CAEL, 223 W. Jackson Blvd., Suite 510, Chicago, IL 60606 (312-922-5909).

The *ACE Guide Series* now comprises this *Guide* and companion volumes, *The National Guide to Educational Credit for Training Programs* (which lists recommendations for courses offered by business and industry, government agencies, professional and voluntary associations, and labor unions), and the *Guide to Educational Credit by Examination* (which provides descriptions and credit recommendations for nationally recognized testing programs). This *Guide* and the *National Guide* may be purchased through Macmillan Professional Books Division, Macmillan Publishing Co., Inc., 866 Third Avenue, New York, NY 10022 (800-257-5755). The *Guide to Educational Credit by Examination* may be purchased from ACE Publications.

16

How can the MOS recommendations assist me in conducting an individual assessment of a student?

The process of conducting an individual assessment to verify MOS proficiency is not very different from making a "portfolio" assessment of a student's experiences. The *Guide* can provide guidance to help simplify the steps in the assessment process.

When a student submits a portfolio, the institution official must (1) determine the thoroughness and preciseness of the documentation of the experience, (2) identify clearly the learning outcomes that have been achieved, (3) judge the equivalence of the learning outcomes to those achieved through the institution's programs of study or courses, and (4) translate the learning outcomes into credit. In considering whether to grant credit for an MOS, you should keep in mind that ACE evaluation teams have already accomplished three of these steps. They have (1) determined the expected learning outcomes of that MOS, (2) judged the compatibility of the MOS training with postsecondary curricula, and (3) translated the learning outcomes into credit recommendations for specific postsecondary courses. These teams are composed of subject-matter experts, nearly all of whom are faculty members at postsecondary education institutions. Accompanied by an ACE staff member, they actually visit military installations where soldiers are working in their MOS's.

In order to make a recommendation, ACE evaluators must first identify the skills, competencies, and knowledge associated with a given MOS. To do this, they use various resources, including the official Army MOS regulation, which describes the duties and qualifications for each MOS skill level; technical manuals, soldier's manuals, and other publications used by soldiers in the day-to-day performance of their duties and to prepare for their SQTs; MOS evaluation tests or SQTs; and study guides that outline the proficiency requirements for each MOS skill level. During site visits to Army installations, evaluators interview and observe soldiers on the job.

Thus, ACE provides a sound initial assessment of MOS's in terms of their equivalency to postsecondary learning. The institution must verify whether the individual actually possesses the skills and knowledge described in the *Guide* entry before awarding the recommended credit. Thus, although the ACE MOS credit recommendations are valid in a general way, they cannot be applied routinely to every individual seeking MOS-related credit. When you can confirm that the individual has attained some or all of the skills and knowledge represented by the MOS, the ACE recommendation can be utilized or appropriately modified.

17

Should a two-year college use only the lower-division credit recommendations? And, should a four-year college use only upper-division credit recommendations?

Not necessarily. Evaluators are instructed to be as general as possible. That is, they place a course recommendation in the category in which it is *generally* taught at most institutions. If your institution teaches a given course at a different level, you are encouraged to grant the credit at that level. Depending on the recommendation, the programs of study available at the institution, and the objectives of the student, all types of institutions can use any or *all* of the four categories used in the *Guide*, namely the vocational certificate category, the lower-division baccalaureate/associate degree category, the upper-division baccalaureate category, and the graduate degree category. Please read "Categories of Credit" in Appendix A. (See questions 11, 12, 13, 14, and 15.)

18

I am an employer. How will the *Guide* be useful to me?

As an employer, you may find the exhibits helpful when hiring and placing veterans in jobs. The recommendations and descriptions enable you to compare a veteran's training and experience with the qualifications and requirements for jobs. The recommendations relate learning to postsecondary courses and curricula and, in some cases, to apprentice training programs.

19

What is the *Handbook to the Guide to the Evaluation of Educational Experiences in the Armed Services?*

The *Handbook to the Guide* was designed to keep institutional and military representatives up to date on the activities of ACE and The Center as well as to provide credit recommendations for courses and occupations evaluated since the latest *Guide* was printed. Revisions are mailed to military education personnel and civilian institutions three times between *Guides*. Sections most likely to be revised are those on exams, other aids, and evaluation updates.

20

I have heard that active duty Army personnel may obtain a transcript containing a servicemember's military training and educational experiences while in the Army. Is this true?

Yes. An Army/ACE Registry System (AARTS) transcript is available to active duty enlisted personnel and veterans who entered the service on or after October 1, 1981. The transcript will document courses, Military Occupational Specialties (MOS's) held, Skill Qualification Test (SQT) scores, and college-level standardized test results with descriptions and American Council on Education (ACE) credit recommendations.

Service members can obtain a request form (DA Form 5454-R) from the *Handbook*, the *Guide*, or from their local education center office or send a request directly to: AARTS Operations Center, Ft. Leavenworth, KS 66027-5073. There is no charge for the transcript. (See Appendix G for a sample transcript and a sample request form. The request form may be duplicated as necessary.)

21

Why don't all courses taken by a soldier or a veteran while on active duty in the Army appear on the AARTS transcript?

Automation of military course completion records began in 1984. As a result you may find omissions in the military course completion section of the transcript. ACE has determined that transcript omissions are permissable based on results of their survey of college registrars. When information is missing from AARTS transcripts, soldiers should use DD Form 295 and veterans should use DD Form 214 to supplement transcripts.

22

What distinguishes an official AARTS transcript from an unofficial issuance?

An official AARTS transcript has the phrase "institutional copy" printed at the top of each page of the transcript. When a soldier or veteran requests that a transcript be sent to a particular college or university, entry of that institution's "FICE code" alerts the system to automatically print "institutional copy" on the transcript pages. This procedure was recommended by the committee of college registrars who have advised AARTS since the initial development of the transcript registry. Transcripts going to soldiers, veterans, education center counselors or employers do not contain the phrase "institutional copy." For soldiers applying for admission to colleges and universities prior to their transition from active duty, AARTS transcripts included in the Admissions Packet from the United States Army Continuing Education System are not official transcripts. They are provided for information and initial planning purposes only. You should have the soldier request that an official transcript be sent to your institution to meet your established time requirements.

23

An Army student I'm counseling has taken an Air Force course. It's not in the Air Force volume of the *Guide*. What should I do?

Anyone attending an Air Force school or course can obtain a Community College of the Air Force (CCAF) transcript which documents that training if the school or course is recognized by CCAF for credit. The transcript may be used to request transfer of credit to another institution or otherwise document college credit, since non-Air Force personnel cannot enroll in CCAF. CCAF does not award credit for all Air Force courses, but only those regularly attended by Air Force enlisted personnel and taught by CCAF-affiliated schools.

A CCAF transcript may be obtained by sending a completed AF Form 2099 or a brief letter requesting transcript service to CCAF/RRRA, Maxwell Air Force Base, AL 36112-6655. A certificate of training must accompany the request. DD Form 219 is not acceptable. Specify the type of transcript (personal or official) and the address to which the transcript is to be mailed. Provide full name, social security number, and ensure that the person whose transcript is requested signs the request form. The transcripts are free. Official transcripts will be mailed only to institutions.

24

I understand many military records were destroyed in a fire at the General Services Administration a number of years ago. What should I do if the applicant's military records were among those destroyed?

Many records were reclaimed or reconstructed and are now available. In addition, the applicant's copies of certificates may be used in lieu of records destroyed in the GSA fire.

25

What are USAFI and DANTES? Can I grant credit for the courses and tests listed on an applicant's USAFI or DANTES military test reports?

USAFI was the United States Armed Forces Institute, which offered an extensive educational program to active-duty personnel. USAFI correspondence, seminar, and self-study courses, end-of-course tests, and Subject Standardized Tests (SSTs) were made available to service personnel worldwide until 1974, when USAFI was disestablished. Credit recommendations for USAFI courses and examinations may be found in the *Handbook to the*

Guide. Subsequently, the Defense Activity for Non-Traditional Education Support (DANTES) was established in 1974, and that agency continued the development and administration of Subject Standardized Tests and other educational services. The Center continues to recommend credit for USAFI offerings and DANTES SSTs. Credit recommendations for DANTES SSTs are found in the *Handbook*. Detailed descriptions may be found in the *Guide to Educational Credit by Examination*, which can be purchased through ACE Publications.

In verifying completion of USAFI or DANTES courses or tests, the military test report should not be considered official. That report is given to all service personnel who have taken a course or test. To obtain official USAFI or DANTES transcripts, refer to the addresses provided in Appendix A, under "Other Recommendations."

26

We have received a transcript from a military service school listing semester credits and carrying the statement that the school is accredited by one of the six regional accrediting associations. How do we handle this?

At this time we know of no military schools that are accredited above the certificate level other than the following: Community College of the Air Force, which is accredited at the two-year community college level; Army Command and Staff College at Fort Leavenworth, Kansas, which is accredited to grant an M.A. degree; Air Force Institute of Technology at Wright-Patterson Air Force Base, Ohio, which is accredited through the doctoral level; Defense Intelligence College, Washington, DC, accredited to grant an M.A. degree; Naval Postgraduate School, Monterey, CA, accredited through the doctoral level; Uniformed Service University of the Health Sciences School of Medicine, Bethesda, MD, accredited through the doctoral level; and, of course, the Service Academies.

We recommend that you handle the certificate-level credit listings in accordance with your institutional policy regarding certificate-level credit.

27

I've found exhibits for most enlisted occupations, but not for the Air Force. How come?

The student may write to the Community College of the Air Force (CCAF) to obtain a transcript which will include credit for the AFSCs held, reported as internship. The student should write to CCAF/RRRA, Office of the Registrar, Maxwell AFB, AL 36112-6655.

Marine Corps MOS recommendations are included in the *Guide*. Recent evaluations have been conducted for MOS's in the aircraft maintenance and avionics occupational fields. The exhibits are in Volume 4. Refer to How to Find and Use Marine Corps MOS Exhibits and Appendix A in Volume 4 for information on the Marine Corps MOS system.

If you are not already receiving the newsletter, write to the Editor, Update, The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036–1193.

Awarding Credit for Extrainstitutional Learning

The following statement by the ACE Commission on Educational Credit and Credentials has been approved by the ACE Board of Directors and endorsed by the Council on Postsecondary Accreditation.

The American Council on Education recommends that postsecondary education institutions develop policies and procedures for measuring and awarding credit for learning attained outside their sponsorship.[1]

American society abounds in resources for learning at the postsecondary level. Public, private, and proprietary education institutions exercise the central but not exclusive responsibility for instruction and learning. Associations, business, government, industry, the military, and unions sponsor formal instruction. In addition, independent study and reading, work experiences, the mass media, and social interaction contribute to learning and competency.

Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning:

- Educational credentials have a significant bearing on the economic, professional, and social status of the individual. Thus, social equity requires that equivalent learning, regardless of where and how it is achieved, be incorporated into the system of rewards for learning and competency.
- Recognition encourages learning and contributes to pedagogical effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

In the development of institutional policies and procedures, the American Council on Education recommends the following guidelines and resources.

Guidelines

1.

Reliable and valid evaluation of student achievement is the sine qua non in awarding credit. Experience, whether acquired at work, in social settings, in the library, at home, or in the formal classroom, is in itself an inadequate basis for awarding credit. Increased attention in choosing evaluation procedures and techniques and more thorough evaluation are necessary when learning has been attained without participation in a program of study prescribed by an educational institution and offered by its faculty.

2.

In determining whether it is appropriate to accept a student's extrainstitutional learning for credit, the governing considerations should be its applicability to the student's program of study, including graduation requirements, and the relationship of the learning to the institution's mission, curricula and standards for student achievement. Learning should be articulated, documented and measured in these terms.

3.

Institutions should evaluate extrainstitutional learning only in subject-matter fields in which they have or can arrange for faculty expertise or where they can rely on nationally validated examinations or other procedures for establishing credit equivalencies. Institutions should award credit in these areas only if the quality of learning meets their standards for student achievement. Normally, institutions should evaluate learning and award credit only in subject fields in which they offer courses or curricula. However, if the acquisition of college level learning outcomes has been demonstrated in an area not taught by the institution, but related to the student's program of study, an exception may and ought to be made.

4.

Institutions awarding credit for extrainstitutional learning should develop clearly stated policies regarding administrative responsibility, student eligibility, means of assessment, recording of results on transcripts, storage of documentation, student fees, and maximum number of credits allowable. Information on these and related institutional policies and procedures should be disseminated to students and faculty for maximum awareness and utilization.

5.

Institutional policy should include provision that the institution's policies and procedures for awarding credit for extrainstitutional learning should be subject to periodic reevaluation.

---

[1] "Extrainstitutional learning" is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary educational institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military, and unions.

Transfer and Award of Credit

The following set of guidelines was developed by the three national associations whose member institutions are directly involved in the transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation. The need for such a statement came from an awareness of the growing complexity of transfer policies and practices, which have been brought about, in part, by the changing contours of postsecondary education. With increasing frequency, students are pursuing their education in a variety of institutional and extrainstitutional settings. Social equity and the intelligent use of resources require that validated learning be recognized wherever it takes place.

The statement is intended to serve as a guide for institutions developing or reviewing policies dealing with transfer and award of credit. The statement is under periodic review by the three associations, and reactions to it would, of course, be welcome. Comments may be directed to Henry Spille, Vice President, ACE, and Director, The Center for Adult Learning and Educational Credentials.

Robert H. Atwell, President

American Council on Education

This statement is directed to institutions of postsecondary education and others concerned with the transfer of academic credit among institutions and award of academic credit for extrainstitutional learning. Basic to this statement is the principle that each institution is responsible for determining its own policies and practices with regard to the transfer and award of credit. Institutions are encouraged to review their policies and practices periodically to assure that they accomplish the institutions' objectives and that they function in a manner that is fair and equitable to students. Any statements, this one or others referred to, should be used as guides, not as substitutes, for institutional policies and practices.

Transfer of credit is a concept that now involves transfer between dissimilar institutions and curricula and recognition of extrainstitutional learning, as well as transfer between institutions and curricula with similar characteristics. As their personal circumstances and educational objectives change, students seek to have their learning, wherever and however attained, recognized by institutions where they enroll for further study. It is important for reasons of social equity and educational effectiveness, as well as the wise use of resources, for all institutions to develop reasonable and definitive policies and procedures for acceptance of transfer credit. Such policies and procedures should provide maximum consideration for the individual student who has changed institutions or objectives. It is the receiving institution's responsibility to provide reasonable and definitive policies and procedures for determining a student's knowledge in required subject areas. All institutions have a responsibility to furnish transcripts and other documents necessary for a receiving institution to judge the quality and quantity of students' work. Institutions also have a responsibility to advise the students that the work **reflected** on the transcript **may or may not** be accepted by a receiving institution.

INTERINSTITUTIONAL TRANSFER OF CREDIT

Transfer of credit from one institution to another involves at least three considerations:

(1) the educational quality of the institution from which the student transfers

(2) the comparability of the nature, content, and level of credit earned to that offered by the receiving institution

(3) the appropriateness and applicability of the credit earned to the programs offered by the receiving institution, in light of the student's educational goals.

Accredited Institutions

Accreditation speaks primarily to the first of these considerations, serving as the basic indicator that an institution meets certain minimum standards. Users of accreditation are urged to give careful attention to the accreditation conferred by accrediting bodies recognized by the Council on Postsecondary Accreditation (COPA). COPA has a formal process of recognition which requires that all accrediting bodies so recognized must meet the same standards. Under these standards, COPA has recognized a number of accrediting bodies, including:

(1) regional accrediting commissions (which historically accredited the more traditional colleges and universities but which now accredit proprietary, vocational-technical, and single-purpose institutions as well)

(2) national accrediting bodies that accredit various kinds of specialized institutions

(3) certain professional organizations that accredit freestanding professional schools, in addition to programs within multipurpose institutions (COPA annually publishes a list of recognized accrediting bodies, as well as a directory of institutions accredited by these organizations).

Although accrediting agencies vary in the ways they are organized and in their statements of scope and mission, all accrediting bodies that meet COPA's standards for recognition function to assure that the institutions or programs they accredit have met generally accepted minimum standards for accreditation.

Accreditation affords reason for confidence in an institution's or a program's purposes, in the appropriateness of its resources and plans for carrying out these purposes, and in its effectiveness in accomplishing its goals, insofar as these things can be judged. Accreditation speaks to the probability, but does not guarantee, that students have met acceptable standards of educational accomplishment.

Comparability and Applicability

Comparability of the nature, content, and level of transfer credit and the appropriateness and applicability of the credit earned to programs offered by the receiving institution are as important in the evaluation process as the accreditation status of the institution at which the transfer credit was awarded. Since accreditation does not address these questions, this information must be obtained from catalogues and other materials and from direct contact between knowledgeable and experienced faculty and staff at both the receiving and sending institutions. When such considerations as comparability and appropriateness of credit are satisfied, however, the receiving institution should have reasonable confidence that students from accredited institutions are qualified to undertake the receiving institution's educational program.

Admissions and Degree Purposes

At some institutions there may be differences between the acceptance of credit for admission purposes and the applicability of credit for degree purposes. A receiving institution may accept previous work, place a credit value on it, and enter it on the transcript. However, that previous work, because of its nature and not its inherent quality, may be determined to have no applicability to a specific degree to be pursued by the student.

Institutions have a responsibility to make this distinction, and its implications, clear to students before they decide to enroll. This should be a matter of full disclosure, with the best interests of the student in mind. Institutions also should make every reasonable effort to reduce the gap between credits accepted and credits applied toward an educational credential.

Unaccredited Institutions

Institutions of postsecondary education that are not accredited by COPA-recognized accrediting bodies may lack that status for reasons unrelated to questions of quality. Such institutions, however, cannot provide a reliable, third-party assurance that they meet or exceed minimum standards. That being the case, students transferring from such institutions may encounter special problems in gaining acceptance and transferring credits to accredited institutions. Institutions admitting students from unaccredited institutions should take special steps to validate credits previously earned.

Foreign Institutions

In most cases, foreign institutions are chartered and authorized by their national governments, usually through a ministry of education. Although this policy provides for a standardization within a country, it does not produce useful information about comparability from one country to another. No other nation has a system comparable to voluntary accreditation. The Division of Higher Education of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) is engaged in a project to develop international compacts for the acceptance of educational credentials. At the operational level, four organizations—the Council on International Educational Exchange (CIEE), the National Council on the Evaluation of Foreign Student Credentials (CEC), the National Association for Foreign Student Admissions (NAFSA), and the National Liaison Committee on Foreign Student Admissions (NLC)—often can assist institutions by distributing general guidelines on admission and placement of foreign students. Equivalency or placement recommendations are to be evaluated in terms of the programs and policies of the individual receiving institution.

VALIDATION OF EXTRAINSTITUTIONAL AND EXPERIENTIAL LEARNING FOR TRANSFER PURPOSES

Transfer-of-credit policies should encompass educational accomplishment attained in extrainstitutional settings as well as at accredited postsecondary institutions. In deciding on the award of credit for extrainstitutional learning, institutions will find the services of the American Council on Education's Center for Adult Learning and Educational Credentials helpful. One of The Center's functions is to operate and foster programs to determine credit equivalencies for various modes of extrainstitutional learning. The Center maintains evaluation programs for formally structured courses offered by the military, and civilian noncollegiate sponsors such as business, corporations, government agencies, and labor unions. Evaluation services are also available for examination programs, for occupations with validated job proficiency evaluation

systems, and for correspondence courses offered by schools accredited by the National Home Study Council. The results are published in a Guide series. Another resource is the General Education Development (GED) Testing Program, which provides a means for assessing high school equivalency.

For learning that has not been validated through the ACE formal credit recommendations process or through credit-by-examination programs, institutions are urged to explore the Council for Adult and Experiential Learning (CAEL) procedures and processes.

USES OF THIS STATEMENT

This statement has been endorsed by the three national associations most concerned with practices in the area of transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation.

Institutions are encouraged to use this statement as a basis for discussions in developing or reviewing institutional policies with regard to transfer. If the statement reflects an institution's policies, that institution might want to use this publication to inform faculty, staff, and students.

It is recommended that accrediting bodies reflect the essential precepts of this statement in their criteria.

Approved by the Executive Committee, American Association of Collegiate Registrars and Admissions Officers
November 21, 1978 and reaffirmed in 1989.

Approved by the American Council on Education/Commission on Educational Credit and Credentials
December 5, 1978 and reaffirmed in 1989.

Approved by the COPA Board
October 10, 1978

Elements of a Model Policy on Awarding Credit for Extrainstitutional Learning

Extrainstitutional learning is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary education institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military and unions.

I. Example Statement of General Policy

Degree credit shall be awarded for postsecondary-level extrainstitutional learning. Such credit awards shall be made under protocols designed to assure that reliable and valid measures of learning outcomes are or have been applied.

Rationale

Adult students are demanding that their learning acquired in extrainstitutional settings be assessed and that appropriate degree-related credit be awarded. This is a reasonable request and also one in keeping with the national interest. Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning.

American society abounds in resources for learning at the postsecondary level. Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials accordingly have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

Educational credentials have a significant bearing on the economic, professional, and social status of the individual. It follows that social equity requires that equivalent learning regardless of where and how it is achieved be incorporated into the system of rewards for learning and competency. Recognition encourages learning and contributes to teaching effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Through reliable and valid assessment of extrainstitutional learning, more persons can be enabled to enter college and work successfully toward degrees and other academic goals. Many of these individuals are those who have been educationally disadvantaged in the past.

II. Example Policy for Administrative Responsibility

Responsibility for administering policies and procedures for awarding credit for extrainstitutional learning rests with the Academic Vice President (or other designated senior academic official).

Rationale

Awarding credit is an academic matter. Therefore, administrative responsibility for the policies and procedures pertaining to awarding credit for extrainstitutional learning should be assigned to the institution's senior academic official. Policy implementation and application may be delegated to other institutional officials such as deans, department chairpersons, and registrars. However, oversight of their policy implementation and application is performed by a senior academic official.

Example of Application of the Policy

The academic vice president delegates to the institutional registrar the responsibility for transcripting credit awarded on the basis of recommendations in the ACE Guides (the policy was approved through the institution's usual governance procedures) and provides the registrar with guidelines for performing this responsibility. Included in the guidelines are a series of steps to follow in determining how to apply the ACE credit recommended for a course whose title is not the same as the title of any course offered by the institution.

The ACE *Guide* recommends 3 semester hours in automotive maintenance, but the institution's courses are more specific and carry titles such as Tune-Up I, Auto Brakes, and Automatic Transmission I. In accordance with the guidelines, the registrar compares course descriptions in the institution's catalog with the course description in the *Guide*, finds that the learning outcomes acquired through Tune-Up I match very closely the learning outcomes acquired through the military's automotive maintenance course, and transcripts 3 semester hours in Tune-Up I.

III Example Policy on Learning That Will Be Evaluated and Who Will Conduct the Evaluations

Extrainstitutional learning related to subject areas, courses and programs of study will be evaluated for registered students. Established institutional evaluation procedures will be followed, using one or more of the authorized publications and methods for effecting assessment. Students of any age may apply for credit for extrainstitutional learning at any time during a period of enrollment.

Rationale

The learning that is evaluated must be in subject areas in which faculty expertise is available or in which expertise can be arranged. This expertise is essential for conducting evaluations and making credit-award decisions. If subject-matter experts do not conduct the evaluations and make the decisions, the credibility of the activity is suspect.

While the great majority of students requesting credit for extrainstitutional learning will be of relatively mature years, it is possible that "young students" may have acquired learning in extrainstitutional settings. Providing a student can document the attainment of appropriate learning outcomes, he or she should receive credit regardless of age. While most applications for award of extrainstitutional learning credit will be received at the time of enrollment from new students, it is possible that students already enrolled may realize that they, too, have extrainstitutional learning experiences that might qualify for credit awards. It is also possible that enrolled students, especially those who are employed, will continue to learn in noncollegiate settings, and will want their learning assessed. Student initiatives with respect to extrainstitutional learning assessment shall not be limited or restricted to the initial term of enrollment.

Example of Application of the Policy

A 19-year old student has been enrolled at Local College for two years and is about to enter her junior year. At the time of enrollment, it did not occur to her that the foreign language requirement might be satisfied with a language other than one of those taught at the institution. This student's parents were refugees from Hungary who entered the United States in 1958. The Hungarian language is spoken in the home and the student speaks the language fluently. The student is able to document to the satisfaction of the institution's language faculty, through evaluation done by a person in the community fluent in Hungarian, that she is, indeed, proficient in Hungarian. She received 6 credits in Hungarian that satisfy the foreign language requirement for the bachelor's degree.

IV. Example Policy on Publications and Methods for Use in Awarding Credit for Extrainstitutional Learning

Nine publications and methods are permitted for use in awarding credit for extrainstitutional learning. These publications and methods are: (1) ACE *Guide to the Evaluation of Educational Experiences in the Armed Services*, (2) ACE *National Guide to Educational Credit for Training Programs*, (3) ACE *Guide to Educational Credit by Examination*, (4) New York Regents *Guide to Educational Programs in Noncollegiate Organizations*, (5) College Entrance Examination Board Advanced Placement Program (CEEB/AP), (6) department challenge examinations and/or faculty end-of-course examinations, (7) degree-relevant extrainstitutional learning credit awarded and transcripted by other accredited institutions, as well as that credit transcripted by ACE on the Army/ACE Registry Transcript System (AARTS) and the Registry of Credit Recommendations (ROCR), (8) subject-matter experts who are not members of the institution's faculty but who evaluate extrainstitutional learning at the faculty's request, and (9) individual portfolios using Council for Adult and Experiential Learning (CAEL) or other standardized guidelines.

In addition, advice on using other publications and methods for awarding credit for extrainstitutional learning may be sought from the American Council on Education.

Rationale

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in the military. More recently, the *National Guide to Educational Credit for Training Programs* and the *Guide to Educational Credit by Examination* have attained similar stature. ACE has worked cooperatively with the Department of Defense, the armed services, business, industry, labor unions, other organizations providing education and training, and test publishers, as well as with accredited colleges and universities in developing the credit recommendations presented in the *Guide* series. All recommendations carried are the result of careful and periodic review by evaluation teams that consist of university and college faculty members who are subject-matter experts. All evaluation teams work under policies and procedures approved by the ACE Commission on Educational Credit and Credentials and under protocols and supervision provided by the staff of the ACE Center for Adult Learning and Educational Credentials.

The policies and procedures used to develop the exhibits in the New York Regents *Guide to Educational Programs in Noncollegiate Organizations* are similar to those used by the American Council on Education.

The CEEB/AP program permits high school students to demonstrate the attainment of college-level learning outcomes; the important factor is that learning outcomes are attained, not where the learning took place (in a high school) or who taught the course (usually a high school teacher).

The practice of administering departmental or individual faculty member challenge examinations or end-of-course examinations is long-standing and permits the faculty members to make direct judgements about the equivalence of learning for specific courses.

Credit transcripted on the basis of extrainstitutional learning should be treated the same as that transcripted for courses; in both instances the faculty of the sending institution has attested to the student's attainment of required learning outcomes. Credit transcripted on ACE's Army/ACE Registry Transcript System (AARTS) and Registry of Credit Recommendations (ROCR) for the Army component of the Military Evaluations Program and participants in the Program on Noncollegiate Sponsored Instruction (PONSI) should also be treated as that transcripted for courses; in these instances, teams of fac-

ulty members from accredited colleges and universities have evaluated the learning and judged its equivalence to learning acquired on campuses.

Sometimes the expertise to evaluate extrainstitutional learning is not available on the faculty; in these instances, the faculty can designate an expert to conduct the evaluation. Criteria for selection of "outside" experts should be established.

The portfolio assessment guidelines promulgated by CAEL are widely accepted by faculty assessors and are considered exemplary. The portfolio provides a reliable method for evaluating learning outcomes acquired individually, as opposed to a set of learning outcomes acquired by large numbers of persons, such as through a course offered by the U.S. Army for soldiers.

Example of Application of the Policy

A student (soldier), upon entering Local College, provides an AARTS transcript that confirms completion of a course entitled "Advanced Geodetic Surveyor" at the Engineer School, Ft. Belvoir, Virginia, in October 1981, while holding the rank of sergeant in the U.S. Army. Information on the transcript and in the ACE *Guide to the Evaluation of Educational Experiences in the Armed Services* indicates that the soldier completed this course when it was taught at Ft. Belvoir between January 1977 and November 1983. Its objectives were to train warrant officers and senior noncommissioned officers in advanced geodetic survey techniques. The course was delivered by means of lectures and practical exercises in advanced geodetic surveying techniques including map compiling, vertical and horizontal control surveys, gravity, astronomic observations, and mathematics. The *Guide* recommends that a college or university award 6 semester hours in geodesy at the upper-division baccalaureate level; this recommendation also appears on the AARTS transcript. After review of this recommendation, Local College awards this student 6 semester hours of credit in geodesy toward completion of a planned major in mathematics.

V. Example Policy on Maximum Number of Credits That May Be Awarded for Extrainstitutional Learning

The maximum number of credits that may be awarded for extrainstitutional learning is three-fourths the number required for a degree.

Rationale

Most postsecondary education institutions have a requirement that stipulates that a minimum of one-fourth of the credits required for a degree must be earned in residence. The balance of the required credits could be awarded on the basis of extrainstitutional learning. However, the credits awarded for extrainstitutional learning and those earned in residence would have to satisfy all degree requirements before a degree could be awarded. In the absence of a residency requirement, all degree requirements conceivably could be met through extrainstitutional learning.

Example of Application of the Policy

John Smith is a newly registered student at Local College. He is a financial vice president of a major U.S. corporation, CPA, and licensed realtor; he is fluent in three foreign languages—German, French, and Spanish; he has published seven articles in domestic and foreign journals and has contributed chapters in two books on international economics; he is knowledgeable about foreign countries and cultures as a result of having lived abroad for eleven years; and he is proficient in computer programming (COBOL and FORTRAN).

On the basis of Mr. Smith's demonstrated knowledge, skills, and competencies, the faculty awarded him 106 credits. The college requires 124 credits for a degree and has a 24 credit residency requirement. Therefore, Mr. Smith must earn 24 credits in residence. What courses does he take to earn 24 credits? His academic advisers decided, and Mr. Smith concurred, that he lacked knowledge about the environment, a special focus and thrust of the college's general education requirement. He took courses to satisfy this requirement and was awarded a degree.

VI. Example Policy on Recording Credits Awarded for Extrainstitutional Learning on Transcripts

The credit awarded for extrainstitutional learning shall be transcripted in the same manner as credits awarded for course completions.

Rationale

The faculty members have either evaluated the learning or approved the other means by which credit can be awarded. They have verified that learning has occurred and is equivalent to the learning acquired in their courses and programs. Therefore, special notation or differentiation of courses and credits awarded on the basis of extrainstitutional learning is unnecessary.

Example of the Application of the Policy

Examples of the way in which Mr. Smith's credit was transcripted are:

Accounting 261	—Financial Information Systems—3 semester hours
Accounting 360	—Financial Reporting Theory and Practice—3 semester hours
Computer Science 251	—Principles of Programming—FORTRAN—4 semester hours
Computer Science 252	—Principles of Programming—COBOL—4 semester hours
German 101	—Elementary German—4 semester hours
German 201	—Intermediate German—4 semester hours
German 309	—Advanced Conversation—3 semester hours

VII. Example Policy on Retention of the Documentation of Extrainstitutional Learning

Documents used to verify the award of credit for extrainstitutional learning shall be retained for one calendar year.

Rationale

The length of time documentation for the credits awarded for extra-institutional learning shall be retained should be consistent with the length of time documentation for credits awarded for classroom learning are retained. Consistency facilitates equitable handling of student documents and represents sound recordkeeping practices.

Example of Application of the Policy

Local College keeps students' final exams on file for one calendar year, after which they are shredded. Mr. Smith's documentation—copies of articles and chapters he authored, copies of his computer programs, notes and summaries of interviews faculty members had with him, etc.—were kept on file for one calendar year and were then shredded.

VIII. Student Fees for Assessing Extrainstitutional Learning

A fee for the assessment of extrainstitutional learning shall be charged.

Rationale

Assessing extrainstitutional learning, transcripting the credits awarded, etc., are valuable services to students. These services require faculty and staff time. Students should therefore pay a fee for these services just as they pay fees for other institutional services.

Example of Application of the Policy

The fee for assessing extrainstitutional learning and transcripting the results at Local College is based on its average hourly salaries for various faculty ranks (assistant professor, professor, etc.) and administrative positions plus the costs for benefits and administrative services which are computed as percentages of salaries. The average hourly salaries are multiplied by the amount of time spent in performing the evaluation and administrative functions, rounded up to the half-hour. The fee for assessing Mr. Smith's extrainstitutional learning and transcripting the results was $880.

IX. Example Policy on Oversight of the "Program"/Activity

An Oversight Committee, broadly representative of the institution's divisions/departments, shall be appointed (by the "program" administrator or through the institution's usual means of appointing committees). The major function of this committee is to review the credit award decisions to assure consistency across the institution.

Rationale

To protect the integrity and credibility of the activity, consistency is absolutely necessary. If either the faculty or the students perceive that credit awards are made capriciously, their confidence in the activity will be lost. When this occurs, the activity will no longer be viable.

Example Application of the Policy

The Oversight Committee detected that, when a faculty evaluation team for portfolio assessment was comprised of three specific faculty members, the credit awards seemed overly "generous." The Oversight Committee recommended to the administrator that these three faculty members not comprise a team. The administrator discussed the credit-award information with the three faculty members, and they agreed with the Oversight Committee's recommendation, which was then implemented.

X. Example Policy on "Program" Evaluation

The "program" for assessing extrainstitutional learning shall be evaluated on an annual basis by the academic vice-president or his designee(s).

Rationale

It is sound administrative practice to evaluate "programs" on a regular basis to determine if "program" objectives are being met. It is especially important to evaluate new "programs" so that problems are detected early on and changes can be made, if necessary. Evaluation should probably be done jointly by "program" staff and the staff of the Office of Institutional Research.

Example of Application of the Policy

At Local College, responsibility for "program" evaluation is assigned to the Office of Institutional Research, but the Office involves the "program" staff. "Program" evaluation includes but is not limited to, an indepth look at the academic performance of students who have received credit for extrainstitutional learning. Recent data showed that their overall performance, in terms of GPA, was higher than that of the student body as a whole; the average number of credits carried each semester was equivalent to the average number carried by the student body as a whole; they were enrolled in all academic departments of the college, etc. Credit awards were examined by age categories and by assessment instrument used. This information was useful to the college faculty and administrators in deciding to continue the "program."

Army Enlisted MOS Exhibits

MOS-00B-001

Diver

00B10
00B20
00B30
00B40

Exhibit Dates: 10/73–2/78.

Career Management Field: 51 (General Engineering), subfield 511 (Construction Engineering).

Description

Summary: Supervises or performs underwater reconnaissance, demolition, repair, and salvage. *Skill Level 10:* Performs as assistant to diver; operates power-driven air compressor and electric and engine-driven winches; makes simple repairs to diving gear and equipment; applies principles of water rescue and first aid. *Skill Level 20:* Able to perform the duties required for Skill Level 10; using self-contained underwater breathing apparatus, performs reconnaissance, salvage, repair, and demolition operations; collects and reports on hydrographic conditions; makes charts and maps of underwater photographs, and prepares beach or river intelligence reports and keeps the diving log; uses demolition techniques to clear underwater obstacles; employs sophisticated first aid treatment, particularly as related to diving operations. *Skill Level 30:* Able to perform the duties required for Skill Level 20; using surface-supplied air and diving equipment; performs underwater repair by caulking seams, patching holes, and clearing fouled equipment; directs or assists in underwater construction projects; rigs submerged objects for surfacing; employs underwater welding techniques and other special construction tools; operates decompression chamber; performs underwater inspection, estimates weight of underwater objects, and calculates method of lifting underwater material and objects. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises underwater reconnaissance, demolition, repair, and salvage in addition to scuba and standard diving activities; supervises diver's bell (or appropriate mechanical diving unit) and directs maintenance of diving equipment; interprets hydrographic charts, maps, and sketches; instructs in diving procedures and safety practices; prepares reports on diving operations.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in the use, operation, and maintenance of mechanical equipment and 2 in first aid. In the lower-division baccalaureate/associate degree category, 2 semester hours in first aid (5/76).

Recommendation, Skill Level 20

In the vocational certificate category, 9 semester hours in the use, operation, and maintenance of mechanical equipment and 4 in first aid. In the lower-division baccalaureate/associate degree category, 3 semester hours in mapping, 3 in technical report writing, 3 in marine and oceanographic technologies, and 4 in first aid, and additional credit for detonation/demolition and photography, on the basis of institutional evaluation (5/76).

Recommendation, Skill Level 30

In the vocational certificate category, 12 semester hours in the use, operation, and maintenance of mechanical equipment, 12 in marine underwater repair and construction, and 6 in first aid. In the lower-division baccalaureate/associate degree category, 3 semester hours in physics, 3 in mapping, 3 in technical report writing, 6 in marine and oceanographic technologies, 6 in first aid, and 3 in human relations, and additional credit for detonation/demolition and photography on the basis of institutional evaluation (5/76).

Recommendation, Skill Level 40

In the vocational certificate category, 18 semester hours in the use, operation, and maintenance of mechanical equipment, 18 in marine underwater repair and construction, and 6 in first aid. In the lower-division baccalaureate/associate degree category, 3 semester hours in mapping, 3 in marine geography, 6 in physics, 6 in technical report writing, 9 in marine and oceanographic technologies, 6 in first aid and safety, 3 in human relations, 3 in personnel supervision, and 6 for field experience in management, and additional credit for detonation/demolition/salvage and photography on the basis of institutional evaluation (5/76).

Summary: Supervises or performs underwater reconnaissance, demolition, repair, and salvage. *Skill Level 10:* Performs as assistant to senior divers, operating power-driven air compressor and electric and engine-driven winches; makes simple repairs to diving gear and equipment; applies principles of water rescue and first aid; may perform as diver, using self-contained underwater breathing apparatus and surface-supplied air diving equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; using self-contained underwater breathing apparatus, performs reconnaissance, salvage, repair, and demolition operations; serves as senior diver; collects and reports on hydrographic conditions; makes charts and maps of underwater conditions, takes underwater photographs, and prepares beach or river intelligence reports and keeps the diving log; uses demolition techniques to clear underwater obstacles; employs sophisticated first aid treatment, particularly as related to diving operations. *Skill Level 30:* Able to perform the duties required for Skill Level 20; using surface-supplied air and diving equipment, performs underwater repair by caulking seams, patching holes, and clearing fouled equipment; directs or assists in underwater construction projects; rigs submerged objects for surfacing; employs underwater welding techniques and other special construction tools; operates decompression chamber; performs underwater inspection, estimates weight of underwater objects, and calculates method of lifting underwater material and objects. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises underwater reconnaissance, demolition, repair, and salvage in addition to scuba and standard diving activities; supervises diver's bell (or appropriate mechanical diving unit) and directs maintenance of diving equipment; interprets hydrographic charts, maps, and sketches; instructs in diving procedures and safety practices; prepares reports on diving operations.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in the use, operation, and maintenance of mechanical equipment and 2 in first aid; if duties included diving, 3 semester hours in scuba diving. In the lower-division baccalaureate/associate degree category, 2 semester hours in first aid (9/79).

Recommendation, Skill Level 20

In the vocational certificate category, 9 semester hours in the use, operation, and maintenance of mechanical equipment, 4 in first aid, and 6 in scuba diving. In the lower-division baccalaureate/associate degree category, 3 semester hours in mapping, 3 in technical report writing, 3 in marine and oceanographic technologies, 4 in first aid, and 3 in scuba diving, and additional credit for detonation/demolition, photography, and scuba diving on the basis of institutional evaluation (9/79).

Recommendation, Skill Level 30

In the vocational certificate category, 12 semester hours in the use, operation, and maintenance of mechanical equipment, 12 in marine underwater repair and construction, 6 in scuba diving, and 6 in first aid. In the lower-division baccalaureate/associate degree category, 3 semester hours in physics, 3 in mapping, 3 in technical report writing, 6 in marine and oceanographic technologies, 6 in first aid, 3 in scuba diving, and 3 in human relations, and additional credit for detonation/demolition, photography, and scuba diving on the basis of institutional evaluation (9/79).

Recommendation, Skill Level 40

In the vocational certificate category, 18 semester hours in the use, operation, and maintenance of mechanical equipment, 18 in marine underwater repair and construction, 6 in scuba diving, and 6 in first aid. In the lower-division baccalaureate/associate degree category, 3 semester hours in mapping, 3 in marine geography, 6 in physics, 6 in technical report writing, 9 in marine and oceanographic technologies, 6 in first aid and safety, 3 in scuba diving, 3 in human relations, 3 in personnel supervision, and 6 for field experience in management, and additional credit for detonation/demolition/salvage, photography, and scuba diving on the basis of institutional evaluation (9/79).

MOS-00C-001

DOG TRAINER

00C20

00C40

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 00C was discontinued and its functions were incorporated into MOS 95B, Military Police.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 000 (Special Assignment).

Description

Summary: Trains dogs to obedience. *Skill Level 20:* Leads dogs through prescribed series of excercises, teaches dogs to obey commands, knows physical capabilities and limitations of dogs under varying conditions of terrain and climate; determines rejection or assignment to more advanced and specialized training by observing physical and psychological traits; feeds, waters, and grooms dogs; complies with established preventive medicine techniques; applies first aid and administers medicine to dogs. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises the training of dogs; analyzes training for more efficient methods and techniques; assigns personnel to positions and evaluates their performance.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in veterinary science or animal science, 3 in dog training, and 3 in animal first aid (12/75).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in veterinary science or animal science, 3 in dog training, 3 in animal first aid, 3 in personnel supervision, and 3 in instructional techniques. In the upper-division baccalaureate category, 3 semester hours for field experience in management, and additional credit in management, in education, and in animal science or veterinary science on the basis of institutional evaluation (12/75).

MOS-00D-001

SPECIAL DUTY ASSIGNMENT

00D20

00D40

Exhibit Dates: 10/73–Present.

Career Management Field: 00 (Exceptional Management Specialties), subfield 000 (Special Assignment).

Description

Summary: This MOS code is used to identify duty positions for special assignments; its use is approved on an individual case basis by the Headquarters of the Department of the Army. Before this code is assigned, a position must encompass duties that are highly specialized, that cannot be classified elsewhere, that do not correspond with formal military courses, and that occur so rarely and in such small numbers that establishment of a separate MOS is not practical. *Skill Level 20:* Used to identify all journeymen and technician levels of skill. *Skill Level 40:* Used to identify all leader levels of skill.

Recommendation, Skill Level 20

Credit on the basis of institutional evaluation of the individual student seeking competency recognition (5/76).

Recommendation, Skill Level 40

Credit on the basis of institutional evaluation of the individual student seeking competency recognition (5/76).

MOS-00E-001

RECRUITER AND CAREER COUNSELOR

00E40

00E50

Exhibit Dates: 10/73–2/78.

Career Management Field: 00 (Exceptional Management Specialties), subfield 000 (Special Assignment).

Description

Summary: Recruits or counsels civilian and military personnel concerning Army careers. NOTE: Required to have held at least one other MOS. *Skill Level 40:* Contracts, interviews, and advises civilian and military personnel; presents formal and informal talks to individuals and groups; writes, edits, and distributes recruiting material; establishes liaison with public media; evaluates the occupational, educational, and psychological background of prospective recruits and reenlistees; administers and scores screening tests; conducts occupational or career counseling. *Skill Level 50:* Able to perform the duties required for Skill Level 40; plans, organizes and coordinates recruitment and reenlistment programs and activities; supervises up to five Skill Level 40 personnel; trains Skill Level 40 personnel; supervises the preparation of correspondence and the keeping of files and records.

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of advertising, 3 in applied psychology, 3 in salesmanship, 3 in technical report writing or business correspondence, 3 in public speaking, 3 in records management, 3 in conference coordination, and 2 in preparation of audio-visual materials. In the upper-division baccalaureate category, 3 semester hours in advertising media, 3 for field experience in recruiting, 2 in human relations, and 2 in vocational counseling, or 10 semester hours for field experience in counseling and recruiting. In the graduate degree category, 1 semester hour in human relations and 3 in vocational counseling (2/75).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in advertising media, 4 for field experience in recruiting, 2 in human relations, 2 in vocational counseling, 3 in publicity release writing, 3 in office management, and 3 in personnel management, or 14 semester hours for field experience in counseling and recruiting, 3 in office management, and 3 in personnel management. In the graduate degree category, 3 semester hours in office administration, 2 in vocational counseling, and 1 in human relations (2/75).

MOS-00E-002

RECRUITER

00E20

00E30

00E40

00E50

Exhibit Dates: 3/78–Present.

Career Management Field: 79 (Recruitment and Retention).

Description

Summary: Recruits or supervises the recruitment of personnel for the Army. *Skill Level 20:* Contacts and conducts interviews of individuals who are prospective enlistees into the Army; contacts representatives of schools, corporations, civic groups and other agencies to present career and employment opportunities of the Army; presents formal and informal talks to organizations, groups, or individuals; writes, edits, and presents recruiting material for use by local communications media; interviews and counsels individuals on enlistment incentives, Army benefits and educational opportunities; evaluates applicants, using screening tests; prepares forms and documents as part of enlistment processing; counsels disqualified applicants; assists in market research and analysis of recruiting area. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical guidance to Skill Level 20 personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; may serve as Recruiting Station Commander, Professional Development Sergeant, or Reception Station Liaison Sergeant, supervising 5-8 persons; plans and organizes recruitment programs; maintains statistics on recruiting; prepares enlistment reports and official correspondence; prepares station plans, and conducts professional development programs; supervises subordinate personnel; provides guidance for improvement, and evaluates their performance. *Skill Level 50:* Able to perform the duties required for Skill Level 40; may serve as principal noncommissioned officer of a recruiting region, Senior Professional Development Sergeant, Staff Operations Sergeant or Management Noncommissioned Officer for recruiting; may supervise up to 30 personnel; assists area commander concerning training, production and personnel status; plans and conducts recruiting seminars and conferences; develops presentations reflecting a change in requirements, sales techniques and enlistment contract options; identifies, investigates, and takes corrective action in problem areas; trains, assigns duties, and evaluates performance of subordinates; develops recruiter training programs.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in principles of advertising, 2 in social psychology, 3 in sales techniques, [illegible] in public speaking, 3 in records management, and 2 in audio-visual techniques. In the upper-division baccalaureate category, 3 semester hours in advertising media, 3 for field experience in recruiting, and 2 in vocational counseling (7/79).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 20. In the upper-division baccalaureate category, 3 semester hours in advertising media, 3 for field experience in recruiting, 2 in vocational counseling, and 2 in publicity release writing (7/79).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of advertising, 3 in social psychology, 3 in sales techniques, 3 in public speaking, 3 in records management, 3 in audio-visual techniques, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in advertising media, 3 for field experience in recruiting, 2 in vocational counseling, 2 in publicity release writing, and 3 in personnel management (7/79).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of advertising, 3 in social psychology, 3 in sales techniques, 3 in public speaking, 3 in records management, 3 in audio-visual techniques, 3 in personnel supervision, and 3 in office practice. In the upper-division baccalaureate category, 3 semester hours in advertising media, 3 for field experience in recruiting, 2 in vocational counseling, 2 in publicity release writing, 3 in personnel management, and 3 in office management (7/79).

MOS-00F-001

Drill Sergeant

00F40

00F50

Exhibit Dates: 10/73-2/75. (Effective 3/75, MOS 00F was discontinued and its functions were incorporated into Special Qualifications Identifier X, Drill Sergeant.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 000 (Special Assignment).

Description

Summary: Is a group organizer and leader in various public and special interest activities; conducts classes to develop basic skills in group living and to generate group cohesiveness; plans and coordinates short-term and long-range educational and recreational activities of groups; supervises subordinate personnel; prepares oral and written reports; maintains records. *Skill Level 40:* Prepares lesson plans and and training schedules; assists in determining operational policies and procedures; teaches, guides, observes, and evaluates personnel in training; plans and coordinates billeting, food, and transportation arrangements for trainees. *Skill Level 50:* Able to perform the duties required for Skill Level 40; plans and coordinates all instructional and operational activities of the Drill Sergeant School; applies prescribed training management policies and procedures to insure the most economical and efficient use of manpower, facilities, equipment, time, and money.

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in personnel supervision, 3 in records administration, and 3 for field experience in education. In the lower-division baccalaureate/associate degree category or in the upper-division baccalaureate category, 3 semester hours in institutional management, 3 in communication skills, and 3 for field experience in education (2/75).

Recommendation, Skill Level 50

In the vocational certificate category, 3 semester hours in personnel supervision, 3 in records administration, and 6 for field experience in education. In the lower-division baccalaureate/associate degree category or in the upper-division baccalaureate category, 3 semester hours in institutional management, 3 in communication skills, and 6 for field experience in education (2/75).

MOS-00H-001

Enlisted Aide

00H20

00H50

Exhibit Dates: 10/73-8/76. (Effective 9/76, MOS 00H was discontinued and its functions were incorporated into MOS 94B, Food Service Specialist.)

Career Management Field: 94 (Food Service).

Description

Summary: Serves on the personal staff of a general officer; Able to perform the duties required for 94B20 (Food Service Specialist). *Skill Level 20:* Performs duties that aid a general officer in the performance of official and military responsibilities, including social responsibilities; assists in planning, arranging, and preparing for official social functions and activities; plans seating arrangements; arranges flowers; recommends menus and orders foodstuff; sets table; cooks and prepares foods, desserts, and beverages; serves meals; receives and keeps records of telephone calls; makes appointments; provides administrative assistance, and receives guests and visitors; assists in maintaining quarters; cares for military uniforms and equipment. *Skill Level 50:* Able to perform the duties required for Skill Level 20; as the supervisor of a large household staff, supervises and coordinates the activities of the enlisted aides.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in quantity food preparation, 3 in kitchen operations, 3 in food service operations, 3 in catering, 3 in menu planning, 3 in estimating and purchasing foods, 2 in record keeping, 2 in food decorating, and 1 in first aid (5/76).

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in inventory control, 3 in food sanitation and safety, 3 in food service equipment and maintenance, 2 in office accounting, and 2 in business math (1/82).

Recommendation, Skill Level 30

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in food purchasing and inventory control, 3 in food sanitation and safety, 3 in food preparation, 3 in food service equipment and maintenance, 3 in hotel/motel management, 3 in restaurant management, 3 in office accounting, and 2 in business mathematics (1/82).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours in office management and 3 in personnel management (1/82).

Recommendation, Skill Level 50

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours in office management, 3 in personnel management, and 3 in marketing (1/82).

MOS-00R-001

RECRUITER/RETENTION NCO

00R20
00R30
00R40
00R50

Exhibit Dates: 9/83–Present.

Career Management Field: 79 (Recruitment and Retention).

Description

Summary: Recruits, reenlists, or supervises personnel for military service in the Army. NOTE: MOS 00E (Recruiter) and MOS 79D (Reenlistment NCO) have been incorporated into MOS 00R. The combining of the two former MOS's results in a career track in which an individual has principal assignment either in recruiting or in retention, with special duties available in counseling, recruiting, training management, instructing, professional development advising, or serving in a supervisory role as the principal noncommissioned officer of a recruiting facility or a recruiting area/region. The recruiting track includes skill levels 20, 30, 40, and 50; the retention track, skill levels 30, 40, and 50. Because of the principal assignment option after skill level 20, descriptions and recommendations below are cited in two groups at skill levels 30, 40, and 50. *Skill Level 20:* (Recruiting): Contacts and interviews individuals as prospective enlistees; contacts representatives of schools, corporations, civic groups and other agencies to present employment and career opportunities of the Army; presents formal and informal talks to organizations and groups; distributes recruiting publicity materials; establishes liaison with communications media, and prepares local news releases; evaluates applicants, using screening tests and vocational aptitude tests; prepares forms and documents as part of the enlistment process; arranges for transportation, meals, and lodging of enlistees; assists in market research and analysis of recruiting area. *Skill Level 30:* Recruiting: Able to perform the duties required for Skill Level 20; provides technical guidance to lower skill level personnel. Retention: Knows Army occupations, career fields and skill levels; explains reenlistment options, benefits and obligations; counsels persons who will be separating from the Army about reserve component benefits; explains training options, vocational opportunities, and reenlistment bonuses; counsels respective reenlistees and assists in designing career plan; processes forms, documents, and records for reenlistment; prepares status charts and statistics; conducts training and inspections; advises unit commanders on status of reenlistment programs; recommends corrective actions in areas that are deficient. *Skill Level 40:* (Recruiting): Able to perform the duties required for Skill Level 30; commands a recruiting station and maintains records, statistics, administrative files, and publications library; prepares enlistment reports; supervises and evaluates subordinate personnel; conducts professional development programs for lower skill level personnel; accomplishes administrative functions to include preparation of official correspondence and reports; assigns duties to subordinates and supervises resources. Retention: Advises commanders on status of reenlistment programs; conducts training for commanders, staff persons, noncommissioned officers and others when assigned as principal noncommissioned officer in a large facility or region. *Skill Level 50:* Recruiting: Able to perform the duties required for Skill Level 40; supervises recruiting programs and personnel at several recruiting stations within an area; assists area commanders with training, operations, administration, and personnel matters; plans and conducts recruiting conferences and seminars; develops presentations which reflect changing sales techniques, enlistment contracts, and enlistment requirements; supervises subordinates; identifies and takes corrective actions to problem areas; evaluates subordinates; develops training programs and inspects recruiting stations to ensure efficient operation and management. Retention: Supervises, assigns duties, and evaluates performance of subordinate personnel; organizes and coordinates retention/career counseling activities; conducts reenlistment seminars and serves as policy advisor in reenlistment matters; coordinates the use and management of reenlistment funds; presents information talks as needed on reenlistment programs.

Recommendation, Skill Level 20

Recruiter: In the lower-division baccalaureate/associate degree category, 2 semester hours in social psychology, 2 in audio-visual techniques, 3 in sales techniques, 3 in public speaking, and 2 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in recruiting and 3 in records management (9/83).

Recommendation, Skill Level 30

Recruiter: In the lower-division baccalaureate/associate degree category, 2 semester hours in social psychology, 3 in sales techniques, 3 in public speaking, 2 in audio-visual techniques, and 3 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in recruiting and 3 in records management. Retention: In the lower-division baccalaureate/associate degree category, 2 semester hours in social psychology, 3 in sales techniques, 3 in public speaking, 2 in audio-visual techniques, and 3 in record keeping. In the upper-division baccalaureate category, 3 semester hour in records managment and 3 in vocational guidance (9/83).

Recommendation, Skill Level 40

Recruiter: In the lower-division baccalaureate/associate degree category, 3 semester hours in social psychology, 3 in record keeping, 3 in sales techniques, 3 in public speaking, 3 in audio-visual techniques, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in recruiting, 3 in records management, and 3 in personnel management. Retention: In the lower-division baccalaureate/associate degree category, 3 semester hours in social psychology, 3 in record keeping, 3 in sales techniques, 3 in public speaking, and 3 in audio-visual techniques. In the upper-division baccalaureate category, 3 semester hours in records management and 3 in vocational guidance (9/83).

Recommendation, Skill Level 50

Recruiter: In the lower-division baccalaureate/associate degree category, 3 semester hours in social psychology, 3 in record keeping, 3 in sales techniques, 3 in public speaking, 3 in audio-visual techniques, 3 in personnel supervision, and 3 in office procedures. In the upper-division baccalaureate category, 3 semester hours for field experience in recruiting, 3 in records management, 3 in personnel management, and 3 in office management. Retention: In the lower-division baccalaureate/associate degree category, 3 semester hours in social psychology, 3 in record keeping, 3 in sales techniques, 3 in public speaking, 3 in audio-visual techniques, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in records management, 3 in vocational guidance, and 3 in personnel management (9/83).

MOS-00U-001

Race Relations/Equal Opportunity
Specialist

00U20
00U40
00U50

Exhibit Dates: 10/73–2/78.

Career Management Field: 00 (Exceptional Management Specialties), subfield 00 (Special Assignment).

Description

Summary: Plans, organizes, and coordinates activities of community organizations and groups concerned with social problems. 00U40
00U50

Exhibit Dates: 3/78–2/85. (Effective 3/85, MOS 00U was discontinued).

Career Management Field: 71 (Administration), subfield 711 (Administration).

Description

Summary: Plans, organizes, and coordinates activities of community organizations and groups concerned with social problems. NOTE: Required to have held at least one other MOS. *Skill Level 20:* Administers programs designed to study, analyze, and make recommendations for improvement of social conditions for individuals or small communities. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor and trains Skill Level 20 personnel; coordinates activities of several agencies or groups; writes reports and maintains files; directs programs in medium-sized communities. *Skill Level 40:* Able to perform the duties required for Skill Level 30; recommends and drafts equal opportunity and affirmative action plans; conducts training course in human relations and management effectiveness; makes presentations; assists in establishing policies and procedures. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as a mid-level manager; supervises, evaluates, and coordinates the activities of lower skill level personnel; assigns duties.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in communication skills and 6 in social sciences. In the lower-division baccalaureate/associate degree category, 2 semester hours in communication skills, 2 in social psychology, 2 in human relations, 2 in minority groups, and 1 in filing and records management. In the upper-division baccalaureate category, 2 semester hours in social psychology, 2 in human relations, and 2 in minority groups (7/79).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in communication skills, 6 in social sciences, 2 in personnel supervision, and 2 in filing and records management. In the lower-division baccalaureate/associate degree category, 3 semester hours in communication skills, 3 in social psychology, 3 in human relations, 3 in minority groups, 2 in interviewing techniques, 2 in personnel supervision, and 1 in filing and records management. In the upper-division baccalaureate category, 2 semester hours in social psychology, 3 in human relations, and 3 in minority groups (7/79).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in communication skills, 6 in social sciences, 2 in personnel supervision, 1 in filing and records management, and 2 for field experience in race relations. In the lower-division baccalaureate/associate degree category, 3 semester hours in communication skills, 3 in social psychology, 3 in human relations, 3 in minority groups, 2 in interviewing techniques, 2 in technical writing, 2 in personnel supervision, 2 in educational techniques, and 1 in filing and records management. In the upper-division baccalaureate category, 2 semester hours in social psychology, 3 in human relations, 3 in minority groups, 2 in educational methods, 2 for field experience in race relations, and 1 in personnel management (7/79).

Recommendation, Skill Level 50

In the vocational certificate category, 3 semester hours in communication skills, 6 in social sciences, 3 in personnel management, 1 in filing and records management, 2 for field experience in race relations, and 2 for field experience in education. In the lower-division baccalaureate/associate degree category, 3 semester hours in communication skills, 3 in social psychology, 3 in human relations, 3 in minority groups, 3 in personnel supervision, 2 in interviewing techniques, 2 in technical writing, 2 in educational techniques, and 1 in filing and records management. In the upper-division baccalaureate category, 2 semester hours in social psychology, 3 in human relations, 3 in minority groups, 2 in educational methods, 3 for field experience in race relations, and 2 in personnel management (7/79).

MOS-00Z-001

COMMAND SERGEANT MAJOR

00Z50

Exhibit Dates: 10/73–Present.

Career Management Field: 00 (Exceptional Management Specialties), subfield 000 (Special Assignment).

Description

Skill Level 50: Is an experienced mid-level manager responsible for advising high-level administrators on matters of personnel assignment, utilization, promotion, and training, and about operations and logistics; supervises subordinate staff members and evaluates their performance; evaluates the operational effectiveness of the organization. NOTE: Required to have attained Skill Level 50 in at least one other MOS.

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 18 semester hours in personnel management, 3 in staff principles, procedures, and organization, and 3 in office administration (2/75).

MOS-01B-001

ELECTRICAL-ELECTRONIC ENGINEERING ASSISTANT

01B20

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 01B was discontinued and its functions were incorporated into MOS 32Z, Communications-Electronics Maintenance Chief; MOS 35E, Special Electrical Devices Repairer; MOS 35G, Biomedical Equipment Repairer; MOS 35S, Electronic Biomedical Equipment Repairer; MOS 35U, Biomedical Equipment Maintenance Chief; and MOS 74F, Programmer/Analyst.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level laboratory and field research in any functional branch of electrical or electronic engineering, including power generation and distribution, illumination, wire communication, radar, radio, microwave, and infrared radiation; receives assignments which outline scope of problem, time allotment, and related projects; develops plans for research and locates source material; designs new equipment or the modification of existing equipment; uses advanced mathematics including calculus and differential equations; uses computer terminal and other electronic test and measurement equipment; writes detailed reports, bids, and specifications; supervises engineering shop personnel. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months of related experience, or a master's degree in electrical or electronic engineering.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in electrical/electronic engineering research and laboratory procedures and additional credit on the basis of institutional evaluation (6/76).

MOS-01C-001

MECHANICAL ENGINEERING ASSISTANT

01C20

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 01C was discontinued and its functions were incorporated into MOS 51T, Technical Engineering Supervisor, and MOS 81B, Technical Drafting Specialist.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level laboratory and field research in mechanical and metallurgical engineering, including research in automotive and aeronautical fields; receives broad scope assignments for the design and development of mechanical equipment and systems; interprets, adapts, and applies engineering principles and practices and complex guidelines in devising research and development working plans; reviews manufacturers' drawings of commercial equipment for possible adaptation for military use; writes formal justifications for proposed designs; prepares specifications and operating and maintenance instruction; sets up test objectives and criteria for designed equipment; evaluates performance te ; data and field reports; prepares summary reports and staff studies on research projects. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months related experience, or a master's degree in mechanical, automotive, aeronautical, or metallurgical engineering.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in mechanical engineering research and additional credit on the basis of institutional evaluation (6/76).

MOS-01D-001

CIVIL ENGINEERING ASSISTANT

01D20

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 01D was discontinued and its functions were incorporated into MOS 51T, Technical Engineering Supervisor, MOS 81B, Technical Drafting Specialist; and MOS 91S, Environmental Health Specialist.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level office and field duties in the field of civil engineering; orginates, evaluates, and inspects projects in construction, highway, stuctural, hydraulics, and sanitary engineering; prepares and interprets blueprints and engineering diagrams and makes inspections before and during construction; reviews plans and specifications submitted on engineering projects, and prepares estimates of personnel, materials, and equipment required; performs preconstruction layout and schedules flow of materials and equipment to project; prepares detailed progress reports on projects. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months of related experience, or a master's degree in civil engineering.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in engineering management and additional credit on the basis of institutional evaluation (6/76).

MOS-01E-001

MATHEMATICS-STATISTICS ASSISTANT

01E20

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 01E was discontinued and its functions were incorporated into MOS 73D, Accounting Specialist, and MOS 74F, Programmer/Analyst.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Develops and adapts mathematical or statistical theory and methodology for all kinds of mathematical or statistical investigation; investigates and evaluates applicability, efficiency, and accuracy of theory and methods used in mathematical or statistical programs and studies; applies general mathematics such as differential and integral calculus, theory of differential equations and complex numbers; selects and refines systems of experimental and sample designs and specifications; develops theory and appropriate methodology for analysis of problems; carries out research in experimental and sample design; tests validity and efficiency of design; aplies principles of statistical inference and probability. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months related experience, or a master's degree, in mathematics; or a bachelor's degree and a minimum of one year related experience, or a master's degree in statistics.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in mathematical and statistical research and additional credit on the basis of institutional evaluation (6/76).

MOS-01F-001

PHYSICAL SCIENCES ASSISTANT

01F20

Exhibit Dates: 10/73-2/78. (Effective 3/78, MOS 01F was discontinued and its functions were incorporated into MOS 73D, Accounting Specialist; MOS 92C, Petroleum Laboratory Specialist; MOS 93E, Meteorological Observer; and MOS 93F, Field Artillery Meteorological Crewman.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level laboratory and research functions in the field of physics, meteorology, geology, or chemistry; performs research involving theoretical analysis, exploration, or experimentation of physical phenomena or composition, molecular structure, and properties of substances; investigates applications of theoretical concepts to specific processes, devices, techniques, or products; develops research design and investigative techniques; performs chemical analyses of samples; collects and interprets test data and draws conclusions based on evidence; prepares technical reports and makes recommendations on suitability of samples for intended use. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months of related experience, or a master's degree in physics, meteorology, geology, or chemistry.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in physical sciences research and additional credit on the basis on institutional evaluation (6/76).

MOS-01G-001

CHEMICAL ENGINEERING ASSISTANT

01G20

Exhibit Dates: 10/73-2/78. (Effective 3/78, MOS 01G was discontinued and its functions were incorporated into MOS 92B, Medical Laboratory Specialist, and MOS 92G, Petroleum Laboratory Specialist.)

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level laboratory and field research in chemical engineering; conducts research in chemical, ceramic, or petroleum engineering; operates small pilot plants or installs and operates a limited variety of equipment for study of one phase of complex development project; plots governing equations of problems to ascertain relationships between experimental data; consolidates data collected during operations and makes necessary conversions for application to large-scale equipment design; performs a variety of chemical and simulated service tests on commercial products or on products newly developed in the laboratory to determine suitability for particular applications; prepares reports describing test procedures and results and recommending actual materials and machinery to be used. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months related experience, or a master's degree in chemical, ceramic, or petroleum production engineering.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in chemical research and laboratory procedures and additional credit on the basis of institutional evaluation (6/76).

MOS-01H-001

BIOLOGICAL SCIENCES ASSISTANT

01H20

Exhibit Dates: 10/73-2/78.

Career Management Field: 00 (Exceptional Management Specialties), subfield 001 (Professional Requirements).

Description

Skill Level 20: Performs professional-level laboratory and research duties in the field of biological science; conducts studies in biology, bacteriology, biochemistry, entomology, or pharmacology; performs culture work on animal diseases; keeps records of culturing and of purity, density, and viability tests of cultures prepared for use as vaccines; inoculates and performs autopsies on laboratory animals used in the preparation of cultures; identifies, prepares, and ships cultures; makes bio-assays to determine toxicity of drugs and other substances; plans and executes experiments; calculates and administers doses and observes toxic effects produced; prepares detailed reports on experiments and tests. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum of six months of related experience, or a master's degree in biology, bacteriology, zoology, parisitology, botany, pharmacology, or entomology.

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in biological research and laboratory procedures and additional credit on the basis of institutional evaluation (6/76).

MOS-01H-002

BIOLOGICAL SCIENCES ASSISTANT

01H10
01H20
01H30

Exhibit Dates: 3/78-Present.

Career Management Field: 91 (Medical).

Description

Summary: Performs professional-level laboratory and research duties in the field of biological science. *Skill Level 10:* Conducts studies in biology, bacteriology, biochemistry, entomology; or pharmacology; performs culture work on animal diseases; keeps records of culturing and of purity, density, and viability tests of cultures prepared for use as vaccines; inoculates and performs autopsies on laboratory animals used in the preparation of cultures; identifies, prepares, and ships cultures; makes bioassays to determine toxicity of drugs and other substances; plans and executes experiments; calculates and administers doses and observes toxic effects produced; prepares detailed reports on experiments and tests. NOTE: The prerequisite for the assignment of this MOS is a bachelor's degree and a minimum or six months of related experience, or a master's degree in biology, bacteriology, zoology, parisitology, botany, pharmacology, or entomology. *Skill Level 20:* Able to perform the duties required for Skill Level 10; analyzes scientific data for publications; maintains inventories and equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides overall research division supervision including quality control and training.

Recommendation, Skill Level 10

In the graduate degree category, 3 semester hours in biological research (3/90).

Recommendation, Skill Level 20

In the graduate degree category, 6 semester hours in biological research (3/90).

Recommendation, Skill Level 30

In the graduate degree category, 9 semester hours in biological research (3/90).

MOS-02B-001

CORNET-TRUMPET PLAYER

02B20
02B40

Exhibit Dates: 10/73-2/77.

Career Management Field: 97 (Band).

Description

Summary: Plays cornet or trumpet in appropriate musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 20:* Executes instrumental studies and ensemble and solo literature of moderate difficulty within the facility-range typical of university lower-division music majors; sings simple melodic patterns at sight; possesses a basic understanding of musical structure equivalent to that of a college or university freshman music major; performs preventive maintenance on the cornet or trumpet; performs duties as may be assigned in administration, supply, and music library. *Skill Level 40:* Possesses the musicianship and skills required for Skill Level 20; supervises and assigns duties to Skill Level 20 personnel; is assigned to lead instrumental sections, marching formations, and large or small performing groups; may be assigned appropriate tasks in music arranging, music library, supply, equipment management, and other administrative duties.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in marching band, 2 in concert band, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) (6/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in marching band, 3 in concert band, 2 in ensemble electives, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal). In the upper-division baccalaureate category, credit in conducting, arranging, and music administration and supervision on the basis of institutional evaluation (6/76).

MOS-02B-002

CORNET OR TRUMPET PLAYER

02B10
02B20
02B30

Exhibit Dates: 3/77–6/86.

Career Management Field: 97 (Band).

Description

Summary: Plays cornet or trumpet in appropriate musical organizations; performs in military marching and concert musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 10:* Plays cornet or trumpet; marches in military band in response to drum major's signals and oral commands; reads,interprets, and plays instrumental music; plays instrument in marching, concert, or dance/jazz band as appropriate; plays, at sight, secondary parts to ceremonial music and marches of medium difficulty; plays with minimum preparation secondary parts to all styles of standard band literature; doubles on another musical instrument as assigned; applies knowledge of minimum basic music theory; discriminates and matches pitches; performs preventive maintenance on cornet or trumpet. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; plays cornet or trumpet in small instrumental groups as appropriate; plays, at sight, principle parts to ceremonial music and marches of medium difficulty; plays, with minimum preparation, principle parts to all styles of standard band literature; performs music library duties as assigned. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises section as instrumental section leader; serves in various intermediate staff/administrative positions within the band as assigned; organizes, tunes, instructs, and rehearses section or consolidated section of related musical instruments; organizes and leads small instrumental groups; plays, at sight, intermediate music of any style; balances chords and volumes, and interprets complex rhythms; supervises preventive maintenance of musical instruments in section.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 2 in music theory, 1 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

MOS-02B-003

TRUMPET PLAYER

02B10
02B20
02B30
02B40

Exhibit Dates: 7/86–Present.

Career Management Field: 97 (Band).

Description

Summary: Plays trumpet in appropriate musical organizations; performs in military marching and concert musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 10:* Plays trumpet; marches in military band in response to drum major's signals and oral commands; reads,interprets, and plays instrumental music; plays instrument in marching, concert, or dance/jazz band as appropriate; plays, at sight, secondary parts to ceremonial music and marches of medium difficulty; plays with minimum preparation secondary parts to all styles of standard band literature; doubles on another musical instrument as assigned; applies knowledge of minimum basic music theory; discriminates and matches pitches; performs preventive maintenance on trumpet. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; plays trumpet in small instrumental groups as appropriate; plays, at sight, principle parts to ceremonial music and marches of medium difficulty; plays, with minimum preparation, principle parts to all styles of standard band literature; performs music library duties as assigned. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises section as instrumental section leader; serves in various intermediate staff/administrative positions within the band as assigned; organizes, tunes, instructs, and rehearses section or consolidated section of related musical instruments; organizes and leads small instrumental groups; plays, at sight, intermediate music of any style; balances chords and volumes, and interprets complex rhythms; supervises preventive maintenance of musical instruments in section. *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides technical guidance to lower-skill-level personnel; supervises section leaders; rehearses the stage band; assists in rehearsing the concert band; conducts the stage band in a performance; organizes, rehearses, and leads instrumental ensembles; organizes, tunes, and rehearses elements of the band in rehearsal; arranges and transcribes concert and dance/stage band music; tunes and prepares the concert band for rehearsal.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 2 in music theory, 1 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, 3 in personnel supervision, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles. In the upper-division baccalaureate category, 3 semester hours in conducting and 3 in music administration and supervision (3/86).

MOS-02C-001

BARITONE-EUPHONIUM PLAYER

02C20
02C40

Exhibit Dates: 10/73–2/77.

Career Management Field: 97 (Band).

Description

Summary: Plays baritone or euphonium in appropriate musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 20:* Executes instrumental studies and ensemble and solo literature of moderate difficulty within the facility-range typical of university lower-division music majors; sings simple melodic patterns at sight; possesses a basic understanding of musical structure equivalent to that of a college or university freshman music major; performs preventive maintenance on the baritone or euphonium; performs duties as may be assigned in administration, supply, and music library. *Skill Level 40:* Possesses the musicianship and skills required for Skill Level 20; supervises and assigns duties to Skill Level 20 personnel; is assigned to lead instrumental sections, marching formations, and large or small performing groups. may be assigned appropriate tasks in music arranging, music library, supply, equipment management, and other administrative duties.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in marching band, 2 in concert band, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) (6/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in marching band, 3 in concert band, 2 in ensemble electives, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) In the upper-division baccalaureate category, credit in conducting, arranging, and music administration and supervision on the basis of institutional evaluation (6/76).

MOS-02C-002

BARITONE OR EUPHONIUM PLAYER

02C10
02C20
02C30

Exhibit Dates: 3/77-6/86.

Career Management Field: 97 (Band).

Description

Summary: Plays baritone or euphonium in appropriate musical organizations; performs in military marching and concert musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 10:* Plays baritone or euphonium; marches in military band in response to drum major's signals and oral commands; reads,interprets, and plays instrumental music; plays instrument in marching, concert, or dance/jazz band as appropriate; plays, at sight, secondary parts to ceremonial music and marches of medium difficulty; plays with minimum preparation secondary parts to all styles of standard band literature; doubles on another musical instrument as assigned; applies knowledge of minimum basic music theory; discriminates and matches pitches; performs preventive maintenance on baritone or euphonium. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; plays baritone or euphonium in small instrumental groups as appropriate; plays, at sight, principle parts to ceremonial music and marches of medium difficulty; plays, with minimum preparation, principle parts to all styles of standard band literature; performs music library duties as assigned. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises section as instrumental section leader; serves in various intermediate staff/administrative positions within the band as assigned; organizes, tunes, instructs, and rehearses section or consolidated section of related musical instruments; organizes and leads small instrumental groups; plays, at sight, intermediate music of any style; balances chords and volumes, and interprets complex rhythms; supervises preventive maintenance of musical instruments in section.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 2 in music theory, 1 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band. and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation, because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

MOS-02C-003

BARITONE OR EUPHONIUM PLAYER

02C10
02C20
02C30
02C40

Exhibit Dates: 7/86-Present.

Career Management Field: 97 (Band).

Description

Summary: Plays baritone or euphonium in appropriate musical organizations; performs in military marching and concert musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 10:* Plays baritone or euphonium; marches in military band in response to drum major's signals and oral commands; reads,interprets, and plays instrumental music; plays instrument in marching, concert, or dance/jazz band as appropriate; plays, at sight, secondary parts to ceremonial music and marches of medium difficulty; plays with minimum preparation secondary parts to all styles of standard band literature; doubles on another musical instrument as assigned; applies knowledge of minimum basic music theory; discriminates and matches pitches; performs preventive maintenance on cornet or trumpet. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; plays baritone or euphonium in small instrumental groups as appropriate; plays, at sight, principle parts to ceremonial music and marches of medium difficulty; plays, with minimum preparation, principle parts to all styles of standard band literature; performs music library duties as assigned. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises section as instrumental section leader; serves in various intermediate staff/administrative positions within the band as assigned; organizes, tunes, instructs, and rehearses section or consolidated section of related musical instruments; organizes and leads small instrumental groups; plays, at sight, intermediate music of any style; balances chords and volumes, and interprets complex rhythms; supervises preventive maintenance of musical instruments in section. *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides technical guidance to lower-skill-level personnel; supervises section leaders; rehearses the stage band; assists in rehearsing the concert band; conducts the stage band in a performance; organizes, rehearses, and leads instrumental ensembles; organizes, tunes, and rehearses elements of the band in rehearsal; arranges and transcribes concert and dance/stage band music; tunes and prepares the concert band for rehearsal.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 2 in music theory, 1 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, 3 in personnel supervision, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles. In the upper-division baccalaureate category, 3 semester hours in conducting and 3 in music administration and supervision (3/86).

MOS-02D-001

French Horn Player

02D20

02D40

Exhibit Dates: 10/73-2/77.

Career Management Field: 97 (Band).

Description

Summary: Plays French horn in appropriate musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 20:* Executes instrumental studies and ensemble and solo literature of moderate difficulty within the facility-range typical of university lower-division music majors; sings simple melodic patterns at sight; possesses a basic understanding of musical structure equivalent to that of a college or university freshman music major; performs preventive maintenance on the French horn; performs duties as may be assigned in administration, supply, and music library. *Skill Level 40:* Possesses the musicianship and skills required for Skill Level 20; supervises and assigns duties to Skill Level 20 personnel; is assigned to lead instrumental sections, marching formations, and large or small performing groups. may be assigned appropriate tasks in music arranging, music library, supply, equipment management, and other administrative duties.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in marching band, 2 in concert band, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) (6/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in marching band, 3 in concert band, 2 in ensemble electives, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) In the upper-division baccalaureate category, credit in conducting, arranging, and music administration and supervision on the basis of institutional evaluation (6/76).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

MOS-02G-003

Flute or Piccolo Player

02G10
02G20
02G30
02G40

Exhibit Dates: 7/86-Present.

Career Management Field: 97 (Band).

Description

Summary: Plays flute or piccolo in appropriate musical organizations; performs in military marching and concert musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 10:* Plays flute or piccolo; marches in military band in response to drum major's signals and oral commands; reads,interprets, and plays instrumental music; plays instrument in marching, concert, or dance/jazz band as appropriate; plays, at sight, secondary parts to ceremonial music and marches of medium difficulty; plays with minimum preparation secondary parts to all styles of standard band literature; doubles on another musical instrument as assigned; applies knowledge of minimum basic music theory; discriminates and matches pitches; performs preventive maintenance on flute or piccolo. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; plays flute or piccolo in small instrumental groups as appropriate; plays, at sight, principle parts to ceremonial music and marches of medium difficulty; plays, with minimum preparation, principle parts to all styles of standard band literature; performs music library duties as assigned. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises section as instrumental section leader; serves in various intermediate staff/administrative positions within the band as assigned; organizes, tunes, instructs, and rehearses section or consolidated section of related musical instruments; organizes and leads small instrumental groups; plays, at sight, intermediate music of any style; balances chords and volumes, and interprets complex rhythms; supervises preventive maintenance of musical instruments in section. *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides technical guidance to lower-skill-level personnel; supervises section leaders; rehearses the stage band; assists in rehearsing the concert band; conducts the stage band in a performance; organizes, rehearses, and leads instrumental ensembles; organizes, tunes, and rehearses elements of the band in rehearsal; arranges and transcribes concert and dance/stage band music; tunes and prepares the concert band for rehearsal.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 2 in music theory, 1 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1-3 semester hours (equivalent of one semester) in applied study of major instrument, 3 in music theory, 2 in concert band, 2 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (6/78).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2-6 semester hours (equivalent of two semesters) in applied study of major instrument, 4 in music theory, (including ear training), 3 in concert band, 3 in marching band, 3 in personnel supervision, and credit in small ensemble on the basis of institutional evaluation; because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles. In the upper-division baccalaureate category, 3 semester hours in conducting and 3 in music administration and supervision (3/86).

MOS-02H-001

Oboe Player

02H20
02H40

Exhibit Dates: 10/73-2/77.

Career Management Field: 97 (Band).

Description

Summary: Plays oboe in appropriate musical organizations and, as qualified, in associated choral, jazz, and other small ensembles. *Skill Level 20:* Executes instrumental studies and ensemble and solo literature of moderate difficulty within the facility-range typical of university lower-division music majors; sings simple melodic patterns at sight; possesses a basic understanding of musical structure equivalent to that of a college or university freshman music major; performs preventive maintenance on the oboe; performs duties as may be assigned in administration, supply, and music library. *Skill Level 40:* Possesses the musicianship and skills required for Skill Level 20; supervises and assigns duties to Skill Level 20 personnel; is assigned to lead instrumental sections, marching formations, and large or small performing groups; may be assigned appropriate tasks in music arranging, music library, supply, equipment management, and other administrative duties.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in marching band, 2 in concert band, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) (6/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in marching band, 3 in concert band, 2 in ensemble electives, and 4 in music theory (basic harmony and ear training); because of the wide range of individual abilities, additional credit may be awarded on the basis of institutional evaluation in music theory, applied music (individual instruction in performance), and small performing ensembles (jazz, brass, woodwind, percussion, string, and vocal) In the upper-division baccalaureate category, credit in conducting, arranging, and music administration and supervision on the basis of insititutional evaluation (6/76).

Description

Skill Level 50: Supervises development and management of Special Services programs, including entertainment, sports, arts and crafts, outdoor recreation, youth activities, and library programs.

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category or in the upper-division baccalaureate category, 6 semester hours in recreation resource relationships, 6 in recreation resources inventory and planning, 3 in recreation facility and site planning, 3 in organization and management of recreational sports activities, 6 in special problems in recreation, 6 for a recreation internship, 6 in human relations, 6 for field experience in management, 3 in introduction to management, 3 in records administration, and 3 in personnel supervision (5/76).

MOS-04B-001

TRANSLATOR-INTERPRETER

04B20
04B30

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 04B was discontinued and its functions were incorporated into MOS 96C, Interrogator.)

Career Management Field: 96 (Military Intelligence).

Description

Summary: Performs translating and interpreting duties, using knowledge of English and a foreign language. *Skill Level 20:* Prepares translations of written foreign language material into English and written English into a foreign language; prepares summaries of translated foreign documents; translates foreign technical publications; translates announcements, speeches, radio scripts, publications, and other materials into a foreign language; establishes and maintains a file of translation and language reference materials; edits translations for correctness of grammatical construction, phraseology, punctuation, idiom, and clarity of expression; coordinates translating activities; instructs and advises translators. *Skill Level 30:* Able to perform the duties required for Skill Level 20; interprets oral statements into either English or a foreign language using phraseology selected to preserve the original intent, meaning, and emphasis; translates and orally expresses statements in English or in a foreign language.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in typing, 2 in record keeping, and 1 in filing. In the lower-division baccalaureate/associate degree category, 3 semester for field experience in translating, 3 in written communication skills, 2 in English grammar, 2 in typing, 1 in record keeping, and 1 in filing. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (5/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in typing, 2 in record keeping, and 1 in filing. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in translating (written), 3 in written communication skills, 3 in public speaking, 3 in human relations, 2 in English grammar, 2 in typing, 1 in record keeping, and 1 in filing. In the upper-division baccalaureate category, 3 semester hours in interpreting (oral). NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (5/76).

MOS-04C-001

EXPERT LINGUIST

04C20

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 04C was discontinued and its functions were incorporated into MOS 96C, Interrogator.)

Career Management Field: 96 (Military Intelligence).

Description

Skill Level 20: Able to perform the duties required for 04B30 (Translator-Interpreter);

understands the customs and habits of the people of at least one foreign country; analyzes the content of foreign documents and publications; translates or writes in English or foreign language on a variety of technical, tactical, and strategic subjects; reviews translations for accuracy and completeness; employs free translation techniques and uses idiomatic language; interprets, into either English or foreign language, statements made by participants in legal proceedings, conferences, public relations interviews, and radio and loudspeaker broadcasts; acts as a chief interpreter in an interpreter platoon of a military intelligence linguistic company.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semster hours in typing, 2 in record keeping, and 1 in filing. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in translating (written), 3 in public speaking, 3 in understanding a foreign culture, 3 in written communication, 3 in human relations, 2 in English grammar, 2 in typing, 1 in record keeping, and 1 in filing. In the upper-division baccalaureate category, 3 semester hours for field experience in interpreting (oral). NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (5/76).

MOS-05B-001

Radio Operator

05B20

05B40

Exhibit Dates: 10/73-2/78.

Career Management Field: 72 (Telecommunications).

Description

Summary: Supervises or operates and maintains radio communications equipment and transmits and receives messages by voice or by Morse Code. *Skill Level 20:* Connects equipment components; erects antennas; installs power generators; test-operates equipment; applies prescribed radio procedures; transcribes International Morse Code into clear text and records on message forms; performs preventive maintenance on radio and associated power equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor of a radio-operating activity comprised of at least 4 to 30 or more radio operators; selects installation sites; prepares and disseminates work schedules, operating procedures, and instructions; corrects faulty work practices and operating techniques by instruction and demonstration; checks operational logs maintenance schedules, and station files for completeness and accuracy; requisitions supplies; prepares technical and administrative reports. NOTE: May have progressed to 05B40 from 05E40 (Voice Radio Operator).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in broadcasting, 3 in radio communications (code), 3 in small instrument maintenance, and 2 in basic Morse Code. In the lower-division baccalaureate/associate degree category, 3 semester hours in elementary radio communications, 3 in elementary broadcasting, and 2 in basic Morse Code (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in elementary radio communications, 3 in elementary broadcasting, 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and 2 in basic Morse Code. In the upper-division baccalaureate category, 3 semester hours for field experience in management (3/76).

MOS-05B-002

Radio Operator

05B10

05B20

Exhibit Dates: 3/78-9/84. (Effective 9/84, MOS 05B was discontinued and its functions were incorporated into MOS 31C, Single-Channel Radio Operator, MOS 31K, Combat Signaler, and MOS 18E, Special Operations Communications Sergeant.)

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Operates and installs radio communications equipment and transmits and receives messages by voice. *Skill Level 10:* Connects voice radio equipment components; erects antennas; installs power generators; test-operates equipment; applies prescribed radio procedures; performs limited preventive maintenance on radio and associated power equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; may serve as first-line supervisor of radio-operating activity of two or three Skill Level 10 personnel; selects installation sites; corrects faulty work practices and operating techniques by instruction and demonstration; checks operational logs and station files for completeness and accuracy; prepares equipment inspection reports.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in broadcasting. In the lower-division baccalaureate/associate degree category, 3 semester hours in elementary radio communications and 3 in elementary broadcasting (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in broadcasting. In the lower-division baccalaureate/associate degree category, 3 semester hours in elementary radio communications and 3 in elementary broadcasting (10/79).

MOS-05C-001

Radio Teletype Operator

05C20

05C40

05C50

Exhibit Dates: 10/73-2/78.

Career Management Field: 72 (Telecommunications).

Description

Summary: Supervises or sets up and operates radio teletype or tape relay or Morse Code. *Skill Level 20:* Connects and operates radio teletype keyboard and tape relay equipment; erects antennas; installs power generators; prepares messages in proper format for delivery; establishes and maintains station logs; performs preventive maintenance on radio teletype and tape relay systems; operates radio equipment in voice mode. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor of a radio teletype operating team comprised of 4 to 24 operators; selects sites and supervises installation of equipment; prepares work schedules, operating procedures, and instructions; instructs and demonstrates proper procedures to radio teletype operators; checks logs and files for accuracy; prepares administrative and technical reports. NOTE: May have progressed to 05C40 from 05F40 (Radio Teletypewriter Operator, Non-Morse). *Skill Level 50:* Able to perform the duties required for Skill Level 40; is a mid-level manager; interprets and supervises the execution of policies and procedures; advises superiors on personnel matters; directs and coordinates administrative activities; coordinates food service and supply activities; assists superiors in planning and implementing on-the-job training. NOTE: May have progressed to 05C50 from 05C40 or 05B40 (Radio Operator).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in teletypewriter operation, 3 in typewriting, 3 in broadcasting, 3 in small instrument maintenance, and 2 in basic Morse Code. In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting, 3 in teletypewriter operation, and 3 in elementary radio communications (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting, 3 in teletypewriter operations, 3 in elementary radio communications, 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management (3/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in introduction to management, 3 in maintenance management, 3 in records administration, and 3 in office management (3/76).

MOS-05C-002

Radio Teletype Operator

05C10

05C20

05C30

Exhibit Dates: 3/78-9/84. (Effective 9/84, MOS 05C was discontinued and its functions were incorporated into MOS 31C, Single-Channel Radio Operator.)

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Supervises or sets up and operates radio teletype or tape relay equipment and transmits and receives messages by teletype or tape relay. *Skill Level 10:* Connects and operates radio teletype keyboard or voice equipment; erects antennas; installs power generators; prepares messages in proper format for delivery; establishes and maintains station logs; performs preventative maintenance on radio teletype and tape relay systems; operates radio equipment in voice mode. *Skill Level 20:* Able to perform the duties required for Skill Level 10; may serve as a team chief, supervising two or more Skill Level 10 personnel; selects sites and assists in installation of equipment; prepares work schedules, operating procedures, and instructions; instructs and demonstrates power procedures; prepares equipment inspection reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises from 2 to 4 radio teletype operations teams; supervises installation of equipment; establishes training program to correct faulty work practices and operating procedures; prepares and disseminates work schedules, operating procedures and instructions; establishes and supervises maintenance program to ensure operational readiness of equipment; requisitions supplies and prepares technical and administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in teletypewriter operation and 3 in typewriting. In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in teletypewriter operation and 3 in typewriting. In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting, 3 in human relations, and 3 in personnel supervision (10/79).

MOS-05D-001

EW/Signal Intelligence Emitter
Identifier/Locator

05D20
05D30
05D40

Exhibit Dates: 10/73-2/77.

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Operates or supervises the operation of radio direction-finding systems and other systems using advanced identification techniques; intercepts and acquires bearings on target transmitters and performs analysis on maps or charts to establish probable location of target transmitters; intercepts, acquires, and performs analysis on signals from target transmitters. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 20:* Employs special identification techniques to recognize, identify, and locate foreign radio transmitters; forwards bearings and identification information to a control center; selects, erects, and orients tactical antennas; obtains desired visual display on specialized monitor oscilloscopes; records electrical characteristics of signals displayed, using light sensitive recorders; operates direction-finding and related cryptological, communications, and automatic data processing equipment; prepares and maintains operation logs and card files; types at a minimum rate of 25 words per minute; copies International Morse Code at a minimum rate of 15 groups per minute. *Skill Level 30:* Able to perform the duties required for Skill Level 20; maintains section management files; classifies, analyzes, and evaluates observed bearings and waveform oscillograms; establishes, plots, and evaluates bearings to determine probable geographical location of foreign transmitters; performs measurements of bands on oscillograms to determine ripple frequency, modulation percentages, and duration of other effects; maintains calibration and accuracy studies, and computes statistical data, including standard deviations and systemic errors; monitors quality control of input and data for automatic data processing support; may serve as a first-line supervisor, assigning workloads and completing personnel evaluations; presents oral and written reports. *Skill Level 40:* Able to perform the duties required for Skill Level 30; inspects equipment to ensure proper alignment and orientation; provides guidance and assistance in site selection and equipment installation; prepares written and oral reports; establishes and supervises training programs; performs quality control measures and writes quality control reports; establishes and maintains facilities and support for site personnel; implements emergency action plans; may have experience as the enlisted commander of a detachment.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems operations and 2 in typing (9/79).

Recommendation, Skill Level 30

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 1 in office practices (9/79).

Recommendation, Skill Level 40

In the vocational certificate category, 4 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 in human relations, 3 for field experience in personnel supervision, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 2 in office practices (9/79).

MOS-05D-002

EW/Signal Intelligence Emitter
Identifier/Locator

05D10
05D20
05D30

Exhibit Dates: 3/77-8/87.

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Operates or supervises the operation of radio direction-finding systems and other systems using advanced identification techniques; intercepts and acquires bearings on target transmitters and performs analysis on maps or charts to establish probable location of target transmitters; intercepts, acquires, and performs analysis on signals from target transmitters. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 10:* Employs special identification techniques to recognize, identify, and locate foreign radio transmitters; forwards bearings and identification information to a control center; selects, erects, and orients tactical antennas; obtains desired visual display on specialized monitor oscilloscopes; records electrical characteristics of signals displayed, using light sensitive recorders; operates direction-finding and related cryptological, communications, and automatic data processing equipment; prepares and maintains operation logs and card files; types at a minimum rate of 25 words per minute; copies International Morse Code at a minimum rate of 15 groups per minute. *Skill Level 20:* Able to perform the duties required for Skill Level 10; maintains section management files; classifies, analyzes, and evaluates observed bearings and waveform oscillograms; establishes, plots, and evaluates bearings to determine probable geographical location of foreign transmitters; performs measurement of bands on oscillograms to determine ripple frequency, modulation percentages, and duration of other effects; maintains calibration and accuracy studies, and computes statistical data, including standard deviations and systemic errors; monitors quality control of input and data for automatic data processing support; may serve as a first-line supervisor, assigning workloads and completing personnel evaluations; presents oral and written reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; inspects equipment to ensure proper alignment and orientation; provides guidance and assistance in site selection and equipment installation; prepares written and oral reports; performs quality control measures and writes quality control reports; establishes and maintains facilities and support for site personnel; implements emergency action plans; may have experience as the enlisted commander of a detachment.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems operations and 2 in typing (6/77).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 1 in office practices (6/77).

Recommendation, Skill Level 30

In the vocational certificate category, 4 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 in human relations, 3 for field experience in personnel supervision, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 2 in office practices (6/77).

MOS-05D-003

Electronic Warfare (EW)/Signal Intelligence Emitter Identifier/Locator

05D10
05D20
05D30

Exhibit Dates: 9/87-3/90. (Effective 3/90, MOS 05D was discontinued and its duties were incorporated into MOS 98D, Emitter Locator/Identifier.)

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Operates or supervises the operation of radio direction-finding systems and other systems using advanced identification techniques; intercepts and acquires bearings on target transmitters and performs analysis on maps or charts to establish probable locations of target transmitters. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 10:* Employs special transmitters; forwards bearings and identification information to a control center; selects, erects, and orients tactical antennas; obtains desired visual display on specialized monitor oscilloscopes; records electrical characteristics of signals displayed, using light sensitive recorders; operates direction-finding and related cryptological, communications, and automatic data processing equipment; prepares and maintains operation logs and card files; types at a minimum rate of 25 words per minute; copies International Morse Code at a minimum rate of 20 groups per minute. *Skill Level 20:* Able to perform the duties required for Skill Level 10; maintains section management files; classifies, analyzes, and evaluates observed bearings and waveform oscillograms; establishes, plots, and evaluates bearings to detemine probable geographical location of foreign transmitters; performs measurement of bands on oscillograms to determine ripple frequency, modulation percentages, and duration of other effects; maintains calibration and accuracy studies, and computes statistical data, including standard deviations and systemic errors; monitors quality control of input and data for automatic data processing support; may serve as a first-line supervisor, assigning workloads and completing personnel evaluations; presents oral and written reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; inspects equipment to ensure proper alignment and orientation; provides guidance and assistance in site selection and equipment installation; prepares written and oral reports; establishes and maintains facilities and support for site personnel; implements emergency action plans; may have experience as the enlisted commander of a detachment.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding and 1 in computer literacy (9/88).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in written communications, 1 in office practices, and 2 in computer literacy (9/88).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in written communications, 3 in office practices, 3 in computer literacy, and 3 for field experience in personnel supervision (9/88).

MOS-05E-001

Voice Radio Operator

05E20
05E40

Exhibit Dates: 10/73-2/78. (Effective 3/78, MOS 05E was discontinued and its functions were incorporated into MOS 05B, Radio Operator.)

Career Management Field: 72 (Telecommunications).

Description

Summary: Supervises or operates and maintains radio communications equipment and transmits and receives messages by voice. *Skill Level 20:* Connects components; erects antennas; installs power generators; test-operates equipment; installs and operates radio wire integration facilities and devices associated with FM/SSB radio nets; performs preventive maintenance on radio and associated power equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor of a radio operating facility comprised of at least 4 to 30 or more radio operators; selects installation sites; prepares and disseminates work schedules, operating procedures, and instructions; instructs and demonstrates proper procedures to radio operators; checks operational logs, station files, and maintenance schedules for completeness and accuracy; prepares technical and administrative reports.

Recommendation, Skill Level 20

In the vocational certificate category, 9 semester hours in broadcasting and 3 in small instrument maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in elementary broadcasting and 3 in elementary radio communications (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 9 semester hours in broadcasting and 3 in small instrument maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in elementary broadcasting, 3 in elementary radio communications, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (3/76).

MOS-05F-001

Radio Teletypewriter Operator (Non-Morse)

05F20
05F40

Exhibit Dates: 10/73-2/78. (Effective 3/78, MOS 05F was discontinued and its functions were incorporated into MOS 05C, Radio Teletype Operator.)

Career Management Field: 72 (Telecommunications).

Description

Summary: Sets up and operates teletypewriter and tape relay equipment. *Skill Level 20:* Erects antennas; installs power generators; processes incoming and outgoing messages; converts perforated tape into literal copy; encodes and decodes messages with cryptographic devices; establishes and posts logs; performs preventive maintenance on equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises Skill Level 20 personnel; teaches subordinates correct operating procedures; plans work and maintenance schedules; maintains records; writes technical and administrative reports; supervises installation of equipment.

Recommendation, Skill Level 20

In the vocational certificate category, 5 semester hours in basic typewriting, 3 in radio operation, 6 in radio service and repair, and 1 in small-engine operation and maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic typewriting, 3 in radio operation, and 3 in radio service and repair (2/75).

Recommendation, Skill Level 40

In the vocational certificate category, 5 semester hours in basic typewriting, 3 in radio operation, 6 in radio service and repair, 1 in small-engine operation and maintenance, 3 in technical writing, and 6 for a practicum in personnel and records management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic typewriting, 3 in radio operation, 3 in radio service and repair, 3 in technical writing, 2 in personnel supervision, and 2 in records management. In the upper-division baccalaureate category, 3 semester hours in business administration (2/75).

MOS-05G-001

Signal Security Specialist

05G20
05G40
05G50

Exhibit Dates: 10/73-2/77.

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Supervises and conducts signal security operations throughout the army; monitors and analyzes communications signals; performs electronic security inspections; reviews documents for adequacy of security; prepares comprehensive written reports and makes oral presentations. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill*

Level 20: Performs transcriptions, monitoring, and basic analysis of radiotelephone and conventional telephone messages to detect communications security discrepancies and violations; reviews communications, electronic signal instructions, communications electronic operating instructions, and operations plans and orders to determine adequacy of communications security; reads and interprets maps and map overlays; prepares basic reports on signal security activities; operates and performs user maintenance on communications security and monitoring equipment; selects sites for, erects, and orients tactical antennas; selects and uses commerical battery and generator power; performs general office duties such as filing, typing (35 words per minute minimum), preparation of reports and record keeping; presents oral reports concerning communications security activities. If duty position was communication security specialist, performs the following duties: Provides basic signal security advice and assistance to commanders and performs security analysis of security codes; establishes and supervises operating sites; writes reports, including statistical analyses and presents oral reports on data collected; makes recommendations to eliminate disclosures of intelligence information; provides advice and assistance concerning cryptographic systems and the interpretation of basic documents and regulations; determines need for written communication security instructions; prepares special, periodic, and project reports on signal security activities; may serve as team chief, supervising 2-5 persons. If duty position was senior communications security specialist, performs the following duties: Is a first-line supervisor of 10-12 persons; provides advice and assistance on electronic security procedures and signal security training; prepares signal security monitoring cover plan; analyzes the signal output of communications and noncommunications equipment to establish methods of operations, cryptonetting, and other types of intelligence; reviews documents for signal security; plans and supervises electronic security support; schedules signal security operational activities. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises 15 or more persons; determines needed signal intelligence support; presents oral reports to commanders on operational security plan; serves as advisor to commanders on signal security matters; plans and conducts classes on signal security activities. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as signal security operations chief, first sergeant of a company, or signal security chief; supervises 50-300 persons; has experience as the enlisted commander of a detachment; develops and writes signal security doctrine; advises commander and manages signal security personnel; plans career progression training; allocates personnel; advises commander and manages signal security missions; advises generals and high-level government officials on signal security activities.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in written communication skills, 2 in oral communication skills, 2 in electronic systems operations, and 1 in office practices. If the duty position was communications security specialist, use the following recommendation: In the vocational certificate category, 3 semester hours in typing, 3 in written communication skills, 3 in oral communication skills, 2 in electronic systems operation, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in written communication skills, 3 in oral communication skills, 3 for field experience in personnel supervision, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. If the duty position was senior communications security specialist, use the following recommendation: In the vocational certificate category, 4 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems, 2 in office practices, and 2 in introductory mathematics. In the upper-division baccalaureate category, 2 semester hours for field experience in management (6/77).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 6 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 for an internship in education (6/77).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 40. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in introduction to management, 3 in personnel management, and 3 for an internship in education (6/77).

MOS-05G-002

SIGNAL SECURITY SPECIALIST

05G10
05G20
05G30
05G40
05G50

Exhibit Dates: 3/77-9/85. (Effective 9/85, MOS 05G was discontinued and its functions were incorporated into MOS 97G, Signal Security Specialist.)

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Supervises and conducts signal security operations throughout the Army; monitors and analyzes communications signals; performs electronic security inspections; reviews documents for adequacy of security; prepares comprehensive written reports and makes oral presentations.

NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 10:* Performs transcription, monitoring, and basic analysis of radiotelephone and conventional telephone messages to detect communications security discrepancies and violations; reviews communications, electronic signal instructions, communications electronic operating instructions, and operations plans and orders to determine adequacy of communications security; reads and interprets maps and map overlays; prepares basic reports on signal security activities; operates and performs user maintenance on communications security and monitoring equipment; selects sites for, erects, and orients tactical antennas; selects and uses commercial battery and generator power; performs general office duties such as filing, typing (35 words per minute minimum), preparation of reports, and record keeping; presents oral reports concerning communications security activities. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as team chief, supervising 2-5 persons; provides basic signal security advice and assistance to commanders and performs security analysis of security codes; establishes and supervises operating sites; writes reports, including statistical analyses, and presents oral reports on data collected; makes recommendations to eliminate disclosures of intelligence information; provides advice and assistance concerning cryptographic systems and the interpretation of basic documents and regulations; determines need for written communication security instructions; prepares special, periodic, and project reports on signal security activities. *Skill Level 30:* Able to perform the duties required for Skill Level 20; is a first-line supervisor of 10-12 persons; provides advice and assistance on electronic security procedures and signal security training; prepares signal security monitoring cover plan; analyzes the signal output of communications and noncommunications equipment to establish methods of operations, cryptonetting, and other types of intelligence; reviews documents for signal security; plans and supervises electronic security support; schedules signal security operational activities. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises 15 or more persons; determines needed signal intelligence support; presents oral reports to commanders on operational security principles; plans signal security actions to support the operational security plan; serves as advisor to commanders on signal security matters; plans and conducts classes on signal security activities. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as signal security operations chief, first sergeant of a company, or signal security operations chief, first sergeant of a company, or signal security chief; supervises 50-300 persons; has experience as the enlisted commander of a detachment; develops and writes signal security doctrine; advises commander and manages signal security personnel; plans career progression training; allocates personnel; advises commander and manages signal security equipment resources; plans and carries out signal security missions; advises generals and high-level government officials on signal security activities.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associ-

ate degree category, 3 semester hours in typing, 2 in written communication skills, 2 in oral communication skills, 2 in electronic systems operations, and 1 in office practices (6/77).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in typing, 3 in written communication skills, 3 in oral communication skills, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in written communication skills, 3 in oral communication skills, 3 for field experience in personnel supervision, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics (6/77).

Recommendation, Skill Level 30

In the vocational certificate category, 4 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the upper-division baccalaureate category, 2 semester hours for field experience in management (6/77).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the lower-division baccalaureate/associate degree category, 6 semester hours in written communication skills, 3 in typing, 3 in oral communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in office practices, and 2 in introductory mathematics. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 for an internship in education (6/77).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 40. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in introduction to management, 3 in personnel management, and 3 for an internship in education (6/77).

MOS-05H-001

EW/SIGNAL INTELLIGENCE MORSE
INTERCEPTOR
05H20
05H40

Exhibit Dates: 10/73-2/77.

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Operates International Morse Code message interception and simple printer equipment and supervises the operation of such equipment in mobile or fixed installation for the purpose of detecting, identifying, and exploiting foreign communications. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the comptencies and knowledge associated with the MOS were evaluated. *Skill Level 20:* Operates Morse Code interception equipment, including radio receivers, special typewriters, teletypewriters, antenna-selection devices, internal communications equipment, and magnetic tape recorders; searches for, identifies, and manually records foreign International Morse Code communications at a minimum rate of 20 groups per minute; performs first-level analysis of messages to detect anomalies and suspect items which may be of intelligence interest; maintains operator's log of messages and related data and delivers messages to analysts for interpretation; performs operator maintenance on equipment; types at a minimum speed of 25 words per minute. If duty position was senior Morse interceptor, also performs the following duties: Performs more detailed message analysis and evaluation prior to forwarding messages to other analysts; writes detailed reports regarding intercepted messages; conducts on-the-job training; presents oral reports to high-level command staff. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises Morse intercept activities; establishes and maintains extensive intercept files for messages and related data; assists in formulating unit development plans. If duty position was Morse operations control chief, Morse operations supervisor, or Morse operations shift supervisor, also performs the following duties: Allocates personnel and equipment resources; assists in designing collection strategies; may have experience as the enlisted commander of a detachment; establishes and supervises training programs; analyzes automatic data processing results and confers with computer programmers and analysts. NOTE: May have progressed to 05H40 from 05H30 or 05D30 (EW/ Signal Emitter Identifier/Locator).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems operations and 2 in typing. If the duty position was senior Morse interceptor, use the following recommendation: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 1 in office practices (9/79).

Recommendation, Skill Level 40

In the vocational certificate category, 4 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, and 2 in office practices. If the duty position was Morse operations control chief, Morse operations supervisor, or Morse operations shift supervisor, use the following recommendation: In the vocational certificate category, 6 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 6 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/79).

NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 10:* Operates Morse Code interception equipment, including radio receivers, special typewriters, teletypwriters, antenna selection devices, internal communications equipment, and magnetic tape recorders; searches for, identifies, and manually records foreign International Morse Code communications at a minimum rate of 20 groups per minute; performs first-level analysis of messages to detect anomalies and suspect items which may be of intelligence interest; maintains operator's log of messages and related data and delivers messages to analysts for interpretation; performs operator maintenance on equipment; types at a minimum speed of 25 words per minute. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs more detailed message analysis and evaluation prior to forwarding messages to other analysts; writes detailed reports regarding intercepted messages; conducts on-the-job training; presents oral reports to high-level command staff. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises Morse intercept activities; establishes and maintains extensive intercept files for messages and related data; assists in formulating unit deployment plans. *Skill Level 40:* Able to perform the duties required for Skill Level 30; allocates personnel and equipment resources; assists in designing collection strategies; may have experience as the enlisted commander of a detachment; analyzes automatic data processing results and confers with computer programmers and analysts. NOTE: May have progressed to 05H40 from 05H30 or 05D30 (EW/ Signal Intelligence Emitter Identifier/Locator).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems operations and 2 in typing (6/77).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associ-

ate degree category, 3 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 1 in office practices (6/77).

Recommendation, Skill Level 30

In the vocational certificate category, 4 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, and 2 in office practices (6/77).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 6 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, and 2 in office practices. In the upper-division baccalaureate category, 3 semester hours for field experience in management (6/77).

MOS-05H-003

ELECTRONIC WARFARE (EW)/SIGNAL INTELLIGENCE MORSE INTERCEPTOR

05H10

05H20

05H30

05H40

Exhibit Dates: 9/87-3/90. (Effective 3/90, MOS 05H was discontinued and its duties were incorporated into MOS 98H, Morse Interceptor.)

Career Management Field: 98 (Electronic Warfare/Cryptologic).

Description

Summary: Operates International Morse Code message interception and simple printer equipment and supervises the operation of such equipment in mobile or fixed installations for the purpose of detecting, identifying, and exploiting foreign communications. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated. *Skill Level 10:* Operates Morse Code interception equipment, including radio receivers, special typewriters, teletypewriters, antenna selection devices, internal communications equipment, and magnetic tape recorders; searches for, identifies, and manually records foreign international Morse Code communications at a minimum rate of 20 groups per minute; performs first-level analysis of messages to detect anomalies and suspect items which may be of intelligence interest; maintains operator's log of messages and related data and delivers messages to analysts for interpretation; performs operator maintenance on equipment; types at a minimum speed of 25 words per minute. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs more detailed message analysis and evaluation prior to forwarding messages to other analysts; writes detailed reports regarding intercepted messages; conducts on-the-job training; presents oral reports to high-level command staff. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises Morse intercept activities; establishes and maintains extensive intercept files for messages and related data; assists in formulating unit deployment plans. *Skill Level 40:* Able to perform the duties required for Skill Level 30; allocates personnel and equipment resources; assists in designing collection strategies; may have experience as the enlisted commander of a detachment; analyzes automatic data processing results and confers with computer programmers and analysts; uses counseling techniques to alleviate stress among subordinates. NOTE: May have progressed to 05H40 from 05H30 or 05D30 (EW/Signal Intelligence Emitter Identifier/Locator).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in Morse code and 3 in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding (9/88).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in Morse code and 3 in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding and 1 in office practices (9/88).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in Morse code and 3 in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in office practices, 3 in human relations, 3 for field experience in personnel supervision, and 3 in written communications (9/88).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in Morse code and 3 in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in office practices, 3 in human relations, 3 for field experience in personnel supervision, 3 in written communications, 3 for a counseling practicum, and 3 in social science and humanities. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/88).

MOS-05K-001

EW/SIGNAL INTELLIGENCE NON-MORSE INTERCEPTOR

05K20

O5K40

Exhibit Dates: 10/73-2/77.

Career Management Field: 98 (Electronic Warfare/Cryptolgic).

Description

Summary: Operates non-Morse communications intercept and recording equipment and supervises the operation of such equipment in mobile or fixed environments for the purpose of identifying and recording foreign radioteletype, facsimile, and data communications transmissions. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the MOS were evaluated. *Skill Level 20:* Operates radioteletype, facsimile, and data intercept and recording equipment; knows basic AC and DC theory, circuit electronic theory, basic frequency analysis, spectrum analysis, and functional algebra; searches for, identifies, and records foreign transmissions; maintains a log of interceptions; prepares technical reports; types at a minimum rate of 25 words per minute; copies International Morse Code at a minimum rate of 15 groups per minute; performs operator maintenance on non-Morse intercept equipment; selects, erects, and orients tactical antennas. If duty position was senior teletypewriter interceptor, also performs the following duties: Assists in the establishment of operational sites; maintains the technical data base to support collection operations; employs special electronic equipment for complex signal analysis; analyzes intercepted communications for items of intelligence interest; understands computer usage in the interpretation of intercepted messages; prepares detailed reports. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises non-Morse intercept activities; allocates equipment and personnel resources; writes extensive reports to accurately provide intelligence information; analyzes long-term trends, using statistical analysis techniques; coordinates interaction with other collection and processing activities; conducts on-the-job training. If duty position was teletypewriter operations shift supervisor (paygrade E-7), also performs the following duties: Supervises non-Morse intercept activities; interprets signal intelligence collection priorities; ensures proper handling of intelligence information; assesses procedures and operations for adequacy in meeting intelligence requirements and recommends changes; may have experience as the enlisted commander of a detachment.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems operations, 2 in typing, 2 in introductory mathematics, and 2 in introduction to automatic data processing equipment. If the duty position was senior teletypewriter interceptor, use the following recommendation: In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, 2 in introduction to automatic data processing equipment, and 1 in office practices (9/79).

Recommendation, Skill Level 40

In the vocational certificate category, 4 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, 2 in introduction to automatic data processing equipment, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 4 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, 2 in introduction to automatic data processing equipment, and 2 in office practices. If the duty position was teletypewriter operations supervisor, (paygrade E-7), or teletypewriter operations shift supervisor (paygrade E-7), use the following recommendation: In the vocational certificate category, 6 semester hours in written communication skills, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, 2 in introduction to automatic data processing equipment, and 2 in office practices. In the lower-division baccalaureate/associate degree category, 6 semester hours in written communication skills, 3 for field experience in personnel supervision, 3 in human relations, 2 in electronic systems operations, 2 in typing, 2 in introductory mathematics, 2 in introduction to automatic data processing equipment, and 2 in office practices. In the upper-division baccalaureate category, 3 semester hours for field experience in management (7/79).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 1 in computer literacy, and 2 in office practices (9/88).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 2 in computer literacy, 3 in office practices, and 3 in written communications (9/88).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in computer literacy, 3 in office practices, 3 in written communications, 3 in human relations, and 3 in social sciences and humanities (9/88).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in electronic systems operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in keyboarding, 3 in computer literacy, 3 in office practices, 3 in written communications, 3 in human relations, 3 in social sciences and humanities, 3 for a counseling practicum, and 3 for field experience in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/88).

MOS-11B-001

INFANTRYMAN
(LIGHT WEAPONS INFANTRYMAN)

11B10
11B20
11B40

Exhibit Dates: 10/73-8/75.

Career Management Field: 11 (Maneuver Combat Arms), subfield 111 (Infantry).

Description

Summary: Is a member of a unit which consists of 10-70 persons and which utilizes individual weapons and machine guns in offensive and defensive ground combat. *Skill Level 10:* Fires rifles and machine guns; utilizes camouflage to conceal weapons and personnel; assists in the construction of minor fortifications, roadblocks, wire entanglements, and minefields; prepares rough maps, sketches, and simple overlays; reads maps and aerial photographs; performs preventive maintenance on weapons and equipment; administers first aid. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates machine guns and hand-held antiaircraft weapons; uses grenade launchers. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor, directing the utilization of personnel and equipment; supervises construction and maintenance activities; gives commands and makes oral reports; supervises the receipt, storage, and distribution of equipment, supplies and food.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/75).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/75).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, if the duty assignment was team leader, section leader, squad leader, or team chief, 3 semester hours for field experience in management; if the duty assignment was duty sergeant, ammunition chief, or section chief, 3 semester hours in public speaking and 6 for field experience in management; if the duty assignment was instructor, 3 semester hours in principles of instruction, 3 in public speaking, and 6 for field experience in management; if the duty assignment was section sergeant, 3 semester hours in office accounting, 3 in public speaking, 1 in inventory management, and 6 for field experience in management (2/75).

MOS-11B-002

INFANTRYMAN

11B10
11B20
11B30
11B40
11B50

Exhibit Dates: 9/75-2/78.

Career Management Field: 11 (Maneuver Combat Arms), subfield 111 (Infantryman).

Description

Summary: Leads, supervises, and serves as a member of an infantry unit of 10-20 persons, employing individual weapons, machine guns, and anti-armor weapons in offensive and defensive ground combat. *Skill Level 10:* Uses individual infantry weapons; lays field wire; performs basic communications functions and operates communication equipment; utilizes camouflage to conceal weapons and personnel; constructs minor fortifications; performs land navigation; performs preventive maintenance on weapons, equipment, and some vehicles; makes verbal reports; administers first aid; operates wheeled vehicles to transport personnel, supplies, and equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as a team leader, directing deployment and employment of personnel; supervises maintenance and construction activities; reads, interprets, and collects intelligence information; distributes administrative and training documents; trains subordinate personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; as a first-line supervisor, directs the utilization of personnel and equipment; coordinates unit actions with adjacent and supporting elements; insures proper collection and reporting of intelligence data. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate units; supervises receipt, storage, and distribution of supplies, equipment, and food to subordinate units; provides oral and written reports; assists in production and administration of staff journals, files, records, and reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as the principal noncommissioned officer in an infantry company; assists in planning, coordinating, and supervising all company activities; advises superiors on all matters concerning subordinate personnel. NOTE: May have progressed to 11B50 from 11B40 or 11C40 (Indirect Fire Infantryman).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying and 1 in first aid (11/75).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 for field experience in management, and 1 in first aid (11/75).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in record keeping, 3 in human relations, 3 for field experience in management, and 1 in first aid (11/75).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in human relations, 3 in office administration, 3 in record keeping, 3 in surveying, 3 for field experience in management, and 1 in first aid (11/75).

Recommendation, Skill Level 50

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 4 semester hours in office administration, 4 in record keeping, 6 in human relations, 3 in surveying, 3 in introduction to management, 3 for field experience in management, and 1 in first aid. In the upper-division baccalaureate category, 3 semester hours in introduction to management and 3 for field experience in management (11/75).

Career Management Field: 11 (Infantry).

Description

Summary: Leads, supervises, and serves as a member of an infantry unit of 10-20 persons, employing individual weapons, machine guns, and anti-armor weapons in offensive and defensive ground combat. *Skill Level 10:* Uses individual infantry weapons; lays field wire; performs basic communications functions and operates communication equipment; utilizes camouflage to conceal weapons and personnel; constructs minor fortifications; performs land navigation; performs preventive maintenance on weapons, equipment, and some vehicles; makes verbal reports; administers first aid; operates wheeled vehicles and transport personnel, supplies, and equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as a team leader, directing deployment and employment of personnel; supervises maintenance and construction activities; reads, interprets, and collects intelligence information; distributes administrative and training documents; trains subordinate personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; as a first-line supervisor, directs the utilization of personnel and equipment; coordinates unit actions with adjacent and supporting elements; insures proper collection and reporting of intelligence data. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and trains personnel in infantry operations and intelligence activities; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate units; supervises receipt, storage, and distribution of supplies, equipment, and food to subordinate units; provides oral and written reports; assists in production and administration of staff journals, files, records, and reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as the principal noncommissioned officer in infantry company; assists in planning, coordinating, and supervising all company activities; advises superiors on all matters concerning subordinate personnel. NOTE: May have progressed to 11B50 from 11B40, 11C40 (Indirect Fire Infantryman), or 11H40 (Heavy Antiarmor Weapons Crewman).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying and 1 in first aid (6/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance.

In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 for field experience in management, and 1 in first aid (6/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in record keeping, 3 in human relations, 3 for field experience in management, and 1 in first aid (6/79).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in human relations, 3 in office administration, 3 in record keeping, 3 in surveying, 3 in principles of instruction, 3 for field experience in management, and 1 in first aid (6/79).

Recommendation, Skill Level 50

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 4 semester hours in office administration, 4 in record keeping, 6 in human relations, 3 in surveying, 3 in introduction to management, 3 for field experience in management, 3 in principles of instruction, and 1 in first aid. In the upper-division baccalaureate category, 3 semester hours in introduction to management and 3 for field experience in management (6/79).

Career Management Field: 11 (Infantry).

Description

Summary: Leads or serves as a member of heavy antiarmor crew-served vehicles squad, section, or platoon. *Skill Level 10:* Serves as a loader of a special ammunition weapon; fires weapon or drives the vehicle; prepares ammunition; excercises safety precautions and knows first-aid procedures; lays field wire, performs basic communications function and operates communications equipment; performs preventive maintenance on vehicle, armament, and weapon fire control system; assists in clearing or breaching minefields or fortifications. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as a vehicle crew commander, directing employment of personnel in field operations; evaluates terrain; selects emplacement locations and assigns target locations; supervises construction of fortifications; interprets maps and prepares field sketches; supervises crew training and various work details. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises and leads an antiarmor section consisting of several vehicles; coordinates and supervises the employment of the section; supervises the receipt, storage, and distribution of food, supplies, and communication; coordinates firepower and advises on tactical situations; supervises maintenance program of all section vehicles and equipment; trains and instructs replacement personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in planning, organizing, and coordinating activities of subordinate activities and squads; assists in coordinating administrative matters, implementing training programs and communications activities; advises commander on employment of weapons systems. *Skill Level 50:* Able to perform the duties required for Skill Level 40; plans, coordinates, supervises, and participates in activities pertaining to organization, training, combat operations, and intelligence; serves as a principal noncommissioned officer in a heavy antiarmor weapons company; supervises the processing of operations and intelligence information at batallion or higher level.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid and 3 in map reading (11/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (11/79).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, 3 in personnel supervision, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (11/79).

Recommendation, Skill Level 50

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, 3 in personnel supervision, and 3 in introduction to management. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in personnel management (5/88).

MOS-11M-001

FIGHTING VEHICLE INFANTRYMAN

11M10
11M20
11M30
11M40

Exhibit Dates: 3/81-8/87.

Career Management Field: 11 (Infantry).

Description

Summary: Leads, supervises, manages, and serves as a member of a fighting vehicle unit or activity employing vehicular and dismounted weapons in combat operations. *Skill Level 10:* Operates and conducts preventive maintenance checks and services on the Infantry Fighting Vehicle (IFV) and components; performs operator maintenance on automotive components; selects routes and firing positions; provides a steady platform for stabilized weapons fire; assists in target detection, identification, and round sensing; assists in refueling and vehicle recovery operation; is familiar with turret recovery operation, loading, and controls; presents verbal reports and operates communications equipment; collects and reports technical information; assists in construction of fortifications; carries and prepares ammunition; administers first aid and applies field sanitation methods; maintains assigned weapons and individual equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; conducts preventive maintenance checks and services on IFV turret and weapon systems; performs operator maintenance on turret; assists in supervising automotive maintenance; loads and fires weapons; detects, acquires, identifies, and engages targets; responds to fire commands; determines range to targets; employs battlesight gunnery techniques and adjusts direct fire; prepares range cards; boresights and zeroes weapons; leads infantry dismount team in combat operations and processes intelligence and operations data; receives and implements combat orders; directs deployment of personnel in offensive, defensive, and retrograde combat operations; evaluates terrain, selects weapons' placement sites, and assigns target engagement areas and fields of fire; utilizes IFV capabilities to maintain night surveillance; requests, observes, and adjusts direct supporting fires; supervises construction of hasty fortifications; supervises receipt, storage, issue, and loading of ammunition; records operational information on maps; reads and interprets maps and aerial photos; trains lower skill-level personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; receives and issues orders; controls vehicular and dismounted weapons' fire in mounted and dismounted operations; engages targets from commander's position; coordinates action of squad with adjacent and supporting elements; coordinates organic and supporting firepower; leads and participates in patrols; insures collection and proper reporting of intelligence data to unit and responsible staff sections; supervises and manages all squad preventive and operator maintenance activities. *Skill Level 40:* Able to perform the duties required for Skill Level 30; performs duties as vehicle element or dismount element leader; assists platoon leader in controlling infantry fighting platoon in mounted or dismounted operations; acts as platoon leader in his absence; processes operations and intelligence information; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate squads; supervises receipt, storage and distribution of ammunition, supplies, equipment, and food to subordinate elements; supervises platoon preventive and operation maintenance activities of IFV; collects intelligence information to support combat operations; supervises and trains personnel in fighting vehicle operations, maintenance and intelligence activities; assists in dissemination of intelligence information to unit and staff sections; assists in coordination and implementation of combat operations, training programs, and administrative and communication procedures; assists in production and administration of staff journals, files, records, and reports; assists in organization and operation of the tactical operations center.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in vehicle maintenance, and 1 in map reading (9/85).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 2 in personnel supervision (9/85).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/85).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management (9/85).

MOS-11M-002

FIGHTING VEHICLE INFANTRYMAN

11M10
11M20
11M30
11M40
11M50

Exhibit Dates: 9/87-Present.

Career Management Field: 11 (Infantry).

Description

Summary: Leads, supervises, manages, and serves as a member of a fighting vehicle unit or activity employing vehicular and dismounted weapons in combat operations. *Skill Level 10:* Operates and conducts preventive maintenance checks and services on the Infantry Fighting Vehicle (IFV) and components; performs operator maintenance on automotive components; selects routes and firing positions; provides a steady platform for stabilized weapons fire; assists in target detection, identification, and round sensing; assists in refueling and vehicle recovery operation; is familiar with turret recovery operation, loading, and controls; presents verbal reports and operates communications equipment; collects and reports technical information; assists in construction of fortifications; carries and prepares ammunition; administers first aid and applies field sanitation methods; maintains assigned weapons and individual equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; conducts preventive maintenance checks and services on IFV turret and weapon systems; performs operator maintenance on turret; assists in supervising automotive maintenance; loads and fires weapons; detects, acquires, identifies, and engages targets; responds to fire commands; determines range to targets; employs battlesight gunnery techniques and adjusts direct fire; prepares range cards; boresights and zeroes weapons; leads infantry dismount team in combat operations and processes intelligence and operations data; receives and implements combat orders; directs deployment of personnel in offensive, defensive, and retrograde combat operations; evaluates terrain, selects weapons' placement sites, and assigns target engagement areas and fields of fire; utilizes IFV capabilities to maintain night surveillance; requests, observes, and adjusts direct supporting fires; supervises construction of hasty fortifications; supervises receipt, storage, issue, and loading of ammunition; records operational information on maps; reads and interprets maps and aerial photos; trains lower skill-level personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; receives and issues orders; controls vehicular and dismounted weapons' fire in mounted and dismounted operations; engages targets from commander's position; coordinates action of squad with adjacent and supporting elements; coordinates organic and supporting firepower; leads and participates in patrols; insures collection and proper reporting of intelligence data to unit and responsible staff sections; supervises and manages all squad preventive and operator maintenance activities.

Skill Level 40: Able to perform the duties required for Skill Level 30; performs duties as vehicle element or dismount element leader; assists platoon leader in controlling infantry fighting platoon in mounted or dismounted operations; acts as platoon leader in his absence; processes operations and intelligence information; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate squads; supervises receipt, storage and distribution of ammunition, supplies, equipment, and food to subordinate elements; supervises platoon preventive and operation maintenance activities of IFV; collects intelligence information to support combat operations; supervises and trains personnel in fighting vehicle operations, maintenance and intelligence activities; assists in dissemination of intelligence information to unit and staff sections; assists in coordination and implementation of combat operations, training programs, and administrative and communication procedures; assists in production and administration of staff journals, files, records, and reports; assists in organization and operation of the tactical operations center. *Skill Level 50:* Able to perform the duties required for Skill Level 40; plans, coordinates, supervises, and participates in activities pertaining to organization, training, and combat operations and intelligence; serves as principal noncommissioned officer in a mechanized infantry company; supervises the processing of operations and intelligence information at battalion or higher level.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in vehicle maintenance, and 1 in map reading (9/85).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 2 in personnel supervision (9/85).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/85).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management (9/85).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in personnel management (5/88).

MOS-11Z-001

Maneuver Combat Arms Sergeant

11Z50

Exhibit Dates: 9/75–2/78. (Effective 3/78, MOS 11Z was discontinued and its functions were incorporated into 11B50, Infantryman, and 19Z50, Armor Senior Sergeant; effective 9/87, MOS 11Z was reestablished with the title Infantry Senior Sergeant–see exhibit MOS-11Z-002.)

Career Management Field: 11 (Maneuver Combat Arms), subfield 110 (General).

Description

Skill Level 50: Serves as the principal noncommissioned officer in operations and intelligence sections or as the first sergeant at a combined arms headquarters at brigade or higher level; supervises senior noncommissioned officers performing the duties of 11B50 (Infantryman) or 11E50 (Armor Crewman); as an experienced mid-level manager, plans, coordinates, and supervises all activities pertaining to daily operations, training, and administrative activities of subordinate personnel. NOTE: May have progressed to 11Z50 from 11B50 or 11E50.

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 15 semester hours in business administration and personnel management, 6 in human relations, and 3 for field experience in management (11/75).

MOS-11Z-002

Infantry Senior Sergeant

11Z50

Exhibit Dates: Pending evaluation. 9/87–Present.

MOS-12B-001

Combat Engineer

12B20
12B30
12B40

Exhibit Dates: 10/73–9/74.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Engages in construction and demolition activities. *Skill Level 20:* Uses hand tools and engineering tools; operates a dump truck; assists with excavation, earthmoving, rigging, and concrete work. *Skill Level 30:* Able to perform the duties required for Skill Level 20; uses basic algebraic skills and physical principles; interprets maps; reads and interprets blueprints; writes technical reports; applies oral communication skills; has a broad knowledge of construction practices. *Skill Level 40:* Able to perform the duties required for Skill Level 20 or 30; supervises teams of construction personnel. NOTE: May have progressed to 12B40 from 12B20, 12B30, or 12F40 (Combat Engineer Tracked Vehicle Crewman).

Recommendation, Skill Level 20

In the vocational certificate category, 12 semester hours in construction equipment operation (2/75).

Recommendation, Skill Level 30

In the vocational certificate category, 12 semester hours in construction equipment operation, 6 in construction methods, 3 in algebra, 1 in applied physics, 1 in blueprint reading, and 2 in communication skills. In the lower-division baccalaureate/associate degree category, 3 semester hours in algebra, 1 in applied physics, 2 in geography (map interpretation), 6 in construction methods, 1 in blueprint reading, and 2 in communication skills (2/75).

Recommendation, Skill Level 40

In the vocational certificate category, 15 semester hours in construction equipment operation, 3 in algebra, 1 in applied physics, 2 in geography (map interpretation), 6 in construction methods, 1 in blueprint reading, 2 in communication skills, and 3 in construction supervision. In the lower-division baccalaureate/associate degree category, 3 semester hours in algebra, 1 in applied physics, 2 in geography (map interpretation), 6 in construction methods, 1 in blueprint reading, 2 in communication skills, and 3 in construction supervision (2/75).

MOS-12B-002

Combat Engineer

12B10
12B20
12B30
12B40

Exhibit Dates: 10/74–8/76.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Engages in construction and demolition activities. *Skill Level 10:* Assists combat engineers, bridge and powered bridge specialists, atomic demolition munitions specialists, and combat engineer tracked vehicle crewmen in performance of duties; uses hand tools and engineering tools. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates a dump truck; assists with excavation, earthmoving, rigging, and concrete work. *Skill Level 30:* Able to perform the duties required for Skill Level 20; acts as demolition expert. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises teams of construction and demolition personnel. NOTE: May have progressed to 12B40 from 12B20, 12B30, or 12F40 (Combat Engineer Tracked Vehicle Crewman).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in hand tool operation (12/75).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in construction equipment operation and 3 in hand tool operation (12/75).

Recommendation, Skill Level 30

In the vocational certificate category, 9 semester hours in demolition operations, 6 in construction equipment operation, and 3 in hand tool operation (12/75).

Recommendation, Skill Level 40

In the vocational certificate category, 15 semester hours in construction equipment operation, 9 in demolition operations, 2 in geography (map interpretation), 6 in construction methods, 1 in blueprint reading, 2 in communication skills, and 3 in construction supervision. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, and additional credit in administration and in construction on the basis of institutional evaluation (12/75).

MOS-12B-003

COMBAT ENGINEER

12B10
12B20
12B30
12B40

Exhibit Dates: 9/76–Present.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Engages in vertical, road, and airfield construction, and rigging, bridging, and demolition activities. *Skill Level 10:* Assists combat engineers and bridge and powered-bridge specialists in performance of duties; uses hand tools and engineering tools. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists with excavation, earthmoving, rigging, and concrete work. *Skill Level 30:* Able to perform the duties required for Skill Level 20; acts as demolition expert. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises teams of construction and demolition personnel.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in hand-tool operation (11/77).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in construction equipment operation and 3 in hand-tool operation (11/77).

Recommendation, Skill Level 30

In the vocational certificate category, 9 semester hours in demolition operations, 6 in construction equipment operation, and 3 in hand-tool operation (11/77).

Recommendation, Skill Level 40

In the vocational certificate category, 15 semester hours in construction equipment operation, 9 in demolition operations, 3 in hand-tool operation, 2 in geography (map interpretation), 3 in construction methods, 1 in blueprint reading, 2 in communication skills, and 3 in construction supervision. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, and additional credit in administration and in construction on the basis of institutional evaluation (11/77).

MOS-12C-001

BRIDGE SPECIALIST

12C20
12C30
12C40

Exhibit Dates: 10/73–8/76.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Provides engineer bridging for streams and dry gaps. *Skill Level 20:* Assembles, erects, and dissassembles floating and fixed prefabricated bridges; uses rigging techniques; operates rafts and ferries; uses and maintains hand tools. *Skill Level 30:* Able to perform the duties required for Skill Level 20; operates power boats; interprets maps; uses and maintains construction hand tools. *Skill Level 40:* Able to perform the duties required for Skill Level 20 or 30; supervises bridge construction and repair; interprets maps; determines bridge construction sites; provides work and material estimates; supervises the use of heavy construction equipment; prepares technical reports; supervises a minimum of 10 persons.

Recommendation, Skill Level 20

In the vocational certificate category, 9 semester hours in bridge construction and 3 in use and maintenance of hand tools (2/75).

Recommendation, Skill Level 30

In the vocational certificate category, 12 semester hours in bridge construction, 4 in use and maintenance of construction hand tools, and 4 in power boat operation. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction methods and 1 in blueprint reading (2/75).

Recommendation, Skill Level 40

In the vocational certificate category, 12 semester hours in bridge construction, 4 in use and maintenance of construction hand tools, 4 in power boat operation, 4 in construction methods, 3 in bridge maintenance, and 3 in construction supervision. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction methods, 3 in construction supervision, 1 in blueprint reading, 2 in geography (map interpretation), 2 in technical writing, 2 in communication skills, and 1 in applied physics (2/75).

MOS-12C-002

BRIDGE CREWMAN

12C10
12C20
12C30
12C40

Exhibit Dates: 9/76–Present.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Provides engineer bridging for streams and dry gaps. *Skill Level 10:* Assists in the assembly, erection, and disassembly of floating and fixed prefabricated bridges; uses and maintains hand tools; assists in rigging; prepares for operation and operates assault boats. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises rigging; performs as demolition expert. *Skill Level 30:* Able to perform the duties required for Skill Level 20; operates power boats; interprets maps; uses and maintains construction hand tools. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises bridge construction and repair; determines bridge construction sites; provides work and material estimates; supervises the use of heavy construction equipment; prepares technical reports; supervises a minimum of 10 persons.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in construction hand-tool operation and maintenance (11/77).

Recommendation, Skill Level 20

In the vocational certificate category, 9 semester hours in bridge construction and 3 in construction hand-tool operation and maintenance (11/77).

Recommendation, Skill Level 30

In the vocational certificate category, 12 semester hours in bridge construction, 4 in construction hand-tool operation and maintenance, and 4 in power boat operation. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction methods and 1 in blueprint reading (11/77).

Recommendation, Skill Level 40

In the vocational certificate category, 12 semester hours in bridge construction, 4 in construction hand tool operation and maintenance, 4 in power boat operation, 4 in construction methods, 3 in bridge maintenance, and 3 in construction supervision. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction methods, 3 in construction supervision, 1 in blueprint reading, 2 in geography (map interpretation), 2 in technical writing, 2 in communication skills, and 1 in applied physics (11/77).

MOS-12D-001

POWERED BRIDGE SPECIALIST

12D20
12D40

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 12D was discontinued and its functions were incorporated into MOS 12C, Bridge Crewman.)

Career Management Field: 12 (Combat Engineering).

Description

Summary: Performs or supervises powered bridging and rafting support duties for stream and other wet gap crossing operations; duties are similar to those performed in operating and maintaining ferry boats, tug boats, busses, and heavy duty trucks. *Skill Level 20:* Operates boats, trucks, and heavy duty equipment; connects with other vehicles to form rafts and bridges; holds position with or without anchor; utilizes compasses, ranges, charts, tide and current tables to take bearings and soundings; couples and uncouples bridge units; employs rigging techniques; maintains tools. *Skill Level 40:* Able to perform the duties required for Skill Level 20; interprets blueprints, aerial photographs, maps, and operating diagrams; plans and draws working sketches of crossing points, launching areas, and approach road nets; determines stream flow, effect of stream velocities, high water marks, type of stream bottom, and safe load capacities of raft and bridges; coordinates use of multiple units; inspects powered bridge components and equipment and supervises periodic and emergency maintenance; prepares technical reports on bridging and rafting activities; supervises powered bridge personnel.

Recommendation, Skill Level 20

In the vocational certificate category, 12 semester hours in boat operation, 3 in heavy equipment operation, and 3 in heavy equipment maintenance. In the lower-division baccalaureate/associate degree category, 2 semester hours in heavy equipment operation and 1 in use and care of tools (12/75).

Recommendation, Skill Level 40

In the vocational certificate category, 15 semester hours in heavy equipment operation, 4 in powered bridge construction, 4 in multiple unit management, 3 in heavy equipment maintenance, 2 in blueprint reading, and 2 in navigation. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 in heavy equipment operation, 2 in navigation, 2 in powered bridge construction management, and 1 in use and care of tools. In the upper-division baccalaureate category, if the duty assignment was either bridge section sergeant or bridge platoon sergeant, 3 semester hours for field experience in management (12/75).

MOS-12E-001

Atomic Demolition Munitions
Specialist

12E20
12E40

Exhibit Dates: 10/73-8/76.

Career Management Field: 12 (Combat Engineering).

Description

Summary: Assembles, arms, disarms, disassembles, tests, monitors, and transports atomic demolition munitions. NOTE: Able to perform the duties required for 12B10 (Combat Engineer). *Skill Level 20:* Interprets aerial photographs and reads maps; prepares atomic demolition munitions for destruction, using conventional demolition materials; employs radiological accident and incident control procedures; uses engineer handtools; performs combat engineering tasks and simple construction necessary in the employment of atomic demolition munitions. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor, serving as a squad or team leader or as a platoon sergeant; supervises atomic demolition munitions activities; interprets technical literature and instructs subordinates in the use of atomic demolition munitions equipment; enforces safety regulations; advises commander on the employment of the weapon and makes recommendations concerning technical improvements, safety procedures, and security; requisitions supplies and equipment; keeps files of related manuals and regulations; coordinates with other units on storage, security, and transportation of atomic demolition munitions and on communications procedures. NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; these duties were not evaluated.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in the use of hand tools and 1 in map reading (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in the use of hand tools and 1 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, 3 for field experience in management, and 3 for field experience in education (6/76).

MOS-12E-002

Atomic Demolition Munitions (ADM)
Specialist

12E10
12E20
12E30
12E40

Exhibit Dates: 9/76-2/89. (Effective 3/89, MOS 12E was discontinued.)

Career Management Field: 12 (Combat Engineering).

Description

Summary: Assembles, arms, disarms, disassembles, tests, monitors, and transports atomic demolition munitions (ADM). NOTE: Many of the duties required for this MOS involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the MOS were evaluated. *Skill Level 10:* Assists in assembling, arming, disarming, disassembling, testing, and monitoring of ADM; prepares ADM for transport; operates and maintains vehicles; inspects and repairs ADM, test equipment, training sets, tools, and related equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; interprets aerial photographs and reads maps; prepares ADM for destruction, using conventional demolition materials; employs radiological accident and incident control procedures; handles classified material and employs security procedures; uses engineering hand tools; performs combat engineering tasks and simple construction necessary in the employment of ADM. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises prefire, arming, disarming, firing, cancellation and emergency destruction procedures; supervises nuclear weapons transportation preparation, routing, and security; conducts briefings. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor of ADM activities; interprets technical literature and instructs subordinates in the use of ADM equipment; enforces safety regulations; advises commander on the weapon and makes recommendations concerning operational improvements, safety procedures, and security; requisitions supplies and equipment; keeps files of related manuals and regulations; coordinates with other units on storage, security, and transportation of ADM and on communications procedures.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in hand-tool operation and maintenance (11/77).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in hand-tool operation and maintenance, and 1 in map reading (11/77).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in hand-tool operation and maintenance 1 in map reading, and 3 in demolition operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in hand-tool operation and maintenance, 3 for field experience in personnel supervision, and 1 in map reading (11/77).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in hand-tool operation, 2 in map reading, 3 in demolition operations, and 2 in communication skills. In the lower-division baccalaureate/associate degree category, 3 semester hours in hand-tool operation and maintenance, 3 for field experience in personnel supervision, 3 in personnel supervision, 3 in human relations, 3 in safety, 3 in nuclear surveillance monitoring, and 2 in map reading (11/77).

MOS-12F-001

Combat Engineer Track Vehicle
Crewman

12F20
12F40

Exhibit Dates: 10/73-8/76. (Effective 9/76, MOS 12F was discontinued and its functions were incorporated into MOS 11E, Armor Crewman.)

Career Management Field: 12 (Combat Engineering).

Description

Summary: Commands or serves as a member of a combat engineer vehicle crew, an armored vehicle launched bridge crew, or a landing vehicle track crew. *Skill Level 20:* Operates combat engineer tracked vehicles over rough or smooth terrain, in sandy, swampy, and marshy areas, or in water; performs operator maintenance on vehicle and communication equipment; observes and reports targets and other combat information; reads compasses, maps, marine charts, and photographs for reconnaissance and terrain analysis and to establish locations; constructs field fortifications and utilizes camouflage; operates special purpose equipment, such as demolition guns, bridge launching mechanisms, mine clearing devices, lifting devices, and power winches; keeps required records and reports. NOTE: May have progressed to Skill Level 20 from 12B10 (Combat Engineer). *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises activities of combat engineer platoons, squads, and crews equipped with tracked vehicles operating independently or with engineer amphibious assault units; judges tide flow and estimates high water marks and types of offshore bottoms; interprets military maps, aerial photographs, and operating diagrams; assists in the preparation of operations directives, reports, and records.

Recommendation, Skill Level 20

In the vocational certificate category, 10 semester hours in operation of tracked construction equipment. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading or photographic interpretation (12/75).

Recommendation, Skill Level 40

In the vocational certificate category, 10 semester hours in operation of tracked construction equipment, 2 in equipment maintenance, 1 in records administration, and 1 in technical mathematics or physics. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading or photographic interpretation, 1 in records administration, and 2 in personnel supervision (12/75).

MOS-12F-002

Engineer Tracked Vehicle Crewman

12F10
12F20
12F30
12F40

Exhibit Dates: 9/79-Present.

Career Management Field: 12 (Combat Engineer).

Description

Summary: Leads, supervises, or serves as member of combat engineer vehicle launched bridge crew, or operates engineer armored personnel carrier. *Skill Level 10:* Operates combat engineer vehicles over varied terrain and roads; reacts to commands and navigates over land; operates special equipment such as bridge launchers, lifting devices, power winches, and bulldozers; loads, fires, and unloads guns; installs and dismantles radios and antennas; services and adjusts vehicle components; participates in bridging and demolition operations. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as squad leader; supervises, instructs, and provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises crew and section personnel; directs overall operations and training exercises; conducts battle drills; identifies targets, and selects placement of demolitions; coordinates maintenance requirements; manages equipment and personnel; conducts reconnaissance and reports intelligence information. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises platoon and section personnel; assists in planning, organization, direction, supervision, and management at the platoon, section, or team level; directs assignment of vehicles and personnel.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in heavy equipment operation. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in vehicle maintenance, and 1 in map reading (9/85).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in heavy equipment operation. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 2 in personnel supervision (9/85).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in heavy equipment operation. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (9/85).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in heavy equipment operation. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in vehicle maintenance, 2 in map reading, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management (9/85).

MOS-12Z-001

COMBAT ENGINEER SENIOR SERGEANT

12Z50

Exhibit Dates: 10/73-8/76.

Career Management Field: 12 (Combat Engineering).

Description

Skill Level 50: Serves as the principal noncommissioned officer of a combat engineer company, bridge company, or engineering section; capable of the management of personnel and activities in a civilian engineering/construction firm; assists in planning, supervising, and coordinating all company activities; advises company commander on all personnel matters; provides subordinate supervisors with instructions; inspects work; provides on-the-job training; prepares reports; has a prerequisite knowledge of engineering equivalent to an associate degree in engineering technology. NOTE: May have progressed to 12Z50 from Skill Level 40 of any MOS in the combat engineering career management field (12).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 12 semester hours in business administration, 6 in personnel supervision, and 6 for field experience in management (12/75).

MOS-12Z-002

COMBAT ENGINEERING SENIOR SERGEANT

12Z50

Exhibit Dates: 9/76–Present.

Career Management Field: 12 (Combat Engineer).

Description

Skill Level 50: Serves as principal noncommissioned officer of a combat engineer company, bridge company, or engineer staff section; serves as a bridge inspector, operations or intelligence noncommissioned officer; may advise higher headquarters, supported units, allied forces, Army Reserve units, and Army National Guard units; may serve as an instructor in a formal military school; capable of managing personnel and activities in a civilian engineering/construction firm; assists in planning, supervising, and coordinating all unit activities; advises commander on personnel equipment and technical matters; provides subordinate supervisors with instructions; plans and implements training programs; inspects work progress and enforces job specifications and safety standards; supervises maintenance of functional and project files; prepares correspondence, plans, orders, construction schedules, and reports; maintains equipment records; maintains technical publications. NOTE: May have progressed to 12Z50 from Skill Level 40 of any MOS in the combat engineering career management field (12).

Recommendation, Skill Level 50

NOTE: Has a prerequisite knowledge of engineering equivalent to an associate degree (30-40 semester hours depending on general education requirements) in engineering technology. In the upper-division baccalaureate category, 3 semester hours in elements of construction management, 3 in management problems, 3 in records management, 3 in quality control, 3 in personnel supervision, 3 in supervision and leadership, and 6 for field experience in management (11/77).

MOS-13A-001

FIELD ARTILLERY BASIC
(CANNONEER)

13A10

Exhibit Dates: 10/73-9/74. (Effective 10/74, MOS 13A was discontinued and its functions were incorporated into 13B10, Field Artillery Crewman.)

Career Management Field: 13 (Field Artillery Cannon).

Description

Skill Level 10: Serves as a member of a gun crew, ammunition section, or security section; may be a data recorder, truck driver, or ammunition specialist; operates radios, field telephones, and power generating equipment; conducts circuitry tests; uses vernier scales; measures tolerances; performs preventive maintenance on vehicles, generators, and crew-served weapons.

Recommendation, Skill Level 10

Credit on the basis of institutional evaluation (2/75).

MOS-13B-001

FIELD ARTILLERY CREWMAN

13B10
13B20
13B30
13B40

Exhibit Dates: 10/73-8/76.

Career Management Field: 13 (Field Artillery Cannon).

Description

Summary: Serves in a field artillery unit; reads schematic diagrams; uses wire and radio communications equipment; services hydraulic systems. *Skill Level 10:* Serves as a data recorder, truck driver, or ammunition specialist; operates radios, field telephones, and power generating equipment; conducts circuitry tests; measures tolerances and uses vernier scales; performs preventive maintenance on vehicles, generators, and crew-served weapons. NOTE: Skill Level 10 (formerly 13A10, Field Artillery Basic) was not added to MOS 13B until 10/74. *Skill Level 20:* Under supervision, uses optical measuring devices, adjusts instruments to required tolerances, and performs preventive maintenance on vehicles; knows angular relationships of optical devices in both horizontal and vertical planes. *Skill Level 30:* Able to perform the duties required for Skill Level 20; uses specialized precision tools; uses technical publications; has theoretical background in mechanics, hydraulics, electrical systems, and optional measurement instruments; performs organizational maintenance on wheeled and tracked vechicles, optical instruments, and hydraulic systems; diagnoses and repairs malfunctions. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for 8-15 persons; supervises the maintenance of vehicles, instruments, and equipment; preperes technical reports; coordinates record keeping; conducts on-the-job training; inspects the work of subordinates.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, credit in measurement and instrumentation, electronic communications, and applied mathematics on the basis of institutional evaluation (3/76).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 1 in electronic communications, and 1 in basic mathematics (3/76).

Recommendation, Skill Level 30

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, and 2 in hydraulics and mechanics (3/76).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electric circuits, 2 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, 2 in hydraulics and mechanics, 1 in equipment management, 1 in personnel management, and 3 for an internship (management) (3/76).

MOS-13B-002

CANNON CREWMAN

13B10
13B20
13B30
13B40

Exhibit Dates: 9/76-5/89.

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Supervises or serves in a field artillery unit; reads equipment placement and systems diagrams; uses wire and radio communications equipment; services hydraulic systems. *Skill Level 10:* Serves as security guard, cannoneer, vehicle driver, or ammunition specialist; operates radios, field telephones, and power generating equipment; conducts continuity tests; measures tolerances and uses vernier scales; uses metric notation; performs preventive maintenance on vehicles, generators, and crew-served weapons. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists the section chief; uses optical measuring devices, adjusts instruments to required tolerances; supervises preventive maintenance on vehicles; know angular relationships of optical devices in both horizontal and vertical planes; supervises transportation and use of ammunition. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as a section chief, supervising 10-14 persons; instructs in gunnery procedures; uses technical publications; has theoretical background in mechanics, hydraulics, electrical systems, and optical measurement instruments; supervises preventive maintenance on wheeled and tracked vehicles; assures adherence to safety procedures. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for 12-45 persons; supervises the maintenance of vehicles, instruments, and equipment; prepares technical and personnel reports; coordinates record keeping; supervises on-the-job training; inspects the work of subordinates; assures compliance with safety procedures.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in communications systems operation and 1 for field experience in electromechanical and hydraulic maintenance, and additional credit in applied mathematics and in measurements and instrumentation on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in basic mathematics, 1 in communications systems operation, 1 for field experience in electromechanical and hydraulic maintenance, and 1 in measurements and instrumentation (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, 2 sememster hours in basic mathematics, 2 for field experience in electromechanical and hydraulic maintenance, 1 in communications systems operation, and 1 in measurements and instrumentation. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in communication skills, 2 in human relations, 2 in personnel supervision, 2 in basic mathematics, 2 for field experience in electromechanical and hydraulic maintenance, 1 in communications systems operation, and 1 measurements and instrumentation (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in communication skills, 3 in human relations, 3 in personnel supervision, 2 in basic mathematics, 2 for field experience in electromechanical and hydraulic maintenance, 1 in communications systems operation, 1 in measurements and instrumentation, and 1 in safety procedures (4/77).

MOS-13B-003

CANNON CREWMEMBER

13B10
13B20
13B30
13B40

Exhibit Dates: 6/89-Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves as a member of a field artillery cannon unit; places and fires cannon, maintains transport vehicles and weapons, and operates communications equipment. *Skill Level 10:* Serves as a vehicle driver, ammunition specialist, cannoneer, maintenance technician, and communications equipment operator; determines azimuth, reads maps, navigates, and operates radio set; services hydraulic, pneumatic, and electromechanical systems. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists section chief; uses aiming devices; performs boresight; supervises preventive maintenance, ammunition supply, and equipment transport. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief; directs defense of section; instructs and supervises 7 to 12 section personnel; supervises equipment maintenance, emplacement construction, safety procedures, and ammunition handling and distribution. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises 12 to 60 section personnel; selects sites for weapon emplacement; supervises firing; supervises and conducts training of section personnel; lays fire direction; conducts weapon checks; supervises ammunition train, movement of weapons, and prepares technical reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in communication systems operation, 1 in hydraulic and electromechanical systems troubleshooting and maintenance, 1 in map reading, and 1 in applied mathematics (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in communication systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, and 2 in applied mathematics (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hours in communication systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, 2 in applied mathematics, 3 in principles of supervision, 3 in communication skills, and 1 in technical report writing (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2 semester hours in communication systems operation, 2 in hydraulic and electromechanical systems troubleshooting and maintenance, 2 in map reading, 2 in applied mathematics, 3 in principles of supervision, 3 in communication skills, and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13C-001

TACFIRE OPERATIONS SPECIALIST

13C10
13C20
13C30
13C40

Exhibit Dates: 9/79-5/89.

Career Management Field: 13 (Field Artillery), subfield 133 (Field Artillery Fire Direction/Fire Support).

Description

Summary: Supervises or serves as a member of activity operating tactical fire direction (TACFIRE) equipment in a field artillery cannon battalion or higher unit. *Skill Level 10:* Operates equipment in conjunction with or in support of TACFIRE computer; assists in preparation and operation of the computer; assists in preparing the computer center for operation and shutdown; performs cabling and equipment installation and removal; operates computer center equipment during normal, alternate mode and emergency operations; recognizes partial/complete computer center failure and performs alternate mode reconfiguration procedures; prepares fire plan, firing capability, and target and control point overlays using a digital plotter map; distributes printed data generated by TACFIRE computer; performs computer center preventive maintenance and performance checks; operates and performs operator maintenance on power generation equipment; prepares TACFIRE Remote Terminal (TRT) for operation; performs TRT cabling and installation/removal procedures; operates TRT to input and retrieve computer control, tactical data base, artillery target intelligence, fire planning, survey, tactical, and technical fire control operations data; recognizes partial/complete TRT failure and performs alternate mode reconfiguration procedures; performs TRT troubleshooting procedures and operator maintenance; performs TRT shutdown procedures; lays field wire; installs field telephones, vehicle radio remote control equipment; erects/dismantles antennas; performs operator checks and maintenance on communication equipment; transmits and receives on communications equipment; monitors radio broadcasts. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; inputs and retrieves computer center control information necessary to establish communications with subcribers and initiates computer center operations; performs maintenance on TACFIRE computer and remote devices; maintains required tools, test equipment, and appropriate spare parts to accomplish organizational maintenance duties. *Skill Level 30:* Able to perform the duties required for Skill Level 20; operates TACFIRE computer in field artillery cannon battalion fire direction center; operates TACFIRE computer to input and retrieve computer initialization control and tactical data base information; processes tactical and technical fire control data, artillery target intelligence, non-nuclear fire planning data survey information and routines, and meteorological data; performs operator maintenance and checks on computer; supervises lower-skill-level personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in supervision of battalion or higher operations section; operates TACFIRE computer in field artillery brigade or higher unit; supervises TACFIRE Remote Terminal (TRT) operators; prepares and distributes maps, operational information and training materials; present briefings on current operations and situations; compiles information for and prepares reports; ensures compliance with security precautions and regulations; supervises march order and emplacement of fire direction center equipment; operates TACFIRE computer to input and retrieve computer initialization, control, and tactical data base information. NOTE: May have progressed to 13C40 from 13C30 or 13E30 (Cannon Fire Direction Specialist).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics and 2 in computer concepts (7/82).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in computer concepts, and 3 in computer maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in computer concepts, and 3 in computer maintenance (7/82).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in computer concepts, 3 in computer maintenance, and 3 in personnel supervision (7/82).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in computer concepts, 3 in computer maintenance, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (7/82).

MOS-13C-002

TACFIRE OPERATIONS SPECIALIST

13C10
13C20
13C30
13C40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves as a member of an activity operating tactical fire direction (TACFIRE) equipment in a field artillery cannon battalion or higher unit. *Skill Level 10:* Operates equipment in conjunction with or in support of TACFIRE computer; assists in preparation and operation of the computer; assists in preparing the computer center for operation and shutdown; performs cabling and equipment installation and removal; operates computer center equipment during normal, alternate mode and emergency operations; recognizes partial/complete computer center failure and performs alternate mode reconfiguration procedures; distributes printed data generated by TACFIRE computer; performs computer center preventive maintenance and performance checks; operates and performs operator maintenance on power generation equipment; prepares TACFIRE Remote Terminal (TRT) for operation; performs TRT cabling and installation/removal procedures; operates TRT to input and retrieve computer control, tactical data base, artillery target intelligence, fire planning, survey, tactical, and technical fire control operations data; recognizes partial/complete TRT failure and performs alternate mode reconfiguration procedures; performs TRT troubleshooting procedures and operator maintenance; performs TRT shutdown procedures; lays field wire; installs field telephones, vehicle radio remote control equipment; erects/dismantles antennas; performs operator checks and maintenance on communication equipment; transmits and receives on communications equipment; monitors radio broadcasts. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; inputs and retrieves computer center control information necessary to establish communications with subcribers and initiates computer center operations; performs maintenance on TACFIRE computer and remote devices; maintains required tools, test equipment, and appropriate spare parts to accomplish organizational maintenance duties; supervision and management experience may vary. *Skill Level 30:* Able to perform the duties required for Skill Level 20; operates TACFIRE computer in field artillery cannon battalion fire direction center; operates TACFIRE computer to input and retrieve computer initialization control and tactical data base information; processes tactical and technical fire control data, artillery target intelligence, non-nuclear fire planning data survey information and routines, and meteorological data; performs operator maintenance and checks on computer; supervises lower-skill-level personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in supervision of battalion or higher operations section; operates TACFIRE computer in field artillery brigade or higher unit; supervises TACFIRE Remote Terminal (TRT) operators; prepares and distributes maps, operational information and training materials; present briefings on current operations and situations; compiles information and prepares reports; ensures compliance with security precautions and regulations; supervises march order and emplacement of fire direction center equipment; operates TACFIRE computer to input and retrieve computer initialization, control, and tactical data base information. NOTE: May have progressed to 13C40 from 13C30 or 13E30 (Cannon Fire Direction Specialist).

Recommendation, Skill Level 10

Credit is not recommended because of the limited and specialized nature of the skills, competencies, and knowledge (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, if served in a supervisory position, 3 semester hours in principles of supervision and 3 in maintenance management (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in maintenance management, and 3 in communication skills (oral and written) (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13E-001

FIELD ARTILLERY CANNON OPERATIONS/ FIRE DIRECTION ASSISTANT

13E20
13E40

Exhibit Dates: 10/73–8/76.

Career Management Field: 13 (Field Artillery Cannon).

Description

Summary: Supervises or serves as a member of an operations and intelligence section, liaison section, forward observer party, fire support coordination element, or field artillery cannon fire direction center. *Skill Level 20:* Serves in a field artillery section as a member of a gun crew; plots target locations and constructs firing locations, angles, corrections, and displacements; operates gun control and gun direction computer; reads maps and aerial photographs; assists in liaison activities with infantry and armor; operates chronograph and computes muzzle velocity; performs preventive maintenance on generators, communications equipment (wire and radio), vehicles, and gun direction computer. *Skill Level 40:* Able to perform the duties required for Skill Level 20; prepares situation maps; collects and consolidates data for fire control; prepares operations journal; assists in liaison activities with other units; armor, and infantry; determines target distance and azimuth, utilizing optical instruments, compass, maps, mil relation formula, and timing of sound; supervises operation and preventive maintenance of section equipment.

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 1 in electronic communications, and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 1 in electronic communications, 1 in basic mathematics, and 1 in introduction to computer science (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electric circuits, 2 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, 2 in hydraulics and mechanics, 1 in equipment management, and 1 in personnel supervision. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electric circuits, 2 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, 2 in hydraulics and mechanics, 1 in equipment management, 1 in personnel supervision, 3 for field experience in management, and 1 in introduction to computer science (3/76).

MOS-13E-002

Cannon Fire Direction/Fire Support Specialist

13E10
13E20
13E30
13E40

Exhibit Dates: 9/76–2/78.

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Supervises or serves as a member of a field artillery fire direction center, liaison section, operations section, or forward observer section. *Skill Level 10:* Uses graphs, tables, and maps for computing firing locations, angles, altitudes, corrections, and displacements; constructs firing charts; computes meteorological, registration, and muzzle velocity corrections; operates gun direction computer (FADAC) or chronograph; installs and operates field wire telephones and switchboards; operates radio transmitter/receiver and speech security equipment; operates and maintains vehicles, section equipment, and generators; maintains situation map, fire support records, reports, and overlays; uses optical instruments, mil relation formula, and data for firing weapons from standardized tables. *Skill Level 20:* Supervises operations within the section; computes firing data and transmits to firing units; computes data corrections; prepares status charts, target lists, and situation maps; participates in reconnaissance. *Skill Level 30:* Supervises computations, operations, and planning; maintains records and reports; processes fire support requests; recommends fire support means; supervises maintenance of equipment, vehicles, and generators. *Skill Level 40:* Supervises fire direction control operations; assists in preparing training schedules, fire support plans, and tactical operations plans; trains, supervises, and evaluates 8-12 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, credit on the basis on institutional evaluation in any of the following areas: applied mathematics, communications systems operation, measurements and instrumentation, map reading, and introduction to computer concepts (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic mathematics, 1 in communications systems operation, 1 in map reading, and 1 in introduction to computer concepts, and additional credit in measurements and instrumentation on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic mathematics, 1 in communications systems operation, 1 in map reading, 1 in introduction to computer concepts, and 1 in personnel supervision, and additional credit in measurements and instrumentation on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in basic mathematics, 2 in map reading, 1 in communications systems operation, and 1 in introduction to computer concepts, and additional credit in measurements and instrumentation on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in personnel supervision, 2 in communication skills, 2 in human relations, 2 in basic mathematics, 2 in map reading, 1 in communications systems operation, and 1 in introduction to computer concepts, and additional credit in measurements and instrumentation on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in personnel supervision, 3 in communication skills, 3 in human relations, 2 in basic mathematics, 2 in map reading, 1 in communications systems operation, 1 in introduction to computer concepts, and 1 in safety procedures, and additional credit in measurements and instrumentation on the basis of institutional evaluation (4/77).

MOS-13E-003

Cannon Fire Direction Specialist

13E10
13E20
13E30
13E40

Exhibit Dates: 3/78–5/89.

Career Management Field: 13 (Field Artillery), subfield 133 (Field Artillery Fire Direction/Fire Support).

Description

Summary: Supervises or serves as a member of a field artillery fire direction center or operations section. *Skill Level 10:* Uses graphs, tables, and maps for computing firing locations, angles, altitudes, corrections, and displacements; constructs firing charts; computes meteorological, registration, and muzzle velocity corrections; operates gun direction computer (FADAC) or chronograph; installs and operates field wire telephones and switchboards; operates and maintains vehicles, section equipment, and generators; maintains situation map, fire support records, reports, and overlays; uses optical instruments, mil relation formula, and data for firing weapons from standardized tables. *Skill Level 20:* Able to perform the duties required for Skill Level 10; computes firing data and transmits to firing units; computes data corrections; prepares status charts, target lists, and situation maps. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises computations, operations, and planning; maintains records and reports; processes fire support requests; recommends fire support means; supervises maintenance of equipment, vehicles, and generators. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises fire direction control operations; assists in preparing training schedules, fire support plans, and tactical operations plans; trains, supervises, and evaluates 8-12 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in basic mathematics, 1 in communications systems operation, 1 in measurements and instrumentation, 1 in map reading, and 1 in introduction to computer concepts (6/79).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in basic mathematics, 1 in communications systems operation, 1 in measurements and instrumentation, 1 in map reading, and 1 in introduction to computer concepts (6/79).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in basic mathematics, 2 in map reading, 1 in communications systems operation, 1 in introduction to computer concepts, and 1 in measurements and instrumentation. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in personnel supervision, 2 in communication skills, 2 in human relations, 2 in basic mathematics, 2 in map reading, 1 in communications systems operations, 1 in introduction to computer concepts, and 1 in measurements and instrumentation (6/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in personnel supervision, 3 in communication skills, 3 in human relations, 2 in basic mathematics, 2 in map reading, 1 in communications systems operation, 1 in introduction to computer concepts, 1 in safety procedures, and 1 in measurements and instrumentation. In the upper-division baccalaureate category, 2 semester hours in introduction to management and 3 for field experience in management (6/79).

MOS-13E-004

Cannon Fire Direction Specialist

13E10
13E20
13E30
13E40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Leads, supervises, or serves as a member of a field artillery cannon fire direction center (FDC) or of an operations section. *Skill Level 10:* Uses graphs, tables, charts and maps for manual computation of firing locations, angles, altitude corrections, and displacements; constructs firing charts; computes corrections for meteorological, registration and muzzle velocity; operates computer for computerized method of determining data; knows and can use either the Battery Computer System (BCS) or the Back-up Computer System (BUCS) (military version of Hewlitt-Packard 71B (16K) computer); installs and operates field telephones, digital message system, and FM radio transmitter/receiver; knows and uses mathematics concepts (including some geometry and trigonometric functions) for manual computations; operates and maintains vehicles, section equipment and generators; maintains situation map, fire support records, reports and overlays; uses data from standardized tables to calculate data for nonstandard conditions. *Skill Level 20:* Able to perform the duties required for Skill Level 10; computes firing data and transmits to firing units; prepares status charts, target lists, and situation maps; enters database into computer unit; computes and enters meteorological and muzzle velocity corrections; prepares BUCS for operation and computes firing data. *Skill Level 30:* Able to perform the duties required for Skill Level 20; instructs personnel in fire direction techniques and operations; supervises computation of data; insures accuracy and completeness of firing data; evaluates and prepares annual efficiency reports on subordinates. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises fire direction operations; assists operations sergeant in supervision of operations section; presents briefings on current operations; prepares training materials; insures compliance with security requirements; supervises and evaluates 8-12 persons.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied mathematics, 1 in communications systems operations, 1 in map reading, and 1 in computer operations (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied mathematics, 1 in communications systems operations, 1 in map reading, and 2 in computer operations (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 1 in communications systems operations, 2 in map reading, 2 in computer operations, 3 in principles of supervision, and 2 in communication skills (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 1 in communications systems operations, 2 in map reading, 2 in computer operations, 3 in principles of supervision, and 3 in communication skills. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13F-001

Fire Support Specialist

13F10
13F20
13F30
13F40

Exhibit Dates: 3/78–5/89.

Career Management Field: 13 (Field Artillery), subfield 133 (Field Artillery Fire Direction/Fire Support).

Description

Summary: Supervises or serves as a member of a field artillery forward observer section, a company fire support team, or a fire support element at a battalion or higher level. *Skill Level 10:* Assists in locating targets and initiating requests for fire on them; uses optical instruments, laser range finder, night observation device and compass; installs field wire and telephone; operates radio transmitter/receiver and speech security equipment; uses graphs, tables and maps for computing target locations including altitude, coordinates, vertical interval and distance; maintains fire support map, status charts, capability overlay, records of missions fired and visibility diagram/profile; operates and maintains vehicles, generators, and other section equipment; performs patrol and land navigation duty. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs reconnaissance, both map and physical; selects observation post location, develops visibility and capability diagrams, orients maps using optical devices and compass, and establishes communications to support units; identifies, locates, computes data, and initiates fire on targets; adjusts artillery, mortar, naval, or aerial fire on targets; prepares fire support plans for offensive and defensive operations; capable of conducting night operations through use of night observation devices or by coordinated illumination techniques. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises, or assists in supervising development of fire plans, coordination of fire support requests, and maintenance of records; processes and disseminates fire support information via written messsage format or by radio/telephone network; instructs and evaluates lower skill level personnel in work techniques and procedures; supervises maintenance of vehicles, communications and speech security equipment, and fire support instruments/equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises, trains, and evaluates 8-12 persons; prepares and coordinates fire support plans with maneuver plan; recommends use and coordinated employment of fire support means for tactical operations; familiar with concepts and principles of employment of various munitions and fire support means including close air support and naval gunfire; assists in preparing operation orders or plans, including the fire support plan.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in map reading, 1 in communications systems operation, 1 in basic mathematics, and 1 in measurement and instrumentation (6/79).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in map reading, 1 in communications systems operation, 1 in basic mathematics, and 1 in measurement and instrumentation (6/79).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in map reading, 1 in communications systems operation, 2 in basic mathematics, and 1 in measurement and instrumentation. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading, 2 in basic mathematics, 1 in communications systems operation, 1 in measurement and instrumentation, 2 in human relations, 2 in communication skills, and 2 in personnel supervision (6/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading, 2 in basic mathematics, 1 in communications systems operation, 1 in measurement and instrumentation, 2 in human relations, 3 in communication skills, 3 in personnel supervision, 1 in safety procedures, and 3 for field experience in management. In the upper-division baccalaureate category, 2 semester hours in introduction to management and 3 for field experience in management (6/79).

MOS-13F-002

Fire Support Specialist

13F10
13F20
13F30
13F40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Serves as a member of a field artillery unit; leads or supervises fire support activities including intelligence, target processing, and observation. *Skill Level 10:* Reads maps and makes map entries; assists in fire support planning; prepares staff journals; prepares target records; encodes and decodes messages; requests munitions; emplaces and uses laser range finders; locates targets; determines target location; erects antennas and installs field telephones; operates radios and telephones; transports personnel and weapons; maintains vehicles; administers first aid; performs patrol duty; fires defense weapons. *Skill Level 20:* Able to perform the duties required for Skill Level 10; leads and instructs forward observer and combat observation lasing team; assists in training subordinates in fire support; assists in developing fire support plan and tactics; prepares target lists and assists in compiling target information; sets up and maintains observation system; and performs map reconnaissance. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises 5 to 10 persons; instructs, advises, and evaluates personnel; supervises operator maintenance on equipment; assists targeting noncommissioned officer; processes fire requests; prepares technical reports; integrates fire support plan; performs duties of the Fire Support Officer in his absence. *Skill Level 40:* Able to perform the duties required for Skill Level 30; leads and trains targeting personnel in combat, fire support element, liaison section and fire support sergeants; writes and coordinates fire support plans; recommends fire support employment, recommends target selection, and assists in tactics and target analysis at the brigade, division, and corps levels.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading, 1 in communications systems operation, and 1 in applied mathematics (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 2 in communications systems operation, and 2 in applied mathematics (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 2 in communications systems operation, 2 in applied mathematics, 2 in technical writing, 3 in principles of supervision, and 2 in communication skills (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 2 in communications systems operation, 2 in applied mathematics, 3 in technical writing, 3 in principles of supervision, and 3 in communication skills. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13M-001

MULTIPLE LAUNCH ROCKET SYSTEM
(MLRS) CREWMEMBER
13M10
13M20

Exhibit Dates: 9/81-2/87.

Career Management Field: 13 (Field Artillery).

Description

Summary: Serves as a member of a multiple launch rocket system crew. *Skill Level 10:* Drives launch vehicle; performs manual elevation; operates boon hoist; operates radio; performs general maintenance on vehicle; removes and installs fire control components; conducts reconnaissance; fires weapon systems. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance to Skill Level 10 personnel; operates multiple launch rocket system fire control systems; enters fire control data; computes meteorological data; performs fire missions and diagnoses fire control system problems.

Recommendation, Skill Level 10

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (11/85).

Recommendation, Skill Level 20

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (11/85).

MOS-13M-002

MULTIPLE LAUNCH ROCKET SYSTEM
(MLRS) CREWMEMBER
13M10
13M20
13M30
13M40

Exhibit Dates: 3/87-Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves in a field artillery unit on the multiple launch rocket system; operates and maintains the launcher, transport vehicle, trailer, and other support equipment. *Skill Level 10:* Participates in launch maintenance and ammunition resupply activities; drives transport vehicles; participates in launcher operations; operates radio; maintains computer and performs systems checks. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists the section chief; trains subordinate personnel; operates fire control panel; operates launcher; performs organizational maintenance; serves as firing platoon reconnaissance sergeant. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief supervising 7 to 12 persons; instructs in launch procedures; supervises preventive maintenance on launch vehicles; supervises fire control panel maintenance; writes reports, and assures safety procedure compliance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises 12 to 60 persons; supervises all section maintenance; writes technical and personnel reports; supervises and performs training of personnel, and assures safety procedure compliance.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in communications systems operations, 1 in electromechanical systems troubleshooting and maintenance, and 1 in electronic and computer systems troubleshooting and maintenance (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hour in communications systems operations, 2 in electromechanical systems troubleshooting and maintenance, 2 in electronic and computer systems troubleshooting and maintenance, and 1 in map reading (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hour in communications systems operations, 2 in electromechanical systems troubleshooting and maintenance, 2 in electronic and computer systems troubleshooting and maintenance, 1 in map reading, 1 in applied mathematics, 1 in technical report writing, 3 in principles of supervision, and 3 in communication skills (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2 semester hour in communications systems operations, 2 in electromechanical systems troubleshooting and maintenance, 2 in electronic and computer systems troubleshooting and maintenance, 1 in map reading, 1 in applied mathematics, 3 in technical report writing, 3 in principles of supervision, and 3 in communication skills In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13N-001

LANCE CREWMEMBER
13N10
13N20
13N30
13N40

Exhibit Dates: 3/87-Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves as a Lance missile crewmember. *Skill Level 10:* Under supervision, performs crewmember duties during placement, assembly, disassembly or firing of missile; drives vehicles; emplaces missile launcher; operates power generator; performs maintenance; prepares missile handling equipment; provides proper storage locations for ammunition; performs guard duties and assists in defense of position; renders first aid and provides sanitation facilities. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides leadership and applicable training to Skill Level 10 personnel; assists in instruction of security teams; assists or supervises orientation of aluncher; monitors computer operation and programming; performs warhead settings; supervises or assists in maintenance and adjustments on equipment; establishes communication with proper facility; counsels subordinate personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; leads and supervises preparation of launcher and missile firing; provides leadership and instruction to personnel in receipt, storage, handling, and firing of missile; directs assembly of missile components; directs operation and maintenance of section equipment; supervises and coordinates ammunition supply; prepares maintenance and technical records; verifies sighting and emplacement operations. *Skill Level 40:* Able to perform the duties required for Skill Level 30; leads and directs missile placement and resupply operations; leads and directs maintenance; plans and organizes crew work schedules; ensures proper safety procedures; verifies final missile tests; originates and/or reviews technical personnel, administrative, readiness, and efficiency reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in communications systems operation, 2 in electronics and computer systems troubleshooting and maintenance, and 2 in electrohydraulic systems troubleshooting and maintenance (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 4 in electronics and computer systems troubleshooting and maintenance, 2 in electro-hydraulic systems troubleshooting and maintenance, and 2 in map reading (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 4 in electronics and computer systems troubleshooting and maintenance, 2 in electro-hydraulic systems troubleshooting and maintenance, 2 in map reading, 1 in applied mathematics, 2 in technical writing, 3 in principles of supervision, and 3 in communication skills (6/89).

Recommendation, Skill Level 40
In the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems operation, 4 in electronics and computer systems troubleshooting and maintenance, 2 in electro-hydraulic systems troubleshooting and maintenance, 2 in map reading, 1 in applied mathematics, 3 in technical writing, 3 in principles of supervision, and 3 in communication skills. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13P-001

Multiple Launch Rocket System/
LANCE Operations/Fire
Direction Specialist
13P10
13P20
13P30
13P40

Exhibit Dates: 9/88–Present.

Career Management Field: 13 (Field Artillery).

Description
Summary: Leads, supervises, or serves as a member of a Multiple Launch Rocket System (MLRS) or a Lance missile fire direction center (FDC0, or of an operations section for either nuclear or conventional missions. *Skill Level 10:* Uses graphs, tables, charts, and maps for manual computation of firing locations, angles, altitudes, corrections, and displacements; constructs firing charts; knows and uses mathematics concepts (including some plane geometry and trigonometric functions) for manual computations; plots information on situation maps; operates the following specialized computers: Fire Direction System (FDS), Platoon Leaders Digital Message Device (PLDMD), or the Back-up Computer System (BUCS) (military version of Hewlett-Packard 71B (16K) computer); installs and operates digital message systems, FM radio transmitter/receiver and secures voice equipment; operates and maintains vehicles, equipment, and generators; uses data from standardized tables to calculate data for nonstandard conditions. *Skill Level 20:* Able to perform the duties required for Skill Level 10; computes data for Lance targets; operates BUCS in Lance fire direction centers; assists in supervising and instructing fire direction center personnel; uses map reading skills in maintaining situation maps. *Skill Level 30:* Able to perform the duties required for Skill Level 20; instructs personnel in techniques and procedures for manual computation of firing data; maintains target and mission reports; may serve in a high level Fire Support Element (FSE) to provide guidance and advice on matters of employment of Lance missiles; instructs in the use and operation of FDS, PLDMD, and BUCS communications equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises FDC to insure accurate computations, plotting and issuing of fire commands; organizes work schedules and assigns duties to FDC personnel; instructs and supervises personnel; prepares technical, personnel, and administrative reports of section activities; provides emergency action plans and information in a Lance unit.

Recommendation, Skill Level 10
In the lower-division baccalaureate/associate degree category, 1 semester hour in applied mathematics, 1 in communications systems operations, 1 in map reading, and 1 in computer operations (6/89).

Recommendation, Skill Level 20
In the lower-division baccalaureate/associate degree category, 1 semester hour in applied mathematics, 1 in communications systems operations, 1 in map reading, and 2 in computer operations (6/89).

Recommendation, Skill Level 30
In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in communications systems operations, 2 in map reading, 2 in computer operations, 2 in principles of supervision, and 2 in communication skills (6/89).

Recommendation, Skill Level 40
In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in communications systems operations, 2 in map reading, 2 in computer operations, 3 in principles of supervision, 3 in communication skills and 3 in personnel management (6/89).

MOS-13R-001

Field Artillery Firefinder Radar
Operator
13R10
13R20
13R30

Exhibit Dates: 3/80–2/87.

Career Management Field: 13 (Field Artillery), subfield 132 (Field Artillery Target Acquistion Operations).

Description
Summary: Operates or supervises operation of artillery and mortar firefinder radars to locate hostile firing weapons and adjusts friendly artillery. *Skill Level 10:* Prepares radar set for operation; operates radar set; directs and reports system malfunctions; installs field telephones, constructs fortifications, and administers first aid. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists in radar emplacement. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operation of firefinder radar section; prepares for radar operation and site selection; instructs personnel in radar operation, and supervises organizational maintenance.

Recommendation, Skill Level 10
In the lower-division baccalaureate/associate degree category, 2 semester hours in radar operations, 2 in map reading, and 1 in computer operations (10/83).

Recommendation, Skill Level 20
In the lower-division baccalaureate/associate degree category, 2 semester hours in radar operations, 2 in map reading, and 2 in computer operations (10/83).

Recommendation, Skill Level 30
In the lower-division baccalaureate/associate degree category, 2 semester hours in radar operations, 2 in map reading, 2 in computer operations, and 3 in personnel supervision (10/83).

MOS-13R-002

Field Artillery Firefinder Radar
Operator
13R10
13R20
13R30
13R40

Exhibit Dates: 3/87–Present.

Career Management Field: 13 (Field Artillery).

Description
Summary: Operates or supervises operation of artillery and mortar firefinder radars to locate hostile firing weapons, and adjusts friendly artillery. *Skill Level 10:* Prepares radar set for operation; operates radar set; directs and reports system malfunctions, and administers first aid. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill level 10 personnel; assists in radar emplacement; assists section chief; in the absence of the section chief, assumes duties of that position. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operation of firefinder radar section; prepares for radar operation and site selection; instructs personnel in radar operation, and supervises organizational maintenance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises, trains, and evaluates subordinates; coordinates survey data and assists in site selection; prepares reports summarizing data obtained from radar sections on troop strengths, logistics, surveillance techniques, and tactical operations.

Recommendation, Skill Level 10
In the vocational certificate category, 2 semester hours in radar operations (6/89).

Recommendation, Skill Level 20
In the vocational certificate category, 2 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, if served as section chief, 3 semester hours in principles of supervision and 3 in maintenance management (6/89).

Recommendation, Skill Level 30
In the vocational certificate category, 2 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in maintenance management, and 3 in communication skills (oral and written) (6/89).

Recommendation, Skill Level 40
In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-13T-001

Remotely Piloted Vehicle
Crewmember
13T10
13T20
13T30
13T40

Exhibit Dates: Pending evaluation. 7/86–Present.

MOS-13W-001

Field Artillery Target Acquisition
Senior Sergeant

13W50

Exhibit Dates: 9/76–2/87. (Effective 3/87, MOS 13W was discontinued and its functions were incorporated into MOS 13Z, Field Artillery Senior Sergeant.)

Career Management Field: 13 (Field Artillery), subfield 132 (Field Artillery Target Acquisition Operations).

Description

Skill Level 50: Supervises intelligence activities in a field-artillery-cannon, rocket, missile, and target-acquisition activity; serves as the principal noncommissioned officer in a target acquisition battery; coordinates target-acquisition collection activities; collects, interprets, analyzes, and evaluates intelligence and target-acquisition data; plots, records, and reports targets; reads and interprets maps and aerial photos; keeps situation maps, charts, and overlays; processes security clearances; maintains files and records; prepares reports. NOTE: May have progressed to 13W50 from 17B40 (Field Artillery Radar Crewman), 17C40 (Field Artillery Target Acquisition Specialist), 82C40 (Field Artillery Surveyor), or 93F40 (Field Artillery Meteorological Crewman).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in supervision and leadership, and 6 for field experience in management, and additional credit in map reading and aerial photo interpretation on the basis of institutional evaluation (5/77).

MOS-13Y-001

Cannon/Missile Senior Sergeant

13Y50

Exhibit Dates: 9/76–2/87. (Effective 3/87, MOS 13Y was discontinued and its functions were incorporated into MOS 13Z, Field Artillery Senior Sergeant.)

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Skill Level 50: Supervises operations and fire support activities in a field artillery battalion or serves as the principal noncommissioned officer in a field artillery cannon, missile, or rocket battery; prepares and distributes maps, operational information, operation reports, and training material; participates in coordination and implementation of cannon, missile, or rocket operations, training programs, administrative matters, and communication activities; maintains staff journals, files, and records; prepares reports. NOTE: May have progressed to 13Y50 from 13B40 (Cannon Crewman), 13E40 (Cannon Fire Direction/Fire Support Specialist), 15D40 (Lance Missile Crewman), 15E40 (Pershing Missile Crewman), or 15J40 (Lance/Honest John Operations/Fire Direction Specialist).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in supervision and leadership, and .6 for field experience in management (5/77).

MOS-13Z-001

Field Artillery Senior Sergeant
(Field Artillery Cannon Senior
Sergeant)

13Z50

Exhibit Dates: 10/73–Present.

Career Management Field: 13 (Field Artillery).

Description

Skill Level 50: Serves as the principal noncommissioned officer in a major field artillery organization; supervises operations, intelligence activities, and liaison activities; assists superiors in planning, coordinating, and supervising all operations and personnel matters; holds meetings with subordinate noncommissioned officers to provide guidance and direction; directs on-the-job training; is a mid-level manager overseeing 45-150 persons. NOTE: May have progressed to 13Z50 from 13B40 (Field Artillery Crewman), 13W50 (Field Artillery Target Acquisition Senior Sergeant), or 13Y50 (Cannon/Missile Senior Sergeant).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 in human relations, and 6 for field experience in management, and additional credit in public speaking and for an internship in education on the basis of institutional evaluation (3/76, 4/77).

MOS-15B-001

Sergeant Missile Crewman

15B10
15B20
15B30
15B40

Exhibit Dates: 10/73–8/76.

Career Management Field: 15 (Field Artillery Missiles).

Description

Summary: Is familiar with the mechanical energy conversion, hydraulics, and pneumatic systems; understands both rocket and missile technology and the operation of missile guidance components, electrical subsystems, and communications systems as utilized in coordinated launch processes; operates mechanical equipment, optical devices, and gas turbine generators. *Skill Level 10:* Under supervision, assists in basic missile system operations, including receiving, handling, and assembling missile parts and components; uses radio and telephone communications equipment; tests and maintains equipment; operates gas turbine generator set. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates heavy equipment boom in handling and assembling major missile components; assists in operating the computer-firing set used in missile countdown and self-test procedures; checks out the guidance system, propulsion system, and electrical system; uses azimuth-orienting devices; understands and applies precision standards in optical measurement, mechanical tolerances, and computer-based self-test data prior to launch. *Skill Level 30:* Able to perform the duties required for Skill Level 20; can serve as the principle operater of an azimuth orientation unit, the test station equipment, or the firing set; conducts countdown procedures; coordinates communications between stations at the launch site; computes firing data. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for a minimum of 15 persons; supervises the operations of the missile system at the launch site; directs the emplacement and relocation of launch stations; coordinates assembling, inspecting, testing, and firing of the missiles; maintains equipment records, verifies computations and conversions of firing data and guidance system data.

Recommendation, Skill Level 10

Credit on the basis of institutional evaluation (3/75).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in measurements and instrumentation, 1 in rocket engines and guidance systems, and 1 in mechanical technology (hydraulics, pneumatics, and energy conversion) (3/75).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronic circuits, 2 in measurements and instrumentation, 1 in management of equipment and personnel, 2 in rocket engines and guidance systems, and 2 in mechanical technology (hydraulics, pneumatics, and energy conversion) (3/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronic circuits, 2 in measurements and instrumentation, 2 in management of equipment and personnel, 2 in mechanical technology (hydraulics, pneumatics, and energy conversion), 2 in rocket engines and guidance systems, 2 in public speaking, and 3 for a practicum in management (3/75).

MOS-15B-002

Sergeant Missile Crewman

15B10
15B20
15B30

Exhibit Dates: 9/76–9/78. (Effective 10/78, MOS 15B was discontinued.)

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Is familiar with the mechanical-energy-conversion, hydraulics, and pneumatic systems; understands rocket and missile technology and the operation of missile guidance components, electrical subsystems, and communications systems as utilized in coordinated launch processes; operates mechanical equipment, optical devices, and gas-turbine generators. *Skill Level 10:* Under supervision, assists in basic missile system operations, including receiving, handling, and assembling missile parts and components; uses radio and telephone communications equipment; participates in emplacement of azimuth-orienting equipment; tests and maintains equipment; operates gas turbine generator set. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists in operating the computer-firing set used in missile countdown and self-test procedures; checks out the guidance system, propulsion system, and electrical system; uses azimuth-orienting devices; understands and applies precision standards in optical measurement, mechanical tolerances, and computer-based self-test data prior to launch; supervises receipt, storage, and preparation of ammunition for delivery to firing and missile test section; assists in supervising assembly and disassembly of the missile and emplacement of launcher. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief and first-line supervisor for 9-11 subordinates; serves as the principal noncommissioned officer in a unit of approximately 70 persons; supervises preparation for missile section tests, missile check-out, and preparation for travel; supervises work techniques, work distribution, and maintenance.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours for field experience in electromechanical and hydraulic maintenance, and credit in electric circuitry, measurement and instrumentation, and rocket engines and components, on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 2 for field experience in electromechanical and hydraulic maintenance, 2 in communication skills (oral and written), 2 in human relations, 2 in personnel supervision, and 3 for field experience in management (4/77).

MOS-15D-001

LANCE MISSILE CREWMAN

15D10
15D20
15D40

Exhibit Dates: 10/73-8/76.

Career Management Field: 15 (Field Artillery Missile).

Description

Summary: Supervises or serves as a member of a Lance missile crew. *Skill Level 10:* Under supervision, assists in basic missile operations, including receiving, handling, and assembling missile components; uses radio and telephone communications equipment; performs operator maintenance and assists in routine maintenance of equipment, missiles, weapons, and vehicles; operates gas turbine generator set. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates heavy equipment boom in handling and assembling major missile components; assists in operating the computer firing set used in missile countdown and self-test procedures; is familiar with the mechanical technology of guided missiles, including thrust propulsion, energy conversion, hydraulics, and pneumatic systems; checks out the guidance, propulsion, and electrical missile systems; uses azimuth orienting devices; applies precision standards in optical measurement and mechanical tolerances. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor for 10 or more persons; supervises missile operations at the launch site, coordinating the assembly, inspection, testing, and firing of missiles; establishes and maintains equipment records; verifies computations and conversion of firing data and guidance system data; directs the emplacement and relocation of launch stations.

Recommendation, Skill Level 10

In the vocational certificate category, credit in heavy equipment operation and maintenance and in surveying on the basis of institutional evaluation (3/76).

Recommendation, Skill Level 20

In the vocational certificate category, the recommendation is the same as that for Skill Level 10. In the lower-division baccalaureate/associate degree category, 1 semester hour in measurements and instrumentation, 1 in missile guidance and propulsion systems, and 1 in mechanical technology (hydraulics, pneumatics, and energy conversion) (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 10. In the lower-division baccalaureate/associate degree category, 2 semester hours in measurements and instrumentation, 2 in guidance and propulsion systems, 2 in mechanical technology (hydraulics, pneumatics, and energy conversion), 3 in human relations, 1 in public speaking, and 3 for field experience in management (3/76).

MOS-15D-002

LANCE MISSILE CREWMEMBER
(LANCE MISSILE CREWMAN)

15D10
15D20
15D30
15D40

Exhibit Dates: 9/76-3/87. (Effective 3/87, MOS 15D was discontinued and its functions were incorporated into MOS 13N, Lance Crewmember and MOS 13M, Multiple Launch Rocket System Crewmember.)

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Supervises or serves as member of Lance missile crew, or supervises Honest John rocket firing battery or Sergeant missile crew. *Skill Level 10:* Participates in positioning, emplacement, assembly, and preparation of Lance missile for firing; operates missile-handling equipment; performs maintenance on equipment, missiles, weapons, carrier, unit vehicles, and communications equipment; operates gas-turbine generator set; uses radio and telephone communication equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists section chief in firing or assembly and transport section and serves as section chief in ammunition or security section; operates heavy-equipment boom in handling and assembling major missile components; assists in supervision of receipt, storage, handling, assembly, and transporting missile to firing section; uses azimuth-orienting devices. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises preparation of launcher and missile for firing; supervises receipt, storage, handling, assembly, mating, movement, and firing of missile; serves as section chief and first-line supervisor for 9-11 subordinates; supervises work techniques, work distribution, and maintenance; supervises maintenance of missiles and section equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as first-line supervisor for 11 or more persons; directs positioning emplacement, and employment of firing sections; establishes and maintains equipment records; verifies computations and conversion of firing data and guidance system data; reviews and prepares technical, personnel, administrative, and readiness reports on unit activities. NOTE: May have progressed to 15D40 from 15D30, 15B30 (Sergeant Missile Crewman), or 15F30 (Honest John Rocket Crewman).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours for field experience in electromechanical and hydraulic maintenance, and credit in electric circuitry, measurement and instrumentation, and rocket engines and components on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 2 for field experience in electromechanical and hydraulic maintenance, 2 in communication skills (oral and written), 2 in human relations, 2 in personnel supervision, and 3 for field experience in management (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 2 for field experience in electromechanical and hydraulic maintenance, 3 in communication skills (oral and written), 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and 1 in safety procedures (4/77).

MOS-15E-001

PERSHING MISSILE CREWMAN

15E10

15E20

15E30

15E40

Exhibit Dates: 10/73–8/76.

Career Management Field: 15 (Field Artillery Missile).

Description

Summary: Supervises or serves as a member of a Pershing missile crew. *Skill Level 10:* Under supervision, assists in basic missile system operations, including receiving, handling, and assembling missile components; uses radio and telephone communications equipment; operates gas turbine generator set; operates wrecker boom and tracked vehicles; performs operator maintenance on wheeled vehicles. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates equipment necessary to position launch vehicles and to assemble missiles; installs and monitors special equipment; operates erector-launcher control panel; operates power station to provide electrical power and pressurized air for the missile system; performs operator maintenance on system equipment; is familiar with the mechanical technology of guided missiles, including thrust propulsion, energy conversion, hydraulics, and pneumatic systems; operates optical devices. *Skill Level 30:* Able to perform the duties required for Skill Level 20; applies precision standards in optical measurement and mechanical tolerances; connects and operates computerized missile launch control system, aligns missile guidance platform on the firing azimuth; positions, assembles, and levels theodolite. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for 11 or more persons; supervises missile operations at the launch site, coordinating the assembly, inspection, testing, and firing of missiles; directs the emplacement and relocation of launch stations; establishes and maintains equipment records; verifies computations and conversions of firing data and guidance system data; coordinates liaison activities.

Recommendation, Skill Level 10

In the vocational certificate category, credit in heavy equipment operation and maintenance and in surveying on the basis of institutional evaluation (3/76).

Recommendation, Skill Level 20

In the vocational certificate category, the recommendation is the same as that for SKill Level 10. In the lower-division baccalaureate/associate degree category, 1 semester hour in measurements and instrumentation, 1 in missile guidance and propulsion systems, and 1 in mechanical technology (hydraulics, pneumatics, and energy conversion) (3/76).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 10. In the lower-division baccalaureate/associate degree category, 2 semester hours in measurements and instrumentation, 2 in guidance and propulsion systems, and 2 in mechanical technology (hydraulics, pneumatics, and energy conversion). (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for SKill Level 10. In the lower-division baccalaureate/associate degree category, 2 semester hour in measurements and instrumentation, 2 in guidance and propulsion systems, 2 in mechanical technology (hydraulics, pneumatics, and energy conversion), 3 in human relations, 1 in public speaking, and 3 for field experience in management (3/76).

MOS-15E-002

PERSHING MISSILE CREW MEMBER
(PERSHING MISSILE CREWMAN)

15E10

15E20

15E30

15E40

Exhibit Dates: 9/76–5/89.

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Supervises or serves as a member of a Pershing missile crew. *Skill Level 10:* Under supervision, assists in launcher emplacement and receipt, assembly, disassembly, transporting, and storing of missile and missile components; uses radio and telephone communications equipment; operates gas-turbine generator set; operates wrecker boom and tracked vehicles; performs maintenance on vehicles and field communications equipment; participates in emplacement and operation of azimuth reference unit. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates equipment necessary to position launch vehicles and to assemble missiles; installs and monitors special equipment; operates erector launcher control panel during mating, recovery, and firing operations; is familiar with the mechanical technology of guided missiles, including thrust propulsion, energy conversion, hydraulics, and pneumatic systems; supervises operations performed by missile handlers while drawing, transporting, and storing missiles and components; assists in supervising crew during missile prefire, firing, postfiring, assembly, and disassembly operations. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief and first-line supervisor for 9-11 subordinates; supervises emplacement and preparation of missile for firing; supervises work techniques, work distribution, and maintenance; supervises positioning and operation of azimuth-laying equipment or azimuth reference unit; supervises missile storage, maintenance, assembly, disassembly, and firing procedures. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for 11 or more persons; supervises operation of firing, ammunition, or security platoon or battery control central section; supervises procurement, distribution, and testing of missile and missile components; serves as principal noncommissioned officer; prepares operation reports; participates in coordination and implementation of Pershing missile operation, training programs, administrative matters, and communication activities.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours for field experience in electromechanical and hydraulic maintenance, and credit in electric circuitry, measurement and instrumentation, and rocket engines and components on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 2 for field experience in electromechanical and hydraulic maintenance (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 2 for field experience in electromechanical and hydraulic maintenance, 2 in communication skills (oral and written), 2 in human relations, 2 in personnel supervision, and 3 for field experience in management (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 2 for field experience in electromechanical and hydraulic maintenance, 3 in communication skills (oral and written), 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and 1 in safety procedures (4/77).

MOS-15E-003

PERSHING MISSILE CREW MEMBER

15E10

15E20

15E30

15E40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or serves as a member of a Pershing missile crew. *Skill Level 10:* Under supervision, assists in launcher emplacement and receipt, assembly, disassembly, transporting, and storing of missile and missile components; uses radio and telephone communications equipment; operates gas-turbine generator set; operates wrecker boom and tracked vehicles; performs maintenance on vehicles and field communications equipment; participates in emplacement and operation of azimuth reference unit; runs system diagnostic. *Skill Level 20:* Able to perform the duties required for Skill Level 10; operates equipment necessary to position launch vehicles and to assemble missiles; installs and monitors special equipment; operates erector launcher control panel during mating, recovery, and firing operations; is familiar with the mechanical technology of guided missiles, including thrust propulsion, energy conversion, hydraulics, and pneumatic systems; supervises operations performed by missile handlers while drawing, transporting, and storing missiles and components; assists in supervising crew during missile prefire, firing, post-firing, assembly, and disassembly operations; supervision experience may vary. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief and first-line supervisor for 9-11 subordinates; supervises emplacement and preparation of missile for firing; supervises work techniques, work distribution, and maintenance; supervises positioning and operation of azimuth-laying equipment or azimuth reference unit; supervises missile storage, maintenance, assembly, disassembly, and firing procedures. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line supervisor for 11 or more persons; supervises operation of firing, ammunition, or security platoon or battery control central section; supervises procurement, distribution, and testing of missile and missile components; serves as principal noncommissioned officer; prepares operation reports; participates in coordination and implementation of Pershing missile operation, training programs, administrative matters, and communication activities.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical and hydraulic systems troubleshooting and maintenance (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical and hydraulic systems troubleshooting and maintenance; if served as section chief, team leader, or squad/shift leader, 3 semester hours in principles of supervision and 3 in maintenance management (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical and hydraulic systems troubleshooting and maintenance, 3 in principles of supervision, 3 in maintenance management, and 3 in communication skills (oral and written) (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-15F-001

HONEST JOHN ROCKET CREWMAN

15F10

15F20

15F40

Exhibit Dates: 10/73–8/76.

Career Management Field: 15 (Field Artillery Missiles).

Description

Summary: Is familiar with precision standards of mechanical and electrical systems of rocketry and with processes and procedures for launch and communications systems/equipment necessary for coordination of activities; operates optical and electrical test devices such as anemometer, multimeter, micrometer aiming circle, and panoramic telescope; knows procedures for receiving, transporting, assembling, and loading rocket or launcher; knows procedure for tests of circuitry; performs maintenance on generators, vehicle, launcher, and allied equipment associated with preparation of rockets for launching. *Skill Level 10:* Under supervision, assists in receiving, storing, handling, assembling, and inspecting rocket components; assists in emplacing launcher with associated launch equipment and accessories; understands and uses communications equipment (telephone and radio), test instruments, and electronic instruments; performs electrical circuitry tests; maintains vehicles and launch equipment; understands mechanics of rocket power and thrust. *Skill Level 20:* Able to perform the duties required for Skill Level 10; does some troubleshooting; is familiar with optical as well as electronic measuring instruments and tolerances (or precision). *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor for 5-11 subordinates; coordinates receiving, handling, and assembly of rockets; coordinates loading and inspection operations; serves as gunner at each launching; serves as a principal noncommissioned officer in a unit of approximately 70 persons.

Recommendation, Skill Level 10

Credit on the basis of institutional evaluation (1/75).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in electronic communications operations, and 1 in measurements and instrumentation (1/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in management internship experience, 2 in basic electronic circuits, 2 in rocket engines and components, 2 in measurements and instrumentation, 2 in equipment management or personnel management, and 2 in public speaking (1/75).

MOS-15F-002

HONEST JOHN ROCKET CREW MEMBER
(HONEST JOHN ROCKET CREWMAN)

15F10

15F20

15F30

Exhibit Dates: 9/76–2/80. (Effective 3/80, MOS 15F was discontinued and its functions were incorporated into MOS 13B, Cannon Crewman.)

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Is familiar with precision standards of mechanical and electrical systems of rocketry and with processes and procedures for launch and communications systems/equipment necessary for coordination of activities; operates optical and electrical test devices such as anemometer, multimeter, micrometer aiming circle, and panoramic telescope; knows procedures for receiving, transporting, assembling, and loading rocket or launcher; knows procedure for tests of circuitry; performs maintenance on generators, vehicle, launcher, and allied equipment associated with preparation of rockets for launching. *Skill Level 10:* Under supervision, assists in receiving, storing, handling, assembling, and inspecting rocket components; assists in emplacing launcher with associated launch equipment and accessories; understands and uses communications equipment (telephone and radio), test instruments, and electronic instruments; performs electrical circuitry tests; maintains vehicles and launch equipment; understands mechanics of rocket power and thrust. *Skill Level 20:* Able to perform the duties required for Skill Level 10; does some troubleshooting; is familiar with optical as well as electronic measuring instruments and tolerances (or precision); serves as gunner for each launching; performs supervisory function in maintaining launcher, windset, handling equipment, and warhead test equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief and first-line supervisor of 9-11 persons; supervises emplacement and firing of rocket; supervises work techniques, work distribution, and maintenance, coordinates receiving, handling, and assembly of rockets; coordinates loading and pre-fire inspection operations; serves as principal noncommissioned officer in unit of approximately 70 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours for field experience in electromechanical and hydraulic maintenance, and credit in electric circuitry, measurement and instrumentation, and rocket engines and components, on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 3 for field experience in electromechanical and hydraulic maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in measurement and instrumentation, 1 in communications systems operation, and 3 for field experience in electromechanical and hydraulic maintenance (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic circuits, 1 in rocket engines and components, 1 in communications systems operation, 1 in measurement and instrumentation, 3 for field experience in electromechanical and hydraulic maintenance, 2 in communication skills (oral and written), 2 in human relations, 2 in personnel supervision, and 3 for field experience in management (4/77).

MOS-15J-001

LANCE/HONEST JOHN OPERATIONS/FIRE DIRECTION ASSISTANT

15J20

15J40

Exhibit Dates: 10/73–8/76.

Career Management Field: 15 (Field Artillery Missile).

Description

Summary: Supervises or serves as a member of a Lance/Honest John missile crew. *Skill Level 20:* Collects and evaluates observer data for fire control; uses specialized charts and tables to compute firing data; plots targets and computes range, altitude, and azimuth; reads and prepares maps; performs operator maintenance on gun direction computer, desk calculators, generators, communications equipment (wire and radio), and vehicles. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises all operations of fire direction activity to insure proper computations and data evaluations; preforms liaison activities for collection and dissemination of missile firing data.

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 1 in electronic communications, and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electric circuits, 1 in measurement and instrumentation, 1 in electronic communications, 1 in basic mathematics, and 1 in introduction to computer science (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electric circuits, 2 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, 2 in hydraulics and mechanics, 1 in equipment management, and 1 in personnel supervision. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electric circuits, 2 in measurement and instrumentation, 2 in electronic communications equipment operation and troubleshooting, 2 in basic mathematics, 2 in hydraulics and mechanics, 1 in equipment management, 1 in personnel supervision, 3 for field experience in management, and 1 in introduction to computer science (3/76).

MOS-15J-002

Lance/Honest John Operations/Fire
Direction Specialist

15J10

15J20

15J30

15J40

Exhibit Dates: 9/76-8/81.

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations)

Description

Summary: Supervises or serves as member of a Lance or Honest John missile crew. *Skill Level 10:* Assists in computation of firing data; reads and prepares maps; operates and maintains fire direction center communications equipment and vehicles; participates in the gathering of operations and intelligence data; participates in operations and liaison activities. *Skill Level 20:* Able to perform the duties required for Skill Level 10; computes firing data; plots targets and computes range, altitude, and azimuth to target; operates and performs maintenance on gun direction computer. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assists in supervision of all operations of the fire direction center; performs liaison activities, including collection and transmission of data. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operations of fire direction center to insure proper computations, plotting of targets, and issuance of fire commands; plans and organizes work schedules; instructs subordinate personnel in techniques and procedures in computation of firing data; reviews and prepares technical, personnel, and administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, and 1 for field experience in electromechanical and hydraulic maintenance, and credit in electric circuitry, measurement and instrumentation, and rocket engines and components on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in communications systems operation, 1 in basic mathematics, and 1 in introduction to computer concepts, and credit in electronic circuits on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in communications systems operation, 1 in basic mathematics, and 1 in introduction to computer concepts, and credit in electronic circuits on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in communications systems operation, 1 in basic mathematics, 1 in introduction to computer concepts, 2 in communication skills (oral and written), 2 in human relations, 2 in personnel supervision, and 3 for field experience in management, and credit in electronic circuits on the basis of institutional evaluation (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in communications systems operation, 1 in basic mathematics, 1 in introduction to computer concepts, 3 in communication skills (oral and written), 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and 1 in safety procedures, and credit in electronic circuits on the basis of institutional evaluation (4/77).

MOS-15J-003

MLRS/LANCE Operation/Fire
Direction Specialist

15J10

15J20

15J30

15J40

Exhibit Dates: 9/81-9/88. (Effective 9/88, MOS 15J was discontinued and its duties were incorporated into MOS 13P, Multiple Launch Rocket System/Lance Operations/Fire Direction Specialist.)

Career Management Field: 13 (Field Artillery), subfield 131 (Field Artillery Cannon/Missile Operations).

Description

Summary: Supervises or serves as a member of Multiple Launch Rocket System (MLRS)/LANCE Fire Direction Center or Firing Platoon Headquarters. *Skill Level 10:* Assists in computation of firing data; reads and prepares maps; operates and maintains fire direction center communications equipment and vehicles; participates in the gathering of operations and intelligence data; participates in operations and liaison activities. *Skill Level 20:* Able to perform the duties required for Skill Level 10; computes firing data; plots targets and computes range, altitudes, and azimuth to target; operates and performs maintenance on gun direction computer. *Skill Level 30:* Able to perform the duties required for Skill level 20; assists in supervision of all operations of the fire direction center; performs liaison activities, including collection and transmission of data. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operations of fire direction center to insure proper computations, plotting of targets, and issuance of fire commands; plans and organizes work schedules; instructs subordinate personnel in techniques and procedures in computation of firing data; reviews and prepares technical, personnel, and administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in electronic circuitry, 2 in computer operations, and 1 in measurement and instrumentation (10/83).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in electronic circuitry, 2 in computer operations, 1 in communications systems operation, and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in electronic circuitry, 2 in computer operations, 1 in communications systems operation, and 1 in basic mathematics (10/83).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in electronic circuitry, 1 in communications systems operation, 1 in basic mathematics, 2 in introduction to computer operations, 2 in communication skills (oral and written), 2 in human relations, and 2 in personnel supervision (10/83).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and interpretation, 1 for field experience in electromechanical and hydraulic maintenance, 1 in measurement and instrumentation, 1 in communications systems operations, 1 in basic mathematics, 2 in introduction to computer operations, 3 in communication skills (oral and written), 2 in human relations, 3 in personnel supervision, 3 for field experience in management, 1 in electronic circuitry, and 1 in safety procedures (10/83).

MOS-15Z-001

Field Artillery Missile/Rocket
Senior Sergeant

15Z50

Exhibit Dates: 10/73-8/76. (Effective 9/76, MOS 15Z was discontinued and its functions were incorporated into Skill Level 50 of MOS 13W, Field Artillery Target Acquisition Senior Sergeant, MOS 13Y, Cannon/Missile Senior Sergeant, or MOS 13Z, Field Artillery Senior Sergeant.)

Career Management Field: 15 (Field Artillery Missile).

Description

Skill Level 50: NOTE: Able to perform the duties of Skill Level 40 in any MOS in career management field 15. Serves as the principal noncommissioned officer in a field artillery missile unit; supervises operations, intelligence activities, and liaison activities; assists superiors in planning, coordinating, and supervising all unit activities and personnel matters; is a mid-level manager who supervises 45-150 persons; directs on-the-job training; holds meeting with subordinate noncommissioned officers to provide guidance and direction.

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 in human relations, and 6 for field experience in management, and additional credit in public speaking and for an internship in education on the basis of institutional evaluation (3/76).

MOS-16B-001

Hercules Missile Crewman

16B10
16B20
16B40

Exhibit Dates: 10/73-8/75.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile Operations).

Description

Summary: Engages in launching activities of surface-to-air missiles. *Skill Level 10:* Under supervision, participates in the emplacement and displacement of missile launchers and associated equipment; checks missile components and related equipment; assists in assembling the rocket and attaching it to the launcher; performs the duties of switchboard operator; knows safety precautions necessary for working with high voltage potentials and propellants. *Skill Level 20:* Able to perform the duties required for Skill Level 10; under supervision, participates in pre-fire checks and adjustments to missiles; assists in testing, adjusting, and replacing defective components; performs preventive maintenance on missile, launching equipment, handling equipment, transport trailers, light vehicles, and power equipment; assists in receiving, unpacking, inspecting, assembling, and storing explosive heads and related equipment; possible duty assignments include assembly crewman, fire panel operator, launcher crewman, senior launcher crewman, and senior assembly crewman. *Skill Level 40:* Able to perform the duties required for Skill Level 20; is a first-line supervisor of a launching section or platoon; directs the emplacement and displacement of missile launcher and related equipment; supervises the preparation and orientation of the missile for launching; enforces safety precautions; supervises low-level maintenance of launchers and related equipment; interprets technical material for subordinate personnel.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/75).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, if the duty assignment was either senior launcher or senior assembly crewman, 1 semester hour in electronic test equipment, 2 in introduction to electric circuits, and 3 for field experience in management (2/75).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic test equipment, 3 in introduction to electric circuits, 3 in basic electronic circuits, and 6 for field experience in management (2/75).

MOS-16B-002

Hercules Missile Crew Member
(Hercules Missile Crewman)

16B10
16B20
16B30
16B40

Exhibit Dates: 9/75-8/86. (Effective 9/86, MOS 16B was discontinued.)

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Engages in launching activities of surface-to-air missiles. *Skill Level 10:* Under supervision, assembles, prepares, and maintains Nike-Hercules missile for launching; participates in the emplacement and displacement of missile launchers and associated equipment; checks missile components and related equipment; assists in assembling the rocket and attaching it to the launcher; performs the duties of switchboard operator; knows safety precautions necessary for working with high voltage potentials and propellants. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists in testing, adjusting, and replacing defective components; performs preventive maintenance on missile, launching equipment, handling equipment, transport trailers, light vehicles, and power equipment; assists in receiving, inspecting, assembling, transporting, and storing explosive warheads and related equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises launching section operations in a Nike-Hercules missile battery; reads and interprets technical materials pertaining to missile components and related equipment; supervises crew training and preventive maintenance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises launch fire control platoon operations in a Nike-Hercules missile battery; is a first-line supervisor of a launching platoon; directs the emplacement and displacement of missile launcher and related equipment; supervises the preparation and orientation of the missile for launching; enforces safety precautions. NOTE: May have progressed to 16B40 from 16B30 or 16C30 (Hercules Fire Control Crewman).

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in introductory electronics and additional credit in mechanical maintenance on the basis of institutional evaluation. In an electronic technician apprentice training program, 100 clock hours of experience and 20 contact hours of related instruction (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 1 semester hour in introductory electronics and additional credit in mechanical maintenance on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 1 in introductory electronics, and additional credit in mechanical maintenance on the basis of institutional evaluation. In an electronic technician apprentice training program, 100 clock hours of experience and 20 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 1 semester hour in introductory electronics and additional credit in mechanical maintenance on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, 3 for field experience in management, 1 in introductory electronics, and additional credit in mechanical maintenance on the basis of institutional evaluation. In an electronic technician apprentice training program, 100 clock hours of experience and 20 contact hours of related instruction (2/76).

MOS-16C-001

Hercules Fire Control Crew Member
(Hercules Fire Control Crewman)

16C10
16C20
16C30

Exhibit Dates: 9/75–8/86. (Effective 9/86, MOS 16C was discontinued.)

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Engages in fire control activities of surface-to-air missiles. *Skill Level 10:* Operates fire control equipment and associated test equipment for Nike-Hercules missiles; performs preventive maintenance on radars, automatic data transmission systems, and associated power supply equipment; makes basic adjustments and corrects simple malfunctions of fire control equipment; recognizes various types of jamming and employs electronic counter-countermeasure procedures; excercises safety precautions when working around high voltage potentials. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises over 20 persons in a fire control section; interprets intelligence information; reviews logs containing operating data; enforces safety precautions and security requirements; supervises maintenance; directs on-the-job training.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

MOS-16D-001

Hawk Missile Crew Member
(Hawk Missile Crewman)

16D10
16D20
16D30
16D40

Exhibit Dates: 9/75–Present.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Serves as a member of or supervises the operation of a firing platoon, an assembly section, or a service and maintenance section of a Hawk missile battery. *Skill Level 10:* Maintains and prepares Hawk missile and associated equipment for launching; participates in the unloading and emplacement of equipment; assists in assembling, arming, and disarming the missile; performs routine preventive maintenance on launch and handling equipment; assists in performing checks and adjustments; observes safety precautions. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises the assembly, testing, arming, disarming, loading, and unloading of Hawk missiles; supervises the transportation and emplacement of equipment; supervises preventive maintenance and coordinates organizational maintenance of launch and loading equipment. *Skill Level 40:* Able to perform the duties required for 16D30 or 16E30 (Hawk Fire Control Crewman); serves as platoon sergeant, supervising over 20 persons; plans and organizes security arrangements; interprets intelligence information; supervises maintenance of equipment.

Recommendation, Skill Level 10

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in hydraulic and electrohydraulic systems (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in hydraulic and electrohydraulic systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in hydraulic and electrohydraulic systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 3 in personnel supervision, and 3 for field experience in management (2/76).

MOS-16E-001

Hawk Fire Control Crew Member
(Hawk Fire Control Crewman)

16E10
16E20
16E30

Exhibit Dates: 9/75–Present.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Serves as a member of or supervises a command and acquisition section or firing section of a Hawk firing platoon. *Skill Level 10:* Operates fire control equipment or engagement simulator; operates and performs operator maintenance checks and adjustments on Hawk missile fire control equipment; observes safety precautions. *Skill Level 20:* Performs the duties required for Skill Level 10 (with the exception of operating engagement simulator) and provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises approximately 10 persons operating Hawk fire control equipment; prepares radar coverage and clutter diagrams; determines known reference point; supervises moving and placement of equipment.

Recommendation, Skill Level 10

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 20

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

MOS-16F-001

Light Air Defense Artillery
Crewman (Reserve Forces)

16F10
16F20
16F30
16F40

Exhibit Dates: 10/73–9/90.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Supervises or serves as a member of a light air defense artillery automatic weapons, machinegun, or ammunition platoon, section, or squad. *Skill Level 10:* Loads ammunition and fires automatic weapons; operates computing sight; operates communications equipment; performs operator maintenance on automatic weapons; requisitions, receives, stores, and distributes ammunition. *Skill Level 20:* Able to perform the duties required for Skill Level 10; leads air defense artillery automatic weapons squad of approximately 10 persons; serves as assistant ammunition sergeant. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises and coordinates the activities of subordinate squads; assures that operator maintenance standards are attained. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises the operations of an automatic weapons platoon of approximately 30 persons.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 for field experience in management (2/76).

MOS-16F-002

Light Air Defense Artillery
Crewmember

16F10
16F20
16F30
16F40

Exhibit Dates: Pending evaluation. 9/90–Present.

MOS-16H-001

Air Defense Artillery (ADA) Operations and Intelligence Assistant

16H10
16H20
16H30
16H40

Exhibit Dates: 9/75-3/90. (Effective 3/90, MOS 16H was discontinued and its duties were incorporated into MOS's 16F, Light Air Defense Artillery Crewmember, 16J, Forward Area Alerting Radar Operator, 16P, Chaparral Crewmember, 16R, Vulcan Crewmember, and 16S, Man Portable Air Defense System (MANPADS) or Pedestal Mounted Stinger (PMS) Crewmember.)

Career Management Field: 16 (Air Defense Artillery), subfield 162 (Air Defense Operations and Intelligence).

Description

Summary: Supervises or serves as a member of an air defense artillery activity engaged in operations or intelligence functions to prepare and revise operations data and situation maps. *Skill Level 10:* Performs plotting and operations or intelligence duties in an air defense artillery unit; plots, reports, and records operations or intelligence information by preparing charts, overlays, strip maps, training aids, logs, reports, and correspondence; installs and operates field telephone equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; collects and consolidates information from related units; prepares training materials and coordinates training activities; transmits intelligence and grid locations to other units. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operations; demonstrates correct procedures and techniques; supervises the preparation of situation maps and overlays; coordinates operations and intelligence data; supervises operation of communications equipment. *Skill Level 40:* Able to perform the duties required for 16H30 or 16J30 (Defense Acquisition Radar Operator); as a first sergeant, supervises 20 or more persons in an airspace control element; supervises and evaluates training; prepares operations plans; assists in reconnaissance.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (2/76).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading and 3 in human relations (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management (2/76).

MOS-16J-001

Defense Acquisition Radar Crewman

16J10
16J20
16J30

Exhibit Dates: 9/75-9/90.

Career Management Field: 16 (Air Defense Artillery), subfield 162 (Air Defense Artillery Operations and Intelligence).

Description

Summary: Supervises or serves as a member of a defense acquisition radar section or a forward area alerting radar unit. *Skill Level 10:* Operates radars and IFF (identification-friend-or-foe) equipment to obtain early warning and target identification data; manipulates radar adjustments to achieve optimum operating performance; observes, tracks, and interprets targets; reads topographic maps to locate points by means of coordinates and prepares grid overlays to plot positions; employs electronic countermeasures to avoid signal jamming; prepares records; performs operator maintenance; follows safety procedures; uses special test equipment to insure proper radar operation and maintenance; installs and operates communications equipment; operates power generating equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises over 20 persons; supervises operation and maintenance of radar and related equipment; directs on-the-job training; maintains equipment records; interprets intelligence information.

Recommendation, Skill Level 10

In the vocational certificate category, credit in surveying on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (2/76).

Recommendation, Skill Level 20

In the vocational certificate category, credit in surveying on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, credit in surveying on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading and 3 in human relations (2/76).

MOS-16J-002

Forward Area Alerting Radar Operator

16J10
16J20
16J30
16J40

Exhibit Dates: Pending evaluation. 9/90-Present.

MOS-16L-001

Sgt. York Air Defense Gun System Crewmember

16L10
16L20
16L30
16L40

Exhibit Dates: 9/83-8/87.

Career Management Field: 16 (Air Defense Artillery).

Description

MOS 16L was discontinued before an evaluation could be scheduled.

Recommendation

Credit may be granted on the basis of institutional evaluation.

MOS-16P-001

ADA (Air Defense Artillery) Short Range Missile Crewman (Chaparral Crewman)

16P10
16P20
16P30

Exhibit Dates: 9/75-8/87.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Supervises or serves as a crewman in a Chaparral system unit or as a gunner in a Redeye section. *Skill Level 10:* Prepares Chaparral fire unit for firing; prepares and fires Redeye missiles; stores ammunition; operates Chaparral unit equipment, including tracked vehicles, power generating equipment, target alert area display set, and fire control devices; assists in equipment maintenance. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; prepares and fires Chaparral missile; leads Redeye team. *Skill Level 30:* Able to perform the duties required for Skill Level 20; leads Chaparral squad; is chief of Redeye section; supervises 12-20 persons engaged in storing, loading, and transporting ammunition; supervises operation and operator maintenance of the equipment.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

MOS-16P-002

Chaparral Crewmember

16P10
16P20
16P30
16P40

Exhibit Dates: 9/87-Present.

Career Management Field: 16 (Air Defense Artillery).

Description

Summary: Supervises or serves as a crewman in a Chaparral system unit or as a gunner in a Redeye section. *Skill Level 10:* Prepares Chaparral fire unit for firing; prepares and fires Redeye missile; stores ammunition; operates Chaparral unit equipment, including tracked vehicles, power generating equipment, target alert area display set, and fire control devices; assists in equipment maintenance. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; prepares and fires Chaparral missile; leads Redeye team. *Skill Level 30:* Able to perform the duties required for SKill Level 20; leads Chaparral squad; is chief of Redeye section; supervises persons engaged in storing, loading, and transporting ammunition; supervises operation and operator maintenance on the equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as platoon sergeant; plans, organizes, directs, supervises, trains, coordinates, and reports activities of subordinate squads and sections; supervises platoon maintenance activities; supervises 20–30 persons; prepares and issues platoon operation orders.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (11/88).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (11/88).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (11/88).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 3 in personnel supervision, and 3 for field experience in management (11/88).

MOS-16R-001

Vulcan Crewman

16R10
16R20
16R40

Exhibit Dates: 10/73–8/75.

Career Management Field: 16 (Air Defense Artillery), subfield 162 (Air Defense Artillery Gun Operations).

Description

Summary: Supervises or serves as a crewman in a Vulcan system section or serves as a platoon sergeant in a Chaparral or Vulcan platoon. *Skill Level 10:* Under supervision, operates selected basic communications equipment and tracked vehicles. *Skill Level 20:* Able to perform the duties required for Skill Level 10; under supervision, manipulates the weapons system; operates generating equipment and firing devices; performs preventive maintenance on equipment; assists in the emplacement and displacement of the weapons system. *Skill Level 40:* Able to perform the duties required for Skill Level 20; as a first-line supervisor, coordinates the activities of the equipment operators; supervises the personnel engaged in storing, issuing, and transporting ammunition and missiles; supervises the emplacement and displacement of the weapons system; supervises the maintenance of equipment.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/75).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision or personnel management, 3 in public speaking, and 6 for field experience in management (2/75).

MOS-16R-002

ADA (Air Defense Artillery) Short Range Gunnery Crewman
(Short Range Air Defense Artillery Crewman)
(Area Air Defense Artillery Crewman)

16R10
16R20
16R30
16R40

Exhibit Dates: 9/75–9/90.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Supervises or serves as a crewman in a Vulcan system section or serves as a platoon sergeant in a Chaparral or Vulcan platoon. *Skill Level 10:* Prepares and assists in firing Vulcan antiaircraft gun; operates and performs operator maintenance on wheeled and tracked vehicles, power generating equipment, communications equipment, and fire control devices; handles ammunition; assists in the emplacement and displacement of the weapons system; assists in performance of routine maintenance. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises equipment operation and operator maintenance; supervises the emplacement and displacement of weapons system; supervises squad training and coordinates squad activities. *Skill Level 40:* Able to perform the duties required for 16R30 or 16P30 (ADA Short Range Missile Crewman or Chaparral Crewman); serves as platoon sergeant in a Chaparral or Vulcan platoon of more than 20 persons; assists superiors in planning, directing, training, coordinating, and reporting the activities of the platoon.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (2/76).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 for field experience in management (2/76).

MOS-16R-003

Vulcan Crewmember

16R10
16R20
16R30
16R40

Exhibit Dates: Pending evaluation. 9/90–Present.

MOS-16S-001

MANPADS Crewman

16S10
16S20
16S30
16S40

Exhibit Dates: 9/80–9/90.

Career Management Field: 16 (Air Defense Artillery), subfield 161 (Air Defense Artillery Missile and Gun Operations).

Description

Summary: Supervises or serves as a member of MANPADS (Man Portable Air Defense System) missile unit. *Skill Level 10:* Prepares and fires MANPADS missiles; identifies friendly and hostile aircraft; operates and assists in programming interrogator equipment; operates assigned vehicles, simulators, and interrogator and cryptological equipment; establishes and maintains radio and/or wire communication with firing units and higher headquarters. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operation of MANPADS section; assists in planning and conducting air defense; assigns personnel as required to provide air defense coverage to other units; supervises programming of interrogator equipment; supervises radio and wire communications and the issuance of ammunition. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operation of MANPADS platoon; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate sections; assists in coordination and implementation of training programs, administrative matters, and communication activities.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (7/82).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (7/82).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision (7/82).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in

personnel supervision and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (7/82).

MOS-16S-002

Man Portable Air Defense System (MANPADS) or Pedestal Mounted Stiner (PMS) Crewmember

16S10
16S20
16S30
16S40

Exhibit Dates: Pending evaluation. 9/90–Present.

MOS-16T-001

Patriot Missile Crewmember

16T10
16T20
16T30
16T40
16T50

Exhibit Dates: 9/80–8/85.

Career Management Field: 16 (Air Defense Artillery).

Description

Summary: Supervises or serves as a crewmember in a PATRIOT air defense unit. *Skill Level 10:* Performs engagement control and launcher emplacement duties; erects radar set and antennas; activates, adjusts, and stabilizes electric power and frequency; activates radios; operates launching stations; performs preventive maintenance on the information and coordination central (ICC), engagement control station, decoy equipment, radar set, missile launcher, and missile-handling equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists in supervising on-the-job training. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises emplacement of launching and fire control equipment; supervises crew maintenance of PATRIOT and related equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate sections and squads. *Skill Level 50:* Able to perform the duties required for Skill Level 40 of MOS16T or MOS 24T (PATRIOT Operator and System Mechanic); supervises activities involved with collection, evaluation, and distribution of intelligence data; assists in planning, organization, and training operations; serves as principal noncommissioned officer.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (12/84).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (12/84).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision (12/84).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management (12/84).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 6 for field experience in management, and 3 in management problems (12/84).

MOS-16T-002

PATRIOT Missile Crewmember

16T10
16T20
16T30
16T40

Exhibit Dates: 9/85–Present.

Career Management Field: 16 (Air Defense Artillery).

Description

Summary: Supervises or serves as a crewmember in a PATRIOT air defense unit. *Skill Level 10:* Drives heavy equipment to move missile system to site; sets up and performs operator maintenance on system; operates truck, electrical generator, and launcher; may include familiarization with general surveying techniques. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists in supervising on-the-job training. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises emplacement of launching and fire control equipment; supervises crew maintenance of PATRIOT and related equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of subordinate sections and squads.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in heavy truck operation (11/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in heavy truck operation (11/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in heavy truck operation. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision (11/86).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in heavy truck operation. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management (11/86).

MOS-16Z-001

Air Defense Artillery (ADA) Senior Sergeant

16Z50

Exhibit Dates: 10/73–Present.

Career Management Field: 16 (Air Defense Artillery), subfield 160 (Air Defense Artillery General).

Description

Skill Level 50: Serves as the principal noncommissioned officer in an air defense artillery unit or headquarters and supervises 44 or more persons; assists superiors in the appraisal of air defense artillery operations, training, and intelligence information; prepares status board and situation map; collects, interprets, evaluates, and disseminates intelligence data; prepares and edits training and intelligence material and the operations manual; supervises security; advises superiors on all personnel matters; coordinates operation of battery food service and supply activities; assists superiors in planning, coordinating, and directing all air defense artillery activities. NOTE: May have progressed to 16Z50 from Skill Level 40 of any MOS in the air defense artillery career management field (16).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in technical writing, 3 in public speaking, 3 in map reading, and additional credit in electronics and mechanical maintenance on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 in human relations, 6 for field experience in management, and additional credit in industrial arts education on the basis of institutional evaluation (2/76).

MOS-17A-001

Combat Surveillance and Target Acquisition Crewman

17A10

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 17A was discontinued and its functions were incorporated into Skill Level 10 of the following MOS's: 17B, Field Artillery Radar Crewman; 17C, Field Artillery Target Acquisition Specialist; 17K, Ground Surveillance Radar Crewman; 17L, Aerial Sensor Specialist (OV-1B/C); and 17M, Unattended Ground Sensor Specialist.)

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 170 (General).

Description

Skill Level 10: Assists in operation of combat surveillance and target acquisition systems; assists in determining direction and range of artillery rounds; assists in gathering intelligence; operates sound and light equipment; plots data on a map.

Recommendation, Skill Level 10

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (3/76).

MOS-17B-001

Field Artillery Radar Crewman
(Counterbattery/Countermortar
Radar Crewman)

17B20
17B40

Exhibit Dates: 10/73-8/76.

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 172 (Target Acquisition).

Description

Summary: Supervises or participates in operation of counterbattery, countermortar, and moving target radar and associated equipment to locate firing weapons, locate moving targets, and adjust artillery. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); assists in equipment emplacement and concealment; prepares radar and associated equipment for operation; operates power unit; locates firing weapons and moving targets; performs organizational maintenance on radar, basic communication equipment, vehicles, and related equipment; performs traverse to locate radar and establishes directional control; directs radar operations during period of interference or enemy jamming. *Skill Level 40:* Able to perform the duties required for Skill Level 20; selects site for emplacement of radar; employs knowledge of operational capabilities and limitations of all field artillery target acquisition systems; supervises subordinate personnel (20-22 in a section); organizes and conducts on-the-job training; supervises organizational maintenance; maintains equipment and personnel records.

Recommendation, Skill Level 20

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (3/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations and 3 for field experience in management; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17B-002

Field Artillery Radar Crewmember
Field Artillery Radar Crewman

17B10
17B20
17B30
17B40

Exhibit Dates: 9/76-Present.

Career Management Field: 13 (Field Artillery), subfield 132 (Field Artillery Target Acquisition Operations).

Description

Summary: Engages in operation of counterfire and moving target locating radars and associated equipment. *Skill Level 10:* Emplaces and conceals equipment; operates power unit; operates and performs minor maintenance on radars and associated equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; prepares site evaluation chart and surveillance cards; performs traverse to locate radar and establish directional control; assists in scheduling maintenance on radar and associated equipment; directs radar operations during periods of interference and jamming; employs electronic counter-countermeasures. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises a radar section of approximately 7 persons; selects and evaluates emplacement site; instructs radar operators in radar techniques and procedures; plans and organizes work schedules; assures adherence to safety procedures involving radar operation and maintenance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operation of radar platoon of approximately 20 persons; supervises and directs operation of radar sections; assists platoon commander in supervision of platoon operations, training, resupply, and maintenance of platoon equipment; conducts reconnaissance and selection of tactical area for radars; prepares technical, personnel, and administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour for field experience in electromechanical maintenance, 1 in basic mathematics, and 1 in map reading (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour for field experience in electromechanical maintenance, 1 in basic mathematics, and 1 in map reading. In the lower-division baccalaureate/associate degree category, 1 semester hour for field experience in electromechanical maintenance, 1 in basic mathematics, and 1 in map reading (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in communication skills, 2 in human relations, 2 in personnel supervision, 1 for field experience in electromechanical maintenance, 1 in basic mathematics, and 1 in map reading (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in communication skills, 3 in human relations, 3 in personnel supervision, 1 for field experience in electromechanical maintenance, 1 in basic mathematics, and 1 in map reading (4/77).

MOS-17C-001

Sound Ranging Crewman

17C20
17C30
17C40

Exhibit Dates: 10/73-8/76.

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 172 (Target Acquisition).

Description

Summary: Supervises or participates in operation of sound ranging equipment in an artillery sound ranging section or platoon. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); operates sound recording equipment; uses formulas and tables to compute data; operates and maintains communication equipment and vehicles. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs minor operational maintenance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operation and maintenance of sound ranging section (up to 8 persons) or platoon (up to 30 persons).

Recommendation, Skill Level 20

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (3/76).

Recommendation, Skill Level 30

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (3/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations and 3 for field experience in management; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17C-002

Field Artillery Target Acquisition
Specialist

17C10
17C20
17C30
17C40

Exhibit Dates: 9/76-2/88. (Effective 3/88, MOS 17C was discontinued and its functions were incorporated into MOS 13F, Fire Support Specialist.)

Career Management Field: 13 (Field Artillery), subfield 132 (Field Artillery Target Acquisition Operations).

Description

Summary: Supervises or participates in operation of sound ranging and flash-ranging equipment in the location of targets. *Skill Level 10:* Emplaces and operates sound-ranging and flash-ranging equipment; establishes and operates sound/flash observation post; initiates sound-ranging recordings; measures range and horizontal and vertical angles to weapon flashes and projectile bursts; uses mathematics and prepared tables to compute and plot sound/flash data for evaluation; performs preventive maintenance on sound-ranging and flash/ranging equipment; operates and performs operator maintenance on communications equipment and vehicles. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; orients, operates, and calibrates sound and flash equipment; supervises employment, operation, and preventive maintenance of field illumination equipment by Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operation of a sound/flash ranging section; controls operation of sound/flash observation posts; supervises computation of sound/flash data and maintenance of equipment; accepts, evaluates, processes, correlates, and reports target information. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises the activities of a sound/flash and field illumination platoon; conducts reconnaissance and selects tactical location for sound, flash, and searchlight equipment; coordinates and insures logistical, personnel, administrative, and training support for all platoon elements (sound, flash, searchlight, and processing sections).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in electromechanical systems, and 1 in map reading (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic mathematics, 1 in electromechanical systems, and 1 in map reading (4/77). In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in electromechanical systems, and 1 in map reading (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in personnel supervision, 2 in human relations, 2 in communication skills, 1 in basic mathematics, 1 in electromechanical systems, and 1 in map reading (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in personnel supervision, 3 in human relations, 3 in communication skills, 1 in basic mathematics, 1 in electromechanical systems, and 1 in map reading (4/77).

MOS-17D-001

FLASH RANGING CREWMAN

17D20
17D40

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 17D was discontinued and its functions were incorporated into MOS 17C, Field Artillery Target Acquisition Specialist.)

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 172 (Target Acquisition).

Description

Summary: Supervises or participates in flash ranging operations. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); computes firing data; locates observation post and establishes directional controls; orients and calibrates flash ranging instruments; operates observation post; measures range and horizontal and vertical angles; computes and evaluates flash ranging data; operates and performs preventive maintenance on equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as the principal noncommissioned officer in a flash ranging platoon or section; supervises operation and emplacement of flash ranging equipment; supervises 8-12 technical personnel; when the duty assignment is platoon sergeant, supervises up to 30 personnel.

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (3/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management and 3 in human relations; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17E-001

FIELD ILLUMINATION CREWMAN

17E20
17E30
17E40

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 17E was discontinued and its functions were incorporated into MOS 17C, Field Artillery Target Acquisition Specialist.)

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 172 (Target Acquisition).

Description

Summary: Supervises or participates in field illumination and searchlight operations. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); sets up equipment to operate searchlight for field lighting and area findings; operates light direction center; assists in maintenance. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs rountine and preventive maintenance of field artillery searchlights and associated electrical equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises operation of field illumination section, platoon, or comparable unit; supervises operation of light direction center; supervises maintenance of equipment and vehicles; when the duty assignment is platoon sergeant, supervises up to 30 persons. NOTE: May have progressed to Skill Level 40 from Skill Level 20 or 30.

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (3/76).

Recommendation, Skill Level 30

In the vocational certificate category, 1 semester hour in basic electronics (repair) (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30, only if Skill Level 30 was held prior to Skill Level 40. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations and 3 for field experience in management; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17K-001

GROUND SURVEILLANCE RADAR
CREWMAN

17K20
17K40

Exhibit Dates: 10/73–8/76.

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 171 (Combat Surveillance).

Description

Summary: Operates radar and associated equipment; prepares maps, overlays, and surveillance records; maintains ground surveillance radar and associated equipment, communication equipment, and vehicles. NOTE: Able to perform the duties required for 17A10 (Combat Surveillance and Target Acquisition Crewman). *Skill Level 20:* Assists in the emplacement and relocation of equipment; operates power units; locates radar and orienting points. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises all activities of ground surveillance radar team, section, or comparable group.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in map reading, and 2 in equipment maintenance (2/75).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in map reading, 2 in equipment maintenance, and 3 in personnel supervision (2/75).

MOS-17K-002

GROUND SURVEILLANCE RADAR
CREWMAN

17K10
17K20
17K30
17K40
17K50

Exhibit Dates: 9/76–8/85. (Effective 9/85, MOS 17K was discontinued and its duties were incorporated into MOS 96R, Ground Surveillance Systems Operator.)

Career Management Field: 96 (Military Intelligence), subfield 963 (Tactical Intelligence Surveillance).

Description

Summary: Supervises or participates in operation of ground surveillance radar/unattended ground sensor elements engaged in intelligence and information collection activities. *Skill Level 10:* Assists in emplacement and displacement of radars and associated equipment; detects, locates, and reports target data for evaluation; operates and performs preventive maintenance on communications equipment, power generators, light wheeled vehicles, ground surveillance radars, and associated equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; selects radar locations; supervises operation and preventive maintenance of communications equipment, power generators, vehicles, ground surveillance radars, and associated equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as section chief; conducts on-the-job training; selects potential radar emplacement sites using maps, aerial photographs, terrain studies, and intelligence reports; prepares overlays and situation maps and maintains operational records; requests replacement parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as platoon sergeant, supervising ground surveillance radar and unattended ground sensor activities; plans and organizes work schedules, assigns duties, instructs section chiefs in proper work techniques and procedures, and recommends operational changes; participates in intelligence surveillance. NOTE: May have progressed to 17K40 from 17M30 (Unattended Ground Sensor Specialist). *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as first sergeant of a company or as the principal noncommissioned officer for ground surveillance at a large headquarters; assists in planning and coordinating employment of ground surveillance systems; assists in preparation and implementation of reconnaissance and surveillance assets.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in map reading, and 1 for field experience in electromechanical maintenance (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 1 semester hour in basic mathematics, 1 in map reading, and 1 for field experience in electromechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in map reading, and 1 for field experience in electromechanical maintenance (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 2 in personnel supervision, 2 in human relations, 2 in communication skills, 1 in basic mathematics, 1 in map reading, and 1 for field experience in electromechanical maintenance (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in personnel supervision, 3 in human relations, 3 in communication skills, 1 in basic mathematics, 1 in map reading, and 1 for field experience in electromechanical maintenance (4/77).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 in human relations, and 3 for field experience in management (4/77).

MOS-17L-001

AIRBORNE SENSOR SPECIALIST

17L20
17L40

Exhibit Dates: 10/73-8/76.

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 171 (Combat Surveillance).

Description

Summary: Supervises or participates in airborne sensor operations in an aerial surveillance section or platoon. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); performs preflight checkout of airborne sensor equipment; performs inflight operation of airborne sensor equipment; assists aviator in using navigational aids in aircraft; performs limited imagery interpretation during mission; inspects operation of sensor equipment and readings of indicators; replaces malfunctioning unit or component with serviceable items; operates aircraft communications equipment as directed. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises preflight checkout of sensor equipment; supervises mounting and removal of sensor equipment in aircraft; supervises routine maintenance of sensor equipment, maintenance of records, and supervision of personnel; provides on-the-job training.

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (3/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations and 3 for field experience in management; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17L-002

AERIAL SENSOR SPECIALIST (OV-1B/C)

17L10
17L20
17L30
17L40

Exhibit Dates: 9/76-8/85. (Effective 9/85, MOS 17L was discontinued.)

Career Management Field: 96 (Military Intelligence), subfield 963 (Tactical Intelligence Surveillance).

Description

Summary: Supervises or participates in aerial surveillance operations using ground data terminal systems to provide information and imagery of intelligence value. *Skill Level 10:* Performs aerial surveillance, including visual reconnaissance, search and rescue, radiological survey, and similar intelligence activities; operates aerial infrared, radar, photographic, or similar sensor systems including associated data transmission links and ground data terminal stations; performs radio communications and aids aviator in aerial navigation; performs applicable electronic counter-countermeasures; assists in image interpretation; performs operator maintenance on sensors and associated equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists aviator in weather analysis, navigation computations, and aircraft preflight inspection procedures; operates or supervises the operation of aerial surveillance and associated equipment; troubleshoots sensor systems; records operation and maintenance data in equipment logs; utilizes interpretation keys in assisting image interpreter. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises operations and activities of a section; supervises inspections and operator maintenance of sensors and associated equipment; directs and conducts on-the-job training; assists in planning use of aerial surveillance systems; assists image interpreter in analysis and interpretation of imagery; conducts or participates in briefing headquarters staff on capabilities and limitations of aerial surveillance missions, and on the results obtained. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises aerial surveillance platoon operations; plans and organizes work schedules, assigns duties, and instructs section leaders in proper work techniques and procedures; critiques mission results; participates in planning the use of aerial surveillance systems and advises commander on coordination of aerial and ground surveillance; coordinates personnel, equipment, operational supply and maintenance support requirements.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in general mathematics, 1 in still-camera techniques, and 1 in electric circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in general mathematics, 3 in outdoor survival skills, 1 in still-camera techniques, 1 in electric circuits, and 1 in maps and air photos. In the upper-division baccalaureate category, 1 semester hour in remote sensing (4/77).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in general mathematics, 1 in still-camera techniques, and 1 in electric circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in general mathematics, 3 in outdoor survival skills, 1 in still-camera techniques, 1 in electric circuits, and 1 in maps and air photos. In the upper-division baccalaureate category, 1 semester hour in remote sensing (4/77).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in general mathematics, 3 in outdoor survival skills, 3 for field experience in management, 2 in maps and air photos, 2 in human relations, 2 in communication skills, 2 in personnel supervision, 1 in still-camera techniques, and 1 in electric circuits. In the upper-division baccalaureate category, 1 semester hour in remote sensing (4/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in general mathematics, 3 in outdoor survival skills, 3 for field experience in management, 3 in human relations, 3 in communication skills, 3 in personnel supervision, 2 in maps and air photos, 1 in still-camera techniques, and 1 in electric circuits. In the upper-division baccalaureate category, 1 semester hour in remote sensing (4/77).

MOS-17M-001

UNATTENDED GROUND SENSOR SPECIALIST

17M20
17M30
17M40

Exhibit Dates: 10/74-8/76.

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 171 (Combat Surveillance).

Description

Summary: Commands or serves as a member of an unattended ground sensor team, section, or platoon engaged in emplacing and operating sensors and sensor monitoring equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10 of MOS 17A (Combat Surveillance and Target Acquisition Crewman); reads air photographs and contour maps to plan sensor and relay location; assists in sensor emplacement; emplaces and activates relay stations; emplaces, monitors, and recovers sensor devices; reads and interprets monitoring, recording, and display devices and reports information gathered; computes density, direction, rate of movement, and nature of targets detected. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assembles, tests, and maintains portable monitoring equipment, sensor relay and automated readout equipment; performs operational maintenance on equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; scouts potential areas, selects sensor emplacement sites, and supervises emplacement; determines employment and operational techniques; supervises maintenance; supervises unit personnel; maintains records; conducts on-the-job training. NOTE: May have progressed to Skill Level 40 from Skill Level 20 or 30.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photographic map reading (3/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electronics troubleshooting. In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photographic map reading (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electronics troubleshooting, only if Skill Level 30 was held prior to Skill Level 40. In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photographic map reading, 3 in human relations, and 3 for field experience in management; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision (3/76).

MOS-17M-002

UNATTENDED GROUND SENSOR SPECIALIST

17M10

17M20

17M30

Exhibit Dates: 9/76–8/85. (Effective 9/85, MOS 17M was discontinued and its duties were incorporated into MOS 96R, Ground Surveillance Systems Operator.)

Career Management Field: 96 (Military Intelligence), subfield 963 (Tactical Intelligence Surveillance).

Description

Summary: Operates unattended ground sensor elements engaged in intelligence and information collection activities. *Skill Level 10:* Emplaces, monitors, and recovers unattended ground sensors; reads aerial photographs and military maps; records, interprets, and reports unattended ground sensor activations; computes direction, rate of speed, target classification, and density; assists in performance of preventive maintenance on unattended ground sensors, relays, monitoring equipment, and associated equipment; performs operator maintenance on communications equipment and light-wheeled vehicles. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; prepares for operation and operates sensors, sensor relays, monitoring equipment and associated equipment; uses maps, aerial photographs, terrain studies and intelligence reports; prepares sensor overlays; keeps records of sensor in place, including operating frequency, codes, presettings, locations, types of emplacement, activation, destruction/disability and recovery; performs preventive maintenance on unattended ground sensors and related equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises unattended ground sensor activities at the team level; supervises emplacement and displacement of unattended ground sensor equipment; prepares situation maps; maintains operational records; supervises maintenance of unattended ground sensors and associated equipment, communications equipment, and wheeled vehicles; inspects, tests, and maintains portable monitoring equipment.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photograph interpretation (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, credit in basic electronic troubleshooting, communication equipment maintenance, wheeled vehicled maintenance, and map reading on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photograph interpretation, and credit in basic electronic troubleshooting, communications equipment maintenance, wheeled vehicle maintenance, and map reading on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in aerial photograph interpretation and 1 in personnel supervision, and credit in basic electronic troubleshooting, communications equipment maintenance, wheeled vehicle maintenance, and map reading on the basis of institutional evaluation (5/78).

MOS-17Z-001

COMBAT SURVEILLANCE AND TARGET ACQUISITION NCO

17Z50

Exhibit Dates: 10/73–8/76. (Effective 9/76, MOS 17Z was discontinued and its functions were incorporated into the following MOS's: 13W, Field Artillery Target Acquisition Senior Sergeant; 13Z, Field Artillery Senior Sergeant; 17C, Field Artillery Target Acquisition Specialist; 17K, Ground Surveillance Radar Crewman; and 96Z, Intelligence Senior Sergeant.)

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 170 (General).

Description

Skill Level 50: Supervises operations of intelligence activities in target acquisition platoon, battery, battalion, or staff section at corps level artillery or serves as the principal noncommissioned officer in a combat surveillance target acquisition or searchlight battery; able to perform the duties required for Skill Level 40 of any MOS career management field 17; provides liaison between combat surveillance or target acquisition elements and firing elements; supervises operation of command post; establishes unit defense; prepares operations and intelligence plans and reports; coordinates intelligence collection activities; as first sergeant of a battery, directs and coordinates battery administration, assists battery commander in unit training, and supervises up to 200 persons; periodically serves as chief instructor in a training facility; prepares personnel reports and records; conducts on-the-job training.

Recommendation, Skill Level 50

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, credit in electronics on the basis on institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in human relations, 3 in personnel management, and 6 for field experience in management, and additional credit in industrial arts education on the basis of institutional evaluation; if the duty assignment was chief instructor in a formal training facility, 3 additional semester hours for an internship in education (3/76).

MOS-18B-001

SPECIAL FORCES WEAPONS SERGEANT (SPECIAL OPERATIONS WEAPONS SERGEANT)

18B30

18B40

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Serves as a detachment member in military operations, foreign internal defense, unconventional warfare, and counterterrorist operations; employs warfare tactics and techniques in small arms, antiaircraft, and antiarmor weapons; recruits, organizes, and trains forces. *Skill Level 30:* Conducts training in light infantry tactics and combat operations; prepares and teaches weapons skills to detachment members, indigenous, and non-indiginous personnel; reads and interprets maps and aerial photos; writes reports. *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides tactical and technical guidance to detachment members; leads and trains small light infantry tactical units in highly specialized combat operations.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in

technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques (5/87).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques (5/87).

MOS-18C-001

Special Forces Engineer Sergeant
(Special Operations Engineer
Sergeant)

18C30

18C40

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Performs, supervises, and instructs in engineering techniques and operations employed in warfare; advises, trains, and assists foreign nationals in their own environment. *Skill Level 30:* Performs the duties of a combat engineer and demolition specialist; leads, supervises, plans, and conducts training in all special operations engineering duties; writes reports. *Skill Level 40:* Able to perform the duties required for Skill Level 30; leads, supervises, plans, and instructs in all phases of combat engineering and special operations engineering; provides technical guidance to subordinates and other special operations detachment members.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in construction technology and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in construction project management, 3 for a practicum in instructional techniques, 6 for field experience in construction, and 3 for field experience in management (5/87).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 6 semester hours in construction technology and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in construction project management, 3 for a practicum in instructional techniques, 6 for field experience in construction, and 3 for field experience in management (5/87).

MOS-18D-001

Special Forces Medical Sergeant
(Special Operations Medical
Sergeant)

18D30

18D40

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Establishes field and unconventional warfare medical facilities to support operations; ensures medical preparedness. *Skill Level 30:* Provides emergency, routine, and long term medical care for special operations members, associated allied, and indigenous personnel; trains personnel in basic emergency and preventive medical care; operates with minimal or no medical supervision or assistance; examines and provides medical care for special operations detachment members; maintains records. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises routine and emergency field medical activities, patient care and medical service activities.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in technical report writing. In the upper-division baccalaureate category, 9 semester hours for a practicum in medical care, 3 for field experience in management, 3 in case studies in medicine, and 3 for a practicum in instructional techniques (5/87).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in technical report writing. In the upper-division baccalaureate category, 9 semester hours for a practicum in medical care, 3 for field experience in management, 3 in case studies in medicine, and 3 for a practicum in instructional techniques (5/87).

MOS-18E-001

Special Forces Communications
Sergeant
(Special Operations Communications
Sergeant)

18E30

18E40

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Installs, operates, supervises, and trains indigenous forces in the installation and operations of FM, AM, HF, VHF, and UHF/SHF radio communications equipment. *Skill Level 30:* Develops lesson plans and instructs military and non-military personnel in the installation and use of radio communication equipment; writes reports; performs tests and operates maintenance on equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30; prepares communication plans and annexes for commander of special operations detachment; supervises preparation of records and reports.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques (5/87).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques (5/87).

MOS-18F-001

Special Forces Intelligence Sergeant
(Special Operations Intelligence
Sergeant)

18F30

18F40

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Plans and executes small unit strike, foreign internal defense, unconventional warfare, and counterterrorist operations. *Skill Level 30:* Recruits, organizes, trains, and supervises indigenous and nonindigenous forces; writes reports; coordinates and conducts training in intelligence subjects; performs security duties; able to use fingerprint identification, operate photographic equipment, develop and print film, prepare area studies, and conduct area assessments. *Skill Level 40:* Able to perform the duties required for Skill Level 30; prepares tactical exercise plans and scenarios; establishes intelligence nets; prepares agent reports; conducts agent handling and training; prepares physical security plans; provides technical and tactical guidance to special operations members in intelligence-related subjects; advises special operations commander on all intelligence-related matters.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques and 3 for field experience in management (5/87).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques and 3 for field experience in management (5/87).

MOS-18Z-001

SPECIAL FORCES SENIOR SERGEANT
(SPECIAL OPERATIONS SENIOR SERGEANT)

18Z50

Exhibit Dates: 9/84–Present.

Career Management Field: 18 (Special Operations).

Description

Skill Level 50: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Heads, supervises, and serves as senior enlisted member for special operations activities; performs senior leadership, staff, and training functions within special operations; provides tactical and technical guidance and professional support to superior and subordinates; recruits, organizes, trains, and supervises indigenous and nonindigenous personnel and organizations.

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in instructional techniques and 3 for field experience in management (5/87).

MOS-19D-001

CAVALRY SCOUT

19D10
19D20
19D30
19D40

Exhibit Dates: 3/78–Present.

Career Management Field: 19 (Armor).

Description

Summary: Leads, serves, or assists as a member of a scout crew, squad, section, or platoon in reconnaissance security and other combat operations. *Skill Level 10:* Serves as a member of observation and listening posts; gathers and reports information on terrain features, enemy strength, disposition, and equipment; identifies targets; requests and adjusts indirect and aerial fire; operates wheeled and tracked vehicles and operates communications equipment; uses maps and map symbols; navigates on ground; uses compass and distinguishes topographic features; performs operator maintenance on scout vehicles, weapons, and communications equipment; assists in firing of crew-served weapons; performs first aid and applies field sanitation methods; uses radiac instruments and chemical detection kits. *Skill Level 20:* Able to perform the duties required for Skill level 10; leads scout crew or assists squad leader; selects, organizes, and supervises operation of observation and listening posts; prepares, distributes, and files maps and overlays; reproduces, distributes, and files operations and intelligence information; coordinates with adjacent and supporting elements. *Skill Level 30:* Able to perform the duties required for Skill Level 20; leads scout squad or section; directs tactical deployment; leads in combat; supervises maintenance of assigned vehicles and equipment; evaluates routes, assembly areas, and positioning for mounted combat operations. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises armored cavalry or reconnaissance platoon and processes operations and intelligence information; assists in planning, organizing, directing, supervising, training, coordinating, and reporting activities of the scout or armored cavalry platoon and staff sections; directs distribution of fire; supervises platoon maintenance activities; collects, evaluates, and assists in interpretation and dissemination of combat information. NOTE: May have progressed to 19D40 from 19D30 or 19G30 (Armor Reconnaissance Vehicle Crewman).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in map reading and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid and 3 in map reading (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in map reading and 6 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, and 3 in record keeping (11/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, 3 in record keeping, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (11/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 3 in map reading, 3 in record keeping, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (11/79).

MOS-19E-001

M48-M60A1/A3 ARMOR CREWMAN

19E10
19E20
19E30
19E40

Exhibit Dates: 3/78–Present.

Career Management Field: 19 (Armor).

Description

Summary: Leads, supervises, or serves as a member of an armor tank unit. *Skill Level 10:* Secures, prepares, and stows communications aboard vehicle; loads and unloads main gun; excercises all safety precautions in handling of ammunition; installs and dismantles antennas; prepares radio equipment for operation and operates communications equipment; assists in target detection and identification; determines range to target; prepares range cards, reads maps, places turret in operation, and fires main gun; performs operator maintenance on turret, weapons, controls, equipment, and communications equipment; protects self, weapons, and equipment from chemical and other contaminants; employs principles of escape and evasion; administers first aid and applies field sanitation methods; breaches and clears minefields and obstacles. *Skill Level 20:* Able to perform the duties required for Skill Level 10; loads and fires main gun; leads ammunition supply section; helps process intelligence and operation data; provides technical guidance to Skill Level 10 personnel; prepares, files, and distributes operation maps, situation maps, and overlays; reads and interprets maps and aerial photographs; reproduces, distributes, and files operation intelligence, administrative, and unit training documents, orders, publications, and evaluation results. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; trains crews; requests, observes, and adjusts supporting fire. NOTE: May have progressed to 19E30 from 19E20 or 19F20 (Tank Driver). *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises tank platoon and processing of operations and intelligence information; assists in planning, organization, direction, training supervision, coordination, and reporting activities of tank or staff sections; collects, evaluates, assists in interpretation and dissemination of combat information.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, and 2 in record keeping (11/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, 3 in personnel supervision, and 3 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in management (11/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for

Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, 3 in record keeping, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (11/79).

MOS-19F-001

TANK DRIVER

19F10

19F20

Exhibit Dates: 3/78–8/81. (Effective 9/81, MOS 19F was discontinued and its duties were incorporated into MOS 19E, M48-M60 Armor Crewman.)

Career Management Field: 19 (Armor).

Description

Summary: Drives and performs operator maintenance on tanks. *Skill Level 10:* Drives tanks, combat engineer vehicles, and armored vehicle launched bridges; operates tracked vehicles over varied terrain and roadways in combat formation and armor marches; excercises techniques of land navigation; assists in reading and interpreting maps and aerial photographs; selects tank routes; assists in target detection and identification; performs operator maintenance on automotive components; administers first aid and applies field sanitation methods; assists in construction of fortifications and barriers, including minefields; protects self, weapons, vehicle, and equipment from chemical and other contaminants. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs senior tank driving duties and provides technical guidance to Skill Level 10 personnel; assists in maintaining training readiness of platoon drivers; fires main gun as required; reads and interprets maps and aerial photographs.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading and 1 in first aid (11/79).

MOS-19G-001

ARMOR RECONNAISSANCE VEHICLE CREWMAN

19G10

19G20

19G30

Exhibit Dates: 3/78–8/81. (Effective 9/81, MOS 19G was discontinued and its duties were incorporated into MOS 19E, M48-M60 Armor Crewman.)

Career Management Field: 19 (Armor).

Description

Summary: Serves as a member or as commander of a crew operating in an armored reconnaissance vehicle. *Skill Level 10:* Serves as loader of conventional or missile ammunition; recognizes chemical or nuclear hazards and exercises safety precautions; knows first-aid procedures; operates gun firing control systems; prepares range cars and calibrates sighting devices; assists in constructing field barriers; operates radio communications equipment; performs maintenance on vehicle, fire control devices, and armament, using checklists to meet specified standards. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; assists in maintaining gunnery proficiency of subordinate gunners; prepares, files, and distributes operation and situation maps and overlays; reads and interprets maps and aerial photographs; reproduces and distributes intelligence and operations documents; reproduces files and distributes training and administrative documents, publications, and evaluation reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor of a crew and as the vehicle/crew commander; plans reconnaissance routes, identifies and selects targets, and issues fire commands; supervises crew maintenance and coordinates organizational maintenance; trains crew; insures collection and reporting of intelligence data.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, and 2 in record keeping (11/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, 3 in personnel supervision, and 3 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in management (11/79).

MOS-19H-001

ARMOR RECONNAISSANCE VEHICLE DRIVER

19H10

19H20

Exhibit Dates: 3/78–8/81. (Effective 9/81, MOS 19H was discontinued and its duties were incorporated into MOS 19E, M48-M60 Armor Crewman.)

Career Management Field: 19 (Armor).

Description

Summary: Drives and performs operator maintenance on armor personnel carrier vehicle. *Skill Level 10:* Operates tracked vehicle over varied terrain and roadways in combat formations and armor marches; exercises techniques of land navigation; assists in reading and interpreting maps and aerial photographs; selects tank routes; assists in target detection and identification; operates vehicular intercommunications equipment; performs crew maintenance on automotive components of tank; employs principles of cover, concealment, and camouflage; administers first aid and applies field sanitation methods; assists in construction of fortifications and barriers and minefields; protects self, weapons, vehicle, and equipment from chemical and other contaminants. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs as senior armor reconnaissance vehicle driver, and provides technical guidance to Skill Level 10 personnel; reads and interprets maps and aerial photographs.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in mechanical mantenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading and 1 in first aid (11/79).

MOS-19J-001

M60A2 ARMOR CREWMAN

19J10

19J20

19J30

19J40

Exhibit Dates: 3/78–8/81. (Effective 9/81, MOS 19J was discontinued and its duties were incorporated into MOS 19E, Armor Crewman.)

Career Management Field: 19 (Armor).

Description

Summary: Leads or serves as a member of a tank unit in field operations. *Skill Level 10:* Serves as loader or gunner of weapon, using conventional ammunition or missile; exercises safety precautions and knows first-aid procedures; installs and prepares radio equipment for use; operates communication equipment; prepares range finder, determines ranges and prepares range cards; operates main gun controls and firing controls; performs operator maintenance on vehicle armament and weapons; assists in maintaining other organizational equipment; assists in clearing and breaching minefields. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides guidance to Skill Level 10 personnel; inspects equipment for malfunctions; assists in maintaining gunnery proficiency of Skill Level 10 personnel; supervises ammunition supply operations; prepares, files, and distributes operation and situation maps and overlays; reads and interprets maps and aerial photos; reproduces and distributes intelligence and operations documents; reproduces files and distributes training and administrative documents, publications, and evaluation reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as tank commander and first-line supervisor; directs deployment of personnel in combat operations; identifies and selects targets; issues fire commands and directs fire on targets; trains crewmembers; coordinates action of tank with platoon and supporting elements; evaluates work performance of crewmembers; ensures collection and reporting of intelligence data. NOTE: May have progressed to 19J30 from 19J20 or 19F20 (Tank Driver). *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises tank platoon operations and processing of intelligence information; assists in planning, organizing, and coordinating squads; advises commander on employment of weapons and the assigning of fields of fire.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid (11/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in mechanical maintenance and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, and 2 in record keeping (11/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, 3 in personnel supervision, and 3 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in management (11/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 1 in first aid, 3 in record keeping, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel supervision (11/79).

MOS-19K-001

XM1 ARMOR CREWMAN

19K10
19K20
19K30
19K40

Exhibit Dates: 3/80–Present.

Career Management Field: 19 (Armor).

Description

Summary: Leads, supervises, or serves as a member of XM1 armor unit in offensive and defensive combat operations. *Skill Level 10:* Drives tank, loads and fires main gun; exercises techniques of land navigation; reads and interprets maps; secures, prepares and stows ammunition; installs and dismantles antennas; prepares and operates communication equipment; assists in target detection and identification; prepares rangefinder for operation; performs operator maintenance on turret, weapons, controls and equipment, and communication equipment; conducts operational checks; services and maintains tank chassis, turret and automotive components. *Skill Level 20:* Able to perform the duties required for Skill Level 10; inspects automotive and turret components of platoon vehicles for malfunctions; assists in the training readiness of platoon drivers and the proficiency of gunners and loaders; processes intelligence and operational data. *Skill Level 30:* Able to perform the duties required for Skill Level 20; Leads tank crew; coordinates action of tank with platoon and supporting elements; supervises crew operator maintenance; coordinates maintenance requirements; evaluates work of lower-skill-level crewmembers; ensures collection and proper reporting of intelligence data to units and responsible staff sections. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises tank platoon and processing of operations and intelligence data; assists in planning, organizing, directing, training, supervising, coordinating, and reporting of activities of tank or staff sections; supervises platoon maintenance activities; collects, evaluates, and assists in the interpretation and dissemination of combat information.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive maintenance and 3 in mechanical systems (7/82).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive maintenance and 3 in mechanical systems (7/82).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in automotive maintenance and 3 in mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive maintenance, 3 in mechanical systems, and 3 in personnel supervision (7/82).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in automotive maintenance and 3 in mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive maintenance, 3 in mechanical systems, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (7/82).

MOS-19Z-001

ARMOR SENIOR SERGEANT

19Z50

Exhibit Dates: 3/78–Present.

Career Management Field: 19 (Armor).

Description

Skill Level 50: Plans, coordinates, and supervises activities of a unit; supervises operations, intelligence, or liaison activities; as intelligence sergeant, collects, interprets, analyzes, and distributes intelligence information; writes routine and special reports, commendations, and operations plans; edits and prepares tactical and training plans; coordinates and implements training programs and directs on-the-job training; is a mid-level manager overseeing 90-150 persons; assists in making formal briefing presentations, and in presenting instruction to larger groups (30-70); provides formal and informal counseling to individuals and groups. NOTE: May have progessed to 19Z50 from 19D40 (Cavalry Scout), 19E40 (M48-M60A1/A3 Armor Crewman), or 19J (M60A2 Armor Crewman).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 6 semester hours in personnel supervision, 3 in office management, 3 in report writing, and 3 in public speaking. In the upper-division baccalaureate category, 6 semester hours in personnel management, 6 for field experience in management, 3 in human relations, and 3 in report writing (11/79).

MOS-21G-001

PERSHING ELECTRONICS MATERIEL SPECIALIST

21G20
21G40

Exhibit Dates: 10/73–8/77.

Career Management Field: 21 (Ballistic Missile Repair), subfield 211, (Pershing Missile Repair).

Description

Summary: Supervises or performs inspection, checkout, and troubleshooting of electronic equipment associated with the Pershing missile system. *Skill Level 20:* Inspects, tests, adjusts, and troubleshoots the Pershing programmer test station, missile, missile trainer, erector launcher, power station, and associated equipment; pulls module unit or circuit board for others to repair; uses multimeter, frequency meter, and to a limited extent, other electronic meters; employs a working knowledge of electronics. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises five or more Skill Level 20 personnel; supervises the preparation of technical forms and reports; coordinates activities with other maintenance units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; supervises the requisitioning and storing of supplies and repair parts.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory and 1 in introduction to digital electronics. In an electronics apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction on the basis of employer of trade association performance examination (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 1 in introduction to digital electronics, 3 in human relations, and 3 for field experience in management. In an electronics apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction on the basis of employer or trade association performance examination (3/76).

MOS-21G-002

PERSHING ELECTRONICS MATERIEL SPECIALIST

21G10
21G20
21G30

Exhibit Dates: 9/77–8/81.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 271, (Ballistic/Land Combat Systems Maintenance).

Description

Summary: Supervises or performs inspection, checkout, and troubleshooting on electronic, mechanical, hydraulic, and pneumatic equipment associated with the Pershing missile system. *Skill Level 10:* Operates and performs maintenance on the Pershing missile programmer-test station, missile, missile trainer, erector-launcher, power station, and associated equipment; performs limited isolation of malfunctioning equipment and components through the use of computer and adapter diagnostic program tapes. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs detailed organizational maintenance of the system and provides technical guidance to operater personnel; isolates malfunctioning equipment and components through manual troubleshooting techniques, using electronic test equipment and functional schematics; adjusts or replaces malfunctioning components; prepares maintenance and supply forms and reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises maintenance units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; supervises the requisitioning and storage of supplies and repair parts.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory and 1 in technical mathematics (6/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 3 in AC/DC theory, and 1 in digital electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 2 in technical mathematics, and 1 in digital electronics (6/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 3 in technical mathematics, 1 in digital electronics, 3 in human relations and 3 for field experience in management (6/79).

MOS-21G-003

PERSHING ELECTRONICS MATERIEL
SPECIALIST

21G10
21G20
21G30
21G40

Exhibit Dates: 9/81–5/89.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons System Maintenance), subfield 217, (Ballistic/Land Combat System Maintenance).

Description

Summary: Supervises or performs inspection, checkout, and troubleshooting on electronic, mechanical, hydraulic, and pneumatic equipment associated with the Pershing missile system. *Skill Level 10:* Operates and performs maintenance on the Pershing missile programmer-test station, missile, missile trainer, erector-launcher, power station, and associated equipment; performs limited isolation of malfunctioning equipment and components through the use of computer and adapter diagnostic program tapes. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs detailed organizational maintenance of the system and provides technical guidance to operator personnel; isolates malfunctioning equipment and components through manual troubleshooting techniques, using electronic test equipment and functional schematics; adjusts or replaces malfunctioning components; prepares maintenance and supply forms and reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises maintenance activities; supervises the preparation of technical forms and reports; coordinates activities with supporting maintenance units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; supervises the requisitioning and storage of supplies and repair parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises battery level organizational maintenance of Pershing missile system electronic equipment; supervises preparation of technical forms and reports, and battery requisitioning of missile supplies; serves as senior enlisted maintenance advisor for the battery and conducts instruction on equipment operation and maintenance.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, and 1 in technical mathematics (10/83).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 2 in technical mathematics, and 1 in digital electronics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 2 in technical mathematics, and 1 in digital electronics (10/83).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 2 in technical mathematics, 1 in digital electronics, 2 in human relations, and 3 in personnel supervision (10/83).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 2 in technical mathematics, 1 in digital electronics, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management (10/83).

MOS-21G-004

PERSHING ELECTRONICS MATERIEL
SPECIALIST

21G10
21G20
21G30
21G40

Exhibit Dates: 6/89–Present.

Career Management Field: 13 (Field Artillery).

Description

Summary: Supervises or performs inspection, checkout, and troubleshooting on electronic, mechanical, hydraulic, and pneumatic equipment associated with the Pershing missile system. *Skill Level 10:* Operates and performs maintenance on the Pershing missile programmer-test station, missile, missile trainer, erector-launcher, power station, and associated equipment; performs limited isolation of malfunctioning equipment and components through the use of computer and adapter diagnostic program tapes. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs detailed organizational maintenance of the system and provides technical guidance to operator personnel; isolates malfunctioning equipment and components through manual troubleshooting techniques, using volt-ohmmeters and functional schematics; adjusts or replaces malfunctioning components; prepares maintenance and supply forms and reports; in the absence of a supervisor or section chief, assumes duties of those positions. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises maintenance activities; supervises the preparation of technical forms and reports; coordinates activities with supporting maintenance units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; supervises the requisitioning and storage of supplies and repair parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises battery level organizational maintenance of Pershing missile system electronic equipment; supervises preparation of technical forms and reports, and battery requisitioning of missile supplies; serves as senior enlisted maintenance advisor for the battery and conducts instruction on equipment operation and maintenance.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronics systems troubleshooting and maintenance (6/89).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronics systems troubleshooting and maintenance; if served in a supervisory position, 3 semester hours in principles of supervision and 3 in maintenance management (6/89).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronics systems troubleshooting and maintenance, 3 in principles of supervision, 3 in maintenance management, and 3 in communication skills (written and oral) (6/89).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in personnel management (6/89).

MOS-21L-001

PERSHING ELECTRONICS REPAIRMAN

21L20
21L40
21L50

Exhibit Dates: 10/73–8/77.

Career Management Field: 21 (Ballistic Missile Repair), subfield 211 (Pershing Missile Repair).

Description

Summary: Supervises or performs maintenance and repair of all electronic systems and components of the Pershing missile system, using a theoretical and working knowledge of electronic, digital, and logic circuits. *Skill Level 20:* Performs maintenance on the programmer test station, training set, and associated equipment, and on system test equipment; reads electronic schematics, uses a wide range of electronic meters, including scope, to inspect, test, and adjust components; determines the causes of malfunctions in electronic, electrical, electromechanical, and pneumatic assemblies, subassemblies, modules, and circuit elements, and makes necessary repairs or replaces defective components; has background in electronic theory and is familiar with digital and logic circuits; performs quality control measures; installs modifications on electronic equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes repair priorities; supervises 6 or more persons in an electronic repair section; conducts on-the-job training; implements quality control measures; establishes and keeps maintenance records; determines faulty work practices and demonstrates proper maintenance techniques. *Skill Level 50:* Able to perform the duties required for Skill Level 40; as the principal noncommissioned officer in a missile maintenance unit, supervises 30 or more persons; assists superiors in establishing policies and procedures; directs and coordinates the administration of a unit or facility; directs on-the-job training; may serve as a chief instructor in a formal training facility; holds meetings with subordinate noncommissioned officers to provide guidance and direction. NOTE: May have progressed to 21L50 from 21L40, 21G40, (Pershing Electronics Materiel Specialist), or 46N40 (Pershing Electrical-Mechanical Repairman).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 2 in digital electronics, and 2 in technical mathematics, and additional credit in electronic instruments on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in digital electronics, and 2 in technical mathematics, and additional credit in electronic instruments on the basis of institutional evaluation. In an electronic technician apprentice training program, 4,000 clock hours of experience and 288 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 2 in digital electronics, 2 in technical mathematics, 3 in human relations, 3 for field experience in management, and additional credit in electronic instruments on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (3/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in human relations, 3 in personnel management, 6 for field experience in management, and 3 in industrial arts education (electronics); if the duty assignment was chief instructor in a formal training facility, 3 additional semester hours for an internship in education. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (3/76).

MOS-21L-002

PERSHING ELECTRONICS REPAIRER

21L10
21L20
21L30
21L40
21L50

Exhibit Dates: 9/77–Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance).

Description

Summary: Supervises or performs maintenance and repair of electronic, mechanical, hydraulic, and pneumatic systems and components associated with the Pershing missile system, using a theoretical and working knowledge of electronic, digital, and logic circuits. *Skill Level 10:* Performs maintenance on the programmer test station, items for the guidance and control section, training set and associated training equipment, and on-system test equipment; reads electronic schematics and uses a wide range of electronic meters, including scope, to inspect, test, and adjust components to specific tolerances; determines deficiencies and causes of malfunctions in electronic, electrical, electromechanical, and pneumatic assemblies, subassemblies, modules, and circuit elements; determines serviceability and disposition of defective assemblies, subassemblies, and parts; serves on inspection teams. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs equipment modifications; provides technical assistance to support units. *Skill Level 30:* Able to perform the duties required for Skill Level 20; establishes workload and repair priorities; supervises receipt, storage, inspection, testing, and repair of items; implements quality control measures; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates proper maintenance techniques; establishes and maintains maintenance records; serves as maintenance inspector; may supervise 6 or more persons. *Skill Level 40:* Able to perform the duties required for Skill Level 30 of MOS 21L, 21G (Pershing Electronic Materiel Specialist), or 46N (Pershing Electrical-Mechanical Repairer); supervises maintenance on electronic and electro-mechanical systems and components of the missile system; serves as section chief or platoon sergeant of a detachment, platoon company, or comparable organization; supervises and assists in the development of quality control programs; may supervise 7 or more persons. *Skill Level 50:* Able to perform the duties required for Skill Level 40; supervises Pershing missile system maintenance activities; serves as maintenance chief; may supervise 30 or more persons; serves as principal noncommissioned officer in a missile maintenance unit.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in AC/DC theory, 6 in basic electronics, 9 in computer fundamentals, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 3 in computer fundamentals, and 3 in technical mathematics (6/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in AC/DC theory, 6 in basic electronics, 9 in computer fundamentals, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 3 in computer fundamentals, and 3 in technical mathematics (6/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 3 in computer fundamentals, 3 in technical mathematics, 3 in maintenance management, 3 in personnel supervision, and 3 in human relations (6/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC theory, 3 in basic electronics, 3 in computer fundamentals, 3 in technical mathematics, 3 in maintenance management, 3 in personnel supervision, 3 in human relations, 2 in communication skills, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, and 3 in industrial arts education (electronics) (6/79).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in introduction to managment, 6 for field experience in management, 3 in industrial arts education (electronics) and 3 in personnel management (6/79).

MOS-21R-001

SERGEANT FIRING SET REPAIRMAN

21R20
21R40

Exhibit Dates: 10/73–8/77. (Effective 9/77, MOS 21R was discontinued.)

Career Management Field: 21 (Ballistic Missile Repair), subfield 212 (Sergeant Missile Repair).

Description

Summary: Supervises or performs support maintenance on the Sergeant missile system firing set. *Skill Level 20:* Performs functional tests on the firing set in conjunction with the missile or training missile to assure proper countdown operation; performs systems analysis with portable test equipment and built-in self-test circuits to locate and isolate malfunctioning electrical circuits and electronic assemblies; removes and replaces defective assemblies and adjusts equipment to insure performance within specified tolerances; performs initial and final checkout and serviceability inspections; determines disposition of defective assemblies; performs quality control measures; performs minor calibration; provides technical assistance; serves on inspection teams; prepares maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; recommends procedures for receipt, storage, inspection, testing, and repair of items; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 for field experience in management (6/76).

MOS-21S-001

SERGEANT MISSILE GUIDANCE REPAIRMAN

21S20

21S40

Exhibit Dates: 10/73-8/77. (Effective 9/77, MOS 21S was discontinued.)

Career Management Field: 21 (Ballistic Missile Repair), subfield 212 (Sergeant Missile Repair).

Description

Summary: Supervises or performs support maintenance on the Sergeant missile guidance system. *Skill Level 20:* Operates test stations and appropriate supplemental shop sets to isolate malfunctions to the assembly level in missile guidance and control systems and training missiles; may isolate malfunctions to the subassembly level when required; removes and replaces defective assemblies; performs initial and final checkout and inspection; makes authorized adjustments on equipment; determines disposition or defective assemblies; performs quality control measures; performs simple calibrations; provides technical assistance; serves on inspection teams; prepares applicable maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; recommends procedures for receipt, storage, inspection, testing, and repair of items; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 for field experience in management (6/76).

MOS-21T-001

SERGEANT TEST EQUIPMENT REPAIRMAN

21T20

21T40

Exhibit Dates: 10/73-8/77. (Effective 9/77, MOS 21T was discontinued.)

Career Management Field: 21 (Ballistic Missile Repair), subfield 212 (Sergeant Missile Repair).

Description

Summary: Supervises or performs support maintenance on Sergeant missle system test equipment. *Skill Level 20:* Operates and performs support maintenance on special test sets used on the Sergeant missile system; isolates subassembly malfunctions; repairs or removes and replaces defective components and parts; performs initial and final checkout and inspection of equipment; determines serviceability and disposition of defective assemblies, subassemblies, and components; performs quality control measures; performs maintenance and calibration on maintenance test equipment; serves on inspection teams; prepares maintenance and supply forms and reports. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises support maintenance on Sergeant missile system test equipment; establishes workloads and repair priorites; recommends procedures for receipt, storage, inspection, testing, and repair of items; implements quality contol measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 for field experience in management (6/76).

MOS-21U-001

SERGEANT MAINTENANCE CHIEF

21U50

Exhibit Dates: 10/73-8/77. (Effective 9/77, MOS 21U was discontinued.)

Career Management Field: 21 (Ballistic Missile Repair), subfield 212 (Sergeant Missile Repair).

Description

Skill Level 50: Supervises support maintenance of the Sergeant missile system; able to perform the duties required for 21R40 (Sergeant Firing Set Repairman); 21S40 (Sergeant Missile Guidance Repairman; 21T40 (Sergeant Test Equipment Repairman); or 46L40 (Sergeant Electrical-Mechanical Repairman); supervises and coordinates support maintenance of the Sergeant missile, launching station and firing set, azimuth orientation unit, training missile, special test stations, suplemental shop sets, and other system-associated equipment; may supervise up to 120 persons; supervises and assists in the development of quality assurance/quality control programs; may serve as an administrator; advises superiors on all enlisted personnel matters; may serve as a chief instructor in a formal training facility.

Recommendation, Skill Level 50

In the vocational certificate category, 2 semester hours in hydraulic laboratory, 2 in basic electricity laboratory, and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in office management, 1 in public speaking, 3 in personnel supervision, and 6 for field experience in management. UP 3 semester hours in introduction to management; if the duty assignment was chief instructor, 3 semester hours for an internship in education (6/76).

MOS-22K-001

HAWK MISSILE-LAUNCHER REPAIRMAN

22K20

22K40

Exhibit Dates: 10/73-1/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Performs inspection, maintenance, and repair on specialized missile and support equipment. *Skill Level 20:* Performs routine maintenance on missile and launching devices; inspects, tests, and adjusts equipment components to specified tolerances; identifies and repairs malfunctions in fluidic, electrical, electronic, and mechanical systems, using a wide variety of test equipment, including multimeters, bridges, oscilloscopes, signal generators, and pulse counters; performs calibration and repair for all test equipment; keeps applicable maintenance and supply forms and records. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor with responsibility for on-the-job training; establishes workloads and repair priorities; implements quality control measures; conducts technical inspections; keeps maintenance records.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics and 3 in basic mathematics (including trigonometry). In an electronic technician apprentice training program, 1,000 clock hours of experience and 200 contact hours of related instruction (3/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics and 3 in basic mathematics (including trigonometry), and additional credit in personnel supervision and for field experience in education on the basis of institutional evaluation. In an electronic technician apprentice training program, 1,200 clock hours of experience and 250 contact hours of related instruction (3/75).

MOS-22K-002

Hawk Missile-Launcher Repairman

22K20
22K40

Exhibit Dates: 2/76–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on the Hawk missile system, launcher, and associated equipment. *Skill Level 20:* Uses common and system special-design test equipment to inspect, test, and adjust missile and launcher-control components to specific tolerances and to troubleshoot malfunctions (to component level) in electronic, electrical, mechanical, hydraulic, and electro-mechanical assemblies, subassemblies, modules, and circuit elements; installs equipment modifications; performs quality control measures, minor calibrations, and initial and final checkouts and inspections; determines the serviceability and disposition of defective assemblies, subassemblies, and parts. *Skill Level 40:* Able to perform the duties required for Skill Level 20; provides first-line technical supervision for Hawk missile-launcher repairmen; coordinates repair activities; organizes and supervises maintenance and inspection teams; prepares technical reports and forms plans and conducts on-the-job training; keeps maintenance records; implements quality control measures; recommends procedures for receiving, storing, testing, and repairing equipment.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 3 in technical mathematics, 2 in shop practices, and 1 in control systems, and additional credit in electronics, hydraulics, and mechanics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 2 in DC circuit analysis, 2 in AC circuit analysis, 2 in technical mathematics, 1 in transistor/tube theory, 1 in electronic instruments, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in human relations, 3 in personnel supervision, 2 in DC circuit analysis, 2 in AC circuit analysis, 2 in technical mathematics, 1 in transistor/tube theory, and 1 in electronic instruments, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-22K-003

Hawk Missile and Launcher Repairer

22K10
22K20
22K30

Exhibit Dates: 3/78–8/80. (Effective 9/80, MOS 22K was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Performs maintenance on the Hawk missile and missile launcher. *Skill Level 10:* Performs routine maintenance on missile and launching devices; inspects, tests, and adjusts components, subassemblies, and assemblies to specified tolerances; identifies and repairs malfunctions in hydraulic, electrical, electronic, and mechanical systems, using a wide variety of test equipment, including oscilloscopes, signal generators and allied instruments; performs tests of missiles in storage to ascertain readiness condition. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; performs initial and final type checkout and inspection of designated system assemblies; installs approved system modifications; provided technical assistance to supported units; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises activities of lower skill level personnel; establishes workloads and repair priorities; recommends procedures for repair, inspection, and storage of systems under the area of responsibility; organizes and supervises inspection teams; organizes and conducts on-the-job training programs; establishes and keeps maintenance records current.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic mathematics (including trigonometry) and 3 in basic electricity and electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning algebra and 3 in basic electricity and electronics (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic mathematics (including trigonometry), 3 in basic electricity and electronics, and 3 in electronic test procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning algebra, 3 in basic electricity and electronics, and 3 in electronic test procedures (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic mathematics (including trigonometry), 3 in basic electricity and electronics, 3 in electronic test procedures, 3 in electronics shop practices, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning algebra, 3 in basic electricity and electronics, 3 in electronic test procedures, 3 in electronic shop practices, 3 in personnel supervision, and 2 in record keeping. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management (1/80).

MOS-22L-001

Nike Test Equipment Repairman

22L20
22L40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance on Nike special purpose test equipment. *Skill Level 20:* Inspects, tests, and adjusts system-item chassis and test equipment to specific tolerances; troubleshoots and repairs deficiencies in electronic assemblies and subassemblies (to component level); determines serviceability and disposition of defective assemblies, subassemblies, and parts; performs initial and final checkouts and inspections; performs quality control measures; performs minor calibrations; installs modifications; *Skill Level 40:* Able to perform the duties required for Skill Level 20; provides first-line technical supervision of Nike test equipment repairmen; establishes workloads and repair priorities; prepares technical forms and reports; organizes and supervises inspection and maintenance teams; plans and conducts on-the-job training programs; supervises requisitioning and storing of repair parts and supplies.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in technical mathematics, 2 in control systems, 1 in systems maintenance, 1 in communication systems (electronics), 1 in shop practices, and 1 in alignment techniques (video). In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 3 in human relations, 3 in personnel supervision, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), 3 for field experience in management, and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-22L-002

NIKE TEST EQUIPMENT REPAIRER

22L10
22L20
22L30

Exhibit Dates: 3/78–8/87. (Effective 9/87, MOS 22L was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance and repair on Nike special purpose test equipment. *Skill Level 10:* Inspects, tests, and adjusts system-item chassis and test equipment to specific tolerances, having known-input reading to test against; knows circuit diagrams and reads schematics; troubleshoots and repairs deficiencies in electronic assemblies and subassemblies; replaces individual components; uses multimeters, oscilloscopes and electronic shop assemblies; determines serviceability and disposition of defective assemblies, subassemblies and parts; performs quality control measures; performs minor calibrations and repair; serves on inspection teams to evaluate serviceability of associated equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel and supported units; installs equipment modifications; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; corrects faulty work practices; establishes workloads and repair priorities; prepares technical forms and keeps maintenance records; organizes and conducts on-the-job training programs; recommends procedures for inspecting, testing, and repair of items; implements quality control program; performs initial and final checkout inspections of workload items; organizes and supervises inspection and maintenance teams.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in basic electricity, 1 in systems maintenance, and 3 in electronic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device theory, radar/microwave, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity, 1 in systems maintenance, and 3 in electronic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device theory, radar/microwave, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in basic electricity, 3 in systems maintenance, 3 in electronic shop practices, 2 in maintenance management, and 3 in electronic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, 3 in electronics shop practices, 2 in maintenance management, 1 in electronic instruments, 3 in personnel supervision, and 2 in record keeping. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 for field experience in personnel management, and credit in electronic device theory, radar/microwave, and circuit analysis on the basis of institutional evaluation (1/80).

MOS-22N-001

NIKE-HERCULES MISSILE-LAUNCHER REPAIRMAN

22N20
22N40

Exhibit Dates: 10/74–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance on the Nike-Hercules missile system, launcher, and associated equipment. *Skill Level 20:* Uses common and system special-design test equipment to inspect, test, and adjust missile and launcher-control components to specific tolerances and to troubleshoot malfunctions (to component level), in electronic, electrical, mechanical, electromechanical, hydro-pneumatic assemblies, subassemblies, modules, and circuits; installs equipment modifications; performs quality control measures, minor calibrations, and initial and final checkouts and inspections; determines the serviceability and disposition of defective assemblies, subassemblies, and parts. *Skill Level 40:* Able to perform the duties required for Skill Level 20; provides first-line technical supervision for Nike-Hercules missile-launcher repairmen; coordinates repair activities; organizes and supervises inspection and maintenance teams; prepares technical reports and forms; plans and conducts on-the-job training; keeps maintenance records; implements quality control measures; recommends procedures for receiving, storing, testing, and repairing equipment.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in technical mathematics, 2 in control systems, 1 in systems maintenance, 1 in communication systems (electronics), 1 in shop practices and 1 in alignment techniques (video). In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 3 in human relations, 3 in personnel supervision, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), 3 for field experience in management, and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-22N-002

NIKE-HERCULES MISSILE LAUNCHER REPAIRER

22N10
22N20
22N30

Exhibit Dates: 3/78–8/87. (Effective 9/87, MOS 22N was discontinued.)

Career Management Field: (23 Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance and repair on Nike-Hercules missile system, launcher, and associated equipment. *Skill Level 10:* Uses common and special-design test equipment to inspect, test, and adjust launcher-control and missile components to specific tolerances; troubleshoots and repairs electric, mechanical, electromechanical, and hydropneumatic assemblies and subassemblies; replaces individual component items; uses multimeter and oscilloscope to verify radio frequency pulse and to diagnose; performs quality control measures, minor calibrations, and checkout inspection; determines serviceability and disposition of defective assemblies or parts; serves on inpsection teams. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel and supported units; installs equipment modifications; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; establishes and keeps maintenance records; organizes and supervises inspection and maintenance teams; conducts on-the-job training programs; recommends procedures for inspecting, testing, and repairing items; implements quality control procedures; and coordinates repair activities.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in basic electricity, 1 in systems maintenance, 1 in electronic systems troubleshooting, and 2 in mechanical/hydraulic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device theory, hydraulic theory, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity, 1 in systems maintenance, 1 in electronic systems troubleshooting, and 2 in mechanical/hydraulic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device theory, hydraulic theory, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in basic electricity, 3 in systems maintenance, 1 in electronic systems troubleshooting, 3 in electronic shop practices, 2 in mechanical/hydraulic systems troubleshooting, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 2 in AC/DC circuit fundamentals, 1 in electronic instruments, 2 in record keeping, 3 in electronic shop practices, 3 in personnel supervision, and 2 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 for field experience in personnel management, and credit in electronic device theory, hydraulic theory, and circuit analysis on the basis of institutional evaluation (1/80).

MOS-23N-001

NIKE TRACK RADAR REPAIRMAN

23N20
23N40

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defense Missile Maintenace), subfield 231 (Nike Missile System Repair).

Description

Summary: Maintains low-power acquisition radar, target and missile tracking radar, target ranging radar, as well as on-site systems, including analog computer, test sets, antenna mast group, operator console, and associated test equipment. *Skill Level 20:* Inspects, tests, and adusts components to specific tolerances; determines malfunctions in electronic, mechanical, electrical, and electromechanical systems with common and special-designed system test equipment; repairs assemblies and modules; performs initial and final inspection on systems and assemblies; performs calibration and repair on job-related equipment; installs modifications on system items; serves on inspection teams. *Skill Level 40:* Able to perform the duties required for Skill Level 20; provides first-line technical supervision; trains personnel; supervises the preparation of technical forms and reports; coordinates unit activities; demonstrates proper maintenance and troubleshooting techniques; establishes workloads and repair priorities; conducts technical inspections.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in technical mathematics, 2 in control systems, 1 in systems maintenance, 1 in communication systems (electronics), 1 in shop practices, and 1 in alignment techniques (video). In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 3 in human relations, 3 in personnel supervision, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, 1 in digital computer fundamentals, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), 3 for field experience in management, and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-23N-002

NIKE TRACK RADAR REPAIRER

23N10
23N20
23N30

Exhibit Dates: 3/78-8/87. (Effective 9/87, MOS 23N was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Maintains low-power acquisition radar, target and missile tracking radar, target ranging radar, as well as on-site systems, including analog computer, test sets, antenna mast group, operator console, and associated test equipment. *Skill Level 10:* Inspects, tests, and adjusts components to specific tolerances; follows specified written procedures and circuit schematics; uses typical industrial, as well as military test equipment to determine malfunctions in electronic, mechanical, electrical, and electro-mechanical systems; troubleshoots and repairs assemblies and modules down to the component level; performs calibration and repair on job-related equipment; may install modifications on systems and serve on inspection teams. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs initial and final inspection on systems and subassemblies; may assist in on-the-job training. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides first-line technical supervision; trains personnel; supervises the preparation of technical forms; coordinates unit activities; demonstrates proper maintenance and troubleshooting techniques; establishes workloads and repair priorities; conducts technical inspections.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in basic electronics, 2 in electronics systems troubleshooting, and 2 in electronic instruments. In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronics, and 2 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electronics, 2 in electronics systems troubleshooting, and 2 in electronic instruments. In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronics, and 2 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in basic electronics, 2 in electronics systems troubleshooting, 2 in electronic instruments, 2 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronics, 2 in electronic instruments, 3 in personnel supervision, and 2 in record keeping. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) and 3 for field experience in personnel management (1/80).

MOS-23Q-001

HAWK FIRE CONTROL REPAIRMAN

23Q20
23Q40

Exhibit Dates: 10/73-2/78. (Effective 9/80, MOS 23Q was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on the Hawk missile fire control system equipment. *Skill Level 20:* Tests, evaluates, and repairs electronics modules, circuit elements, and complete assemblies for radar and communications; uses test equipment such as oscilloscopes, voltmeters, ohmmeters, and spectrum analyzers; installs equipment modifications; analyzes malfunctions; assists radar equipment operators in maintaining equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises support level maintenance on the Hawk fire control system equipment; establishes workloads and repair priorities; implements quality control measures; organizes and supervises inspection and maintenance teams; conducts on-the-job training; keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics, 3 in advanced electronics and additional credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics (including right angle trigonometry), 3 in DC circuits, 3 in AC circuits, 3 in transistors/tubes/amplifiers/oscillators and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in AC/DC concepts and 3 in industrial arts education (electronics). In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics (including right angle trigonometry), 3 in DC circuits, 3 in AC circuits, 3 in transistors/tubes/amplifiers/oscillators, 3 in human relations, and 3 in personnel supervision, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in AC/DC concepts and 3 in industrial arts education (electronics). In an electronic technician apprentice training program, 4,000 clock hours of experience and 288 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-23R-001

HAWK MISSILE SYSTEM MECHANIC

23R10
23R20
23R30
23R40
23R50

Exhibit Dates: Pending evaluation. 3/90–Present.

MOS-23S-001

HAWK PULSE RADAR REPAIRMAN

23S20
23S40

Exhibit Dates: 10/73–2/78. (Effective 9/80, MOS 23S was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on the Hawk pulse acquisition radar and associated equipment. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances; determines deficiencies in electronic, electrical, mechanical, electromechanical, and heat transfer assemblies, subassemblies, modules, and circuit elements, using common and system special-design test equipment; troubleshoots to the component level; installs equipment modifications; performs initial and final checkouts and inspections. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises support-level maintenance on the Hawk pulse radar and related equipment; establishes workloads and repair priorities; implements quality control measures; organizes and supervises maintenance and inspection teams; conducts on-the-job training; demonstrates proper repair techniques; keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in DC circuits, 3 in AC circuits, and 3 in transistors/tubes. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics (including trigonometric functions), 3 in DC circuits, 3 in AC circuits, and 3 in transistors/tubes. In the upper-division baccalaureate category, 3 semester hours in AC/DC concepts and 3 in industrial arts education (electronics). In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics (including trigonometric functions), 3 in DC circuits, 3 in AC circuits, 3 in transistors/tubes, 3 in human relations, 3 in personnel supervision and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in AC/DC concepts and 3 in industrial arts education (electronics). In an electronic technician apprentice training program, 3,000 clock hours of experience and 216 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-23T-001

HAWK CONTINUOUS WAVE RADAR REPAIRMAN

23T20
23T40

Exhibit Dates: 10/73–1/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Performs inspection, maintenance, and repair on a specialized continuous wave acquisition radar and associated equipment. *Skill Level 20:* Inspects, tests, adjusts, troubleshoots, and repairs items associated with this specific continuous wave radar system; provides technical assistance to operators; uses a wide range of test equipment including mulitmeters, bridges, oscilloscopes, signal generators, and pulse counters. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor responsible for on-the-job training; establishes workloads and maintenance priorities; implements quality control measures; keeps maintenance records.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics and 3 in basic mathematics (including trigonometry). In an electronic technician apprentice training program, 1,000 clock hours of experience and 200 contact hours of related instruction (3/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and elctronics and 3 in basic mathematics (including trigonometry), and additional credit in personnel supervision and for field experience in education on the basis of institutional evaluation. In an electronic technician apprentice training program, 1,200 clock hours of experience and 250 contact hours of related instruction (3/75).

MOS-23T-002

HAWK CONTINUOUS WAVE RADAR REPAIRMAN

23T20
23T40

Exhibit Dates: 2/76–2/78. (Effective 9/80, MOS 23T was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Performs maintenance on Hawk continuous wave radars and associated equipment. *Skill Level 20:* Performs maintenance on the Hawk continuous wave radar, continuous wave illuminator radar (high powered illuminator-HPI), including HPI built-in test equipment and other system-designed test equipment; inspects, tests, and adjusts components to specific tolerances; determines shortcomings and malfunctions in electronic, electrical, electromechanical, and heat transfer assemblies, subassemblies, modules, and circuit elements, using common and system special-design test equipment; determines serviceability and disposition of defective assemblies, subassemblies, and parts; performs 'C' level calibration and repair on test equipment; installs equipment modifications; performs initial and final checkouts and inspections; provides technical assistance to other units. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance on Hawk continuous wave radar and associated equipment; establishes repair priorities and workloads; implements quality control measures; supervises inspection and maintenance teams; conducts on-the-job training programs; demonstrates proper repair techniques and procedures; keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and use of test equipment, and 3 in radar, and additional credit in mechanics and electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and use of test equipment, and 3 in radar, and additional credit in mechanics and electronics on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and use of test equipment, 3 in radar, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management, and additional credit in mechanics and electronics on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-23U-001

NIKE HIGH POWER RADAR-SIMULATOR
REPAIRMAN

23U20
23U40

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defnese Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance on Nike high-power acquisition radar, radar target simulator, and associated equipment. *Skill Level 20:* Uses common and special-design test equipment to inspect, test, and adjust components to specific tolerances and to determine malfunctions in electronic, electrical, mechanical, hydraulic, pneumatic, and heat transfer assemblies, modules, and circuit elements; determines serviceability and disposition of defective assemblies, subassemblies, and parts; performs initial and final checkouts and inspections; performs quality control measures; installs equipment modifications. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; recommends procedures for receiving, storing, testing, and repairing equipment; implements quality control measures; organizes and supervises inspection and maintenance teams; conducts on-the-job training; demonstrates proper repair techniques; keeps maintenance records; is a first-line supervisor.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in AC and DC theory and 3 in vacuum tube and transistor theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory and/or AC and DC circuit theory on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in AC and DC theory, 3 in vacuum tube and transistor theory, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 6 semester hours in AC and DC theory, 3 in vacuum tube and transistor theory, 3 in human relations, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), 3 for field experience in management, and additional credit in electronic device theory and/or AC and DC circuit theory on the basis of institutional evaluation. In an electronic technician apprentice training program, 3,000 clock hours of experience and 216 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-23U-002

NIKE HIGH POWER RADAR-SIMULATOR
REPAIRER

23U10
23U20
23U30

Exhibit Dates: 3/78-8/87. (Effective 9/87, MOS 23U was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance and repairs on Nike high-power acquisition radar, radar target simulator, and associated equipment. *Skill Level 10:* Performs highly complex maintenance, calibration and repairs on solid-state, as well as vacuum tube radar and microwave equipment; uses knowledge in basic electronics and schematic tracing to troubleshoot assemblies and circuits down to the component level; performs certain mathematical calculations during routine calibration or alignment procedures; uses common and specialized handtools to perform repairs or adjustments on electrical, electronic, mechanical, pneumatic, and hydraulic equipment; supervises or trains maintenance and operator personnel on the proper handling or maintenance of various parts of the radar equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel and supported units; installs equipment modifications; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; assigns duties; manages maintenance schedules, inspections, and quality control; supervises inspection and maintenance teams; conducts on-the-job training programs; keeps maintenance records.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electronics, 2 in electronic control devices, 3 in radar/microwave technology, 1 in digital circuits, 2 in electronic instruments, and 1 in mechanical laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in radar/microwave technology, and 1 in digital circuits. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) and 3 in a technical elective (radar/microwave theory) (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 2 in electronic control devices, 3 in radar/microwave technology, 1 in digital circuits, 2 in electronic instruments, and 1 in mechanical laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in radar/microwave technology, and 1 in digital circuits. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) and 3 in a technical elective (radar/microwave theory) (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electronics, 2 in electronic control devices, 3 in radar/microwave technology, 1 in digital circuits, 2 in electronic instruments, 1 in mechanical laboratory, 3 in electronics shop practices, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in radar/microwave technology, 3 in electronics shop practices, 2 in maintenance management, 1 in digital circuits, 3 in personnel supervision, and 2 in record keeping. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 in a technical elective (radar/microwave theory), and 3 for field experience in personnel management (1/80).

MOS-23V-001

HAWK MAINTENANCE CHIEF

23V50

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Skill Level 50: Supervises the maintenance of the Hawk missile system; assists in the development of the quality assurance/quality control program and supervises its implementation; interprets policy; recommends changes in policy and procedures; advises superiors; plans all work activities and operations; directs on-the-job training. NOTE: May have progressed to 23V50 from 22K40 (Hawk Missile-Launcher Repairman), 23Q40 (Hawk Fire Control Repairman), 23S40 (Hawk Pulse Radar Repairman), 23T40 (Hawk Continuous Wave Radar Repairman), 24B40 (Hawk Continuous Wave Radar Mechanic), 24D40 (Hawk Missile-Launcher Mechanic), or 24F40 (Hawk Fire Control Mechanic).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in human relations, 3 in maintenance management, 6 for field experience in management, and 3 in industrial arts education (electronics); if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education. In an electronic technician apprentice training program, 4,000 clock hours of experience and 288 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-23V-002

Hawk Maintenance Chief

23V40

23V50

Exhibit Dates: 3/78–8/80. (Effective 9/80, MOS 23V was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 233 (Hawk Missile System Repair).

Description

Summary: Supervises and coordinates maintenance of Hawk missile system. *Skill Level 40:* Supervises and coordinates maintenance of Hawk missile system, including launcher, maintenance test shop, battery control, simulator, radar, and test equipment; serves as a section chief or principle noncommissioned officer of a platoon performing missile system support maintenance; supervises and inspects activities of subordinates engaged in missile system maintenance; assists in development and supervises quality assurance/quality control program; advises superiors on technical and personnel matters; assists in planning and accomplishing on-the-job training. NOTE: May have progressed to 23V40 from 22K30 (Hawk Missile and Launcher Repairer), 23Q30 (Hawk Fire Control Repairer), 23S30 (Hawk Pulse Radar Repairer), or 23T30 (Hawk Continuous Wave Radar Repairer). *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as principal noncommissioned officer of a company performing missile systems support maintenance; or, may serve as chief instructor in a training facility. NOTE: May have progressed to 23V50 from 23V40, 24B40 (Hawk Continuous Wave Radar Mechanic), 24D40 (Hawk Missile Launcher Mechanic), or 24F40 (Hawk Fire Control System Mechanic).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, and 3 in public speaking. In the upper-division baccalaureate category, 2 semester hours in human relations, 3 in introduction to management, 3 for field experience in management, 3 in personnel management, and 3 in industrial arts education (1/80).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 2 semester hours in human relations, 3 in introduction to management, 6 for field experience in management, 3 in personnel management, and 3 in industrial arts education; if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 semester hours for an internship in education (1/80).

MOS-23W-001

Nike Maintenance Chief

23W50

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Skill Level 50: Supervises the maintenance of the Nike-Hercules missile system; assists in the development of the quality assurance/quality control program and supervises its implementation; interprets policy; recommends changes in policy and procedures; advises superiors; plans all work activities and operations; directs on-the-job training; NOTE: May have progressed to 23W50 from 28M50 (Anti-Ballistic Missile Maintenance Specialist), 22L40 (Nike Test Equipment Repairman), 22N40 (Nike-Hercules Missile-Launcher Repairman), 23N40 (Nike Track Radar Repairman), 23U40 (Nike High Power Radar-Simulator Repairman), 24Q40 (Nike-Hercules Fire Control Mechanic), 24U40 (Hercules Electronics Mechanic), or 26H30 (Air Defense Radar Repairman).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in human relations, 3 in maintenance management, 6 for field experience in management, and 3 in industrial arts educations (electronics); if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education. In an electronic technician apprentice training program, 4,000 clock hours of experience 288 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 hours of experience and 72 contact hours of related instruction (2/76).

MOS-23W-002

Nike Maintenance Chief

23W40

23W50

Exhibit Dates: 3/78–8/87. (Effective 9/87, MOS 23W was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises maintenance of the Nike-Hercules missile system. *Skill Level 40:* Supervises and coordinates support level maintenance of the improved Nike-Hercules system including missile, launcher control, launcher with associated equipment, radar sets, tracking station equipment, radar simulator and test equipment and devices; may serve as an instructor; serves as principal non-commissioned officer of a platoon which provides missile system support maintenance; supervises and assists in development of quality assurance program; responsible for on-the-job training; evaluates performance of assigned personnel. NOTE: May have progressed to 23W40 from 22L30 (Nike Test Equipment Repairer), 22N30 (Nike Hercules Missile Launcher Repairer), 23N30 (Nike Track Radar Repairer), 23U30 (Nike High Power Radar Simulator Repairer), or 26H30 (Air Defense Radar Repairer). *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as principal non-commissioned officer at battalion level or higher performing direct support or general support maintenance on the Nike system; may serve as First Sergeant of a company of approximately 90 enlisted persons; may serve as chief instructor in a training facility; may serve as chief advisor to a Reserve component unit or as chief advisor to a foreign military unit; is a top level supervisor and coordinator, experienced in troop leadership techniques, training management and planning work production. NOTE: May have progressed to 23W50 from 23W40, 24Q40 (Nike Hercules Fire Control Mechanic), 24U40 (Hercules Electronics Mechanic), or 24P40 (Defense Acquisition Radar Mechanic).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in public speaking, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 in introduction to management, 3 in personnel management, 2 in human relations, and 3 for field experience in management (1/80).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 6 for field experience in management, 2 in human relations, and 3 for an electronics technical elective (non-engineering); if the duty position was Chief Instructor, 3 additional semester hours for an internship in education; if served as a foreign advisor, 3 semester hours in comparative culture (1/80).

MOS-24B-001

Hawk Continuous Wave Radar Mechanic

24B20

24B40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 234 (Hawk Missile System Mechanics).

Description

Summary: Maintains and repairs Hawk continuous wave acquisition radar, continuous wave illuminator radar, high power illuminator radar, along with associated consoles, power, and test equipment. *Skill Level 20:* Performs electrical checks and adjustments on equipment; locates and corrects malfunctions; provides technical assistance in orientation, alignment, or synchronization of subassemblies and systems; performs authorized equipment modifications; completes required forms for equipment and repair parts; provides technical assistance in the conduct of operational and maintenance inspections; prepares technical reports on system equipment; provides technical assistance for setting up, taking down, and moving equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor; provides technical supervision in training programs; coordinates work activities of radar section; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; organizes and supervises maintenance and inspection teams; supervises the requisitioning and storing of supplies and repair parts.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 2 in electronic devices, 3 in basic electronics, 3 in electronic instruments, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 2 in pulse circuits, 2 in radar/microwave, and 1 in antennas. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), and additional credit in AC/DC circuits and electronic devices on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 3 in human relations, 3 in personnel supervision, 2 in pulse circuits, 2 in radar/microwave, and 1 in antennas. In the upper-division baccalaureate category, the recommendation is the same as that for Skill Level 20. In an electronic technician apprentice training program, 3,000 clock hours of experience and 216 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-24B-002

HAWK CONTINUOUS WAVE RADAR MECHANIC

24B10

24B20

24B30

24B40

Exhibit Dates: 3/78–8/80. (Effective 9/80, MOS 24B was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 234 (Hawk Missile System Mechanics).

Description

Summary: Supervises or performs organizational maintenance on Hawk continuous wave acquisition radar, continuous wave illuminator radar, high-power illuminator, along with associated consoles, power, and test equipment. *Skill Level 10:* Performs electrical checks and adjustments on equipment; locates and corrects equipment malfunctions; performs organizational maintenance with authorized tools, test equipment, and parts; provides technical assistance in orientation, alignment, or synchronization of listed equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists in operator training programs; provides technical assistance during emplacement of equipment; installs equipment and modifications. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical supervision in training programs for operator and maintenance personnel; supervises preparation of technical forms and reports; demonstrates proper maintenance and troubleshooting procedures; supervises maintenance or inspection teams. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as chief continuous wave radar mechanic at battalion or higher level; assists in supervision and coordination of maintenance activities in subordinate units.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 3 in basic electronics, 1 in radar/microwave, and 1 in antennas (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 2 in electronic devices, 3 in electronics instruments, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 3 in basic electronics, 2 in radar/microwave, and 1 in antennas. In the upper-division baccalaureate category, credit in AC/DC circuits and electronic devices on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 2 in electronic devices, 3 in electronics instruments, 3 in applied mathematics, 2 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 3 in basic electronics, 2 in radar/microwave, 1 in antennas, 3 in electronics shop practices, 2 in maintenance management, 3 in personnel supervision, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and 3 for field experience in personnel management, and credit in AC/DC circuits and electronic devices on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 2 in electronic devices, 3 in electronics instruments, 3 in applied mathematics, 3 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in technical mathematics, 3 in basic electronics, 2 in radar/microwave, 1 in antennas, 3 in electronics shop practices, 3 in personnel supervision, 2 in records and reports preparation, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in industrial education (electronics), 3 for field experience in personnel management, 3 in human relations, and 3 in introduction to management, and credit in AC/DC circuits and electronic devices on the basis of institutional evaluation (1/80).

MOS-24C-001

IMPROVED HAWK FIRING SECTION MECHANIC

24C20

24C40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk firing section equipment. *Skill Level 20:* Performs maintenance on Improved Hawk high-powered illuminator radar, missile launching section control box, and electrical, mechanical, and hydraulic systems of the launcher and loader-transporter; inspects, tests, and adjusts to specific operational levels; determines malfunctions and repairs by replacing subassembly units; assists in orientation, alignment, and synchronization of subassemblies and systems; assembles external hardware of the missile and makes prescribed tests to determine operational condition; supervises missile crewmen in transferring, handling, arming, and disarming missiles; initiates requests for repair parts, test equipment, tools, and supplies. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line technical supervisor; establishes workloads and repair priorities; coordinates work activities with other units; demonstrates proper maintenance and troubleshooting techniques; supervises the preparation of technical reports and forms; organizes and supervises maintenance and inspection teams.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semster hours in basic electronics and 3 in basic electricity, and additional credit in electronics, technical mathematics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 1 in radar/microwave, and additional credit in electronics, algebra, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician apprentice training program, 1,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, advanced standing on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in human relations, 3 in personnel supervision, and 1 in radar/microwave, and additional credit in electronics, algebra, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24C-002

Hawk Firing Section Mechanic (Improved Hawk Firing Section Mechanic)

24C10
24C20
24C30
24C40

Exhibit Dates: 3/78–Present.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk firing section equipment. *Skill Level 10:* Performs maintenance on Hawk or Improved Hawk radar, missile launching control box, and electrical, mechanical, and hydraulic systems of the launcher, transporter, and associated equipment; determines malfunction; performs repairs by replacing subassembly units; assists in orientation, alignment, and sychronization of equipment; assembles external hardware of missile; makes prescribed tests to determine operational and maintenance inspections. *Skill Level 20:* Able to perform the duties required for Skill Level 10; installs equipment modifications; supervises transfer and handling of missile; provides technical training to missile crew supervisory and operational personnel in arming and disarming missile; initiates request for repair parts, test equipment, tools, and supplies. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical supervision in training programs for operator and maintenance personnel; demonstrates proper maintenance and troubleshooting techniques; supervises maintenance and inspection teams; supervises the preparation of technical forms and reports. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and coordinates organizational maintenance of Hawk or Improved Hawk firing section equipment.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electronics, 3 in basic electricity, and 3 in applied mathematics, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in radar/microwave, and 3 in technical mathematics, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semster hours in basic electronics, 3 in basic electricity, and 3 in applied mathematics, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in radar/microwave, and 3 in technical mathematics, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electronics, 3 in basic electricity, 3 in applied mathematics, and 3 in electronics shop practices, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in radar/microwave, 3 in technical mathematics, 3 in electronics shop practices, 3 in personnel supervision, and 2 in records and report preparation, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management and 3 in industrial education (electronics) (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in radar/microwave, 3 in technical mathematics, 3 in electronics shop practices, 3 in personnel supervision, 2 in records and reports preparation, and 3 in maintenance management, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management, 3 in introduction to management, 3 in human relations, and 3 in industrial education (electronics) (1/80).

MOS-24D-001

Hawk Missile-Launcher Mechanic

24D20
24D40

Exhibit Dates: 10/73–1/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 234 (Hawk Missile System Mechanics).

Description

Summary: Performs inspections and maintenance on specialized missile equipment. *Skill Level 20:* Inspects, tests, and adjusts equipment and components to specified tolerances; identifies malfunctions in fluidic, electrical, and mechanical systems, using multimeter and test equipment designed specifically for the missile system; repairs fluidic and mechanical components; performs a limited amount of calibration for special test sets. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a foreman and technical inspector, supervising four to six persons; establishes workloads and repair priorities; implements quality control measures; conducts on-the-job training; supervises the preparation of technical forms and reports and the requisition and stockage of supplies and repair parts.

Recommendation, Skill Level 20

Credit is not recommended because of the limited and military nature of the skills, competencies, and knowledge. In an apprentice training program in equipment repair, advanced standing only on the basis of employer or trade association performance examination because of the limited nature of the skills, competencies, and knowledge (3/75).

Recommendation, Skill Level 40

Credit is not recommended because of the limited and military nature of the skills, competencies, and knowledge. In an apprentice training program in equipment repair, advanced standing only on the basis of employer or trade association performance examination because of the limited nature of the skills, competencies, and knowledge (3/75).

MOS-24D-002

Hawk Missile-Launcher Mechanic

24D20
24D40

Exhibit Dates: 2/76–2/78. (Effective 9/80, MOS 24D was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 234 (Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Hawk missile and launcher. *Skill Level 20:* Performs maintenance on Hawk missile, on-missile electronic guidance control components, and mechanical, hydraulic, and electrical systems of launcher and loader-transporter; inspects, tests, and adjusts equipment and components to specified tolerances; assembles, interconnects, and tests components to determine operational condition; identifies malfunctions in electrical, mechanical,and fluidic systems, using multimeter and special-design test equipment; repairs fluidic and mechanical components, using basic block diagrams; substitutes electrical and electronic components; supervises the missile crew in installing initiators, electric power unit fuel stick, ignitors, arming devices, and safety devices; performs a limited amount of calibration for special test sets. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line technical supervisor; establishes workloads and repair priorties; implements quality control measures; conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; coordinates work activities with other units; supervises the preparation of technical reports and forms; supervises the requisitioning and storing of supplies and repair parts.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity and 3 in basic electronics, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and additional credit in electronics, mechanics, and hydrualics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in human relations, 3 in personnel supervision, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24E-001

IMPROVED HAWK FIRE CONTROL
MECHANIC
24E20
24E30
24E40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk fire control equipment and engagement simulator. *Skill Level 20:* Checks and adjusts radar and associated power test equipment; performs electrical tests and adjustments; determines malfunctions and makes repairs; provides technical assistance in orientation, alignment, or synchronization of subassemblies and systems; installs equipment modifications; prepares maintenance and supply reports and forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; checks, adjusts, and repairs Improved Hawk engagement simulator; assists in the preparation of training programs for battery crews. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as the first-line technical supervisor for Improved Hawk operators and mechanics; coordinates work activities with supporting maintenance units; demonstrates proper troubleshooting and maintenance techniques; organizes and supervises maintenance and inspection teams; supervises requisitioning and storing of supplies and repair parts.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics and 3 in electronic instruments, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in electronic instruments, and additional credit in electronics and algebra on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician (sound and manufacturing) apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics and 3 in electronic instruments, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in electronic instruments, and additional credit in electronics and algebra on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician (sound and manufacturing) apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in human relations, and 3 in personnel supervision, and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, the recommendation is the same as that for Skill Level 30. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 30 because additional skills are administrative and supervisory in nature (2/76).

MOS-24E-002

IMPROVED HAWK FIRE CONTROL
MECHANIC
24E10
24E20
24E30
24E40

Exhibit Dates: 3/78–2/81.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk fire control equipment and engagement simulator, pulse acquisition radar, range-only-radar, and associated equipment. *Skill Level 10:* Performs checks and adjustments on Improved Hawk battery control center, pulse acquisition radar, range-only-radar, and associated equipment; localizes malfunctions and accomplishes repairs using appropriate tools, test equipment and parts; provides technical assistance in orientation, alignment, and synchronization of subassemblies and systems; assists in training operators in operator level maintenance; provides technical assistance in operational and maintenance inspections; provides technical assistance in logistics, emplacement, and helicopter rigging of listed equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance and guidance to Skill Level 10 personnel; installs electrical and electronic equipment modifications; initiates request for repair parts, tools, test equipment and other supplies; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical supervision in training programs for operator personnel; supervises the preparation of technical forms and reports; coordinates activities with supporting maintenance units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; supervises the requisitioning and stockage of supplies and repair parts; organizes and supervises maintenance and inspection teams. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as first-line technical supervisor for system operators and mechanics; serves as section chief of fire control mechanics; serves as chief fire control mechanic at battalion or higher level to assist in supervision and coordination of maintenance activities.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in technical mathematics, and additional credit in electronics and technical mathematics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in technical mathematics, and additional credit in electronics and technical mathematics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in electronic shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in technical mathematics, 3 in electronics shop practices, 3 in personnel supervision, 2 in records and reports preparation, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management and 3 in industrial education (electronics) (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in technical mathematics, 3 in personnel supervision, 3 in electronics shop practices, 2 in records and reports preparation, 3 in maintenance management, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management, 3 in introduction to management, 3 in human relations, and 3 in industrial education (electronics) (1/80).

MOS-24E-003

HAWK FIRE CONTROL MECHANIC
(IMPROVED HAWK FIRE CONTROL
MECHANIC)
24E10
24E20
24E30

Exhibit Dates: 3/81–Present.

Career Management Field: 23 (Air Defense Missile Maintenance).

Description

Summary: Supervises or performs organizational maintenance on Hawk or Improved Hawk fire control equipment, engagement simulator, radar, battery control central, and associated equipment. *Skill Level 10:* Performs equipment checks and adjustments; localizes malfunctions and repairs at the block diagram level; assists in the training of operators in operator level of maintenance and provides technical assistance in the conduct of operational and maintenance inspections. *Skill Level 20:* Able to perform the duties required for Skill Level 10; initiates request for repair parts, tools, and supplies; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises training programs for operator and maintenance personnel; prepares forms and reports; demonstrates proper maintenance and troubleshooting techniques; supervises requisition and stockage of supplies and repair parts; organizes and supervises maintenance and inspection teams.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic test equipment, and 3 in digital circuits (12/84).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic test equipment, and 3 in digital circuits (12/84).

Recommendation, Skill Level 30

In the vocational certificate category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic test equipment, 3 in digital circuits, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in in technical mathematics, 3 in electronic test equipment, 3 in digital circuits, and 3 in personnel supervision (12/84).

MOS-24F-001

HAWK FIRE CONTROL MECHANIC

24F20

24F30

24F40

Exhibit Dates: 10/73-2/78. (Effective 9/80, MOS 24F was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 234 (Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Hawk fire control and engagement simulator. *Skill Level 20:* Checks and adjusts radar and associated power and test equipment; performs electrical tests and adjustments; provides technical assistance in orientation, alignment, or sychronization of subassemblies and systems; localizes malfunctions and makes repairs; installs equipment modifications; prepares maintenance and supply forms and reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; checks, adjusts, and repairs Hawk engagement simulator; assists in the preparation of training programs for battery crews. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as the first-line technical supervisor for operator and maintenance personnel; coordinates work activities with supporting maintenance units; demonstrates proper maintenance and troubleshooting techniques; supervises requisitioning and storing of supplies and repair parts; organizes and supervises maintenance and inspection teams.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, and 3 in electronic instruments, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in electronic instruments, and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician (sound and manufacturing) apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, and 3 in electronic instruments, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in electronic instruments, and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician (sound and manufacturing) apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, and 3 in electronic instruments, and additional credit in technical mathematics and electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in electronic instruments, 3 in human relations, and 3 in personnel supervision, and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). The recommendation for advanced standing in an apprentice training program is the same as that for Skill Levels 20 and 30 because additional skills are administrative and supervisory in nature (2/76).

IMPROVED HAWK INFORMATION COORDINATION CENTRAL MECHANIC

24G20

24G40

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk information and coordination equipment. *Skill Level 20:* Performs maintenance on Improved Hawk continuous wave acquisition radar, coordination central, automatic data equipment, battery terminal equipment, and associated test equipment; performs electrical checks and adjustments on equipment; assists in orientation, alignment, and synchronization of subassemblies and systems; performs equipment modifications; initiates requests for repair parts, test equipment, tools, and supplies; prepares maintenance and supply records and forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a first-line supervisor; provides technical supervision in training programs; coordinates work activities; determines faulty work practices and demonstrates proper troubleshooting and maintenance techniques; organizes and supervises maintenance and inspection teams; supervises the requisitioning and storing of supplies and repair parts.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and additional credit in technical mathematics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 2 in pulse circuits, 1 in radar/microwave, and additional credit in electronics, digital computer operation, and mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), and additional credit in AC/DC circuits and electronic devices on the basis of institutional evaluation. In an electronic technician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction. In a construction electrician apprentice training program, advanced standing on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC/DC circuits, 3 in human relations, 3 in personnel supervision, 2 in pulse circuits, 1 in radar/microwave, and additional credit in electronics, digital computer operation, and mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, the recommendation is the same as that for Skill Level 20. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24G-002

Improved Hawk Information
Coordination Central Mechanic
24G10
24G20
24G30
24G40

Exhibit Dates: 3/78–2/81.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 235 (Improved Hawk Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Improved Hawk information and coordination equipment. *Skill Level 10:* Performs maintenance on Improved Hawk radar, information coordination central, automatic data equipment, battery terminal equipment, and associated equipment; performs electrical checks and adjustments on equipment; localizes malfunctions and accomplishes authorized repairs; assists with technical assistance in orientation, alignment, and synchronization of equipment; provides technical assistance in conduct of operational and maintenance inspection. *Skill Level 20:* Able to perform the duties required for Skill Level 10; installs equipment modifications, initiates orders for repair parts, tools and other supplies. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises activities of lower skill level personnel; provides supervision of on-the-job training for operator and maintenance personnel; coordinates activities with supporting maintenance units; demonstrates proper maintenance and troubleshooting techniques; supervises requisitioning and stockage of supplies and repair parts; supervises the preparation of technical forms and reports. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and coordinates maintenance of Improved Hawk information and coordination equipment mechanics; may serve as section chief for mechanics; may serve as chief mechanic at battalion or higher level to assist in coordination of maintenance activities in subordinate units.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 6 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in microwave techniques, 3 in technical mathematics, 3 in computer mathematics, and additional credit in electronics and digital computer operations on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, the recommendation is the same as that for Skill Level 10. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in microwave techniques, 3 in technical mathematics, 3 in computer mathematics, 3 in introduction to computers, and additional credit in electronics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, 6 in applied mathematics, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in microwave techniques, 3 in technical mathematics, 3 in computer mathematics, 3 in introduction to computers, 3 in electronics shop practices, 3 in personnel supervision, and 2 in records and reports preparation, and additional credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial education (electronics) and 3 for field experience in personnel management (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC/DC circuits, 1 in microwave techniques, 3 in technical mathematics, 3 in computer mathematics, 3 in introduction to computers, 3 in electronics shop practices, 3 in personnel supervision, 2 in records and reports preparation, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in industrial education (electronics), 3 for field experience in personnel management, 3 in introduction to management, and 3 in human relations (1/80).

MOS-24G-003

Hawk Information Coordination
Central Mechanic
(Improved Hawk Information
Coordination Central
Mechanic)
24G10
24G20
24G30

Exhibit Dates: 3/81–Present.

Career Management Field: 23 (Air Defense Missile Maintenance).

Description

Summary: Supervises or performs organizational maintenance on Hawk or Improved Hawk information and coordination equipment. *Skill Level 10:* Performs equipment checks and adjustments; localizes malfunctions and repairs at the block diagram level; assists in the training of operators in operation level of maintenance and provides technical assistance in the conduct of operational and maintenance inspections. *Skill Level 20:* Able to perform the duties required for Skill Level 10; initiates requests for repair parts, tools, and supplies; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises training programs for operator and maintenance personnel; prepares forms and reports; demonstrates proper maintenance and troubleshooting techniques; supervises requisition and stockage of supplies and repair parts; organizes and supervises maintenance and inspection teams.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic systems troubleshooting, 1 in microwave techniques, 3 in digital techniques, and credit in computer operations on the basis of institutional evaluation (12/84).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic systems troubleshooting, 1 in microwave techniques, 3 in digital techniques, and credit in computer operations on the basis of institutional evaluation (12/84).

Recommendation, Skill Level 30

In the vocational certificate category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic systems troubleshooting, 3 in electronics shop practices, 1 in microwave techniques, 3 in digital techniques, and credit in computer operations on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in technical mathematics, 3 in electronic systems troubleshooting, 1 in microwave techniques, 3 in digital techniques, 3 in personnel supervision, and credit in computer operations on the basis of institutional evaluation (12/84).

MOS-24H-001

Improved Hawk Fire Control
Repairman
24H20
24H40

Exhibit Dates: 10/73–8/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises and performs support maintenance on electronic systems of Improved Hawk fire control equipment. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances and determines malfunctions in electronic assemblies, subassemblies, modules, and circuit elements, using common and system special-design test equipment; performs initial and final checkouts and inspections of the system, assemblies, and subassemblies; installs equipment modifications. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics and 3 in introduction to computer science or data processing, and additional credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics and 3 in introduction to computer science or data processing, and additional credit in electronics on the basis of institutional evaluation. In an electronic technician apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in introduction to computer science or data processing, 3 in human relations, 3 in personnel supervision, 3 for field experience in management, and additional credit in electronics on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24H-002

IMPROVED HAWK FIRE CONTROL REPAIRMAN

24H20
24H40

Exhibit Dates: 9/76–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Performs support maintenance and inspections of Improved Hawk battery control centers, including radar consoles, electronic systems, communications systems, computers, and various types of advanced electronic test instruments. *Skill Level 20:* Applies basic electronic theory and advanced circuit concepts in troubleshooting both vacuum tube and solid-state electronic systems and circuits; uses schematics and logic diagrams to trace specific problems in analog, digital, or mechanical systems; uses both electrical and mechanical hand tools when performing adjustments and making repairs; operates sophisticated test instruments such as digital multimeters, frequency counters, time-interval meters, pulse generators, sweep generators, test simulators, dual-trace dual-sweep oscilloscopes, and radar computers; frequently performs repairs and minor calibration of support test instruments; uses simple algebraic and trigonometric formulas for calculating tolerances on various electromechanical systems; logs equipment failures, repairs, and inspections; completes maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records; prepares maintenance reports.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics, 3 in electronics laboratory, 3 in basic algebra and trigonometry, 3 in radar circuit theory, 2 in computer circuit theory, 2 in electromechanics, 2 in instrumentation, and 1 in introduction to television. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, and 3 in technical mathematics. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. In an electronics instrument mechanic/repairman apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (5/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, 3 in technical mathematics, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (5/77).

MOS-24H-003

HAWK FIRE CONTROL REPAIRER
(IMPROVED HAWK FIRE CONTROL REPAIRER)

24H10
24H20
24H30

Exhibit Dates: 3/78–9/90.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance and inspections of Hawk or Improved Hawk battery control centers including radar consoles, electronic systems, communications systems, computers, and various types of advanced electronic test equipment. *Skill Level 10:* Inspects, tests, and adjusts components to specific tolerances; determines shortcomings and malfunctions in electronic assemblies, subassemblies, modules, and circuit elements with common and system special-design test equipment; repairs unserviceable items by removing and replacing defective components and parts; determines serviceability and disposition of defective assemblies, subassemblies, modules, and circuit elements; performs quality control measures; serves on inspection teams; performs maintenance and repair on test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs electrical and electronic equipment modifications; provides technical assistance to supported units; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises duties performed at preceding levels; establishes workloads and repair priorities; recommends procedures for receipt, storage, inspection, testing, and repair of items; implements quality control measures; performs initial and final type checkout and inspection of designated system items and their assemblies and subassemblies; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records; prepares maintenance reports.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in technical mathematics, and additional credit in electronics and technical mathematics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in technical mathematics, and additional credit in electronics and technical mathematics on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, 3 in applied mathematics, and 3 in electronic shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, 3 in technical mathematics, 3 in electronic shop practices, 3 in personnel supervision, 2 in records and reports preparation, and additional credit in electronics and technical mathematics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management (1/80).

MOS-24H-004

HAWK FIRE CONTROL REPAIRER

24H10
24H20
24H30
24H40

Exhibit Dates: Pending evaluation. 9/90–Present.

MOS-24J-001

IMPROVED HAWK PULSE RADAR REPAIRMAN

24J20
24J40

Exhibit Dates: 10/73–8/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs support maintenance on Improved Hawk pulse radars and associated equipment. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances and determines malfunctions in electronic assemblies, subassemblies, modules, and circuit elements, using common and system special-design test equipment; performs initial and final checkouts and inspections of the system, assemblies, and subassemblies; installs equipment modifications. *Skill Level 40:* Able to perform the duties required for Skill Level 20;

establishes workloads and repair priorities; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, 3 in radar, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24J-002

IMPROVED HAWK PULSE RADAR
REPAIRMAN

24J20

24J40

Exhibit Dates: 9/76–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Peforms or supervises support maintenance on Improved Hawk pulse radars and associated equipment. *Skill Level 20:* Maintains improved pulse acquisition radar, range-only radar, test equipment, and systems associated with test equipment; inspects, tests, and adjusts components to specific tolerances; determines malfunctions in electronic assemblies, subassemblies, modules, and circuit elements by using common and system special-design test equipment; determines disposition of defective assemblies, subassemblies, modules, and circuit elements; locates, removes, and replaces defective components and parts; performs initial and final checkouts; installs equipment modifications; completes maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance on Improved Hawk pulse radars and associated equipment; establishes workloads and repair priorties; recommends procedures for receiving, storing, inspecting, testing, and repairing equipment, parts, and supplies; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records; prepares maintenance reports.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 3 in electricity/electronics laboratory, 3 in radar circuit theory, 3 in tube and transistor circuits, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, and 3 in technical mathematics. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. In an electronics instrument mechanic/repairman apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (5/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, 3 in technical mathematics, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (5/77).

MOS-24J-003

HAWK PULSE RADAR REPAIRER
(IMPROVED HAWK PULSE RADAR
REPAIRER)

24J10

24J20

24J30

Exhibit Dates: 3/78–2/89. (Effective 3/89, MOS 24J was discontinued and its duties were incorporated into MOS 27J, Hawk Field Maintenance Equipment/Pulse Acquisition Radar Repairer.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises and performs maintenance on Hawk or Improved Hawk missile pulse radars and associated equipment. *Skill Level 10:* Performs maintenance on electronic systems of pulse acquisition radars and pulse ranging radars of the Hawk Missile System; inspects, tests, and adjusts electronic components, modules, subassemblies, and assemblies, using common and specialized electronic test instruments; performs initial and final checkouts and inspections for the electronic portions of the radar system; replaces defective parts and does approved modifications; serves on inspection teams. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs equipment modifications and provides technical assistance to support units; prepares maintenance records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; implements quality control measures; performs initial and final check out and inspection of the radar system and the subassemblies; supervises inspection and maintenance teams; establishes and keeps maintenance records; organizes and conducts on-the-job training programs.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronics test procedures, 3 in tube and transistor circuits, and 1 in microwave techniques. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in elementary DC and AC circuits, 3 in introduction to tube and transistor circuits, 3 in electronic test procedures, and 1 in microwave techniques (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronic test procedures, 3 in tube and transistor circuits, and 2 in microwave techniques. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in elementary AC and DC circuits, 3 in introduction to tube and transistor circuits, 3 in electronic test procedures, and 2 in microwave techniques (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronics test procedures, 3 in tube and transistor circuits, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in algebra, 3 in elementary DC and AC circuits, 3 in introduction to tube and transistor circuits, 3 in electronics shop practices, 3 in personnel supervision, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management (1/80).

MOS-24K-001

IMPROVED HAWK CONTINUOUS WAVE
RADAR REPAIRMAN

24K20

24K40

Exhibit Dates: 10/73–8/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs support maintenance on electronic systems of Improved Hawk continuous wave radars and associated equipment. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances and determines malfunctions in electronic assemblies, subassemblies, modules, and circuit elements, using common and system special-design test equipment; performs initial and final checkouts and inspections of the system, assemblies, and subassemblies; installs equipment modifications. *Skill Level 40:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, 3 in radar, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24K-002

Improved Hawk Continuous Wave Radar Repairman

24K20
24K40

Exhibit Dates: 9/76–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Performs or supervises maintenance on electronic systems of Improved Hawk continuous wave radars, high-power illuminator radars, and associated equipment. *Skill Level 20:* Performs maintenance on Improved Hawk continuous wave radars, high-power illuminator radars, test equipment, mobile team shops, and associated system-peculiar portable test equipment; inspects, tests, and adjusts components to specific tolerances; determines malfunctions in electronic assemblies, subassemblies, modules, and circuit elements by using common and system-design test equipment; removes and replaces defective components and parts; determines disposition of defective assemblies, subassemblies, modules, and circuit elements; performs initial and final checkouts; installs equipment modifications; completes maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance on Improved Hawk continuous wave radars and associated equipment; establishes workloads and repair priorities; recommends procedures for receiving, storing, inspecting, testing, and repairing equipment and parts; organizes and conducts on-the-job training programs; supervises maintenance and inspection teams; demonstrates proper work procedures and troubleshooting techniques; keeps maintenance records; prepares maintenance reports.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 3 in electricity/electronics laboratory, 3 in radar circuit theory, 3 in tube and transistor circuits, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, and 3 in technical mathematics. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. In an electronics instrument mechanic/repairman apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (5/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in advanced electronics, 3 in electronics laboratory, 3 in technical mathematics, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (5/77).

MOS-24K-003

Hawk Continuous Wave Radar Repairer
(Improved Hawk Continuous Wave Radar Repairer)

24K10
24K20
24K30

Exhibit Dates: 3/78–9/90.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on Hawk or Improved Hawk continuous wave radars and associated equipment. *Skill Level 10:* Performs support maintenance on electronic systems of continuous wave radars and special high-power illuminator radars associated with the Hawk missile system; adjusts, inspects, and tests electronic assemblies, subassemblies, modules, and circuit elements, using common and special-design test equipment; performs initial and final checkouts and inspections for the electronic portions of the radar systems; performs approved modifications and serves on inspection teams. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs equipment modifications and provides technical assistance to supported units; prepares maintenance records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; implements quality control measures; performs initial and final checkouts and inspection of the radar systems and their subassemblies; supervises inspection and maintenance teams; establishes and keeps maintenance records; prepares maintenance reports; organizes and conducts on-the-job training programs.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronics test procedures, 3 in tube and transistor circuits, and 1 in microwave techniques. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in elementary DC and AC circuits, 3 in introduction to tube and transistor circuits, 3 in electronic test procedures, and 1 in microwave laboratory (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronic test procedures, 3 in tube and transistor circuits, and 2 in microwave techniques. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in elementary DC and AC circuits, 3 in introduction to tube and transistor circuits, 3 in electronic procedures, and 2 in microwave laboratory (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in applied mathematics, 3 in DC and AC circuits, 3 in electronics test procedures, 3 in tube and transistor circuits, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in elementary DC and AC circuits, 3 in introduction to tube and transistor circuits, 3 in electronics test procedures, 3 in microwave laboratory, 3 in personnel supervision, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management (1/80).

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on electrical, hydraulic, hydropneumatic, mechanical, and electromechanical portions of the Improved Hawk missile system and on the electronic systems of the Improved Hawk launcher and associated test equipment. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances; determines deficiencies in electronic, electrical, hydraulic, hydropneumatic, mechanical, and electromechanical assemblies, subassemblies, and circuits by using common and system special-design test equipment; removes and replaces defective components and determines their disposition; performs load testing and maintenance calibration; repairs job-related tools and equipment; installs electrical, hydraulic, hydropneumatic, mechanical, and electromechanical modifications on Improved Hawk system items; completes maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance of electrical, mechanical, electromechanical, hydraulic, and hydropneumatic systems of the Improved Hawk missile system and of the electronics system of the Improved Hawk launcher; establishes workloads and repair priorities; recommends procedures for receiving, storing, inspecting, testing, and repairing items; organizes and conducts on-the-job training programs; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records; prepares maintenance reports.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in electromechanical systems, 3 in mechanics, 3 in hydraulics, 3 in technical mathematics, and 1 in care and use of tools, and additional credit in electronics, mechanics, and hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in mechanics, 3 in hydraulics, and 3 in technical mathematics, and additional credit in electronics, electricity, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. In a wireman-electrician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction (5/77).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in mechanics, 3 in hydraulics, 3 in technical mathematics, 3 in human relations, 3 in personnel supervision, and 3 for field experience in management, and additional credit in electronics, electricity, mechanics, and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, credit in industrial arts on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skill are administrative and supervisory in nature (5/77).

MOS-24L-002

HAWK LAUNCHER AND MECHANICAL
SYSTEMS REPAIRER
(IMPROVED HAWK LAUNCHER AND
MECHANICAL SYSTEMS REPAIRER)

24L10
24L20
24L30

Exhibit Dates: 3/78-2/89. (Effective 3/89, MOS 24L was discontinued and its duties were incorporated into MOS 27H, Hawk Firing Section Repairer.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises or performs maintenance on the electrical, hydraulic, hydropneumatic, mechanical, and electromechanical portions of the Improved Hawk system and the electronic systems of Hawk or Improved Hawk launcher. *Skill Level 10:* Inspects, tests, and adjusts to specific tolerances; determines deficiencies in electronic, electrical, hydraulic, hydropneumatic, mechanical, and electromechanical assemblies, subassemblies, and circuits with common and special-design test equipment; performs required maintenance; repairs unserviceable items by removing and replacing defective components and parts and determines their disposition; performs quality control measures; performs load testing, maintenance calibration, and repair of job related tools and equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs electrical, hydraulic, hydropneumatic, mechanical, and electromechanical equipment modifications; provides technical assistance to supported units; completes maintenance and supply forms. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises duties performed by lower skill level personnel involving maintenance of the Improved Hawk missile and launching systems; establishes workloads and repair priorities; recommends procedures for receiving, storing, inspecting, testing, and repairing items; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; establishes and keeps records; prepares maintenance reports.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in electromechanical systems, 3 in mechanics, 3 in hydraulics, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in mechanics, 3 in hydraulics, and 3 in technical mathematics (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in electromechanical systems, 3 in mechanics, 3 in hydraulics, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in mechanics, 3 in hydraulics, and 3 in technical mathematics (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity, 3 in electromechanical systems, 3 in mechanics, 3 in hydraulics, 3 in applied mathematics, and 3 in electrical and mechanical shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in mechanics, 3 in hydraulics, 3 in technical mathematics, 3 in electrical and mechanical shop practices, 3 in personnel supervision, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel supervision (1/80).

MOS-24M-001

VULCAN SYSTEM MECHANIC

24M20
24M30
24M40

Exhibit Dates: 10/73-8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 271 (Combat Missile Mechanics).

Description

Summary: Supervises or performs maintenance on Vulcan weapon system and associated equipment. *Skill Level 20:* Performs routine maintenance on the range-only radar, the rapid alerting identification display, and test, diagnostic, and measuring equipment; uses test equipment to determine malfunctioning components, parts, and accessories; initiates requests for repair parts, tools, test equipment, and other supplies. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs maintenance on the forward area alert radar. *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides technical supervision in training programs for operator and maintenance personnel; coordinates work activities with supporting units; demonstrates proper maintenance and troubleshooting techniques; is responsible for requisitioning and storing supplies and repair parts.

Recommendation, Skill Level 20

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 30

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 3 in personnel supervision, and 3 for field experience in management (2/76).

MOS-24M-002

VULCAN SYSTEM MECHANIC
(VULCAN/FAAR SYSTEM MECHANIC)

24M10
24M20
24M30
24M40

Exhibit Dates: 9/77-Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 272 (Light Air Defense Systems Maintenance).

Description

Summary: Supervises or performs maintenance on the Vulcan weapons system and the Forward Area Alerting Radar (FAAR) and associated equipment. *Skill Level 10:* Performs routine maintenance on range-only radar, the target display system, and test, diagnostic, and measuring equipment; maintains electro-mechanical and mechanical components associated with turret assemblies on Vulcan launch equipment; uses some basic test equipment including meters, oscilloscopes, and specialized test equipment; isolates malfunctions to the black box level. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill-level personnel; assigns duties; maintains forms and records to insure proper maintenance procedures for all Chaparral systems. *Skill Level 40:* Able to perform the duties required for Skill Level 30; establishes maintenance procedures; conducts technical inspections and coordinates maintenance activities.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in electronics laboratory, and 2 in mechanical laboratory. In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in electronics laboratory, and 2 in mechanical laboratory. In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in electronics laboratory, 2 in mechanical laboratory, 2 in maintenance management, and 3 in electronic and mechanical shop practices. In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision, 3 in electronics and mechanical shop practices, 2 in maintenance management, and 2 in electronics laboratory (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in electronics laboratory, 2 in mechanical laboratory, 3 in electronics and mechanical shop practices, and 4 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in electronics and mechanical shop practices, 4 in maintenance management, and 2 in electronics laboratory (1/80).

MOS-24N-001

CHAPARRAL SYSTEM MECHANIC

24N20
24N30
24N40

Exhibit Dates: 10/73-8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 271 (Combat Missile Mechanics).

Description

Summary: Supervises or performs maintenance on Chaparral weapon systems and on Forward Area Alerting Radar (FAAR). *Skill Level 20:* Performs routine maintenance on Chaparral weapons systems, using test equipment to locate malfunctions in the assemblies and subassemblies of the systems; initiates requests for repair parts, tools, test equipment, and other supplies. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs maintenance on Forward Area Alerting Radar (FAAR). *Skill Level 40:* Able to perform the duties required for Skill Level 30; provides technical supervision in training programs for operational and maintenance personnel; coordinates work activities with supporting units; demonstrates proper maintenance and troubleshooting techniques, organizes and supervises maintenance and inspection teams; is responsible for requisitioning and storing supplies and repair parts.

Recommendation, Skill Level 20

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 30

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 3 in personnel supervision, and 3 for field experience in management (2/76).

MOS-24N-002

CHAPARRAL SYSTEM MECHANIC

24N10
24N20
24N30
24N40

Exhibit Dates: 9/77-Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 272 (Light Air Defense Systems Maintenance).

Description

Summary: Supervises or performs maintenance on Chaparral weapon system and associated equipment. *Skill Level 10:* Performs routine maintenance on Chaparral weapon system and target display sets; maintains mechanical, electrical, hydraulic, pneumatic, and some electronic systems associated with the Chaparral launch equipment; uses test meters and specialized test sets to localize malfunctions to the black-box level. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; assigns duties; maintains forms and records to insure proper maintenance procedures for all Chaparral systems. *Skill Level 40:* Able to perform the duties required for Skill Level 30; establishes maintenance procedures; conducts technical inspections of Chaparral systems and coordinates maintenance activities.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in mechanical laboratory (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in mechanical laboratory (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 2 semester hours in mechanical laboratory, 3 in mechanical shop practices, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision, 3 in mechanical shop practices, and 2 in maintenance management (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in mechanical laboratory, 3 in mechanical shop practices, and 4 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in mechanical shop practices, and 4 in maintenance management (1/80).

MOS-24P-001

DEFENSE ACQUISITION RADAR MECHANIC

24P20
24P40

Exhibit Dates: 10/73-2/78.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 261 (Radar Mechanics).

Description

Summary: Supervises or performs maintenance of air defense acquisition radars. *Skill Level 20:* Performs maintenance on high-power acquisition radars, low-power acquisition radars, auxiliary battery acquisition radars, communications systems security devices, battery control circuits, and fire unit integration facility; performs maintenance checks with specialized test and measuring devices; locates and isolates malfunctions; inspects, tests, and replaces defective components; makes adjustments to return equipment to operating order; keeps maintenance records and prepares equipment maintenance reports. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance activities; supervises preparation and administration of maintenance records and reports.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and test equipment operation, and 3 in tubes and transistor circuits. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and test equipment operation, and 3 in tubes and transistor circuits. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits, and test equipment operation, 3 in tube and transistor circuits, 3 in personnel supervision, and 3 in human relations. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-24P-002

DEFENSE ACQUISITION RADAR MECHANIC

24P10
24P20
24P30
24P40

Exhibit Dates: 3/78-2/87. (Effective 3/87, MOS 24P was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 232 (Nike Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on air defense acquisition radar sets and associated equipment. *Skill Level 10:* Performs maintenance on several radar sets, including high power acquisition radar, low power acquisition radar, and auxiliary battery acquisition radar; maintains and determines operational condition of communications security devices, firing control coordination facility, and battery control circuits; uses common and specialized test equipment and measuring devices to locate and isolate malfunctions, along with circuit analysis techniques; inspects, tests, and replaces defective components; adjusts equipment to return to operating condition; know basic electric/electronic theory, principles of solid-state-devices, and binary fundamentals. *Skill Level 20:* Able to perform the duties required for Skill Level 10; completes maintenance and supply forms; installs equipment modifications; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; coordinates activity with supporting maintenance units; supervises preparation of technical and maintenance logs, forms, records and reports; supervises the requisition of supplies and repair parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as chief radar mechanic at battalion or higher level; knows characteristics of equipment, repair procedures, supply management and maintenance management; supervises and coordinates maintenance activities in subordinate units.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity and electronics, 1 in systems maintenance, and 2 in electronic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics fundamentals, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device fundamentals, radar principles, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity and electronics, 1 in systems maintenance, and 2 in electronic systems troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics fundamentals, 2 in AC/DC circuit fundamentals, and 1 in electronic instruments. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and credit in electronic device fundamentals, radar principles, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in systems maintenance, 2 in maintenance management, 3 in electronic systems troubleshooting, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics fundamentals, 2 in AC/DC circuit fundamentals, 3 in electronics shop practices, 1 in electronic instruments, 3 in personnel supervision, 2 in maintenance management, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 for field experience in personnel management, and credit in electronic device fundamentals, radar principles, and circuit analysis on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity and electronics, 3 in systems maintenance, 3 in electronic systems troubleshooting, 2 in supply management procedures, 3 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics fundamentals, 2 in AC/DC circuit fundamentals, 3 in electronics shop practices, 1 in electronic instruments, 3 in personnel supervision, 2 in records and reports preparation, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 for field experience in personnel management, and credit in electronic device fundamentals, radar principles, and circuit analysis on the basis of institutional evaluation (1/80).

MOS-24Q-001

NIKE-HERCULES FIRE CONTROL MECHANIC

24Q20
24Q30
24Q40

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 232 (Nike Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on misssile fire control equipment and radar target simulator. *Skill Level 20:* Checks and adjusts target and missile tracking and ranging radar systems, computers, multichannel data recorders, and associated battery control circuits; locates and repairs malfunctions, using common and special-design tools and test equipment; installs equipment modifications. *Skill Level 30:* Able to perform the duties required for Skill Level 20; maintains radar target simulator. *Skill Level 40:* Able to perform the duties required for Skill Level 30; is a first-line technical supervisor; trains maintenance personnel; coordinates work activities with other maintenance units; demonstrates proper maintenance and troubleshooting techniques; organizes and supervises maintenance and inspection teams; establishes workloads and repair priorities; supervises the requisitioning and storing of repair parts and supplies.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in technical mathematics, 2 in control systems, 1 in systems maintenance, 1 in communication systems (electronics), 1 in shop practices, and 1 in alignment techniques (video). In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 2 in digital circuit analysis, 1 in digital computer fundamentals, 1 in electronic instruments, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in technical mathematics, 2 in control systems, 1 in systems maintenance, 1 in communication systems (electronics), 1 in shop practices, and 1 in alignment techniques (video). In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 2 in digital circuit analysis, 1 in digital computer fundamentals, 1 in electronic instruments, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20 In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in radar/microwave theory, 3 in human relations, 3 in personnel supervision, 2 in DC circuit analysis, 2 in AC circuit analysis, 2 in digital circuit analysis, 1 in digital computer fundamentals, 1 in electronic instruments, and 1 in transistor/tube theory. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics) and additional credit in electronic device theory, radar/microwave, digital computers, and circuit analysis on the basis of institutional evaluation; if the duty assignment was chief fire control mechanic, 3 additional semester hours for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 30 because additional skills are administrative and supervisory in nature (2/76).

MOS-24Q-002

NIKE-HERCULES FIRE CONTROL MECHANIC

24Q10
24Q20
24Q30
24Q40

Exhibit Dates: 3/78-2/87. (Effective 3/87, MOS 24Q was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 232 (Nike Missile System Mechanics).

Description

Summary: Supervises or performs organizational maintenance on Nike Hercules fire control equipment and radar target simulator. *Skill Level 10:* Performs maintenance on tracking radar, range radar, missile tracking radar, data recorders, and battery control circuits; performs checks and adjustments to the component level using schematic-related troubleshooting techniques; uses standard circuit tracing equipment such as an oscilloscope, multimeter, differential voltmeter; circuitry primarily involves vacuum tubes, but some transistors and integrated circuitry are also encountered. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises activities of lower skill levels; supervises the preparation of maintenance forms and reports; supervises training programs, requisition of parts and stocks for repairs; organizes and supervises maintenance and inspection teams. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and coordinates all maintenance on the Nike Hercules fire control equipment including the radar target simulator; may serve as Chief Fire Control Mechanic at battalion or higher level.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, and 3 in electronics fundamentals. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals and 3 in radar operations. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, and 3 in electronics fundamentals. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals and 3 in radar operations. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, 3 in electronics troubleshooting, 3 in electronics shop practices, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, 3 in electronics troubleshooting, 3 in electronics shop practices, 2 in records and reports preparation, 2 in maintenance management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) and 3 for field experience in personnel management (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, 3 in electronics troubleshooting, 3 in electronics shop practices, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in electric/electronic fundamentals, 3 in electronics maintenance, 3 in electronics troubleshooting, 3 in electronics shop practices, 2 in records and reports preparation, 3 in maintenance management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 for field experience in personnel management, 3 in introduction to management, and 3 in human relations (1/80).

MOS-24R-001

HAWK MASTER MECHANIC

(IMPROVED HAWK MASTER MECHANIC)

24R40

24R50

Exhibit Dates: 3/81-Present.

Career Management Field: 23 (Air Defense Missile Maintenance).

Description

Summary: Supervises or performs maintenance on Improved Hawk equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 30 of MOS 24E, Hawk (Improved Hawk) Fire Control Mechanic, MOS 24G, Hawk (Improved Hawk) Information Coordination Central Mechanic, and MOS 24C, Hawk Firing Section Mechanic; supervises and coordinates the maintenance of Improved Hawk information coordination central, automatic data equipment, improved continuous wave acquisition radar, identification friend or foe, battery terminal equipment, battery control central, pulse acquisition radar, range-only radar, and associated tools and test equipment; prepares maintenance forms and supply records; diagnoses and determines causes of malfunctions; reads, interprets, and explains complex circuit diagrams and schematics; provides technical advice and assistance. NOTE: May have progressed to 24R40 from 24E30 (Hawk (Improved Hawk) Fire Control Mechanic or 24G30 (Hawk (Improved Hawk) Information Coordination Central Mechanic). *Skill Level 50:* Able to perform the duties required for Skill Level 40; supervises and coordinates maintenance on Improved Hawk high-powered illuminator radar, missile-launching section control box, launcher, mechanical, hydraulic, and electrical systems, and loader-transporter; serves as senior mechanic; establishes, maintains and monitors on-the-job training programs; provides technical guidance to other units.

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management (12/84).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 6 for field experience in management, and 3 in management problems (12/84).

MOS-24T-001

PATRIOT OPERATOR AND SYSTEM MECHANIC

24T10

24T20

24T30

24T40

Exhibit Dates: 9/80–3/84.

Career Management Field: 23 (Air Defense Missile Maintenance).

Description

Summary: Supervises, operates, or performs maintenance on the Patriot air defense missile system. *Skill Level 10:* Performs repairs on the Patriot radar set; installs authorized equipment modifications and prepares appropriate supplies, communication equipment, computer and computer peripherals, tools, and test equipment; removes and replaces faulty circuit cards and operates the maintenance vehicle. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to lower skill level personnel; performs organizational maintenance on the Patriot radar set, and assists in training operators in maintenance techniques; troubleshoots problems with external test equipment when isolation is not accomplished by built-in or other machine-aided equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as shift supervisor; provides supervision in training programs for operator and maintenance personnel; supervises preparation of technical forms and reports as well as requisitioning and stockage of supplies and repair parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; coordinates activities of maintenance personnel; supervises inspection of maintenance performance; supervises inspection teams and the maintenance of repair parts stockage; establishes maintenance priorities.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits (12/84).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits (12/84).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, 3 in digital circuits, and 3 in personnel supervision (12/84).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, 3 in digital circuits, 3 in personnel supervision, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management (12/84).

Career Management Field: 23 (Air Defense Missile Maintenance).

Description

Summary: Supervises, operates, or performs maintenance on the Patriot air defense missile system. *Skill Level 10:* Performs repairs on the Patriot radar set; installs authorized equipment modifications and prepares appropriate supplies, communication equipment, computer and computer peripherals, tools, and test equipment; removes and replaces faulty circuit cards and operates the maintenance vehicle. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to lower skill level personnel; performs organizational maintenance on the Patriot radar set, and assists in training operators in maintenance techniques; troubleshoots problems with external test equipment when isolation is not accomplished by built-in or other machine-aided equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; serves as shift supervisor; provides supervision in training programs for operator and maintenance personnel; supervises preparation of technical forms and reports as well as requisitioning and stockage of supplies and repair parts. *Skill Level 40:* Able to perform the duties required for Skill Level 30; coordinates activities of maintenance personnel; supervises inspection of maintenance performance; supervises inspection teams and the maintenance of repair parts stockage; establishes maintenance priorities. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as maintenance chief; assists in planning, organization, and training operations; provides technical expertise; may serve as a member of a multi-national evaluation team.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits (12/84).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, and 3 in digital circuits (12/84).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, 3 in digital circuits, and 3 in personnel supervision (12/84).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 3 in electronic systems troubleshooting, 3 in digital circuits, 3 in personnel supervision, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for field experience in management (12/84).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in personnel management and 6 for field experience in management (12/84).

MOS-24U-001

Hercules Electronics Mechanic

24U20
24U40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 232 (Nike Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Hercules missiles, airframes, and launching devices. *Skill Level 20:* Assembles, installs, maintains, and adjusts mechanical on-missile guidance control systems and associated equipment; assembles and interconnects electronic missile components; locates and repairs malfunctions, using common and special-design tools and test equipment; initiates requisitions for repair parts, tools, test equipment, and supplies. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as the first-line technical supervisor of Hercules electronics mechanics; establishes workloads and maintenance priorities; coordinates maintenance activities with other units; determines faulty work practices and demonstrates proper maintenance and troubleshooting techniques; organizes and supervises inspection and maintenance teams; supervises the preparation of technical reports and forms.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, and 3 in electronic instruments, and additional credit in advanced electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in basic electricity, and 3 in technical mathematics (including trigonometry). In an electronic technician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction. In a construction electrician apprentice training program, advanced standing on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in electronic instruments, and 3 in advanced electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in basic electricity, 3 in technical mathematics (including trigonometry), and 3 in human relations. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-24U-002

Nike-Hercules Custodial Mechanic
(Hercules Electronics Mechanic)

24U10
24U20
24U30
24U40

Exhibit Dates: 3/78–3/90. (Effective 3/90, MOS 24U was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 232 (Nike Missile System Mechanics).

Description

Summary: Supervises or performs maintenance on Hercules missiles, airframes, and launch devices. *Skill Level 10:* Assembles, installs, maintains, and adjusts certain mechanical assemblies relating to on-missile guidance control; assembles and interconnects electronic missile components; localizes malfunctions and repairs authorized components using specialized test sets; initiates requisitions for repairs of mechanical and some electronic missile subsystems; checks calibration of test sets; makes adjustments; isolates malfunctions in test sets to component level and makes repairs. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises activities of lower skill level personnel; supervises the preparation of maintenance forms and reports; supervises training programs, requisition of parts and stock for repairs; organizes and supervises maintenance and inspection teams. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and coordinates all maintenance on the Hercules missiles, airframe and launch devices; may serve as chief electronics mechanic at battalion or higher level.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronic maintenance, and 3 in electronic troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronic maintenance, and 3 in electronic troubleshooting. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in electric/electronic fundamentals, 3 in electronic maintenance, 3 in electronic troubleshooting, 2 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals, 2 in maintenance management, 3 in personnel supervision, 3 in electronic shop practices, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in electrical/electronic fundamentals, 3 in electronic maintenance, 3 in electronic troubleshooting, 3 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics fundamentals, 3 in maintenance management, 3 in personnel supervision, 3 in electronics shop practices, and 2 in records and reports preparation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel management, 3 in introduction to management, and 3 in human relations (1/80).

MOS-24V-001

IMPROVED HAWK MAINTENANCE CHIEF

24V50

Exhibit Dates: 10/73–8/76.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Skill Level 50: Supervises the maintenance of the Improved Hawk missile system; assists in the development of the quality assurance/quality control program and supervises its implementation; interprets policy; recommends changes in policy and procedures; advises superiors on all personnel matters; plans all work activities and operations; directs on-the-job training. NOTE: May have progressed to 24V50 from Skill Level 40 of any Improved Hawk mechanic or repairman MOS.

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in human relations, 3 in maintenance management, 3 in industrial arts education (electronics), and 6 for field experience in management; if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education (2/76).

MOS-24V-002

IMPROVED HAWK MAINTENANCE CHIEF

24V50

Exhibit Dates: 9/76–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Skill Level 50: Supervises and coordinates maintenance of Improved Hawk missile system, including launcher; assists in the development of the qulity control program and supervises its implementation; interprets polices and procedures; advises superiors on technical and personnel matters; plans work activities and operations; assists in planning and accomplishing on-the-job taining; directs and coordinates the administration of the unit to which assigned; assists commander with inspections, observes discrepancies, and initiates appropriate corrective action. NOTE: May have progressed to 24V50 from Skill Level 40 of any Improved Hawk mechanic or repairman MOS.

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in supervision and leadership, 3 in maintenance management, 3 in industrial arts education, and 6 for field experience in management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education (5/77).

MOS-24V-003

HAWK MAINTENANCE CHIEF
(IMPROVED HAWK MAINTENANCE CHIEF)

24V40

24V50

Exhibit Dates: 3/78–2/89. (Effective 3/89, MOS 24V was discontinued and its duties were incorporated into the following MOS's: 27V, Hawk Maintenance Chief; 24H, Hawk Fire Control Repairer; 27J, Hawk Field Maintenance Equipment/Pulse Acquisition Radar Repairer; 24K, Hawk Continuous Wave Radar Repairer; and 27H, Hawk Firing Section Repairer.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 236 (Improved Hawk Missile System Repair).

Description

Summary: Supervises and coordinates maintenance of Hawk or Improved Hawk system. *Skill Level 40:* Supervises and coordinates maintenance of Hawk or Improved Hawk system, including launcher, radar, battery control, information coordination, simulator station, test equipment and associated training equipment; serves as a section chief or principle noncommissioned officer of platoon performing missile system support maintenance; supervises and inspects activities of subordinates engaged in missile system maintenance; assists in development and supervises quality assurance and quality control programs; advises superiors on technical and personnel matters; assists in planning and accomplishing on-the-job training. NOTE: From 3/87–present, progressed to 24V40 from 26H30 (Air Defense Radar Repairer); from 3/78–2/87, may have progressed to 24V40 from 22K30 (Hawk Missile and Launcher Repairer), 23Q30 (Hawk Fire Control Repairer), 22S30 (Hawk Pulse Radar Repairer), or 23T30 (Hawk Continuous Wave Radar Repairer). *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as maintenance chief in unit at battalion level or higher, or serves as chief instructor in a training facility; may serve as first sergeant of a company. NOTE: From 3/87–present, may have progressed to 24V50 from 24V40 or 24R50 (Hawk Master Mechanic); from 2/78–3/78, may have progressed to 24V50 from 24V40, 24B40 (Hawk Continuous Wave Radar Mechanic, 24D40 (Hawk Missile Launcher Mechanic), 24F40 (Hawk Fire Control System Mechanic), or 23V50 (Hawk Maintenance Chief).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, and 3 in public speaking. In the upper-division baccalaureate category, 2 semester hours in human relations, 3 in introduction to management, 3 for field experience in management, 3 in industrial arts education, and 3 in personnel management (1/80).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 2 semester hours in human relations, 3 in introduction to management, 6 for field experience in management, 3 in industrial arts education, and 3 in personnel management; if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education (1/80).

MOS-24W-001

SGT. YORK AIR DEFENSE GUN SYSTEM MECHANIC

24W10

24W20

24W30

24W40

Exhibit Dates: 3/84–8/87.

Career Management Field: 23 (Air Defense System Maintenance).

Description

MOS 24W was deleted from the MOS system before an evaluation could be scheduled.

Recommendation

Credit may be granted on the basis of institutional evaluation.

MOS-25D-001

BIRDIE REPAIRMAN

25D20

25D40

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 25D was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 238 (Fire Distribution Systems Repair).

Description

Summary: Supervises or performs support maintenance on battery integration radar display equipment (BIRDIE) and associated radar data processing equipment (RDPE). *Skill Level 20:* Troubleshoots circuitry; conducts lamp tests on test panel, replaces indicators, and substitutes circuit packages; repairs or replaces defective test panel internal circuitry; troubleshoots and aligns data link system; test operates monitor console; adjusts deflection presentations, offset functions, and range marker accuracy; adjusts sweep and tag amplifiers for zero and test voltages, using portable oscilloscope and test panel; aligns analog subsystem by measuring and adjusting amplitude and phase; adjusts sweep revolver to align servomechanism; maintains air conditioners, test equipment, and tools. *Skill Level 40:* Able to perform the duties required for Skill Level 20; coordinates work activities with equipment operators and fire distribution terminal equipment repairmen; is responsible for the preparation of technical and administration records and reports; prepares, plans and schedules work shifts and assignments; observes, corrects, instructs, and supervises subordinate personnel in proper maintenance techniques and procedures; diagnoses complex equipment malfunctions.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics (including AC and DC circuits and use of test equipment), 3 in technical mathematics, 1 in digital circuits, and additional credit in electronics, mathematics, and computer science on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics (including AC and DC circuits and use of test equipment), 3 in technical mathematics, 1 in digital circuits, and additional credit in electronics, mathematics, and computer science on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics (including AC and DC circuits and use of test equipment), 3 in technical mathematics, 1 in digital circuits, 3 in human relations, 3 in maintenance supervision, 3 for field experience in management, and additional credit in electronics, mathematics, and computer science on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-25G-001

MOBILE ADCP MONITOR REPAIRMAN

25G20

25G40

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 25G was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 238 (Fire Distribution Systems Repair).

Description

Summary: Maintains weapons monitoring center and associated mobile monitor equipment. *Skill Level 20:* Troubleshoots and repairs or replaces analog, digital, and analog-digital interface circuits; repairs or replaces monitor equipment components, such as buffers, magnetic drum and memory read-write amplifiers, display generators, consoles, cathode ray displays, radar data converters, data links, sequencers, computers, communications, and power supplies; uses oscilloscopes, digital testers, signal generators, transistor testers, tube testers, frequency meters, electronic voltmeters, and multimeters; performs field maintenance on test equipment, air conditioners, and equipment vans; modifies equipment to work order specifications. *Skill Level 40:* Able to perform the duties required for Skill Level 20; prepares, plans, and schedules work shifts and assignments; observes, corrects, and instructs personnel in proper maintenance techniques and procedures; advises and assists repair personnel in solving complex maintenance problems; prepares technical and administrative records and reports. NOTE: May have progressed to 25G40 from either 25G20 or 25H20 (Radar Data Processing Equipment Repairman).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in basic electronics (including AC and DC circuits and use of test equipment), 3 in tube and transistor circuits, and 3 in digital circuits. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in basic electronics (including AC and DC circuits and use of test equipment), 3 in tube and transistor circuits, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in basic electronics (AC and DC circuits and use of test equipment), 3 in tube and transistor circuits, 3 in digital circuits, 3 in human relations, 3 in maintenance supervision, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-25H-001

RADAR DATA PROCESSING EQUIPMENT REPAIRMAN

25H20

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 25H was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 238 (Fire Distribution Systems Repair).

Description

Skill Level 20: Troublshoots, diagnoses malfunctions, and repairs radar data processing and associated mobile monitoring equipment, such as buffers, magnetic drum and memory read-write amplifiers, display generators, digilogs, cathode ray displays and associated circuitry, consoles, data links, sequencers, remote data controls, radar data information circuits, communications, and power supplies; uses block diagrams, schematics, wire run charts and electronic test equipment; modifies equipment to work order specifications; maintains tools, test equipment, air conditioners, and equipment vans; keeps maintenance records; requisitions parts and subassemblies.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electronics, 6 in mathematics and trigonometry, 3 in digital circuits, 3 in tube and transistor circuits, and additional credit in basic electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in technical mathematics, 3 in digital circuits, 3 in tube and transistor circuits, and additional credit in computer technology on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-25J-001

OPERATIONS CENTRAL REPAIRMAN (OC-CDG REPAIRMAN)

25J20

25J40

Exhibit Dates: 10/73–2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 238 (Fire Distribution Systems Repair).

Description

Summary: Supervises or performs support maintenance on operations central. *Skill Level 20:* Diagnoses malfunctions; locates defects; repairs and replaces components, including binary counter, relays, digital card assemblies, vacuum tubes, cathode ray tubes, summing network circuits, power supplies, and associated regulation circuits; performs inspections and conducts system tests; studies and interprets technical manuals, schematics and wiring diagrams; organizes troubleshooting and maintenance procedures. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises repair activities; observes, corrects, and instructs subordinates in proper maintenance functions with supported units; prepares records and reports.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 3 in direct current, 3 in alternating current, 6 in technical mathematics, 3 in tube and transistor circuits, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in direct current, 3 in alternating current, 6 in technical mathematics, 3 in tube and transistor circuits, and 3 in digital circuits. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in direct current, 3 in alternating current, 6 in technical mathematics, 3 in tube and transistor circuits, 3 in digital circuits, 3 in human relations, 3 in maintenance supervision, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-25J-002

OPERATIONS CENTRAL REPAIRER

25J10

25J20

25J30

25J40

Exhibit Dates: 3/78–8/83. (Effective 9/83, MOS 25J was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance, subfield 237 (Fire Distributing Systems Repair).

Description

Summary: Supervises and performs maintenance on operations central. *Skill Level*

10: Peforms full range of maintenance on operations central system; troubleshoots equipment and circuitry; diagnoses malfunctions and locates defects; repairs or replaces components including binary counters, relays, digital card assemblies, vacuum tube amplifiers, cathode ray tubes, circuits, power supplies, and associated regulation circuits; test-operates system; conducts functional and system test, utilizing common and special test equipment; uses technical material, block diagrams, schematics, and charts to organize troubleshooting procedures and techniques; traces and tests circuits for malfunctioning components using oscilloscopes, multimeters, tube testers, and digital element testers; disassembles and repairs chassis and assemblies replacing defective circuit elements; tests repaired chassis and assemblies to ensure proper operations; performs user maintenance on tools and test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs system electrical/electronic equipment modifications. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises duties of lower skill level personnel; observes, corrects, and instructs subordinates in proper maintenance techniques and procedures; prepares or supervises preparation of maintenance and administrative records and reports; advises and assists repair personnel on more difficult phases of maintenance. *Skill Level 40:* Able to perform the duties required for Skill Level 30; serves as senior instructor in a training facility.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 6 in applied mathematics, 3 in transistor circuits, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 3 in technical mathematics, 3 in computer mathematics, 3 in transistor circuits, and 3 in digital circuits (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 6 in applied mathematics, 3 in transistor circuits, and 3 in digital circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 3 in technical mathematics, 3 in computer mathematics, 3 in transistor circuits, and 3 in digital circuits (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 6 in applied mathematics, 3 in transistor circuits, 3 in digital circuits, 2 in maintenance management, and 3 in electronics shop practices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in AC theory, 3 in DC theory, 3 in technical mathematics, 3 in computer mathematics, 3 in transistor circuits, 3 in digital circuits, 3 in electronics shop practices, 2 in maintenance management, 2 in records and reports preparation, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel supervision, and 3 in industrial arts education (electronics) (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 30. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel supervision, 3 in industrial arts education (electronics), and 3 for a practicum in education (1/80).

MOS-25K-001

AN/TSQ-51 SYSTEM REPAIRMAN/
MAINTENANCE CHIEF
25K20
25K40
25K50

Exhibit Dates: 9/75-2/78. (Effective 9/80, MOS 25K was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 238 (Fire Distribution Systems Repair).

Description

Summary: Supervises or performs support maintenance on the Air Defense Command and Control System (AN/TSQ-51). *Skill Level 20:* Performs full range of maintenance on display consoles, display and signal generation equipment, radar integration and video processing equipment, and general-purpose computers; troubleshoots equipment circuitry; diagnoses malfunctions and locates defects; repairs or replaces components in system; test-operates system; studies and interprets technical material, diagrams, computer programs, and interconnection lists; modifies system and components. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance activities; schedules work shifts and assignments; provides technical guidance; prepares technical and administrative records and reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40 of MOS 25K, 25D (BIRDIE Repairman), 25G (Mobile ADCP Monitor Repairman), or 25J (Operations Central Repairman); supervises fire distribution system maintenance unit at brigade or comparable level; supervises tactical movements of mobile fire distribution system; coordinates installation of equipment; handles classified material; diagnoses and determines causes of unusual or recurrent malfunctions; prepares reports and makes recommendations for modification of components; serves as chief instructor in a training facility.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in direct current, 3 in alternating current, 3 in basic electronics, 3 in introduction to computer science, 3 in technical mathematics (including algebra and trigonometry), and additional credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in direct current, 3 in alternating current, 3 in basic electronics, 3 in introduction to computer science, 3 in technical mathematics (including algebra and trigonometry), and additional credit in electronics on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in direct current, 3 in alternating current, 3 in basic electronics, 3 in introduction to computer science, 3 in technical mathematics (including algebra and trigonometry), 3 in human relations, 3 in personnel supervision, 3 for field experience in management, 3 in industrial arts education (electronics), and additional credit in electronics on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics), 3 in introduction to management, 3 in maintenance management, 3 in human relations and 6 for field experience in management; if the duty assignment was maintenance chief, 3 additional semester hours in personnel management; if the duty assignment was chief instructor in a training facility, 3 additional semester hours for an internship in education. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-25L-001

AN/TSQ-73 AIR DEFENSE ARTILLERY
COMMAND AND CONTROL SYSTEM
OPERATOR/REPAIRER
25L10
25L20
25L30
25L40

Exhibit Dates: 9/77-Present.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 237 (Fire Distribution Systems Repair).

Description

Summary: Supervises, operates, and performs maintenance on Air Defense Command and Control System (AN/TSQ-73). *Skill Level 10:* Operates the command and control system in the collection, evaluation, and distribution of target data to air defense artillery fire units; operates general purpose target display systems and communication stations; monitors display status readouts to ensure correct target identification; although this skill level indicates primarily operator duties, maintenance skills are being developed; diagnostic procedures are, in general, limited to programmed diagnostic checks. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs full range of maintenance on display consoles, power supplies, communications equipment, general purpose computers, and peripheral devices; provides technical and operational assistance to skill level 10 personnel; removes and replaces faulty assemblies and circuit cards. *Skill Level 30:* Able to perform the duties required for Skill

Level 20; provides technical guidance to lower skill level personnel in accomplishment of duties; able to detect and replace defective individual components; supervises on-the-job training and all operation/repair activities of subordinate personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and inspects overall organizational maintenance of the air defense command and control system.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in basic electricity, and 3 in applied mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in technical mathematics, and additional credit in electronics and digital computer operations on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in applied mathematics, and 3 in electronic test procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in technical mathematics, and 3 in electronics test procedures, and additional credit in electronics and digital computer operations on the basis of institutional evaluation (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in applied mathematics, 3 in electronics test procedures, 2 in maintenance management, 3 in electronics shop practices, and 3 in introduction to computers. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in technical mathematics, 3 in electronics test procedures, 3 in introduction to computer science, 3 in electronics shop practices, 3 in personnel supervision, and 2 in maintenance management, and additional credit in electronics and digital computer operations on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel supervision (1/80).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in applied mathematics, 3 in electronics test procedures, 3 in maintenance management, 3 in electronics shop practices, and 3 in introduction to computers. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in basic electricity, 3 in technical mathematics, 3 in electronics test procedures, 3 in introduction to computer science, 3 in electronics shop practices, 3 in personnel supervision, and 3 in maintenance management, and additional credit in electronics and digital computer operations on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in personnel supervision, 3 in introduction to management, and 3 in human relations (1/80).

MOS-26B-001

Weapons Support Radar Repairman

26B20
26B30

Exhibit Dates: 10/73–2/78.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 262 (Ground Radar Repair).

Description

Summary: Performs maintenance on weapons support radar and associated equipment. *Skill Level 20:* Uses hand tools and test and measuring equipment to detect sources of malfunctions in weapons support radars; interprets schematic diagrams and technical material; replaces faulty components; adjusts operating radars and associated equipment for maximum performance. *Skill Level 30:* Able to perform the duties required for Skill Level 20; adjusts recorders, relays, controls, and power units; determines the extent of required maintenance; makes comparison checks of repaired equipment with test standards; keeps work logs; prepares supply requisitions.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and test equipment operation, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 30

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in AC and DC circuits and test equipment operation, 3 in tube and transistor circuits, and 3 in radar. In an electronic technican apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-26B-002

Weapons Support Radar Repairer

26B10
26B20

Exhibit Dates: 3/78–8/85. (Effective 9/85, MOS 26B was discontinued and its duties were incorporated into MOS 26C, Target Acquisition/Surveillance Radar Repairer.)

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Performs maintenance on weapons support radar, meteorological and associated equipment. *Skill Level 10:* Performs equipment serviceability criteria checks; maintains logs and records; replaces and repairs faulty components; uses hand tools and test measuring equipment to detect sources of malfunctions; interprets schematic diagrams and technical materials; adjusts operating radars, meteorological and associated equipment for maximum performance; tests, operates, and aligns repaired equipment to ensure operation conforms to standards. *Skill Level 20:* Able to perform the duties required for Skill Level 10; tests and adjusts recorders, relays, controls and power units; determines the extent of required maintenance; makes comparison checks of repaired equipment with test standards; keeps working logs; prepares supply requisitions.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 6 in AC/DC circuits, 3 in tube and transistor circuits, and 3 in radar (10/79).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 6 in AC/DC circuits, 3 in tube and transistor circuits, and 3 in radar (10/79).

MOS-26C-001

Combat Area Surveillance Radar Repairman

26C20

Exhibit Dates: 10/74-8/77.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 262 (Ground Radar Repair).

Description

Skill Level 20: Maintains ground surveillance and light air defense Doppler radars and associated equipment; uses voltmeters, ohmmeters, signal generators, oscilloscopes and other testing devices to localize and isolate source of malfunction; determines extent of required maintenance; replaces faulty components, including vacuum tubes,resistors, capacitors, and multivibrators; adjusts relays, dials, and controls; applies electrical theory to series and parallel circuitry motors and generators; interprets circuit diagrams, block diagrams, schematics, and technical manuals.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-26C-002

Combat Area Surveillance Radar Repairer

26C20

26C30

26C40

Exhibit Dates: 9/77-2/78.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 262 (Ground Radar Repair).

Description

Summary: Maintains ground surveillance equipment and light air defense pulse Doppler radars and associated equipment. *Skill Level 20:* Makes detailed tests through stages of equipment, using voltmeters, ohmmeters, signal generators, oscilloscopes, and other testing devices to localize and isolate source of malfunctions; replaces faulty components, including vacuum tubes, resistors, capacitors, and multivibrators; adjusts relays, dials, and controls, using common or specialized hand tools; maintains tools and test equipment with test standards; applies electrical theory to series and parallel circuitry, motors, and generators; applies servo, timing, and gating circuitry to light air-defense and ground surveillance radars; aligns radar transmitting and receiving chassis; interprets circuit diagrams, block diagrams, schematics and technical manuals; troubleshoots malfunctioning equipment by sectionalization and isolation of malfunction to individual components or associated group of components. *Skill Level 30:* Able to perform the duties required for Skill Level 20; checks maintenance performed by Skill Level 20 personnel for adequacy and suitability; inspects radar systems and components for wear, evidence of damage, and indications of breakdown; test-operates repaired nonintegrated radar and equipment with measuring devices, special tools, and test equipment; assists in diagnosis of complex malfunctions; ensures that completed repairs comply with prescribed standards; recognizes electronic countermeasures and interference problems. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises radar repair personnel engaged in maintenance of nonintegrated radar and associated equipment; organizes and supervises radar repair teams; plans, organizes, and supervises operations of a repair maintenance shop; establishes work priorities; supervises and assists in making complex authorized modifications on nonintegrated radar and associated equipment; interprets complex specification, circuit, schematic, and cable diagrams; determines technical operating difficulties and corrective actions necessary from oscilloscope wave analyses and signal training and schematic or circuit diagrams; conducts on-the-job training. NOTE: May have progressed to 26C40 from 26C20 or 26C30.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity, 3 in radar, 3 in applied mathematics, and 3 in use and care of tools and test equipment. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in radar, 3 in applied mathematics, and 3 in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, 6 semester hours in basic electricity, 3 in radar, 3 in applied mathematics, and 3 in use and care of tools and test equipment. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in radar, 3 in applied mathematics, and 3 in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in radar, 3 in applied mathematics, 3 in use and care of tools and test equipment, 3 in human relations, 3 in personnel supervision, and 3 in shop management (5/78).

MOS-26C-003

Combat Area Surveillance Radar Repairer

26C10

26C20

26C30

Exhibit Dates: 3/78-8/85.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Maintains ground surveillance equipment and light air-defense pulse Doppler radars and associated equipment. *Skill Level 10:* Makes detailed tests through stages of equipment, using voltmeters, ohmmeters, signal generators, oscilloscopes, and other testing devices to localize and isolate source of malfunctions; replaces faulty components, including vacuum tubes, resistors, capacitors, and multivibrators; adjusts relays, dials, and controls, using common or specialized hand tools; maintains tools and test equipment in operating condition; test-operates, aligns, and checks repaired equipment with test standards; applies electrical theory to series and parallel circuitry, motors, and generators; applies servo, timing, and gating circuitry to light air-defense and ground surveillance radars; aligns radar transmitting and receiving chassis; interprets circuit diagrams, block diagrams, schematics and technical manuals; troubleshoots malfunctioning equipment by sectionalization and isolation of malfunction to individual components or associated group of components. *Skill Level 20:* Able to perform the duties required for Skill Level 10; checks maintenance performed by Skill Level 10 personnel for adequacy and suitability; inspects radar systems and components for wear, evidence of damage, and indications of breakdown; test-operates repaired nonintegrated radar and equipment with measuring devices, special tools, and test equipment; assists in diagnosis of complex malfunctions; ensures that completed repairs comply with prescribed standards; recognizes electronic countermeasures and interference problems. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises radar repair personnel engaged in maintenance of nonintegrated radar and associated equipment; organizes and supervises radar repair teams; plans, organizes and supervises operations of repair maintenance shop; establishes work priorities; supervises and assists in making complex authorized modifications on nonintegrated radar and associated equipment; interprets complex specification, circuit, schematic, and cable diagrams; determines technical operating difficulties and corrective actions necessary from oscilloscope wave analyses and signal tracing on schematic or circuit diagrams; conducts on-the-job training. NOTE: May have progressed to 26C30 from 26C20 or 26B20 (Weapons Support Radar Repairer).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuits, 3 in AC laboratory practices, 3 in very high frequency (VHF) techniques, and 6 in troubleshooting techniques (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in DC circuits, 3 in AC laboratory practices, 3 in very high frequency (VHF) techniques, and 6 in troubleshooting techniques. In the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuits, 3 in AC laboratory practices, 3 in very high frequency (VHF) techniques, and 6 in troubleshooting techniques (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuits, 3 in AC laboratory practices, 3 in very high frequency (VHF) techniques, 6 in troubleshooting techniques, and 3 in personnel supervision (10/79).

MOS-26C-004

TARGET ACQUISITION/SURVEILLANCE RADAR REPAIRER
(COMBAT AREA SURVEILLANCE RADAR REPAIRER)

26C10

26C20

26C30

Exhibit Dates: 9/85–9/87. (MOS 26C has been redesignated MOS 39C; see exhibit MOS-39C-001.)

Career Management Field: 29 (Communications Electronics).

Description

Summary: Performs or supervises maintenance on target acquisition and ground level surveillance radar and associated equipment, and on meteorological equipment. *Skill Level 10:* Performs maintenance on target acquisition/surveillance, and meteorological radar and associated equipment; utilizes test equipment such as multimeters, oscillscopes, voltmeters, ohmmeters, signal generators and other testing and measuring devices; refers to technical manuals and circuit diagrams for diagnostic repair procedures; replaces faulty modules and/or components. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance and limited supervision to Skill Level 10 personnel involved in repair and maintenance of radar equipment; maintains maintenance logs; writes reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises the performance of lower skill level personnel; schedules and distributes workloads; provides assistance in diagnosing unusual and complex malfunctions.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in circuit diagnosis and 3 in radar maintenance and repair (11/85).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in circuit diagnosis, 3 in radar maintenance and repair, 3 in recordkeeping, and 1 in personnel supervision (11/85).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in circuit diagnosis, 3 in radar maintenance and repair, 3 in recordkeeping, 3 in personnel supervision, and 3 in office management (11/85).

MOS-26D-001

GROUND CONTROL APPROACH RADAR REPAIRMAN

26D20

Exhibit Dates: 10/73–8/77.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 262 (Ground Radar Repair).

Description

Skill Level 20: Inspects, tests, and repairs ground control radar equipment at field and depot level; utilizes test equipment such as multimeters, electronic voltmeters, oscilloscopes, signal generators, echo boxes, and other test equipment to troubleshoot radar systems to the component level; replaces faulty components, including vacuum tubes, transistors, resistors, and capacitors; adjusts relays, dials, and controls; adjusts and aligns equipment to specified performance levels; interprets circuit diagrams, block diagrams, schematics, and technical manuals.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-26D-002

GROUND CONTROL APPROACH RADAR REPAIRER

26D10

26D20

26D30

Exhibit Dates: 9/77–2/86. (Effective 3/86, MOS 26D was discontinued and its duties were incorporated into MOS 93D, Air Traffic Control Systems, Subsystems and Equipment Repairer.)

Career Management Field: 28 (Aviation Communications-Electronics).

Description

Summary: Maintains ground control approach radar system and associated equipment. *Skill Level 10:* Localizes and diagnoses causes of equipment malfunction or nonfunction; tests and aligns equipment to ensure maximum efficiency; replaces faulty components and parts; performs adjustments after installation. *Skill Level 20:* Able to perform the duties required for Skill Level 10; maintains equipment records; makes detailed tests through stages of malfunctioning equipment, using voltmeters, ohmmeters, echo boxes, signal generators, and other testing devices; determines the cause of malfunction and extent of maintenance; adjusts relays, dials, and controls; test-operates, aligns, and performs comparison checks on repaired equipment with test standards; performs modification work orders; keeps tools and test equipment in operating condition. *Skill Level 30:* Able to perform the duties required for Skill Level 20; keeps work logs; prepares supply requisitions; aligns radar transmitting and receiving chassis; installs ground control approach radar systems; uses sectionalization, localization, and isolation of malfunction in troubleshooting; repairs faulty components; uses safety precautions when working around high voltages; authorizes acquisitions of spare parts, supply stock, and technical literature.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in applied mathematics, and 3 in radar (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity, 3 in applied mathematics, 3 in radar, and 3 in use and care of tools and test equipment. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in applied mathematics, 3 in radar, and 3 in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in applied mathematics, 3 in radar, 3 in use and care of tools and test equipment, 1 for field experience in management, and additional credit in basic electricity and radar on the basis of institutional evaluation (5/78).

MOS-26E-001

AERIAL SURVEILLANCE SENSOR REPAIRER

26E10

26E20

26E30

Exhibit Dates: 9/77–2/82.

Career Management Field: 28 (Aviation Communication-Electronics).

Description

Summary: Maintains aerial surveillance systems employed in the OV-1D (MOHAWK) aircraft, associated data link, and ground receiving and processing components. *Skill Level 10:* Tests, troubleshoots, aligns, and repairs equipment using conventional and special purpose electronic testing and diagnostic equipment and handtools; maintains conventional and special purpose test equipment; employs special handling techniques for delicate and touch-sensitive devices such as photo lenses, optic reflectors, exposure, and processing devices; reads and analyzes electrical/electronic block/detailed schematic diagrams; reads and analyzes mechanical assembly diagrams; maintains technical reference library on aerial surveillance system. *Skill Level 20:* Able to perform the duties required for Skill Level 10; modifies and records aerial surveillance modifications in accordance with modification work orders; maintains maintenance forms and records; requisitions parts and supplies; maintains selected items of special purpose test equipment; provides assistance to Skill Level 10 personnel in diagnoses of complex maintenance problems. *Skill Level 30:* Able to perform the duties required for Skill Level 20; ensures that proper parts and supply inventories are maintained; supervises personnel engaged in the maintenance of aerial surveillance equipment.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity, 3 in shop mathematics, and 3 in use and care of tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in technical mathematics, 3 in basic instrumentation, and 3 in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic electricity, 3 in shop mathematics, and 3 in use and care of tools and test equipment. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in technical mathematics, 3 in basic instrumentation, and 3 in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for

Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity, 3 in technical mathematics, 3 in basic instrumentation, 3 in use and care of tools and test equipment, and 1 in personnel supervision (5/78).

MOS-26E-002

Aerial Radar Sensor Repairer

26E10

26E20

26E30

Exhibit Dates: 3/82-2/87. (Effective 3/87, MOS 26E was discontinued and its functions were incorporated into MOS 33V, Electronic Warfare/Intercept Aerial Sensor Repairer.)

Career Management Field: 28 (Aviation Communications-Electronics Systems Maintenance).

Description

Summary: Supervises and performs unit support, intermediate support, and component level maintenance on aerial radar surveillance sensor systems installed in OV-1D (Mohawk) aircraft, associated data link, and ground-receiving components. *Skill Level 10:* Maintains and repairs aerial radar surveillance sensor systems, including all associated data link, data annotation, and ground-receiving terminals; performs testing, troubleshooting, alignment, and repair; isolates and replaces malfunctioning equipment using a wide variety of conventional and special purpose electronic test equipment, technical literature, and hand tools; prepares work request forms; posts maintenance and inspection entries; assists in maintenance of current technical reference library; requisitions parts and supplies. *Skill Level 20:* Able to perform the duties required for Skill Level 10; maintains and repairs selected items of special purpose test equipment used in a radar sensor equipment maintenance section. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises, plans, and coordinates unit malfunction diagnostic and repair functions to ensure compliance with established standards; supervises five or more persons; conducts on-the-job training; maintains repair parts, stockage levels, forms, records and technical references.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 3 in basic AC/DC laboratory, and 3 in electronic circuits and systems analysis (10/84).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 6 in basic AC/DC laboratory, and 6 in electronic circuits and systems analysis (10/84).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 6 in basic AC/DC laboratory, 6 in electronic circuits and systems analysis, and 3 in personnel supervision (10/84).

MOS-26F-001

Aerial Photoactive Sensor Repairer

26F10

26F20

Exhibit Dates: 3/82-3/87. (Effective 3/87, MOS 26F was discontinued and its functions were incorporated into MOS 33V, Electronic Warfare/Intercept Aerial Sensor Repairer.)

Career Management Field: 28 (Aviation Communications-Electronics Systems Maintenance).

Description

Summary: Supervises and performs unit support, intermediate support, and component level maintenance on aerial photoactive surveillance sensor systems installed in OV-1D (Mohawk) aircraft. *Skill Level 10:* Diagnoses and repairs faulty sensor equipment, employing special techniques for delicate and costly devices such as photolenses, optic reflectors, film exposure devices, and integrated microcircuit card; uses standard system troubleshooting, calibration, and alignment procedures, requiring ability to analyze detailed electronic schematic diagrams, mechanical assembly diagrams, and applicable technical literature; maintains records, orders parts, and prepares work request forms. *Skill Level 20:* Able to perform the duties required for Skill Level 10; maintains and repairs selected items of special purpose test equipment and provides technical supervision to lower skill level personnel.

Recommendation, Skill Level 10

In the vocational certificate category, 8 semester hours in operation and repair of photographic processing machines and camera systems. In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 3 in electrical circuits and systems analysis, and 3 in basic photography (10/84).

Recommendation, Skill Level 20

In the vocational certificate category, 8 semester hours in operation and repair of photographic processing machines and camera systems, and 3 in maintenance and repair of small appliances and optical devices. In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 3 in electrical circuits and systems analysis, and 3 in basic photography (10/84).

MOS-26H-001

Air Defense Radar Repairman

26H20

26H30

Exhibit Dates: 10/73-2/78.

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Performs maintenance on air defense radars and associated equipment, including height, azimuth, and distance finding radars, servo, data transmission systems, and computers. *Skill Level 20:* Keeps tools and test equipment in operating condition; makes detailed tests of operating stages of the equipment, using the voltmeter, ohmmeter, echo box, signal generator, and oscilloscope; determines causes of malfunctions and replaces faulty components; test-operates, aligns, and comparison-checks repaired equipment with test standards; performs modification work orders; interprets circuit diagrams, schematics, and technical manuals; troubleshoots by sectionalization, localization, and isolation; performs servo, timing, and gating circuitry analysis. *Skill Level 30:* Able to perform the duties required for Skill Level 20; maintains specialized air defense radars.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in technical mathematics, 3 in basic electronics, 1 in shop practices, and 1 in use and care of tools and test equipment, and additional credit in advanced electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, and 1 in transistor/tube theory, and additional credit in computer science on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in technical mathematics, 3 in basic electronics, 1 in shop practices, and 1 in use and care of tools and test equipment, and additonal credit in advanced electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in radar/microwave theory, 2 in DC circuit analysis, 2 in AC circuit analysis, 1 in electronic instruments, and 1 in transistor/tube theory, and additional credit in computer science on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (electronics). In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-26H-002

Air Defense Radar Repairer

26H10

26H20

26H30

Exhibit Dates: 3/78-3/90. (Effective 3/90, MOS 26H was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 231 (Nike Missile System Repair).

Description

Summary: Supervises or performs maintenance and repairs on air defense radars and associated equipment, including height, azimuth, and distance-finding radars, servo, data transmission systems, and computer. *Skill Level 10:* Performs highly complex repairs on solid-state, integrated circuit, and vacuum tube radar and associated equipment; provides repair support and advice for various radar maintenance groups; uses advanced as well as basic electronics and schematic tracing to troubleshoot systems, and subassemblies down to the component level; performs certain mathematical calculations during routine calibration or alignment procedures; uses common and advanced industrial type test equipment as well as specialized test sets to diagnose system and subassembly failures; uses common and specialized test sets to diagnose system and subassembly failures; uses common and specialized hand tools to perform repairs, adjustment, or modifications on radar or associated equipment; may train maintenance and operator personnel on the proper handling or maintenance of specified radar equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; updates knowledge of advanced modifications being performed on existing radar equipment through on-the-job training or by attending workshops. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; assigns duties; manages maintenance schedules, inspections, and quality control; supervises inspection and maintenance teams; conducts on-the-job training; keeps maintenance records.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electronics, 3 in electronic control devices, 3 in radar/microwave technology, 2 in technical mathematics, 1 in electronic instruments, and 1 in digital circuitry. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in radar/microwave technology, and 1 in digital circuitry. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering) and 3 in a radar/microwave technical elective (1/80).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 3 in electronic control devices, 3 in radar/microwave technology, 3 in digital circuitry, 2 in technical mathematics, and 3 in electronics instruments. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in radar/microwave technology, 1 in digital circuitry, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), and 3 in a radar/microwave technical elective (1/80).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electronics, 3 in electronic control devices, 3 in radar/microwave technology, 3 in digital circuitry, 2 in technical mathematics, 3 in electronic instruments, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in radar/microwave technology, 1 in digital circuitry, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in an electronics technical elective (non-engineering), 3 in a radar/microwave technical elective, and 3 for field experience in personnel supervision (1/80).

MOS-26K-001

ELECTRONIC WARFARE EQUIPMENT REPAIRMAN

26K20
26K40

Exhibit Dates: 10/73–8/77.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 263 (Airborne Surveillance Equipment Radar).

Description

Summary: Performs field and depot maintenance on electronic systems used for countermeasures and warfare support. *Skill Level 20:* Uses test equipment such as multimeters, electronic voltmeters, oscilloscopes, signal generators, and other electronic test equipment to troubleshoot electronic equipment to the component level; determines if equipment meets original specifications after repair; dismantles and repairs circuit wiring; replaces parts, including vacuum tubes, transistors, resistors, capacitors, and printed circuit cards; adjusts relays, dials, and controls; performs maintenance on electrical generators, amplydines, and selsyn motors; interprets complex circuit diagrams. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises personnel by scheduling work assignments and loads, evaluating personnel performance, preparing technical and administrative reports.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, and 3 in tube and transistor circuits. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, and 3 in tube and transistor circuits. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, 3 in maintenance supervision, 3 in human relations, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-26K-002

AERIAL ELECTRONIC WARNING DEFENSE EQUIPMENT REPAIRER

26K10
26K20
26K30

Exhibit Dates: 9/77–2/87. (Effective 3/87, MOS 26K was discontinued and its functions were incorporated into MOS 35R, Avionic Special Equipment Repairer and MOS 35P, Avionic Equipment Maintenance Supervisor.)

Career Management Field: 28 (Aviation Communications-Electronics Systems Maintenance).

Description

Summary: Supervises and peforms unit support, intermediate support, and component level maintenance on aerial electronic warning defense and associated equipment. *Skill Level 10:* Performs maintenance on aerial warning defense equipment; applies theory and systems analysis in isolating faulty circuits and components; repairs, removes, and replaces defective assemblies, sub-assemblies, and component parts; test-operates optical/laser and digital control systems, infrared countermeasure equipment, automatic and semi-automatic radar warning receivers and special high power transmitters, using technical publications and special test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; prepares reports on supportive equipment; performs maintenance quality control checks and performs final checks of repaired equipment; requisitions supplies and repair parts. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises personnel and provides technical assistance; maintains records and stockage levels; maintains reports and records on repaired equipment.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 12 semster hours in basic electricity/electronics, 3 in AC/DC laboratory, and 3 in electronic circuits and systems analysis (10/84).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 6 in AC/DC laboratory, and 6 in electronic circuits and systems analysis (10/84).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 12 semester hours in basic electricity/electronics, 6 in AC/DC laboratory, 6 in electronic circuits and systems analysis, and 3 in personnel supervision (10/84).

MOS-26L-001

TACTICAL MICROWAVE SYSTEMS REPAIRMAN

26L10
26L20
26L40

Exhibit Dates: 10/73–2/78.

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 312 (Tactical Electronics Maintenance).

Description

Summary: Performs installations, operational adjustments, and maintenance of line-of-sight microwave and troposcatter radio and multiplexing equipment, and related power equipment; applies common basic electronics theory and schematic-reading skills in interpreting circuit functions and specifications; uses common and specialized tools and multimeters in performing operational checks and in diagnosing troubles in microwave equipment; performs preventive maintenance of equipment; adjusts, lubricates, and cleans electrical and mechanical components; applies safety precautions when working around high voltages and performs emergency action in the event of injury; prepares and keeps records for prescribed equipment load lists. *Skill Level 10:* Installs and operates tactical line-of-sight microwave and troposcatter radio and multiplexing equipment and related power equipment; performs operational tests on equipment; follows safety measures and provides first aid when necessary; uses tools and multimeters in performing preventive maintenance procedures. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs complex maintenance of tactical microwave radio equipment; uses specified tools and test instruments in diagnosing and repairing equipment; prepares and keeps maintenance and operational logs and records. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises installation, operation, and maintenance of tactical microwave communications sytems; prepares technical and administrative reports; supervises, coordinates, or conducts training programs; normally supervises 5-8 persons.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in basic AC/DC electronics theory and laboratory, 6 in radio frequency circuit systems and functions, 2 in microwave communications, 1 in high frequency amplifier circuits and devices, 1 in elementary algebra, and 1 in safety and first aid. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, and 1 in safety and first aid. In the upper-division baccalaureate category, 3 semester hours for a technical elective and 3 in industrial arts. In an electronic technician or communications technician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (3/76).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in basic AC/DC electronics theory and laboratory, 6 in radio frequency circuit systems and functions, 2 in microwave communications, 1 in high frequency amplifier circuits and devices, 1 in elementary algebra, and 1 in safety and first aid. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, and 1 in safety and first aid. In the upper-division baccalaureate category, 3 semester hours for a technical elective and 3 in industrial arts. In an electronic technician or communications technician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 10. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, 1 in safety and first aid, 3 in introduction to management, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for a technical elective, 3 in industrial arts, and 3 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Levels 10 and 20 because additional skills are administrative and supervisory in nature (3/76).

MOS-26L-002

TACTICAL MICROWAVE SYSTEMS REPAIRER

26L10
26L20
26L30
26L40

Exhibit Dates: 3/78–3/86. (Effective 3/86, MOS 26L was discontinued and its functions were incorporated into MOS 29M, Tactical Satellite Microwave Repairer, and MOS 32Z, Communication-Electronics Maintenance Chief.)

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Supervises or performs installation, operational adjustment, repair and maintenance of microwave and communication radio, multiplex systems, and related power equipment. *Skill Level 10:* Installs and operates line-of-sight microwave and communication radio, multiplexing equipment, and power supply equipment; applies basic electronic theory and schematic-reading skills for circuit functions and specifications; uses specialized tools, mulitmeters, and oscilloscopes; aligns and adjusts klystrons, magnetrons, and traveling wave tubes; repairs, reassembles, and tests components; computes voltage, amperage, and resistance factors; diagnoses and repairs multiplexing and pulse code modulation equipment; performs operational tests on equipment; aligns and adjusts equipment; adjusts high power amplifier, parametric amplifiers, and receivers; repairs circuit wiring; reassembles, replaces and test-operates components; establishes and maintains records of equipment repair; applies safety precautions when working with high voltage and performs emergency action in the event of injury. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; ensures that proper procedures are followed in maintenance and repair; requisitions and maintains spare parts. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises the installation and maintenance of microwave communications radio systems and multiplex equipment; prepares schedules and work assignments; ensures that proper maintenance procedures are followed; assists in preparation of radio system profile charts and maintenance plans. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises installation and maintenance of microwave communications radio systems and multiplex equipment; supervises eight or more persons in a shop or section engaged in operation or maintenance functions; coordinates installation of new or replacement equipment; supervises training programs; prepares radio frequency charts and communications systems diagrams; evaluates the efficiency and capability of lower skill level personnel.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in AC/DC electronic theory and laboratory, 6 in radio frequency circuit systems and functions, 2 in microwave communications, 1 in high frequency amplifier circuits and devices, 1 in industrial safety procedures, and 1 in elementary algebra. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, and 1 in safety and first aid (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in AC/DC electronic theory and laboratory, 6 in radio frequency circuit systems and functions, 2 in microwave communications, 1 in high frequency amplifier circuits and devices, 1 in industrial safety procedures, and 1 in elementary algebra. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, and 1 in safety and first aid (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, 1 in safety and first aid, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in personnel administration (10/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 6 in radio/microwave communications, 1 in safety and first aid, 2 in personnel supervision, 2 in human relations, and 2 in introduction to management. In the upper-division baccalaureate category, 2 semester hours in personnel administration, 3 in industrial arts, 3 in technical electronics, and 3 for field experience in management (10/79).

MOS-26M-001

AIRBORNE SURVEILLANCE RADAR REPAIRMAN

26M20
26M40

Exhibit Dates: 10/73–8/77.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 263 (Airborne Surveillance Equipment Repair).

Description

Summary: Supervises, inspects, and performs support and depot maintenance on airborne surveillance radar systems and associated ground equipment. *Skill Level 20:* Performs support and depot maintenance on side-looking maintenance airborne radar systems (including the airborne surveillance radar, radar data transmitting set, radar data receiving set, and data transfer system alignment); inspects, tests, and repairs malfunctioning equipment by using voltmeters, ohmmeters, signal generators, and oscilloscopes; adjusts, calibrates, and aligns equipment to manufacturers specifications; performs authorized modifications and advises maintenance personnel on changes in operation and maintenance requirements due to equipment modification; prepares appropriate maintenance and supply forms and reports; keeps tools and test equipment in proper operating condition and accurately calibrated. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance activities and technician training functions. NOTE: May have progressed to 26M40 from 26M20 or 41G20 (Surveillance Photographic Equipment Repairman).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associ-

ate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, 3 in radar, and additional credit in digital electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, 3 in radar, 3 in human relations, 3 in maintenance supervision, 3 for field experience in management, and additional credit in digital electronics, algebra, and triognometry on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-26M-002

AERIAL SURVEILLANCE RADAR REPAIRER

26M10
26M20
26M30

Exhibit Dates: 9/77–9/84.

Career Management Field: 16 (Air Defense Artillery).

Description

Effective 9/77, MOS 26M was discontinued for use in the active Army and retained for use in the Reserve Forces only; effective 9/84, MOS 26M was discontinued and its functions were incorporated into MOS 26E, Aerial Radar Sensor Repairer.

Recommendation

Credit may be granted on the basis of institutional evaluation.

MOS-26N-001

SURVEILLANCE INFRARED REPAIRMAN

26N20

Exhibit Dates: 10/73–8/77.

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 263 (Airborne Surveillance Equipment Repair).

Description

Skill Level 20: Performs support and depot maintenance of infrared surveillance systems; locates and determines causes of malfunctions by circuit diagrams and specialized testing; repairs, modifies, and aligns by using test equipment and specialized hand tools; provides technical assistance; performs administrative duties including requisitioning, stocking, and filing of repair parts and supplies.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radio. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-26N-002

AERIAL SURVEILLANCE INFRARED REPAIRER

26N10
26N20

Exhibit Dates: 9/77–9/84.

Career Management Field: 28 (Aviation Communications-Electronics Systems Maintenance).

Description

Effective 9/77, MOS 26N was discontinued for use in the active Army and retained for use in the Reserve Forces only; effective 9/84, MOS 26N was discontinued and its functions were incorporated into MOS 26E, Aerial Radar Sensor Repairer, and MOS 26F, Aerial Photoactive Sensor Repairer.

Recommendation

Credit is recommended on the basis of institutional evaluation.

MOS-26P-001

RADIO PROPAGATION SPECIALIST

26P20
26P40
26P50

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 26P was discontinued and its functions were incorporated into MOS 32H, Fixed Station Radio Repairer, and MOS 32Z, Communications Electronics Maintenance Chief.)

Career Management Field: 32 (Fixed Plant Communications Maintenance).

Description

Summary: Performs inspections and maintenance on specialized electromagnetic equipment. *Skill Level 20:* Installs, operates, maintains, and repairs radio propagation equipment; locates malfunctions of major components; adjusts equipment, using standardized and specialized meters and oscilloscopes; interprets circuit diagrams, schematic diagrams, and technical literature pertaining to operation and maintenance of ionosonde, field intensity, radio noise measuring, and associated equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; performs routine management functions of a radio propagation station; supervises ionosphere recording operations and associated radio propagation tests and analysis activites; supervises installation of equipment; may write specifications for equipment and technical reports; prepares work schedules and operating procedures; demonstrates correct maintenance and operating procedures; keeps work logs; prepares supply requisitions; prepares and consolidates technical and administrative reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40; organizes and directs survey teams; plans and controls maintenance of facility equipment and physical plant; diagnoses and determines causes of unusual malfunctions; evaluates test equipment; determines tool requirements; provides technical assistance and on-the-job training for subordinate personnel.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in electronics and 2 in technical mathematics. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics and 2 in technical mathematics. In an electronics technician (communications) apprentice training program, 500 clock hours of experience and 60 contact hours of related instruction (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics, 3 in personnel supervision, 3 in human relations, and 2 in technical mathematics. In an electronics technician (communications) apprentice training program, 500 clock hours of experience and 60 contact hours of related instruction (6/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in introduction to management, and 3 in maintenance management. In an electronics technician (communications) apprentice training program, 500 clock hours of experience and 60 contact hours of related instruction (6/76).

MOS-26Q-001

TACTICAL SATELLITE/MICROWAVE SYSTEMS OPERATOR

26Q10
26Q20
26Q30
26Q40

Exhibit Dates: 3/78–9/87. (Effective 9/87, MOS 26Q was discontinued and its duties were incorporated into MOS 31Q, Tactical Satellite/Microwave Systems Operator and MOS 31Y, Communications System Supervisor.)

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Supervises or performs installation, operation and maintenance of microwave, troposcatter radio, satellite, multiplexing equipment and communications security equipment. *Skill Level 10:* Installs, operates and maintains microwave, troposcatter radio satellite, multiplexing equipment and associated power equipment and communications security devices; assembles, erects, and orients antennas; tunes, adjusts and aligns equipment for maximum performance; adjusts multiplexing equipment for maximum efficiency; operates on voice frequency and teletype; performs satellite balancing procedures; employs test equipment and tools such as spectrum analyzers and voltmeters; corrects operational troubles; detects electronic countermeasures; interprets military maps and traffic diagrams;

applies safety precautions around high voltages and performs emergency actions in event of injury. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists in selection of site for systems equipment; makes alignment adjustments to maximum efficiency; monitors operations of system equipment; recognizes electronic countermeasures and employs corrective action; maintains station logs and provides technical guidance to subordinate personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises installation and performance of station equipment and personnel; instructs in proper operating procedures; maintains logs and records; prepares administrative and technical reports; requisitions supplies; provides assistance in complex or unusual operational problems; supervises and evaluates 5 or more personnel. *Skill Level 40:* Able to perform the duties required for Skill Level 30; coordinates maintenance support; assists in the planning, utilization, operation, and maintenance support for communications systems; supervises up to 20 persons.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in AC/DC electronics theory, 3 in microwave and radio frequency communications, 1 in high-frequency amplifier and multiplex operations, and 1 in industrial safety procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in microwave/radio communications, and 1 in safety and first aid (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in AC/DC electronics theory, 3 in microwave and radio frequency communications, 1 in high-frequency amplifier and multiplex operations, and 1 in industrial safety procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in microwave/radio communications, and 1 in safety and first aid (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in microwave/radio communications, 1 in safety and first aid, and 2 personnel supervision. In the upper-division baccalaureate category, 2 semester hours in personnel administration (10/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in microwave/radio communications, 1 in safety and first aid, 2 in personnel supervision, and 2 in introduction to management. In the upper-division baccalaureate category, 2 semester hours in personnel administration and 3 for field experience in management (10/79).

MOS-26R-001

STRATEGIC SATELLITE/MICROWAVE SYSTEM OPERATOR

26R10
26R20
26R30

Exhibit Dates: 3/78–2/86. (Effective 3/86, MOS 26R was discontinued and its duties were incorporated into MOS 26V, Strategic Microwave Systems Repairer.)

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Operates strategic microwave, troposcatter radio, and multiplexing equipment. *Skill Level 10:* Positions, prepares, starts, and adjusts power units; makes preoperative equipment checks; adjusts equipment for desired frequency operation; tunes, adjusts, and aligns receiving and transmitting equipment; establishes and posts station logs; utilizes hand tools and test equipment; operates voice frequency and teletype order wires; maintains equipment logs and records. *Skill Level 20:* Able to perform the duties required for Skill Level 10; applies accepted standards, policies, and reporting procedures in the operation of communications systems; coordinates the operation of the communications system; provides assistance to lower-skill-level personnel; makes administrative and technical reports as required; monitors operation of communications systems equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; prepares work assignments and schedules; requisitions supplies; demonstrates proper operating procedures and techniques to lower-skill-level personnel.

Recommendation, Skill Level 10

Credit is not recommended because of the limited technical nature of the skills, competencies, and knowledge (10/81).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing (10/81).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in technical report writing. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing and 3 in personnel supervision (10/81).

MOS-26T-001

TELEVISION EQUIPMENT REPAIRMAN

26T20
26T30
26T40
26T50

Exhibit Dates: 10/73–2/77.

Career Management Field: 72 (Telecommunications and Audio-Visual), subfield 722 (Audio-Visual).

Description

Summary: Installs, operates, and repairs monochrome and color television receivers, monochrome and color camera chains and film chains, video tape equipment, television transmitting equipment, and television microwave relay systems. *Skill Level 20:* Installs and operates television receivers, cameras, and tape equipment; locates malfunctions of major components; adjusts equipment for proper performance; uses common test equipment such as VOM and oscilloscope; keeps transmitter logs; reads schematic diagrams and wiring diagrams. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assures video quality and is capable of diagnosing substandard video transmission; is familiar with equipment capabilities and limitations. *Skill Level 40:* Able to perform the duties required for Skill Level 30; knows equipment operating parameters; supervises repair and testing of equipment; assists in writing specifications for equipment purchases; increases proficiency beyond Skill Level 30 in diagnosing malfunctions from schematic diagrams; supervises 5 to 29 personnel. *Skill Level 50:* Able to perform the duties required for Skill Level 40; prepares maintenance schedules; evaluates test equipment and tool requirements; supervises equipment modifications; provides technical assistance for maintenance and repair; supervises 30 or more persons; provides on-the-job training.

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in television equipment (closed circuit and cable TV) repair and additional credit on the basis of institutional evaluation. In a television broadcast engineer or a television repairman apprentice training program, 400 clock hours of experience and 50 contact hours of related instruction (2/75).

Recommendation, Skill Level 30

In the vocational certificate category, 9 semester hours in television equipment (closed circuit and cable TV) repair and additional credit on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in television equipment repair. In a television broadcast engineer or a television repairman apprentice training program, 800 clock hours of experience and 100 contact hours of related instruction (2/75).

Recommendation, Skill Level 40

In the vocational certificate category, 9 semester hours in television equipment (closed circuit and cable TV) repair and additional credit on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in television equipment repair and 3 for a practicum in personnel management. In a television broadcast engineer or television repairman apprentice training program, 1,200 clock hours of experience and 150 contact hours of related instruction. NOTE: At this level in civilian television broadcast service, a first-class FCC operators license is mandatory; the skills and knowledge required to pass the FCC license examination are broader in scope than those required for the performance of this MOS (2/75).

Recommendation, Skill Level 50

In the vocational certificate category, 9 semester hours in television equipment (closed circuit and cable TV) repair and additional credit on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in television equipment repair and 3 for a practicum in personnel management. In the upper-division baccalaureate category, 3 semester hours in maintenance management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 40 because additional skills are administrative and supervisory in nature (2/75).

MOS-26T-002

RADIO/TELEVISION SYSTEMS SPECIALIST

26T10
26T20
26T30

Exhibit Dates: 3/77–9/89. (Effective 9/89, MOS 26T was discontinued and its functions were incorporated into MOS 25R, Visual Information/Audio Equipment Repairer.)

Career Management Field: 84 (Public Affairs and Audio-Visual).

Description

Summary: Installs, operates, and repairs monochrome and color television receivers, monochrome and color camera chains and film chains, video tape equipment, television transmitting equipment, and television microwave relay systems. *Skill Level 10:* Under supervision, installs and operates television receivers, cameras, and tape equipment; locates malfunctions of major components; adjusts equipment for proper performance; uses common test equipment such as VOM and oscilloscope; uses common and specialized hand tools and measuring devices; reads schematic diagrams and wiring diagrams; keeps transmitter logs. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises personnel performing the duties of MOS 26T20 or MOS 41E20, Audio Visual Equipment Repairer; assures video quality on all display devices associated with originating or recording equipment; diagnoses substandard video transmission; supervises up to 7 persons; supervises personnel engaged in setting up and aligning cameras, camera control, special effects, and associated transmission equipment; checks the repair work of lower skill level personnel; establishes work schedules. NOTE: May have progressed to 26T30 from 26T20 or 41E20, Audio-Visual Equipment Repairman.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in television equipment repair, 3 in use and care of tools and test equipment, and credit in basic electronics and troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, and credit in television equipment repair, technical aspects of television, troubleshooting techniques, and basic electronics on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in television equipment repair, 3 in use and care of tools and test equipment, and 3 in troubleshooting techniques, and credit in basic electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in television equipment repair, 3 in technical aspects of television, 3 in troubleshooting techniques, and credit in basic electronics on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, 9 semester hours in television equipment repair, 3 in use and care of tools and test equipment, and 3 in troubleshooting techniques, and credit in basic electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in television equipment repair, 3 in technical aspects of television, 3 in troubleshooting techniques, 1 in personnel supervision, and credit in basic electronics and human relations on the basis of institutional evaluation (5/78).

MOS-26U-001

UNATTENDED GROUND SENSOR SYSTEMS
REPAIRMAN

26U20
26U40

Exhibit Dates: 10/73-8/76. (Effective 9/76, MOS 26U was discontinued and its functions were incorporated into MOS 17K, Ground Surveillance Radar Crewman, and MOS 17M, Unattended Ground Sensor Specialist.)

Career Management Field: 17 (Combat Surveillance and Target Acquisition), subfield 171 (Combat Surveillance).

Description

Summary: Supervises and performs maintenance on the unattended ground sensor systems. *Skill Level 20:* Diagnoses and repairs electronic sensors; operates test equipment in automatic, semiautomatic, and manual modes; determines faults in the data transmission, relay, receiver, recorder/display assemblies, sensor module construction, and associated equipment; removes, repairs, and replaces malfunctioning assemblies, subassemblies, modules, and/or component parts; checks out radio frequency channel and unique digital or analog message format of sensor; aligns, adjusts, and repairs equipment; modifies systems; interprets electronic circuit diagrams; applies safety precautions. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises maintenance of the unattended ground sensor systems; organizes units; instructs operator personnel; keeps equipment records and prepares reports; diagnoses and determines causes of unusual malfunctions.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in introductory electronics and 3 in equipment repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics and 3 in equipment repair. Fully qualified to enter an apprentice training program in the electrical and electronic trades (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in equipment repair, 3 in human relations, 3 for field experience in management, and additional credit in technical writing on the basis of institutional evaluation; if the duty assignment was platoon sergeant, 3 additional semester hours in personnel supervision. Fully qualified to enter an apprentice training program in the electrical and electronics trades (3/76).

MOS-26V-001

STRATEGIC MICROWAVE SYSTEMS
REPAIRMAN

26V10
26V20
26V40
26V50

Exhibit Dates: 10/73-2/78.

Career Management Field: 32 (Fixed Plant Communications Maintenance).

Description

Summary: Installs, maintains, and operates line-of-sight and tropospheric scatter microwave communications equipment; wires and connects equipment for installation; makes performance tests on operating equipment, using only one type of equipment for testing. *Skill Level 10:* Knows terminology and can read simple wiring diagrams; uses manuals to interpret meter reading to determine equipment condition; under supervision, operates basic microwave equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; uses basic electronics mathematics and becomes proficient in reading schematic diagrams of subassemblies; under supervision, repairs complicated microwave communications equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; becomes familiar with interconnect concepts; troubleshoots and repairs electronic circuits; applies knowledge of microwave antenna radiation to select operational sites; is a first-line supervisor of personnel who operate and repair microwave communications equipment; as an office manager, makes shift and work assignments, issues instructions, and writes technical and administrative reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40; as a mid-level manager, supervises the technical operation and repair of communications equipment, writes instructions and technical reports pertaining to system operations, and may supervise 30 or more persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (2/75).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics. In the electronics technician or a communications fixed plant installer or repairman apprentice training program, 480 clock hours of experience and 60 contact hours of related instruction (2/75).

Recommendation, Skill Level 40

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics and 3 in personnel supervision or office management. In the upper-division baccalaureate category, 3 semester hours in personnel management or in administration. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/75).

Recommendation, Skill Level 50

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics and 6 in personnel supervision or office management. In the upper-division baccalaureate category, 6 semester hours in personnel management or in administration. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature. NOTE: At this level in a comparable civilian occupation, a second-class FCC radio operator's license is mandatory; the skills and knowledge, particularly in mathematics and electronics theory, required to pass the FCC license examination are broader in scope than those required for the performance of this MOS (2/75).

MOS-26V-002

STRATEGIC MICROWAVE SYSTEMS
REPAIRER
26V10
26V20
26V30
26V40

Exhibit Dates: 3/78–3/87. (Effective 3/87, MOS 26V was discontinued and its duties were incorporated into MOS 29V, Strategic Microwave System Repairer.)

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Installs, repairs, operates, and performs maintenance on line-of-sight and tropospheric scatter microwave communications equipment; wires and connects equipment for installation; makes performance tests on operating equipment. *Skill Level 10:* Knows microwave communications systems, terminology and circuitry; uses test equipment to determine equipment condition; operates basic microwave equipment; does first line repair and maintenance. *Skill Level 20:* Able to perform the duties required for Skill Level 10; repairs microwave communications systems to component level; uses schematic diagrams and test equipment to perform repair duties. *Skill Level 30:* Able to perform the duties required for Skill Level 20; troubleshoots and repairs microwave equipment circuits; uses knowledge of antenna radiation to select operational sites; is a first-line supervisor of personnel who operate and repair microwave communications equipment; as an office manager, makes shift and work assignments, issues instructions, and maintains maintenance records; may supervise 3 to 5 persons. *Skill Level 40:* Able to perform the duties required for Skill Level 30; as a mid-level manager, supervises the technical operation and repair of a microwave communications station, writes instructions and technical reports pertaining to system operations; may supervise from 10 to 15 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in AC/DC circuits, 2 in communications principles, 2 in troubleshooting techniques, and 2 in active devices (5/79).

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications principles, 4 in troubleshooting techniques, 3 in active devices, and 4 in microwave circuits (5/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications principles, 5 in troubleshooting techniques, 3 in active devices, and 4 in microwave circuits. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications principles, 5 in troubleshooting techniques, 3 in active devices, 4 in microwave circuits, 2 in personnel supervision, 3 in human relations, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management (5/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications principles, 5 in troubleshooting techniques, 3 in active devices, 4 in microwave circuits, 3 in personnel supervision, 3 in human relations, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (5/79).

MOS-26W-001

RADAR MAINTENANCE SUPERVISOR-
INSPECTOR
26W20
26W40
26W50

Exhibit Dates: 10/73–8/77. (Effective 9/77, MOS 26W was discontinued and its functions were incorporated into MOS 26C, Combat Area Surveillance Radar Repairer; MOS 35P, Avionic Equipment Maintenance Supervisor; or MOS 27F, Vulcan Repairer.)

Career Management Field: 26 (Non-Integrated Radar Maintenance), subfield 262 (Ground Radar Repair).

Description

Summary: Supervises maintenance and performs technical inspection of non-integrated radars including ground surveillance, weapons support, ground control, airborne, and air defense radars and associated equipment. *Skill Level 20:* Able to perform the duties of any radar repair MOS in career management field 26; inspects and checks maintenance performed by Skill Level 20 personnel in radar repair MOS's for adequacy, suitability, and workability; inspects for wear, damage, and performance; measures performance against test standards; ascertains needed replacements or repairs of component parts. NOTE: May have progressed to 26W20 from 26B20, 26B30 (Weapons Support Radar Repairman), 26C20 (Combat Area Surveillance Radar Repairman), 26D20 (Ground Control Approach Radar Repairman), 26K20 (Electronic Warfare Equipment Repairman), 26M20 (Airborne Surveillance Radar Repairman), or 26N20 (Surveillance Infrared Repairman). *Skill Level 40:* Able to perform the duties required for Skill Level 20; able to perform the duties of any radar repair MOS in career management field 26; supervises radar repair units; organizes and supervises repair team activities, plans work schedules, supervises maintenance and repairs; interprets complex specification, circuit, schematic, and cable diagrams; analyzes malfunctions and recommends corrective action. NOTE: May have progressed to 26W40 from either 26W20 or 26B30 (Weapons Support Radar Repairman). *Skill Level 50:* Able to perform the duties required for Skill Level 40; supervises maintenance unit at battalion or higher level; organizes maintenance facilities and plans maintenance schedule; prepares reports; recommends machine design changes and changes in work procedures; provides technical guidance. NOTE: May have progressed to 26W50 from 26W40, 26P40 (Defense Acquisition Radar Mechanic), 26K40 (Electronic Warfare Equipment Repairman), or 26M40 (Airborne Surveillance Radar Repairman).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test equipment, 3 in tube and transistor circuits, and 3 in radar. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 5 in DC and AC circuits, 3 in tube and transistor circuits, 3 in radar, 3 in maintenance supervision, 3 in human relations, and additional credit in industrial arts education (electronics) and computer science on the basis of institutional evaluation. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in DC and AC circuits and use of test euipment, 3 in tube and transistor circuits, 3 in radar, 3 in maintenance supervision, 3 in personnel supervision, 3 in human relations, and additional credit in industrial arts education (electronics) and computer science on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in industrial arts education (electronics), 3 in human relations, 3 in maintenance management, and 6 for field experience in management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (2/76).

MOS-26Y-001

SATELLITE COMMUNICATIONS GROUND
STATION EQUIPMENT REPAIRMAN

26Y20

26Y40

26Y50

Exhibit Dates: 10/73-2/78.

Career Management Field: 32 (Fixed Plant Communications Maintenance).

Description

Summary: Installs, maintains, and operates satellite tracking systems, antenna positioning systems, and communications systems. *Skill Level 20:* Reads wiring, circuit, cable, and schematic diagrams and knows technical terminology related to the specific equipment; uses technical manuals to interpret meter readings and determine the serviceability of equipment; inspects, tests, and adjusts components to specific tolerances, primarily by using system-specific test equipment, as well as voltmeters, ohmmeters, spectrum analyzers, deviation meters, oscilloscopes, signal generators, frequency counters, and power meters; computes voltage, amperage, and resistance factors; repairs, removes, or replaces defective components and parts; identifies electronic jamming and applies appropriate electronic computer-countermeasures. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a shift supervisor, an operations sergeant, or, at a small facility of fewer than 18 persons, a station chief; conducts on-the-job training; makes work assignments; keeps work logs and requisitions supplies; reviews, consolidates, and prepares technical and administrative reports; interprets complex specifications and diagrams for subordinate personnel and diagnoses unusual cases of equipment malfunction. *Skill Level 50:* Able to perform the duties required for Skill Level 40; manages a large satellite ground station.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics. In an electronic technician apprentice training program, 480 clock hours of experience and 60 contact hours of related instruction (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 6 semester hours in electronics. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics, 3 in personnel supervision, and 3 in human relations. In an electronic technician apprentice training program, 480 clock hours of experience and 60 contact hours of related instruction (6/76).

Recommendation, Skill Level 50

In the vocational certificate category, 6 semester hours in electronics. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in introduction to management. The recommendation for advanced standing in an apprentice training program is the same as that for Skill Level 20 because additional skills are administrative and supervisory in nature (6/76).

MOS-26Y-002

SATELLITE COMMUNICATIONS GROUND
STATION EQUIPMENT REPAIRER

26Y10

26Y20

26Y30

26Y40

Exhibit Dates: 3/78-3/87. (Effective 3/87, MOS 26Y was discontinued and its duties were incorporated into MOS 29V, Strategic Microwave System Repairer.)

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Summary: Installs and maintains satellite tracking, antenna positioning, and communications transmitting and receiving systems. *Skill Level 10:* Performs preventive and corrective maintenance on satellite communications ground station equipment; uses voltmeters, ohmmeters, oscilloscopes, spectrum analyzers, deviation meters, signal generators, frequency counters, power meters, modulation deviation and noise measurement equipment; troubleshoots to component level. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; requisitions repair and replacement parts and tools. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical guidance to lower skill level personnel; prepares and implements standard operating procedures; coordinates maintenance and safety problems with appropriate authorities; coordinates and establishes liaison with support activities; diagnoses unusual cases of equipment malfunction. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises installation, operation, and maintenance of satellite communications ground station equipment, prepares maintenance schedules and work assignments; reviews, coordinates, and prepares technical and administrative reports; may supervise 17 or more persons.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 2 in communications electronics, 2 in troubleshooting techniques, 2 in solid-state circuits, 2 in instrumentation and controls, 4 in digital circuits, and 4 in microwave fundamentals. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in AC/DC circuits, 2 in communications electronics, 2 in troubleshooting techniques, 2 in solid-state circuits, 2 in instrumentation and controls, 2 in digital circuits, and 2 in microwave fundamentals (5/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications electronics, 3 in troubleshooting techniques, 3 in solid-state circuits, 3 in instrumentation and controls, 5 digital circuits, and 6 in microwave fundamentals. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 4 in communications electronics, 4 in troubleshooting techniques, 3 in solid-state circuits, 3 in instrumentation and controls, 4 in digital circuits, and 4 in microwave fundamentals (5/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 3 in communications electronics, 3 in troubleshooting techniques, 3 in solid-state circuits, 3 in instrumentation and controls, 5 in digital circuits, and 8 in microwave fundamentals. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 4 in communications electronics, 5 in troubleshooting techniques, 3 in solid-state circuits, 3 in instrumentation and controls, 4 in digital circuits, 4 in microwave fundamentals, 3 in maintenance management, and 3 in human relations. In the upper-division baccalaureate category, 2 semester hours for field experience in management (5/79).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 30. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in AC/DC circuits, 4 in communications electronics, 5 in troubleshooting techniques, 3 in solid-state circuits, 3 in instrumentation and controls, 4 in digital circuits, 4 in microwave fundamentals, 3 in maintenance management, 3 in human relations, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/79).

MOS-27B-001

LAND COMBAT SUPPORT SYSTEM TEST
SPECIALIST

27B20

27B40

Exhibit Dates: 10/73-8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Supervises or performs maintenance on the Land Combat Support System (LCSS). *Skill Level 20:* Uses basic test equipment such as oscillocope, VOM, and signal generator; solders on printed circuit boards and discrete wiring; reads and interprets schematic diagrams and logic diagrams; identifies common electronic components; uses proper troubleshooting procedures; loads digital computer tapes; interprets digital printer outputs; performs basic instrument calibrations; aligns optical lens systems, shafts, and gear systems; draws block diagrams of systems; performs quality control inspections. *Skill Level 40:* Able to perform the duties required for Skill Level 20; maintains equipment records; establishes shop priorities and procedures; supervises shop operations.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electronics, 2 in industrial electronics, and 1 in digital theory, and additional credit in basic electronics, industrial electronics, digital theory, digital computer systems, systems maintenance, industrial science, and intermediate algebra on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in introductory electronics, 1 in electronic instrumentation, and 2 in digital computer systems. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 2 semester hours in introductory electronics, 1 in electronic instrumentation, 2 in digital computer systems, and 3 in human relations. In an electronic technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction. In a construction electrician apprentice training program, 1,000 clock hours of experience and 72 contact hours of related instruction (2/76).

MOS-27B-002

Land Combat Support System Test
Specialist/Lance Repairer

27B10
27B20
27B30
27B40

Exhibit Dates: 9/77–Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 271 (Ballistic/Land Combat Systems Maintenance).

Description

Summary: Performs maintenance on Land Combat Systems (LCSS) and the Lance missile system; inspects and tests equipment; locates card-level faults with special test equipment; replaces faulty assemblies and subassemblies; selects program tapes, patchboards and cable assemblies; adjusts and aligns mechanical, electrical, and optical assemblies; calibrates and repairs support equipment; performs quality control measures; prepares maintenance and supply forms and reports. *Skill Level 10:* Works under close supervision in performing maintenance functions; uses technical manuals; follows schematics and organized maintenance procedures; uses multimeters, oscilloscopes, signal generators, and power supplies; tests digital multimeters, waveform connectors, signal generators, pulse generators, power supplies, printers, and detector adapters; performs operator maintenance on AC power generators and replaces faulty components. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises and provides technical assistance to Skill Level 10 personnel; repairs multimeters, waveform connectors, pulse generators, power supplies, signal generators, and patchboards; performs modifications on support equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides technical guidance to lower skill level personnel in accomplishment of duties; schedules work; sets repair priorities; inspects, tests, and repairs missile system components; demonstrates proper work practices and maintenance techniques; implements quality control measures; performs system inspections; supervises maintenance and inspection teams; may supervise a minimum of 5 persons. *Skill Level 40:* Able to perform the duties required for Skill Level 30; able to supervise personnel performing the duties of MOS 27B, MOS 27E (TOW/Dragon Repairer), and MOS 27H (Shillelagh Repairer); supervises and coordinates support maintenance activities of system associated electronic equipment; assists in developing quality control measures; serves as section chief performing missile system support maintenance; serves as senior instructor in a training facility. NOTE: May have progressed to 27B40 from 27B30, 27E30 (TOW/Dragon Repairer), or 27H30 (Shillelagh Repairer).

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in an electronics technician program. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity and electronics (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in an electronics technician program. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity and electronics, 2 in electronics instrumentation, and 2 in digital computer principles (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in an electronics technician program. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity and electronics, 2 in electronic instrumentation, 2 in digital computer principles, and 1 in personnel supervision; if the duty assignment was Lance Repair Supervisor or LCSS Repair Supervisor, 1 additional semester hour in personnel supervision and credit in human relations on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in an electronics technician program. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity and electronics, 3 in personnel supervision, 3 in human relations, 2 in electronic instrumentation, and 2 in digital computer principles (5/78).

MOS-27D-001

Lance Missile System Repairman

27D20
27D40

Exhibit Dates: 10/73–8/77. (Effective 9/77, MOS 27D was discontinued and its functions were incorporated into MOS 27B, Land Combat Support System Test Specialist/Lance Repairer.)

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Supervises or performs routine maintence on Lance missile systems. *Skill Level 20:* Performs field-level maintenance on Lance missile system, missile trainer, nickel-cadmium batteries; and field test equipment; inspects, tests, and adjusts subassemblies to specific functional levels; determines area of malfunction in specific subassemblies (electrical, mechanical, electronic, and electro-mechanical); determines serviceability of subassemblies and removes and replaces subassemblies; performs field calibration and provides technical assistance to supported units. *Skill Level 40:* Able to perform the duties required for Skill Level 20; sueprvises field maintenance on Lance missile systems; schedules workloads and establishes priorities; recommends procedures for receipt and storage of items; supervises inspection of items and on-the-job training; establishes and maintains maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation. In an electronic technician apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, and credit in electronics on the basis of institutional evaluation. In an electronic technician apprentice training program, 144 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination. In a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

MOS-27E-001

Wire-Guided Missile Systems
Repairman

27E20
27E40

Exhibit Dates: 10/73–8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Supervises or performs maintenance on the TOW or Dragon missile systems. *Skill Level 20:* Performs maintenance on wire-guided missile systems, trainers, night sights, battery charges, and system-peculiar test equipment; performs adjustments to isolate malfunctions; diagnoses malfunctions; removes and replaces modules and assemblies. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises inspection and maintenance crews; organizes and conducts on-the-job training; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, and additional credit in basic electronics and direct current on the basis of institutional evaluation. In a construction electrician apprentice training program, 2,000 clock hours of experience and 120 contact hours of related instruction (does not have experience in installing electrical components in buildings being constructed) (2/76).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in

basic electronics and 3 in human relations, and additional credit in basic electronics and direct current on the basis of institutional evaluation. In a construction electrician apprentice training program, 2,000 clock hours of experience and 120 contact hours of related instruction (does not have experience in installing electrical components in buildings being constructed) (2/76).

MOS-27E-002

TOW/Dragon Repairer

27E10
27E20
27E30

Exhibit Dates: 9/77–Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 271 (Ballistics/Land Combat Systems Maintenance).

Description

Summary: Performs maintenance on TOW and Dragon missile system trainers, night sites, battery chargers and system test equipment. *Skill Level 10:* Performs maintenance tasks under close supervision; follows technical manuals in servicing and maintaining systems; inspects, tests, and adjusts components to specified tolerances using special test equipment; locates and replaces malfunctioning electronic, electrical, mechanical, pneumatic and electro-mechanical subassemblies, modules, and circuit elements; prepares maintenance and supply forms and reports. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to lower skill level personnel; provides technical assistance to support units; installs equipment modifications; troubleshoots weapon system, launch effects trainer, TOW training set, and breakout box; performs operational checks on tracker test set, tracker and launch effects trainer and monitoring set. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises lower skill level personnel; supervises inspection and maintenance teams; establishes work loads and priorities; conducts in-service staff training; demonstrates proper maintenance and troubleshooting techniques; recommends maintenance procedures; implements quality control measures; establishes and maintains maintenance records; performs inspections; may supervise up to 5 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of tools and test equipment, and 3 in introduction to electricity and electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, and 3 in introduction to electricity and electronics (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in introduction to electricity and electronics, and 1 in personnel supervision; if the duty position was TOW/Dragon Repair foreman,1 additional semester hour in personnel supervision and credit in human relations on the basis of institutional evaluation (5/78).

MOS-27F-001

Chaparral/Vulcan Air Defense System Repairman

27F20
27F40

Exhibit Dates: 10/73–8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Performs support maintenance on specialized missile equipment; has a basic knowledge of electronics, including radar and electromechanical applications. *Skill Level 20:* Inspects, tests, and adjusts components to specific tolerances, and identifies malfunctions using primarily system-specific test equipment; repairs, removes, or replaces defective components and parts; performs initial and final check-out and inspection of system items; performs quality control measures; performs calibration on test sets peculiar to Chaparral and Vulcan equipment; prepares maintenance and supply forms; duties required for maintenance of the Chaparral missile system involve largely modular repair, requiring the ability to read block diagrams; duties required for maintenance of the Vulcan electronic assemblies and radar involve specific component repair, requiring substantially more electronic theory and the ability to read schematic diagrams. *Skill Level 40:* Able to perform the duties required for Skill Level 20; serves as a technical inspector or foreman, supervising and appraising the performance of 9 to 16 persons; establishes workloads and repair priorities; implements quality control measures; conducts on-the-job training, demonstrating proper maintenance and troubleshooting techniques.

Recommendation, Skill Level 20

Credit is not recommended because of the limited and military nature of the skills, competencies, and knowledge. Advanced standing in an electronic technician apprentice training program only on the basis of employer or trade association performance examination because of the limited and military nature of the skills, competencies, and knowledge (3/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in personnel administration, and additional credit for field experience in education on the basis of institutional evaluation. Advanced standing in an electronic technician apprentice training program only on the basis of employer or trade association performance examination because of the limited and military nature of the skills, competencies, and knowledge (3/75).

MOS-27F-002

Vulcan Repairer

27F10
27F20
27F30

Exhibit Dates: 9/77–Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 272 (Light Air Defense Systems Maintenance).

Description

Summary: Performs maintenance on Vulcan electronic assemblies, range-only-radar, and associated equipment. *Skill Level 10:* Works under close supervision; inspects, tests, and adjusts components to specific tolerances; determines malfunctions in assemblies, subassemblies, modules, circuit elements with common and system-peculiar test equipment; removes and replaces defective components and parts; tests transmitters/receivers, antennas, range computers, power supplies, amplifiers, control, and electronic field test sets; performs maintenance calibrations of power supplies, modular testers, receiver test sets, and other components unique to Vulcan electronic assemblies. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance to Skill Level 10 personnel; installs system modifications; provides technical assistance to support units. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises and performs maintenance tasks; establishes work loads and priorities; establishes and conducts staff training; implements quality control measures; supervises inspection and maintenance teams; maintains records; recommends inspection, testing, and maintenance techniques; may supervise up to 5 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of tools and test equipment and 3 in basic electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment and 3 in basic electronics (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in basic electronics, and 1 in personnel supervision; if the duty position was Vulcan Repair Supervisor, 1 additional semester hour in personnel supervision, and credit in human relations on the basis of institutional evaluation (5/78).

MOS-27G-001

Redeye Missile System Repairman

27G20
27G40

Exhibit Dates: 10/73–8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Supervises or performs field maintenance on Redeye missile system, trainer, and associated equipment. *Skill Level 20:* Inspects, tests, and adjusts assemblies and subassemblies to specific operational levels; determines malfunctions in electronic, electrical, and cryogenic assemblies, subassemblies, modules, and circuit elements; removes and replaces defective components and parts; installs equipment modifications; performs initial and final checkouts and inspections; performs 'C' level calibration on test equipment. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises the maintenance on the Redeye missile system, trainer, contact support test set, and associated equipment; schedules workloads; establishes priorities; recommends procedures for receiving, storing, inspecting, testing, and repairing equipment; implements quality control measures; supervises maintenance and inspection teams; organizes and conducts on-the-job training; demonstrates proper maintenance and troubleshooting techniques; establishes and keeps maintenance records.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, and additional credit in basic electronics on the basis of institutional evaluation. In an electronic technician (sound and manufacturing) apprentice training program or in a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electronics, and additional credit in basic electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations, 3 in basic electronics, and additional credit in basic electronics on the basis of institutional evaluation. In an electronic technician (sound and manufacturing) apprentice training program or in a construction electrician apprentice training program, 72 contact hours of related instruction; clock hours of experience on the basis of employer or trade association performance examination (2/76).

MOS-27G-002

CHAPARRAL/REDEYE REPAIRER

27G10
27G20
27G30
27G40

Exhibit Dates: 9/77–Present.

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapon Systems Maintenance), subfield 272 (Light Air Defense Systems Maintenance).

Description

Summary: Performs maintenance on the Chaparral and Redeye missiles systems and associated equipment and trainers. *Skill Level 10:* Inspects, tests, and adjusts components to specific tolerances; determines malfunctions; uses system-associated test equipment; removes and replaces defective components and parts; serves on maintenance and inspection teams; prepares maintenance and supply forms and reports. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; installs equipment modifications; provides technical assistance to supported units. *Skill Level 30:* Able to perform the duties required for Skill Level 20; establishes work load and repair priorities; supervises inspection and maintenance teams; organizes and conducts on-the-job training programs; demonstrates proper maintenance and troubleshooting techniques; implements quality control measures; establishes and maintains maintenance records, may supervise up to 5 persons. *Skill Level 40:* Able to perform the duties required for Skill Level 30 of MOS 27G or 27F (Vulcan Repairer); supervises and coordinates support maintenance of the Chaparral and Redeye missile systems, Vulcan weapon system electronics, forward area alerting radar, system associated trainers and test equipment, power generation equipment, and calibration of system associated electronic equipment; assists in the development of and supervises the quality control program. NOTE: May have progressed to 27G40 from 27G30 or 27F30 (Vulcan Repairer).

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in the use and care of tools and test equipment and credit in basic electronics on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in the use and care of tools and test equipment and credit in basic electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in the use and care of tools and test equipment and credit in basic electronics on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment and 1 semester hour in personnel supervision and credit in basic electronics on the basis of institutional evaluation; if the duty position was Chaparral/Redeye Missile Systems Repair Supervisor, 1 additional semester hour in personnel supervision, and credit in human relations on the basis of institutional evaluation (5/78).

Recommendation, Skill Level 40

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in personnel supervision, and 3 in human relations, and credit in basic electronics on the basis of institutional evaluation (5/78).

MOS-27H-001

SHILLELAGH MISSILE SYSTEM REPAIRMAN

27H20
27H40

Exhibit Dates: 10/73–8/77.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Summary: Supervises or performs maintenance on the Shillelagh missile system. *Skill Level 20:* Inspects, tests, and adjusts Shillelagh missile system by using a method of programmed test equipment and basic electronic theory; replaces faulty cables and assemblies; prepares maintenance and supply forms. *Skill Level 40:* Able to perform the duties required for Skill Level 20; recommends procedures for receiving, storing, inspecting, testing, and repairing equipment and components; implements quality control measures; supervises inspection and maintenance teams; organizes and conducts on-the-job training; demostrates proper maintenance and troubleshooting techniques.

Recommendation, Skill Level 20

In the vocational certificate category, credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, and additional credit in electronics and direct current on the basis of institutional evaluation (2/76).

Recommendation, Skill Level 40

In the vocational certificate category, credit in electronics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in human relations, and additional credit in electronics and direct current on the basis of institutional evaluation (2/76).

MOS-27H-002

SHILLELAGH REPAIRER

27H10
27H20
27H30

Exhibit Dates: 9/77–2/85. (Effective 3/85, MOS 27H was discontinued; in 3/89, the designator was reestablished - see exhibit MOS-27H-003.)

Career Management Field: 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance), subfield 271 (Ballistic/Land Combat Systems Maintenance).

Description

Summary: Performs maintenance on the Shillelagh missile system, the trainer, and associated built-in and portable test equipment. *Skill Level 10:* Works under close supervision; performs on-site repairs by replacing cables and assemblies; inspects, tests, and adjusts components to specified tolerances; determines malfunctions in electronic, electro-mechanical, optical and infrared systems; maintains tools and test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; provides technical assistance to support units; installs equipment modifications; troubleshoots instructor control unit, visual effects simulator, power supply, power control unit, fault locator, and transmitter signal analyzer; performs operational checks on equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; establishes workloads and repair priorities; supervises inspection and maintenance teams; conducts on-the-job training programs; demonstrates proper maintenance and troubleshooting techniques; may supervise up to 5 persons.

Recommendation, Skill Level 10

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment (5/78).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of tools and test equipment, and 3 in introduction to electricity and electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, and 3 in introduction to electricity and electronics (5/78).

Recommendation, Skill Level 30

In the vocational certificate category, the recommendation is the same as that for Skill Level 20. In the lower-division baccalaureate/associate degree category, 3 semester hours in use and care of tools and test equipment, 3 in introduction to electricity and electronics, and 1 in personnel supervision; if the duty assignment was Shillelagh Repair Supervisor, 1 additional semester hour in personnel supervision and credit in human relations on the basis of institutional evaluation (5/78).

MOS-27H-003

Hawk Firing Section Repairer

27H10

27H20

27H30

27H40

Exhibit Dates: Pending evaluation. 3/89–Present.

MOS-27J-001

Hawk Field Maintenance Equipment/Pulse Acquisition Radar Repairer

27J10

27J20

27J30

27J40

Exhibit Dates: Pending evaluation. 3/89–Present.

MOS-27K-001

Hawk Fire Control/Continuous Wave Radar Repairer

27K10

27K20

27K30

27K40

Exhibit Dates: Pending evaluation. 3/89–Present.

MOS-27L-001

Lance System Repairer (LANCE Repairer)

27L10

27L20

27L30

Exhibit Dates: 9/83–Present.

Career Management Field: 27 (Land Combat and Air Defense System Intermediate Maintenance).

Description

Summary: Performs or supervises intermediate maintenance on the Lance missile system, which includes trainer, loader, transporter and launcher. *Skill Level 10:* Inspects, tests, troubleshoots, and repairs electronic, electrical, hydraulic mechanical and electro-mechanical assemblies of the Lance system trainer, loader, transporter and launcher and system test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises field maintenance of Lance missile system. *Skill Level 30:* Able to perform the duties required for Skill Level 20; schedules work loads and establishes priorities; recommends procedures for receipt and storage of items; supervises inspection of items and on-the-job training; establishes and maintains maintenance records.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment (4/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic procedures in system analysis and maintenance (4/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic procedures in system analysis and maintenance, and 2 in personnel supervision (4/86).

MOS-27M-001

Multiple Launch Rocket System (MLRS) Repairer

27M10

27M20

27M30

Exhibit Dates: 9/82–Present.

Career Management Field: 27 (Land Combat and Air Defense System Intermediate Maintenance).

Description

Summary: Supervises or performs intermediate maintenance on Multiple Launch Rocket System (MLRS) self-propelled launcher loader, launcher pad/container trainer, and test support group. *Skill Level 10:* Troubleshoots electrical, electronic, and mechanical assemblies, modules, and interconnecting cables of the self-propelled launcher loader module; isolates malfunctions; repairs and replaces chassis mounted components; prepares and maintains equipment logs, modification and utilization records, and calibration charts. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance to support units; supervises field maintenance of MLRS system. *Skill Level 30:* Able to perform the duties required for Skill Level 20; schedules work loads and establishes priorities; recommends procedures for receipt and storage of items; supervises inspection of items; conducts on-the-job training; establishes and maintains maintenance records.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment (4/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic procedures in system analysis and maintenance (4/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in care and use of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic procedures in system analysis and maintenance and 2 in personnel supervision (4/86).

MOS-27N-001

Forward Area Alerting Radar (FAAR) Repairer

27N10

27N20

27N30

Exhibit Dates: 9/81–Present.

Career Management Field: 27 (Land Combat and Air Defense System Intermediate Maintenance).

Description

Summary: Performs or supervises direct support and general support maintenance on the Foward Area Alerting Radar (FAAR) system to include radar, Target Alert Data Display Set (TADDS) and Interrogator Set (IFF). *Skill Level 10:* Performs support level maintenance on radar, TADDS and IFF electronic assemblies and associated system-peculiar test equipment to include Organizational Maintenance Test Set (OMTS) and Support Maintenance Test Set (SMTS): troubleshoots assemblies, subassemblies, modular and circuit elements; repairs, removes and/or replaces defective components and parts; inspects, tests, and adjusts FAAR system components; performs inspections; prepares and maintains equipment logs, modification and utilization records, exchange tags, and calibration data cards. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel; provides technical assistance to supported units. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs or supervises duties of lower-skill-level personnel; establishes workload and repair priorities; recommends procedures for receipt, storage, inspection, testing, and repair of FAAR system items; organizes and conducts on-the-job training programs and implements quality control measures.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment (4/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance and 3 in electronic circuitry (4/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance, 3 in electronic circuitry, and 2 in personnel supervision (4/86).

MOS-27P-001

SGT. YORK AIR DEFENSE GUN SYSTEM RADAR/ELECTRONIC REPAIRER

27P10
27P20
27P30
27P40

Exhibit Dates: 3/84–8/87. (Effective 9/87, MOS 27P was discontinued.)

Career Management Field: 27 (Land Combat and Air Defense System Intermediate Maintenance).

Description

Summary: Performs or supervises intermediate maintenance on Sgt. York gun system radar and fire control associated components and on the Organizational Maintenance Test Set (OMTS). *Skill Level 10:* Troubleshoots and repairs system radar, system armament, feed system and fire control electronic, electrical, mechanical, pneumatic, and hydraulic components; performs assembly replacement; repairs system cables and wiring harness; isolates malfunctions of laser and optic electronics, IFF (Identify Friend or Foe), radar, or fire control subsystems; prepares and maintains equipment records. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical assistance, guidance, and instruction to lower-skill-level personnel; installs equipment modifications. *Skill Level 30:* Able to perform the duties required for Skill Level 20; provides first line supervision of subordinate personnel engaged in intermediate maintenance activities; organizes and conducts on-the-job training. *Skill Level 40:* Able to perform the duties required for Skill Level 30; supervises and coordinates intermediate maintenance activities; serves as section chief or platoon sergeant; assists in development of and supervises quality control program; identifies faulty work practices and demonstrates correct procedures; serves as maintenance inspector.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment (4/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance and 3 in introduction to hydraulic systems (4/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance, 3 in introduction to hydraulic systems, and 2 in personnel supervision (4/86).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance, 3 in introduction to hydraulic systems, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management (4/86).

MOS-27Q-001

SGT. YORK AIR DEFENSE GUN SYSTEM TEST SPECIALIST

27Q10
27Q20
27Q30

Exhibit Dates: 3/84–8/87. (Effective 9/87, MOS 27Q was discontinued.)

Career Management Field: 27 (Land Combat and Air Defense System Intermediate Maintenance).

Description

Summary: Operates, performs or supervises unit and intermediate maintenance on Sgt. York gun system. *Skill Level 10:* Able to perform unit and intermediate level maintenance on Sgt. York gun system special design field maintenance test equipment; performs unit-under-test checkout and repair of gun system radar and fire control associated components. *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs and supervises unit and intermediate level maintenance on Sgt. York gun system field maintenance test equipment; performs and supervises repair of the gun system radar and fire control associated equipment.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment (4/86).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance, and 3 in electronic circuitry (4/86).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in use and care of hand tools and test equipment. In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and diagnostic techniques in system analysis and maintenance, 3 in electronic circuitry, and 2 in personnel supervision (4/86).

MOS-27T-001

PEDESTAL MOUNTED STINGER, LINE OF SIGHT REAR AIR DEFENSE SYSTEM REPAIRER

27T10
27T20
27T30
27T40

Exhibit Dates: Pending evaluation. 3/90–Present.

MOS-27V-001

HAWK MAINTENANCE CHIEF

27V50

Exhibit Dates: Pending evaluation. 3/89–Present.

MOS-27X-001

PATRIOT SYSTEMS REPAIRER

27X20
27X30
27X40
27X50

Exhibit Dates: Pending evaluation. 3/90–Present.

MOS-27Z-001

LCSS MISSILE MAINTENANCE CHIEF

27Z50

Exhibit Dates: 10/73–Present.

Career Management Field: 27 (Combat Missile Maintenance), subfield 272 (Combat Missile Repair).

Description

Skill Level 50: Coordinates support maintenance of the Land Combat Support System (LCCS), including the Lance, TOW, Dragon, Chaparral, Shillelagh, and Redeye missile systems, Vulcan weapon system electronics, Foward Area Alerting Radar (FAAR), and system-associated trainers and test equipment; helps determine and administers policy; assists superiors in planning and accomplishing training; advises superiors on all matters concerning enlisted personnel; may serve as a chief instructor in a training facility. NOTE: May have progressed to 27Z50 from 27D40 (Land Combat Support System Test Specialist), 27D40 (Lance Missile System Repairman), 27E40 (Wire-Guided Missile Systems Repairman), 27F40 (Chaparral/Vulcan Defense Systems Repairman), 27G40 (Redeye Missile System Repairman), 27H40 (Shillelagh Missile System Repairman), 24M40 (Vulcan System Mechanic), or 24N40 (Chaparral System Mechanic).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 in human relations, 6 for field experience in management, and additional credit in industrial arts education on the basis of institutional evaluation; if the duty assignment was chief instructor in a formal training facility, 3 additional semester hours for an internship in education (2/76).

MOS-28M-001

ANTI-BALLISTIC MISSILE MAINTENANCE SPECIALIST

28M10
28M20
28M40
28M50

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 28M was discontinued.)

Career Management Field: 23 (Air Defense Missile Maintenance), subfield 237 (Ballistic Missile Defense).

Description

Summary: Supervises or performs on-line maintenance on the Safeguard missiles and their associated equipment. *Skill Level 10:* Operates and performs preventive maintennace on missile service and transporter vehicles, test equipment, associated gound support, and handling equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; tests and checks guidance control and warhead sections to verify presence and integrity of circuitry; checks and tests missile and launch equipment and isolates malfunctions; replaces defective missile stages and sections and launch equipment components; determines the cause and location of a malfunction of the environmental system in a cell or launch preparation equipment compartment in the event of a minor alarm; removes cover, deenergizes electrical power, and performs minor corrective action; prepares maintenance and supply records. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises on-line maintenance of the missile and associated equipment; schedules and assigns work; corrects faulty work procedures by instruction and demonstration; enforces safety procedures; diagnoses and analyzes complex malfunctions; conducts on-the-job training programs; prepares technical reports; establishes maintenance controls and performance standards. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as the principal maintenance supervisor in a multi-shift operation performing online missile maintenance.

Recommendation, Skill Level 10

In the vocational certificate category, credit in basic electricity laboratory and systems maintenance on the basis of institutional evaluation (6/76).

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance (6/76).

Recommendation, Skill Level 40

In the vocational certificate category, 2 semester hours in basic electricity laboratory and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 for field experience in management (6/76).

Recommendation, Skill Level 50

In the vocational certificate category, 2 semester hours in basic electricty laboratory and 2 in systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 6 for field experience in management (6/76).

MOS-29E-001

RADIO REPAIRER (COMMUNICATIONS-ELECTRONICS RADIO REPAIRER)

29E10
29E20
29E30

Exhibit Dates: 7/86–Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Installs and maintains radio receivers, transmitters, and associated equipment. *Skill Level 10:* Uses oscilloscopes, multimeters, radio frequency generators, and spectrum analyzers to troubleshoot equipment; troubleshoots and repairs equipment to the component level; uses logical troubleshooting methods to locate faults. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists and instructs Skill Level 10 personnel in equipment maintenance; keeps detailed records of maintenance history on equipment; follows formal maintenance systems. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns specific duties to Skill Level 10 and 20 personnel; establishes workload, work schedules, and priorities; responsible for quality control inspections; evaluates and counsels subordinates; maintains technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronic troubleshooting and repair, and 2 in radio communications (7/87).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 4 in electronic troubleshooting and repair, 2 in radio communications, and 2 in recordkeeping (7/87).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 4 in electronic troubleshooting and repair, 2 in radio communications, 2 in recordkeeping, 3 in maintenance management, and 3 in principles of supervision (7/87).

MOS-29F-001

FIXED COMMUNICATIONS SECURITY EQUIPMENT REPAIRER

29F10
29F20
29F30

Exhibit Dates: 9/85–Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Inspects, tests, and performs maintenance on fixed communications security (COMSEC) equipment. *Skill Level 10:* Operates conventional and specialized test equipment; performs repairs on equipment or system by removing and replacing defective equipment; installs and tests equipment; interprets system diagrams, troubleshooting charts and technical publications; keeps maintenance records; individuals holding the following ASI's perform maintenance at the component level: ASI G7, COMSEC Equipment Full Maintenance (Field), ASI G8, COMSEC Equipment Full Maintenance (Fixed), ASI X8, COMSEC System Maintenance Specialized Repair Activity (SRA), and ASI X9, General COMSEC Maintenance Specialized Repair Activity (SRA). *Skill Level 20:* Able to perform the duties required for Skill Level 10; provides technical guidance and procedural assistance to Skill Level 10 personnel; prepares and maintains repair parts stock records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns specific duties to Skill Levels 10 and 20; establishes workload, work schedules, and maintenance priorities; responsible for quality control inspections; evaluates and counsels subordinate personnel; provides technical assistance to subordinates; maintains technical library; maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews technical and administrative reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics and 1 in electronic troubleshooting and repair. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronic troubleshooting and repair, and 2 in recordkeeping. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronic troubleshooting and repair, 2 in recordkeeping, 3 in maintenance management, and 3 in principles of supervision. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

MOS-29G-001

DIGITAL COMMUNICATIONS EQUIPMENT REPAIRER

29G10
29G20
29G30

Exhibit Dates: 3/87–9/89. (Effective 9/89, MOS 29G was discontinued and its functions were incorporated into MOS 39G, Automated Communications Computer Systems Repairer.)

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Summary: Performs or supervises unit and intermediate level maintenance on digital communications message devices and associated equipment such as common unit control, universal keyboards, card readers, card punches, page printers, and modems. *Skill Level 10:* Uses test equipment to troubleshoot equipment; troubleshoots and repairs equipment to the component level; uses logical troubleshooting methods to locate faults. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists and instructs Skill Level 10 personnel in equipment maintenance; provides technical assistance to subordinates; keeps detailed records of equipment maintenance history. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns duties; establishes workload, work schedules, and priorities; responsible for quality control inspections; evaluates and counsels subordinates; provides technical assistance to subordinates; maintains technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in electromechanical devices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital principles, and 2 in electronic systems troubleshooting and maintenance (6/88).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in electromechanical devices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital principles, 4 in electronic systems troubleshooting and maintenance, 1 in microprocessors, and 1 in solid state electronics (6/88).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in electromechanical devices. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital principles, 6 in electronic systems troubleshooting and maintenance, 2 in microprocessors, 1 in solid state electronics, 2 in record keeping, 2 in maintenance management, and 3 in principles of supervision (6/88).

MOS-29H-001

AUTOMATIC DIGITAL MESSAGE SWITCH
EQUIPMENT (ADMSE) REPAIRER

29H20
29H30

Exhibit Dates: [illegible]/87-9/89. (Effective 9/89, MOS 29H was discontinued and its functions were incorporated into MOS 39G, Automated Communications Computer Systems Repairer.)

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Summary: Troubleshoots and maintains digital computer systems. *Skill Level 20:* Analyzes operation, software, and hardware, to locate system faults; writes software to aid in troubleshooting; repairs to the component level various mini and mainframe computers, power supplys, modems, printers, and disk drives; maintains equipment repair records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; advises superiors; inspects maintenance forms and records; provides guidance and assigns duties to subordinates; establishes workload, work schedules, and repair priorities; evaluates and counsels subordinates; performs and supervises quality control inspections; coordinates logistical support; establishes and monitors on-the-job training.

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 5 in digital principles, 3 in solid state electronics, 2 in microprocessors, 4 in computer systems and organization, 6 in computer systems troubleshooting and maintenance, and 2 in record keeping (6/88).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 5 in digital principles, 3 in solid state electronics, 2 in microprocessors, 4 in computer systems and organization, 6 in computer systems troubleshooting and maintenance, 2 in record keeping, 2 in maintenance management, and 3 in principles of supervision (6/88).

MOS-29J-001

TELETYPEWRITER EQUIPMENT REPAIRER

29J10
29J20
29J30

Exhibit Dates: 7/86-Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Performs maintenance on electromechanical and electronic teletypewriter and facsimile equipment; individuals holding ASI T2, Teletypewriter Maintenance (MOD40TTY) also repair microcomputer systems. *Skill Level 10:* Installs, maintains, and repairs electrical and mechanical office machines at the module level; uses basic hand tools; reads elementary electrical and electronic diagrams; performs detailed testing to discover and diagnose causes of equipment malfunction. *Skill Level 20:* Able to perform the duties required for Skill Level 10; aligns electrical, electronic, and mechanical components as prescribed in applicable technical publications; reassembles and test-operates repaired equipment to ensure conformance with technical specifications; uses proper techniques to maintain, sectionalize, localize, and isolate electrical, electronic, and mechanical causes of equipment malfunction; prepares and keeps maintenance forms and records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises four or more lower skill level personnel; able to diagnose equipment malfunctions and repair requirements; conducts on-the-job training; organizes and supervises maintenance and inspection teams; requisitions and stocks supplies and repair parts; maintains equipment forms and records; plans and schedules equipment maintenance.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting and repair and 3 in introduction to electronics. If ASI T2 is held, 3 semester hours in microcomputer systems repair (7/87).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic troubleshooting and repair, 3 in introduction to electronics, and 2 in recordkeeping. If ASI T2 is held, 3 semester hours in microcomputer systems repair (7/87).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic troubleshooting and repair, 3 in introduction to electronics, 2 in recordkeeping, 3 in principles of supervision, and 3 in maintenance management. IF ASI T2 is held, 3 semester hours in microcomputer systems repair (7/87).

MOS-29M-001

TACTICAL SATELLITE/MICROWAVE
REPAIRER

29M10
29M20
29M30

Exhibit Dates: 7/86-Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Supervises and performs maintenance on tactical satellite, microwave, multichannel radio, multiplexer and associated equipment. *Skill Level 10:* Operates vehicles and power generation equipment; inspects and repairs equipment using test equipment and procedures per technical manuals to determine cause of malfunction and corrective action required; tests repaired item to insure proper operation; performs preventive maintenance checks; records maintenance activities on appropriate forms. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs complex maintenance duties; provides technical and procedural assistance to skill level 10 personnel; requests and maintains authorized repair parts stock, supplies, and technical manuals. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns specific duties to skill level 10 and 20 personnel; establishes workload, work schedules, and priorities; responsible for quality control inspections; evaluates and counsels subordinates; provides technical assistance to subordinates; maintains technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports; performs more complex troubleshooting.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in microwave communication systems, and 2 in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in microwave communication systems, 4 in electronic troubleshooting and repair, and 2 in recordkeeping (7/87).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in microwave communication systems, 6 in electronic troubleshooting and repair, 2 in recordkeeping, 3 in principles of supervision, and 3 in maintenance management (7/87).

MOS-29N-001

TELEPHONE CENTRAL OFFICE REPAIRER

29N10
29N20
29N30

Exhibit Dates: 9/85-Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Performs and supervises maintenance on manual and semi-automatic and selected transportable automatic electronic telephone central office systems. *Skill Level*

10: Maintains relay-operated central office systems and electronic switching systems; uses test equipment including oscilloscopes and multimeters. *Skill Level 20:* Able to perform the duties required for Skill Level 10; serves as a crew chief; schedules tasks and maintains maintenance forms and records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns specific duties to skill level 10 and 20 personnel; establishes workload, work schedules, and priorities; provides technical assistance to subordinates; maintains technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports.

Recommendation, Skill Level 10

In the vocational certificate category, 6 semester hours in telephone equipment and repair. In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronics and 2 in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 20

In the vocational certificate category, 6 semester hours in telephone equipment and repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 4 in electronic troubleshooting and repair, and 2 in recordkeeping (7/87).

Recommendation, Skill Level 30

In the vocational certificate category, 6 semester hours in telephone equipment and repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 4 in electronic troubleshooting and repair, 2 in recordkeeping, 3 in principles of supervision, and 3 in maintenance management (7/87).

MOS-29P-001

COMMUNICATIONS SECURITY
MAINTENANCE CHIEF

29P40

Exhibit Dates: 9/85–Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Supervises the maintenance and repair of communications security (COMSEC) equipment. *Skill Level 40:* May have progressed to 29P40 from 29F30, Fixed Communications Security Equipment Repairer, or 29S30, Field Communications Security Equipment Repairer; advises personnel, supervisors, and commanders on the operational matters dealing with COMSEC maintenance and supply; performs inspection of COMSEC accounting procedures; plans and supervises on-the-job training programs and evaluates and counsels subordinate personnel; supervises and coordinates maintenance and/or logistics support for COMSEC material.

Recommendation, Skill Level 40

In the upper-division baccalaureate category, 3 semester hours for field experience in management (7/87).

MOS-29S-001

FIELD COMMUNICATIONS SECURITY
EQUIPMENT REPAIRER

29S10
29S20
29S30

Exhibit Dates: 9/85–Present.

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Performs maintenance on field cryptographic equipment. *Skill Level 10:* Uses oscilloscopes and multimeters to troubleshoot crytographic equipment; troubleshoots and repairs equipment to the board level; uses logical troubleshooting methods to locate faults; individuals holding the following ASI's perform maintenance at the component level: ASI G7, COMSEC Equipment Full Maintenance (Field), ASI G8, COMSEC Equipment Full Maintenance (Fixed), ASI X8, COMSEC System Maintenance Specialized Repair Activity (SRA), and ASI X9, General COMSEC Maintenance Specialized Repair Activity (SRA). *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists and instructs Skill Level 10 personnel in equipment maintenance; keeps detailed records of maintenance history on equipment; follows formal maintenance system. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns specific duties to Skill Level 10 and 20 personnel; establishes workload, work schedules, and priorities; responsible for quality control inspections; evaluates and counsels subordinates; provides technical assistance to subordinates; maintains technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics and 1 in electronic troubleshooting and repair. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronic troubleshooting and repair, and 2 in recordkeeping. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronic troubleshooting and repair, 2 in recordkeeping, 3 in maintenance management, and 3 in principles of supervision. If ASI G7, G8, X8, or X9 is held, 2 additional semester hours in electronic troubleshooting and repair (7/87).

MOS-29T-001

SATELLITE/MICROWAVE COMMUNICATIONS
CHIEF

29T40

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Skill Level 40: Supervises unit and intermediate level maintenance of microwave communication systems that include satellite and ground station installations; serves as principal noncommissioned officer; provides direction to personnel performing maintenance at ground station microwave and satellite installations; supervises maintenance personnel; coordinates and assigns duties; evaluates and counsels subordinates; advises superiors on maintenance activities; prepares and coordinates technical reports and correspondence; initiates and conducts on-the-job training; instructs subordinates in the utilization of special test equipment; performs liaison between staff, operation, and maintenance personnel. NOTE: May have progressed to 29T40 from 29V30 (Strategic Microwave Systems Repairer) or 29Y30 (Satellite Communications Systems Repairer).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (6/88).

MOS-29U-001

DIGITAL EQUIPMENT MAINTENANCE CHIEF

29U40

Exhibit Dates: 3/87–9/89. (Effective 9/89, MOS 29U was discontinued and its functions were incorporated into MOS 39V, Computerized Systems Maintenance Chief.)

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Skill Level 40: Supervises unit and intermediate-level maintenance of digital communication and switching equipment; serves as principal noncommissioned officer; supervises maintenance personnel; coordinates duties; evaluates and counsels subordinates; advises superiors on maintenance activities; reviews, prepares, and coordinates technical reports and correspondence; initiates and conducts apprentice and on-the-job training programs; instructs subordinates in the utilization of special test equipment; performs liaison between staff, operation, and maintenance personnel; makes plans for the defense of the unit. NOTE: May have progressed to 29U40 from 29G30 (Digital Communications Equipment Repairer), or 29H30 (Automatic Digital Message Switch Equipment Repairer).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (6/88).

MOS-29V-001

STRATEGIC MICROWAVE SYSTEMS
REPAIRER

29V10
29V20
29V30

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Summary: Supervises, operates, and performs unit and intermediate level maintenance on microwave communication equipment, terminals, and systems. *Skill Level 10:* Uses test equipment to troubleshoot microwave communication equipment, terminals, and systems; troubleshoots and repairs to the component level; operates equipment and completes preventive maintenance procedures. *Skill Level 20:* Able to perform the duties required for Skill Level 10; assists and instructs subordinates in equipment maintenance and provides technical assistance when needed; keeps detailed records of equipment maintenance history. *Skill Level 30:* Able to perform the duties required for Skill Level 20; assigns duties; establishes workload, work schedules, and priorities; conducts quality control inspections; evaluates and counsels subordinates; provides technical library; initiates and maintains forms and records; responsible for records pertaining to repair parts; prepares and reviews administrative reports.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, and 3 in electronic systems troubleshooting and maintenance (6/88).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 6 in electronic systems troubleshooting and maintenance, 2 in maintenance management, and 2 in record keeping (6/88).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 6 in electronic systems troubleshooting and maintenance, 2 in maintenance management, 2 in record keeping, and 3 in principles of supervision (6/88).

MOS-29W-001

COMMUNICATIONS MAINTENANCE SUPPORT CHIEF

29W40

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Skill Level 40: Supervises the performance of the unit, intermediate, and depot-level maintenance of communication equipment; coordinates duties; evaluates and counsels subordinates; advises superiors on maintenance activities; reviews, prepares, and coordinates technical reports and correspondence; initiates and conducts on-the-job and apprentice training programs; instructs subordinates in the utilization of special test equipment; performs liaison between staff, operation, and maintenance personnel; makes plans for the defense of the unit. NOTE: May have progressed to 29W40 from 29E30 (Radio Repairer), 29J30 (Teletypewriter Equipment Repairer), 29M30 (Tactical Satellite/Microwave Repairer), or 29N30 (Telephone Central Office Repairer).

Recommendation, Skill Level 40

In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (6/88).

MOS-29X-001

COMMUNICATIONS EQUIPMENT MAINTENANCE CHIEF

29X50

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Skill Level 50: Supervises the Army's communication equipment maintenance mission; determines requirements, assigns overall duties, and coordinates activities of subordinate personnel; develops and applies policies and procedures for a maintenance facility; selects communication sites and advises maintenance officer or unit commander on maintenance activities; conducts training and prepares technical and administrative reports. NOTE: May have progressed to 29X50 from 29P40 (Communications Security Maintenance Chief), 29U40 (Digital Equipment Maintenance Chief), 29W40 (Communications Maintenance Support Chief), or 29T40 (Satellite Microwave Communications Chief).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (6/88).

MOS-29Y-001

SATELLITE COMMUNICATIONS (SATCOM) SYSTEMS REPAIRER

29Y10

29Y20

29Y30

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Summary: Operates and maintains satellite ground station equipment. *Skill Level 10:* Operates and performs preventive maintenance on satellite ground station equipment; uses common electronic test equipment to test and repair digital circuitry; performs a limited amount of troubleshooting. *Skill Level 20:* Able to perform the duties required for Skill Level 10; performs extensive troubleshooting and repair of equipment; keeps maintenance records, supervises and provides guidance to lower skill level personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; prepares technical and administrative reports; maintains files and records; assigns duties; performs and supervises quality control inspections; coordinates logistical support; establishes on-the-job training; advises superiors.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, and 1 in electronic systems troubleshooting and maintenance (6/88).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 6 in electronic systems troubleshooting and maintenance, and 2 in record keeping (6/88).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 6 in electronic systems troubleshooting and maintenance, 2 in record keeping, 2 in maintenance management, and 3 in principles of supervision (6/88).

MOS-29Z-001

ELECTRONICS MAINTENANCE CHIEF (COMMUNICATIONS/ELECTRONICS CHIEF)

29Z50

Exhibit Dates: 3/87–Present.

Career Management Field: 29 (Communications Electronics Maintenance).

Description

Skill Level 50: Supervises, monitors, and directs the Army's communications and electronics maintenance mission; determines requirements; assigns overall duties; coordinates activities of subordinate units; develops and applies policies and procedures for maintenance facilities; briefs commander and staff on maintenance posture of organization; prepares technical correspondence and administrative reports; supervises training in communications, operations, procedures, and maintenance practices. NOTE: May have progressed to 29Z50 from 29X50 (Communications Equipment Maintenance Chief), 39X50 (Electronics Equipment Maintenance Chief), or 35H50 (Calibration Specialist).

Recommendation, Skill Level 50

In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (6/88).

MOS-31B-001

FIELD COMMUNICATIONS-ELECTRONICS EQUIPMENT MECHANIC (FIELD RADIO MECHANIC)

31B20

31B30

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 31B was discontinued and its functions were incorporated into MOS 31V, Tactical Communications Systems Operator/Mechanic.)

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 311 (Field Communications Maintenance).

Description

Summary: Installs, operates, and performs preventive maintenance on electronic communications systems that include communications security equipment, common and special test, calibration, and diagnostic equipment, as well as selected target surveillance equipment. *Skill Level 20:* Inspects equipment for serviceability; cleans equipment covers and cases; replaces fuses, lamps, and batteries; reads and applies circuit and schematic diagrams; performs troubleshooting procedures at the circuit level to localize and diagnose causes of equipment malfunctions; maintains equipment and supply records; interprets technical reports and manuals; uses multimeter, oscilloscope, and signal injection and tracing equipment. *Skill Level 30:* Able to perform the duties required for Skill Level 20; performs preventive maintenance and diagnostic troubleshooting procedures and repair on special purpose digital computer and associated equipment, including paper tape punches and readers.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in electronic circuits and devices (solid-state and vacuum tubes), and 3 in electronic communications systems (3/76).

Recommendation, Skill Level 30

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in electronic circuits and devices (solid-state and vacuum tubes), 3 in electronic communications systems, and 3 in introduction to digital computer circuits (3/76).

MOS-31C-001

SINGLE-CHANNEL RADIO OPERATOR

31C10
31C20
31C30

Exhibit Dates: 9/84–Present.

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Installs and operates high frequency radio, radio telephone, teletype, single channel satellite equipment, field generator power supplies, communications, security devices and associated equipment. *Skill Level 10:* Installs and operates equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises the operation of equipment; supervises 8-15 Skill Level 10 personnel; performs combat communications-electronics planning and maintenance administration. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises 15-20 lower-skill-level personnel in the installation, operation and maintenance of equipment; has additional skills in the areas of signal security, tactical satellite communications, and personnel guidance and supervision.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature. If ASI was J7, WHCA Console Control Operations, credit as follows: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 2 in files management, and 3 in introduction to voice communications networks (9/85).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature. If ASI was J7, WHCA Console Control Operations, credit as follows: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 2 in files management, and 3 in introduction to voice communications networks (9/85).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision. If ASI was J7, WHCA Console Control Operations, additional credit as follows: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 2 in files management, and 3 in introduction to voice communications networks (9/85).

MOS-31D-001

PERSHING COMMUNICATIONS SPECIALIST

31D20
31D40

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 31D was discontinued and its functions were incorporated into MOS 26Q, Tactical Satellite/Microwave Systems Operator; effective 3/88, MOS 31D was reestablished (Mobile Subscriber Equipment Transmission System Operator) – see exhibit MOS-31D-002.)

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 313 (Area Communications).

Description

Summary: Installs, operates, and performs routine maintenance on tropospheric scatter radio and associated multiplexing equipment. *Skill Level 20:* Positions antennas, interconnects equipment, and makes tuning adjustments on receivers and transmitters; uses compass; reads specialized metering scales on equipment; keeps equipment log books. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises and organizes tropospheric scatter radio operations, maintenance, and security functions; corrects faulty work practices by instruction and demonstration of proper techniques; requests supplies and prepares technical and administrative reports.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications (practices and procedures) and 1 in maintenance (radio or equipment) (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in electronic communications (practices and procedures) and 2 in maintenance (radio or equipment). In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications (practices and procedures), 2 in maintenance (radio or equipment), 3 in human relations, 2 in industrial maintenance supervision, and 1 in technical writing. In the upper-division baccalaureate category, 2 semester hours for field experience in management (3/76).

MOS-31D-002

MOBILE SUBSCRIBER EQUIPMENT
TRANSMISSION SYSTEM OPERATOR

31D10
31D20
31D30

Exhibit Dates: 3/88–Present.

Career Management Field: 31 (Signal Operations).

Description

Summary: Installs, operates, supervises, and performs unit level maintenance on Mobile Subscriber Equipment (MSE) radio transmission equipment, radio access units and interoperable devices. *Skill Level 10:* Installs, operates and performs unit level maintenance on line-of-sight multichannel radio terminals, radio access units, communications security (COSMEC) devices, multiplexing equipment and antenna systems; interconnects equipment components and configures systems for operation; maintains records and reports pertaining to equipment operation; performs unit level maintenance on MSE radio transmission and associated equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises and trains subordinate personnel; prepares work schedules and checks operation records and station files for completeness and accuracy; writes technical reports and ensures sufficient spare parts and supplies. *Skill Level 30:* Able to perform the duties required for Skill Level 20; determines requirements, assigns duties, and coordinates activities of communication personnel; plans, supervises and implements tactical training programs; prepares technical and administrative reports; supervises march orders and emplacement of section/team equipment; oversees and performs periodic and emergency adjustment on MSE transmission equipment, radio access units and interoperability devices.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in data communications system troubleshooting and maintenance (6/90).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in data communications system troubleshooting and maintenance (6/90).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in data communications system troubleshooting and maintenance, 3 in principles of supervision, and 3 in maintenance management (6/90).

MOS-31E-001

FIELD RADIO REPAIRMAN

31E20
31E40

Exhibit Dates: 10/73–2/78.

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 312 (Tactical Electronics Maintenance).

Description

Summary: Inspects, tests, and performs maintenance of FM radios, single side band radios, and radio teletypewriter equipment. *Skill Level 20:* Performs testing and maintenance procedures; dismantles components, traces continuity, locates malfunctioning parts, and repairs faulty circuitry parts; uses multimeters, oscilloscopes, signal generators, and other equipment to locate and repair malfunctioning circuits; computes voltage, current, resistance, and power using Ohm's Law and Watt's Law functions. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises field radio equipment maintenance programs and instructs in maintenance procedures and techniques; diagnoses and determines causes of unusual and complex cases of equipment malfunction or nonfunction; interprets complex circuit and schematic diagrams; requisitions supplies; prepares, reviews, and consolidates technical and administrative reports; normally supervises 8-15 persons. NOTE: May have progressed to 31D40 from 31D20, 31B20, or 31B30 (Field Communications Electronics Equipment Mechanic).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, and 3 in electronic components (solid-state and vacuum tubes). In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, and 2 in electronic devices (solid-state and vaccum tubes). Advanced standing in a radio-television repairman apprentice training program on the basis of employer or trade association performance examination (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, 3 in electronic components (solid-state and vacuum tubes, and 2 in systems maintenance and repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, 3 in electronic devices (solid-state and vacuum tubes), 2 in systems maintenance and repair, 3 in human relations, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours in maintenance management. Advanced standing in a radio-television apprentice training program on the basis of employer or trade association performance examination (3/76).

MOS-31E-002

FIELD RADIO REPAIRER

31E10
31E20
31E30

Exhibit Dates: 3/78–9/86. (Effective 9/86, MOS 31E was discontinued.)

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Inspects, tests, and performs maintenance on AM, FM, single side band, and FSK field radio receivers, transmitters, and associated equipment. *Skill Level 10:* Inspects, troubleshoots, repairs, and tests field radio receiver/transmitter equipment; replaces modules and major components; aligns and adjusts equipment to ensure proper operating efficiency; uses common and specialized tools and test equipment. *Skill Level 20:* Able to perform the duties required for Skill Level 10; disassembles components and repairs circuit wiring; prepares reports and maintenance records; provides technical guidance to Skill Level 10 personnel. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises installation and use of necessary equipment for maintenance of field radio receiver and transmitter equipment; observes, corrects, and instructs lower skill level personnel in proper maintenance techniques; requisitions supplies; prepares, reviews, and consolidates technical and administrative reports; diagnoses and determines causes of complex and unusual cases of malfunctions; schedules workloads; conducts on-the-job training.

Recommendation, Skill Level 10

In the vocational certificate category, 3 semester hours in basic electricity (DC) and 3 in communications electronics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), and 3 in communications electronics (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, and 3 in electronic components (solid-state and vacumm tubes). In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, and 2 in electronic devices (solid-state and vacuum tubes) (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, 3 in electronic components (solid-state and vacuum tubes), and 2 in systems maintenance and repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in communications electronics, 3 in electronic devices (solid-state and vacuum tubes), 2 in systems maintenance, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in maintenance management (10/79).

MOS-31F-001

MOBILE SUBSCRIBER EQUIPMENT NETWORK SWITCHING SYSTEM OPERATOR

31F10
31F20
31F30

Exhibit Dates: 3/88–Present.

Career Management Field: 31 (SIgnal Operations).

Description

Summary: Installs, operates, supervises and performs unit level maintenance on systems control center, node center switch, extension node switches, associated multiplexing, net radio interface equipment, communications security devices and remote transmission (down-the-hill) radios; troubleshoots to the board level using digital multimeters, computer terminals with diagnostic readouts and board level LEDs and configuration switches. *Skill Level 10:* Operations: Initializes and loads data base; positions, assembles and interconnects equipment components; operates motor vehicles and power generation equipment; adjusts and aligns equipment to prescribed tolerances; interprets and uses operating instructions, data base information, and system diagrams; establishes and maintains net connectivity; inputs and receives information from system control center for transmitting and receiving operating directives and data base input/output; and provides subscriber assistance. Maintenance: Interprets computer printouts to troubleshoot, repair or replace faulty line replaceable units; coordinates with system operators and managers to resolve difficulties; places spare equipment into operation upon failure of on-line unit. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises installation, operation and maintenance; trains personnel in the employment and operation of equipment; assists in selection of sites; corrects faulty work practices and operating procedures; performs various supervisory duties pertaining to work schedules, records, supplies and reports. *Skill Level 30:* Able to perform the duties required for Skill Level 20; determines requirements, assigns duties and coordinates activities of communication personnel; plans, implements and supervises training programs; supervises maintenance programs; coordinates logistical support; prepares and oversees technical and administrative reports; oversees/performs periodic and emergency adjustments.

Recommendation, Skill Level 10

In the lower-division baccalaureate/associate degree category, 2 semester hours in data communications system troubleshooting and maintenance (6/90).

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 3 semester hours in data communications system troubleshooting and maintenance (6/90).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in data communications system troubleshooting and maintenance, 3 in principles of supervision, and 3 in maintenance management (6/90).

MOS-31G-001

TACTICAL COMMUNICATIONS CHIEF

31G40
31G50

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 31G was discontinued and its functions were incorporated into MOS 31V, Tactical Communications Systems Operator/Mechanic; effective 9/87, MOS 31G was reestablished–see exhibit MOS-31G-002.)

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 311 (Field Communications Maintenance).

Description

Summary: Supervises the installation, operation, and maintenance of communications systems in infantry, armor, artillery, or other units employing similar methods of communication. *Skill Level 40:* Supervises the installation, operation, and routine maintenance of wire communications systmes, FM radio nets, air-to-ground radio sets, and radio teletype sets; conducts training programs for unit personnel in communications procedures, operations, and maintenance practices; assists in selecting locations for communications facilities; assigns duties and coordinates the activities of various communications personnel. NOTE: May have progressed to 31G40 from 31B20, 31B30 (Field Communications Electronics Equipment Mechanic), 31D40 (Pershing Communications Specialist), 31E20 (Field Radio Repairman), 36K40 (Tactical Wire Operations Specialist), 05B40 (Voice Radio Operator), or 05F40 (Radio Teletypewriter Operator, Non-Morse). *Skill Level 50:* Able to perform the duties required for Skill Level 40; supervises and coordinates communications activities; administers maintenance records and prepares reports; supervises supply operations; determines unusual causes of defective equipment. NOTE: May have progressed to 31G50 from 31G40, 31E40 (Field

Radio Repairman), 05B40 (Radio Operator), 05C40, 05C50 (Radio Teletypewriter Operator, 05E40 (Voice Radio Operator), or 05F40 (Radio Teletypewriter Operator, Non-Morse).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in introduction to electricity (DC), 3 in introduction to electronic communications, and 3 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity (DC), 3 in introduction to electronic communications systems, 3 in map reading, 3 in human relations, 3 in introduction to management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in a technical elective, and 3 in industrial arts (3/76).

Recommendation, Skill Level 50

In the vocational certificate category, the recommendation is the same as that for Skill Level 40. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for Skill Level 40. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 for an internship in education, 3 in a technical elective, and 3 in industrial arts (3/76).

MOS-31G-002

TACTICAL COMMUNICATION CHIEF

31G30

31G40

Exhibit Dates: 9/87–Present.

Career Management Field: 31 (Communications Electronics Operations).

Description

Summary: Supervises the installation, operation, and maintenance of communications systems in infantry, armor, artillery, or other units employing similar methods of communication. *Skill Level 30:* Plans, coordinates, and supervises the installation, operation, and maintenance of ground FM radio and field wire communications systems, air ground radio sets, radioteletypewriter sets, and switchboard systems; coordinates activities and assigns duties; conducts training programs; advises the commander on communication matters. NOTE: May have progressed to 31G30 from 31K20 (Combat Signaler) or 31V20 (Unit Level Communications Maintainer). *Skill Level 40:* Able to perform the duties required for Skill Level 30; monitors and coordinates the operation of the various elements of integrated communication systems; prepares, supervises, and conducts training programs; prepares technical and administrative reports; assists in selecting locations for communications facilities; performs liaison between staff, operations, and maintenance personnel.

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision and 3 in maintenance management. If ASI was J7, WHCA Console Control Operations, additional credit as follows: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 2 in files management, and 3 in introduction to voice communications networks (6/88).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision and 2 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 for field experience in management. If ASI was J7, WHCA Console Control Operations, additional credit as follows: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 2 in files management, and 3 in introduction to voice communications networks (6/88).

MOS-31J-001

TELETYPEWRITER REPAIRMAN

31J20

31J40

31J50

Exhibit Dates: 10/73–2/74.

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 312 (Tactical Electronics Maintenance).

Description

Summary: Performs installation, maintenance, and repair of electromechanical and electronic teletypewriter and facsimile equipment. *Skill Level 20:* Installs, maintains, and repairs electrical and mechanical office machines; uses basic hand tools; reads elementary electrical and electronic diagrams. *Skill Level 40:* Able to perform the duties required for Skill Level 20; able to diagnose equipment malfunctions and repair requirements; conduct on-the-job training; organizes and supervises maintenance and inspection teams; requisitions and stocks supplies and repair parts; reviews and prepares technical and administrative reports. *Skill Level 50:* Able to perform the duties required for Skill Level 40; serves as foreman, establishing workloads and maintenance priorities and conducting on-the-job training; implements quality control measures.

Recommendation, Skill Level 20

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in industrial laboratory tool use and care and 1 in basic mathematics (3/75).

Recommendation, Skill Level 40

In the vocational certificate category, 1 semester hour in industrial laboratory tool use and care and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial laboratory tool use and care, 1 in basic mathematics, and additional credit for field experience in personnel supervision, education, and industrial arts on the basis of institutional evaluation (3/75).

Recommendation, Skill Level 50

In the vocational certificate category, 1 semester hour in industrial laboratory tool use and care and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial laboratory tool use and care, 1 in basic mathematics, and additional credit for field experience in personnel supervision, office management, education, and industrial arts on the basis of institutional evaluation (3/75).

MOS-31J-002

TELETYPEWRITER REPAIRMAN

31J20

31J40

Exhibit Dates: 3/74–2/78.

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 312 (Tactical Electronics Maintenance).

Description

Summary: Supervises and performs maintenance on electromechanical and electronic teletypewriter and facsimile equipment. *Skill Level 20:* Installs, tests, adjust, overhauls, and repairs electromechanical and electronic teletypewriters and facsimile equipment; performs detailed testing to diagnose equipment malfunctions, using specialized tools and testing equipment; replaces faulty components, subassemblies, and parts; adjusts electrical, electronic, and mechanical components in accordance with applicable technical publications; test-operates repaired equipment to assure conformance with technical specifications; maintains tools and test equipment; reads schematic and wiring diagrams pertaining to teletypewriters and facsimile equipment; uses conventional and specialized soldering techniques; prepares and keeps maintenance forms and records. *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises the maintenance of electromechanical and electronic teletypewriters and facsimile equipment; plans and schedules maintenance; maintains equipment forms and records; requisitions spare parts, supplies, and technical manuals; reviews, consolidates, and prepares technical and administrative reports pertaining to equipment and equipment maintenance activities; conducts on-the-job training; demonstrates correct maintenance techniques; diagnoses difficult and unusual equipment malfunctions; interprets complex specifications and circuit diagrams.

Recommendation, Skill Level 20

In the vocational certificate category, 2 semester hours in basic electricity, 2 in office machine repair, 1 in electromechanical systems, 1 in use of technical publications, and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity. In an electronic technician apprentice training program, advanced standing on the basis of employer or trade association performance examination (5/77).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity, 3 in office machine repair, 1 in electromechanical systems, 1 in use of technical publications, 1 in care and use of tools, and 1 in blueprint reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in personnel supervision, 3 in human relations, 3 in record keeping, and 2 in technical report writing. In an electronic technician apprentice training program, advanced standing on the basis of employer or trade association performance examination (5/77).

MOS-31J-003

TELETYPEWRITER REPAIRER

31J10
31J20
31J30

Exhibit Dates: 3/78–9/86. (Effective 9/86, MOS 31J was discontinued and its functions were incorporated into MOS 29J, Teletypewriter Equipment Repairer.)

Career Management Field: 29 (Communications-Electronics Maintenance).

Description

Summary: Performs maintenance on electromechanical and electronic teletypewriter and facsimile equipment. *Skill Level 10:* Installs, maintains, and repairs electrical and mechanical office machines at the module level; uses basic hand tools; reads elementary electrical and electronic diagrams; performs detailed testing to discover and diagnose causes of equipment malfunction. *Skill Level 20:* Able to perform the duties required for Skill Level 10; aligns electrical, electronic, and mechanical components as prescribed in applicable technical publications; reassembles and test-operates repaired equipment to ensure conformance with technical specifications; uses proper techniques to maintain, sectionalize, localize, and isolate electrical, electronic, and mechanical causes of equipment malfunction; prepares and keeps maintenance forms and records. *Skill Level 30:* Able to perform the duties required for Skill Level 20; supervises four or more lower skill level personnel; able to diagnose equipment malfunctions and repair requirements; conducts on-the-job training; organizes and supervises maintenance and inspection teams; requisitions and stocks supplies and repair parts; maintains equipment forms and records; plans and schedules equipment maintenance.

Recommendation, Skill Level 10

In the vocational certificate category, 2 semester hours in electronics laboratory and 1 in industrial laboratory tool use and care (10/79).

Recommendation, Skill Level 20

In the vocational certificate category, 4 semester hours in electronics laboratory and 1 in industrial laboratory tool use and care (10/79).

Recommendation, Skill Level 30

In the vocational certificate category, 4 semester hours in electronics laboratory and 1 in industrial laboratory tool use and care. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision (10/79).

MOS-31K-001

COMBAT SIGNALER

31K10
31K20

Exhibit Dates: 9/84–Present.

Career Management Field: 31 (Communications-Electronics Operations).

Description

Summary: Supervises, installs, operates, maintains basic wire, switchboard, and frequency modulated (FM) radio communications equipment and systems in combat, combat support, and combat service support units. *Skill Level 10:* Performs field wire system troubleshooting; splices wires; installs field telephones and FM radios; processes messages. *Skill Level 20:* Able to perform the duties required for Skill Level 10; supervises and trains Skill Level 10 personnel; estimates supply requirements; interprets maps and overlays.

Recommendation, Skill Level 10

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (9/85).

Recommendation, Skill Level 20

Credit is not recommended because the skills, competencies, and knowledge are uniquely military in nature (9/85).

MOS-31L-001

MULTICHANNEL COMMUNICATIONS EQUIPMENT REPAIRMAN
(FIELD RADIO RELAY EQUIPMENT REPAIRMAN)

31L20
31L40

Exhibit Dates: 10/73–2/78. (Effective 3/78, MOS 31L was discontinued and its functions were incorporated into MOS 26L, Tactical Microwave Systems Repairer; effective 9/87, MOS 31L was reestablished with the title Wire Systems Installer–see exhibit MOS-31L-002.)

Career Management Field: 31 (Field and Area Communications Maintenance), subfield 312 (Tactical Electronics Maintenance).

Description

Summary: Inspects, tests, and performs maintenance on multichannel communication equipment including radio sets, carrier terminals, multiplexers, combiners, repeaters, and frequency division plus code modulated systems. *Skill Level 20:* Performs periodic and emergency repairs on multichannel communication equipment using electronic test equipment; tests components, integrated circuits, modules, and printed circuits to localize malfunctions; repairs and replaces faulty items; adjusts unit for proper functioning; interprets schematics and technical literature. NOTE: May have progressed to 31L20 from 31M20 (Multichannel Communications Equipment Operator). *Skill Level 40:* Able to perform the duties required for Skill Level 20; supervises 4 or more multichannel communications equipment repairmen; instructs subordinates in proper repair and maintenance techniques; diagnoses and determines causes of unusual cases of equipment malfunction and nonfunction.

Recommendation, Skill Level 20

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in solid-state devices, 3 in basic digital computer circuits, 3 in communications systems, and 3 in electronic test equipment and instrumentation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in solid-state devices, 3 in basic digital computer circuits, and 3 in communications circuits. In an electronic technician apprentice training program, 1,500 clock hours of experience and 100 contact hours of related instruction (3/76).

Recommendation, Skill Level 40

In the vocational certificate category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in solid-state devices, 3 in basic digital computer circuits, 3 in communications systems, 3 in communications circuits, and 3 in electronic test equipment and instrumentation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (DC), 3 in basic electronics (AC), 3 in solid-state devices, 3 in basic digital computer circuits, 3 in communications systems, 3 in communications circuits, 3 in electronic test equipment and instrumentation, 3 in human relations, and 3 in introduction to management. In an electronic technician apprentice training program, 2,500 clock hours of experience and 180 contact hours of related instruction on the basis of employer or trade association performance examination (3/76).

MOS-31L-002

WIRE SYSTEMS INSTALLER

31L10
31L20
31L30

Exhibit Dates: 9/87–Present.

Career Management Field: 31 (Communications Electronics Operations).

Description
